Notes, Notices, and Cautions

NOTE: A NOTE indicates important information that helps you make better use of your computer.

NOTICE: A NOTICE indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

CAUTION: A CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

Information in this document is subject to change without notice.

About This Guide

This document contains getting started/setup; solving problems; and safety and regulatory information about your Dell™ OptiPlex™ computer.

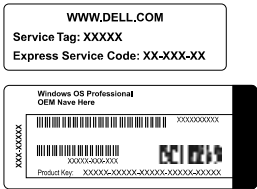

To obtain the latest versions of the documents on your hard drive, go to the Dell support website at <http://support.dell.com>.

Regulatory model numbers appear throughout this document; their chassis type equivalents are shown below:

Regulatory Model Numbers and Chassis Types
DHS = small desktop (SD) chassis
DHP = small form-factor (SF) chassis
DHM = small mini-tower (SMT) chassis

Getting Started/Setup

Use the following steps to connect external devices to your computer via the input/output (I/O) panel. The back of your Dell system, including the I/O panel, may look different from the examples shown here.

1

NOTE: Connect only one keyboard and one mouse.

NOTE: If you have a Universal Serial Bus (USB)-compliant mouse or keyboard, use the USB connectors on the back of your system.

2 System with one video connector

System with two video connectors

video connector
on expansion card

video connector
on expansion card

NOTE: If your system has two video connectors, the integrated video connector is disabled and has a protective cap on it. Use the expansion card connector, as shown in the illustrations on the right in step 2.

**System with
one video connector**

**System with
two video connectors**

video connector
on expansion card

NOTE: If your system has two video connectors, the integrated video connector is disabled and has a protective cap on it. Use the expansion card connector, as shown in the illustrations on the right in step 2.

3

NOTE: If your system has two audio connectors, use the one on the expansion card, as shown in the illustrations on the right in step 3.

Verify that the voltage selection switch is set correctly for your location. For more information, see “When Using Your Computer System” found later in this document.

4

⚠ CAUTION: To help prevent electric shock, use only the power cable provided and ensure that it is plugged into a properly grounded power source.

5

The following illustrations show power button locations and monitor controls.

6

Read the software license agreement and follow the operating system setup instructions on the screen.

7

Congratulations! You have completed your system setup.

Depending on your operating system, double-click the **User's Guides** icon on your desktop (shown below), or click the **Start** button and then select **Help and Support** to access the electronic documentation stored on your hard drive.

Solving Problems

Dell provides a number of tools to help you if your system does not perform as expected. For the latest troubleshooting information available for your system, see the Dell support website at <http://support.dell.com>. You can also find descriptions of Dell troubleshooting tools in the section titled “Getting Help” in your online *User’s Guide*.

If computer problems occur that require help from Dell, write a detailed description of the error, beep codes, or diagnostics light patterns; record your Express Service Code and Service Tag Number below; and then contact Dell from the same location as your computer.

See “Finding Information and Assistance” on page 5 for an example of the express service code and service tag numbers.

Express Service Code: _____

Service Tag Number: _____

Your computer includes the following tools that can help you solve a problem:

DELL DIAGNOSTICS—The Dell Diagnostics test various components in your computer and help to identify the cause of computer problems. For more information, see "Running the Dell Diagnostics" on page 22.

SYSTEM LIGHTS—Located on the front of the computer, these lights can indicate a computer problem. For more information, see your *User’s Guide*.

DIAGNOSTIC LIGHTS—Located on the back of the computer, these lights can indicate a computer problem. For more information, see your *User’s Guide*.

SYSTEM MESSAGES—The computer reports these messages to warn you of current or possible failure. For more information, see your *User’s Guide*.

BEEP CODES—A series of audible beep codes emitted by your computer can help identify a problem. For more information, see your *User’s Guide*.

Using the *Dell OptiPlex ResourceCD*

To use the *Dell OptiPlex ResourceCD* while you are running the Microsoft® Windows® operating system, perform the following steps.

NOTE: To access device drivers and user documentation, you must use the *ResourceCD* while you are running Windows.

- 1 Turn on the computer and allow it to boot to the Windows desktop.
- 2 Insert the *Dell OptiPlex ResourceCD* into the CD drive.

If you are using the *Dell OptiPlex ResourceCD* for the first time on this computer, the **ResourceCD Installation** window opens to inform you that the *ResourceCD* is about to begin installation.

- 3 Click **OK** to continue.

To complete the installation, respond to the prompts offered by the installation program.

- 4 Click **Next** at the **Welcome Dell System Owner** screen.
- 5 Choose the appropriate **System Model**, **Operating System**, **Device Type**, and **Topic**.

Drivers for Your Computer

To display a list of device drivers for your computer, perform the following steps:

- 1 Click **My Drivers** in the **Topic** pull-down menu.

The *ResourceCD* scans your computer's hardware and operating system, and then a list of device drivers for your system configuration is displayed on the screen.

- 2 Click the appropriate driver and follow the instructions to download the driver to your computer.

To view all available drivers for your computer, click **Drivers** from the **Topic** pull-down menu.

Running the Dell Diagnostics

The Dell Diagnostics is a program that tests various components in your computer. Run this program whenever you have a computer problem to help you identify the source of the problem. You can run the Dell Diagnostics from your hard drive or the *ResourceCD*.

 **NOTICE:** If your hard drive fails, run the Dell Diagnostics from the *ResourceCD*.

- 1 Turn on your computer (if your computer is already on, restart it).
- 2 When **F2 = Setup** appears in the upper-right corner of the screen, press <Ctrl> <Alt> <F10>.

The diagnostics initialization begins immediately; then the **Diagnostics Menu** appears.

- 3 Select the appropriate diagnostic option for your computer.
To use the diagnostics, follow instructions on the screen.

Changing the Boot Sequence

To run the Dell Diagnostics from the *ResourceCD*, perform the following steps to enable your computer to boot from the CD:

- 1 Insert the *Dell OptiPlex ResourceCD* into the CD drive.
- 2 Turn on (or restart) your computer.
- 3 When **F2 = Setup** appears in the upper-right corner of the screen, press <Ctrl> <Alt> <F8>.

 **NOTE:** This feature changes the boot sequence for one time only. On the next start-up, the computer boots according to the devices specified in system setup.

The **Boot Device Menu** appears.

If you wait too long and the Windows logo appears, continue to wait until you see the Windows desktop. Then shut down your computer and try again.

- 4 Select the **CD-ROM Device** option.

Running the Dell IDE Hard Drive Diagnostics

The Dell IDE Hard Drive Diagnostics is a utility that tests the hard drive to troubleshoot or confirm a hard drive failure.

- 1 Turn on your computer (if your computer is already on, restart it).
- 2 When **F2 = Setup** appears in the upper-right corner of the screen, press <Ctrl><Alt><D>.
- 3 Follow the instructions on the screen.

If a failure is reported, see “Hard Drive Problems” in your *User’s Guide*.

Safety Instructions

Use the following safety guidelines to help protect your computer system from potential damage and to ensure your own personal safety.

When Working Inside Your Computer

Before you remove the computer cover, perform the following steps in the sequence indicated.

NOTICE: Do not attempt to service the computer yourself, except as explained in your online Dell documentation or otherwise provided to you. Always follow installation and service instructions closely.

CAUTION: There is a danger of a new battery exploding if it is incorrectly installed. Replace the battery only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer’s instructions.

- 1 Turn off your computer and any peripherals.
- 2 Ground yourself by touching an unpainted metal surface on the chassis, such as the metal around the card-slot openings at the back of the computer, before touching anything inside your computer.

While you work, periodically touch an unpainted metal surface on the computer chassis to dissipate any static electricity that might harm internal components.

- 3 Disconnect your computer and peripherals from their power sources. Also, disconnect any telephone or telecommunication lines from the computer.

Doing so reduces the potential for personal injury or shock.

In addition, take note of these safety guidelines when appropriate:

- To avoid shorting out your computer when disconnecting a network cable, first unplug the cable from the network interface controller (NIC) on the back of your computer, and then from the network jack on the wall. When reconnecting a network cable to your computer, first plug the cable into the network jack, and then into the NIC.
- When you disconnect a cable, pull on its connector or on its strain-relief loop, not on the cable itself. Some cables have a connector with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before disconnecting the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, make sure both connectors are correctly oriented and aligned.
- Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a microprocessor chip by its edges, not by its pins.

When Using Your Computer System

As you use your computer system, observe the following safety guidelines.

 **CAUTION: Do not operate your computer system with any cover(s) (including computer covers, bezels, filler brackets, and front-panel inserts) removed.**

- To help avoid damaging your computer, be sure the voltage selection switch on the power supply is set to match the AC power available at your location:
 - 115 volts (V)/60 hertz (Hz) in most of North and South America and some Far Eastern countries such as South Korea and Taiwan
 - 100 V/50 Hz in eastern Japan and 100 V/60 Hz in western Japan

 **NOTE:** The voltage selection switch must be set to the 115V position even though the AC supply in Japan is 100 V.

- 230 V/50 Hz in most of Europe, the Middle East, and the Far East

Also be sure your monitor and attached peripherals are electrically rated to operate with the AC power available in your location.

 **NOTE:** Auto-select power supplies do not require a voltage selection switch. Your power supply may not have this switch.

- To help prevent electric shock, plug the computer and peripheral power cables into properly grounded power sources. These cables are equipped with three-prong plugs to help ensure proper grounding. Do not use adapter plugs or remove the grounding prong from a cable. If you must use an extension cable, use a three-wire cable with properly grounded plugs.

- Before working inside the computer, unplug the system to help prevent electric shock or system board damage. Certain system board components continue to receive power any time the computer is connected to AC power.
- To help avoid possible damage to the system board, wait 15 seconds after unplugging the system before disconnecting a device from the computer.

 **NOTE:** Observe when the auxiliary power light-emitting diode (LED) indicator on the system board turns off to verify that system power is off (see your *User's Guide* for the location of this LED).

- To help protect your computer system from sudden, transient increases and decreases in electrical power, use a surge suppressor, line conditioner, or uninterruptible power supply (UPS).
- Be sure nothing rests on your computer system's cables and that the cables are not located where they can be stepped on or tripped over.
- Do not spill food or liquids on your computer. If the computer gets wet, consult your *User's Guide*.
- Do not push any objects into the openings of your computer. Doing so can cause fire or electric shock by shorting out interior components.
- Keep your computer away from radiators and heat sources. Also, do not block cooling vents. Avoid placing loose papers underneath your computer; do not place your computer in a closed-in wall unit or on a bed, sofa, or rug.

Ergonomic Computing Habits

 **CAUTION: Improper or prolonged keyboard use may result in injury.**

 **CAUTION: Viewing the monitor screen for extended periods of time may result in eye strain.**

For comfort and efficiency, observe the ergonomic guidelines in your *User's Guide* when setting up and using your computer system.

Regulatory Information

Electromagnetic Interference (EMI) is any signal or emission, radiated in free space or conducted along power or signal leads, that endangers the functioning of a radio navigation or other safety service or seriously degrades, obstructs, or repeatedly interrupts a licensed radio communications service.

Your Dell computer system is designed to comply with applicable regulations regarding EMI. Changes or modifications not expressly approved by Dell could void the user's authority to operate the equipment.

 **NOTE:** Additional regulatory information regarding your system can be found in your *User's Guide*.

Limited One-Year Warranty (U.S. Only)

Dell Computer Corporation (“Dell”) manufactures its hardware products from parts and components that are new or equivalent to new in accordance with industry-standard practices. Dell warrants that the hardware products it manufactures will be free from defects in materials and workmanship. The limited warranty term is one year beginning on the date of invoice, as further described in the following text.

Damage due to shipping the products to you is covered under this limited warranty. Otherwise, this limited warranty does not cover damage due to external causes, including accident, abuse, misuse, problems with electrical power, servicing not authorized by Dell, usage not in accordance with product instructions, failure to perform required preventive maintenance, and problems caused by use of parts and components not supplied by Dell.

This limited warranty does not cover any items that are in one or more of the following categories: software; external devices (except as specifically noted); accessories or parts added to a Dell system after the system is shipped from Dell; accessories or parts added to a Dell system through Dell’s system integration department; accessories or parts that are not installed in the Dell factory; or DellWare™ products. Monitors, keyboards, and mice that are Dell-branded or that are included on Dell’s standard price list are covered under this limited warranty; all other monitors, keyboards, and mice (including those sold through the DellWare program) are not covered.

Dell will repair or replace products covered under this limited warranty that are returned to Dell’s facility. To request warranty service, you must contact Dell’s Customer Technical Support within the limited warranty period. See “Getting Help” in your *User’s Guide* to find the appropriate contact information for obtaining customer assistance. If warranty service is required, Dell will issue a Return Material Authorization Number. You must ship the products back to Dell in their original or equivalent packaging, prepay shipping charges, and insure the shipment or accept the risk of loss or damage during shipment. Dell will ship the repaired or replacement products to you (freight prepaid) if you use an address in the continental U.S., where applicable. Shipments to other locations will be made freight collect.

 **NOTE:** Before you ship the product(s) to Dell, back up the data on the hard-disk drive(s) and any other storage device(s) in the product(s). Remove any removable media, such as diskettes, CDs, or PC Cards.

Dell owns all parts removed from repaired products. Dell uses new and reconditioned parts made by various manufacturers in performing warranty repairs and building replacement products. If Dell repairs or replaces a product, its warranty term is not extended.

THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE (OR JURISDICTION TO JURISDICTION). DELL'S RESPONSIBILITY FOR MALFUNCTIONS AND DEFECTS IN HARDWARE IS LIMITED TO REPAIR AND REPLACEMENT AS SET FORTH IN THIS LIMITED WARRANTY STATEMENT. ALL EXPRESS AND IMPLIED WARRANTIES FOR THE PRODUCT, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE WARRANTY PERIOD SET FORTH ABOVE AND NO WARRANTIES, WHETHER EXPRESS OR IMPLIED, WILL APPLY AFTER SUCH PERIOD.

SOME STATES (OR JURISDICTIONS) DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE PRECEDING LIMITATION MAY NOT APPLY TO YOU.

DELL DOES NOT ACCEPT LIABILITY BEYOND THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY STATEMENT OR LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION ANY LIABILITY FOR PRODUCTS NOT BEING AVAILABLE FOR USE OR FOR LOST DATA OR SOFTWARE.

SOME STATES (OR JURISDICTIONS) DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE PRECEDING EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.

These provisions apply to Dell's one-year limited warranty only. For provisions of any service contract covering your system, refer to your invoice or the separate service contract that you will receive.

If Dell elects to exchange a product or portion of a product, the exchange will be made in accordance with Dell's Exchange Policy in effect on the date of the exchange. In any instance in which Dell issues a Return Material Authorization Number, Dell must receive the product(s) for repair prior to the expiration of the warranty period in order for the repair(s) to be covered by the limited warranty.

One-Year Limited Warranty (Canada Only)

Dell Computer Corporation ("Dell") manufactures its hardware products from parts and components that are new or equivalent to new in accordance with industry-standard practices. Dell warrants that the hardware products it manufactures will be free from defects in materials and workmanship. The limited warranty term is one year beginning on the date of invoice, as further described in the following text.

Damage due to shipping the products to you is covered under this limited warranty. Otherwise, this limited warranty does not cover damage due to external causes, including accident, abuse, misuse, problems with electrical power, servicing not authorized by Dell, usage not in accordance with product instructions, failure to perform required preventive maintenance, and problems caused by use of parts and components not supplied by Dell.

This limited warranty does not cover any items that are in one or more of the following categories: software; external devices (except as specifically noted); accessories or parts added to a Dell system after the system is shipped from Dell; accessories or parts added to a Dell system through Dell's system integration department; accessories or parts that are not installed in the Dell factory; or DellWare products. Monitors, keyboards, and mice that are Dell-branded or that are included on Dell's standard price list are covered under this limited warranty; all other monitors, keyboards, and mice (including those sold through the DellWare program) are not covered.

Dell will repair or replace products covered under this limited warranty that are returned to Dell's facility. To request warranty service, you must contact Dell's Customer Technical Support within the warranty period. See "Getting Help" in your *User's Guide* to find the appropriate contact information for obtaining customer assistance. If warranty service is required, Dell will issue a Return Material Authorization Number. You must ship the products back to Dell in their original or equivalent packaging, prepay shipping charges, and insure the shipment or accept the risk of loss or damage during shipment. Dell will ship the repaired or replacement products to you (freight prepaid) if you use an address in Canada, where applicable. Shipments to other locations will be made freight collect.

 **NOTE:** Before you ship the product(s) to Dell, back up the data on the hard-disk drive(s) and any other storage device(s) in the product(s). Remove any removable media, such as diskettes, CDs, or PC Cards.

Dell owns all parts removed from repaired products. Dell uses new and reconditioned parts made by various manufacturers in performing warranty repairs and building replacement products. If Dell repairs or replaces a product, its warranty term is not extended.

DELL MAKES NO EXPRESS WARRANTIES OR CONDITIONS BEYOND THOSE STATED IN THIS LIMITED WARRANTY STATEMENT. DELL DISCLAIMS ALL OTHER WARRANTIES AND CONDITIONS, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SOME STATES (OR JURISDICTIONS) DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR CONDITIONS, SO THIS LIMITATION MAY NOT APPLY TO YOU.

DELL'S RESPONSIBILITY FOR MALFUNCTIONS AND DEFECTS IN HARDWARE IS LIMITED TO REPAIR AND REPLACEMENT AS SET FORTH IN THIS LIMITED WARRANTY STATEMENT. THESE WARRANTIES GIVE YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE (OR JURISDICTION TO JURISDICTION).

DELL DOES NOT ACCEPT LIABILITY BEYOND THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY STATEMENT OR LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION ANY LIABILITY FOR PRODUCTS NOT BEING AVAILABLE FOR USE OR FOR LOST DATA OR SOFTWARE.

SOME STATES (OR JURISDICTIONS) DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE PRECEDING EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.

These provisions apply to Dell's one-year limited warranty only. For provisions of any service contract covering your system, refer to your invoice or the separate service contract that you will receive.

If Dell elects to exchange a product or portion of a product, the exchange will be made in accordance with Dell's Exchange Policy in effect on the date of the exchange. In any instance in which Dell issues a Return Material Authorization Number, Dell must receive the product(s) for repair prior to the expiration of the warranty period in order for the repair(s) to be covered by the limited warranty.

Three-Year Limited Warranty (U.S. Only)

Dell Computer Corporation ("Dell") manufactures its hardware products from parts and components that are new or equivalent to new in accordance with industry-standard practices. Dell warrants that the hardware products it manufactures will be free from defects in materials and workmanship. The limited warranty term is three years beginning on the date of invoice, as described in the following text.

Damage due to shipping the products to you is covered under this limited warranty. Otherwise, this limited warranty does not cover damage due to external causes, including accident, abuse, misuse, problems with electrical power, servicing not authorized by Dell, usage not in accordance with product instructions, failure to perform required preventive maintenance, and problems caused by use of parts and components not supplied by Dell.

This limited warranty does not cover any items that are in one or more of the following categories: software; external devices (except as specifically noted); accessories or parts added to a Dell system after the system is shipped from Dell; accessories or parts added to a Dell system through Dell's system integration department; accessories or parts that are not installed in the Dell factory; or DellWare™ products. Monitors, keyboards, and mice that are Dell-branded or that are included on Dell's standard price list are covered under this limited warranty; all other monitors, keyboards, and mice (including those sold through the DellWare program) are not covered. Batteries for portable computers are covered only during the initial one-year period of this limited warranty.

Coverage During Year One

During the one-year period beginning on the invoice date, Dell will repair or replace products covered under this limited warranty that are returned to Dell's facility. To request warranty service, you must contact Dell's Customer Technical Support within the warranty period. See "Getting Help" in your *User's Guide* to find the appropriate contact information for obtaining customer assistance. If warranty service is required, Dell will issue a Return Material Authorization Number. You must ship the products back to Dell in their original or equivalent packaging, prepay shipping charges, and insure the shipment or accept the risk of loss or damage during shipment. Dell will ship the repaired or replacement products to you freight prepaid if you use an address in the continental U.S., where applicable. Shipments to other locations will be made freight collect.

 **NOTE:** Before you ship the product(s) to Dell, back up the data on the hard-disk drive(s) and any other storage device(s) in the product(s). Remove any removable media, such as diskettes, CDs, or PC Cards. Dell does not accept liability for lost data or software.

Dell owns all parts removed from repaired products. Dell uses new and reconditioned parts made by various manufacturers in performing warranty repairs and building replacement products. If Dell repairs or replaces a product, its warranty term is not extended.

Coverage During Years Two and Three

During the second and third years of this limited warranty, Dell will provide, on an exchange basis and subject to Dell's Exchange Policy in effect on the date of the exchange, replacement parts for the Dell hardware product(s) covered under this limited warranty when a part requires replacement. You must report each instance of hardware failure to Dell's Customer Technical Support in advance to obtain Dell's concurrence that a part should be replaced and to have Dell ship the replacement part. Dell will ship parts (freight prepaid) if you use an address in the continental U.S., where applicable. Shipments to other locations will be made freight collect. Dell will include a prepaid shipping container with each replacement part for your use in returning the replaced part to Dell. Replacement parts are new or reconditioned. Dell may provide replacement parts made by various manufacturers when supplying parts to you. The warranty term for a replacement part is the remainder of the limited warranty term.

You will pay Dell for replacement parts if the replaced part is not returned to Dell. The process for returning replaced parts, and your obligation to pay for replacement parts if you do not return the replaced parts to Dell, will be in accordance with Dell's Exchange Policy in effect on the date of the exchange.

You accept full responsibility for your software and data. Dell is not required to advise or remind you of appropriate backup and other procedures.

General Provisions

THIS LIMITED WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE (OR JURISDICTION TO JURISDICTION). DELL'S RESPONSIBILITY FOR MALFUNCTIONS AND DEFECTS IN HARDWARE IS LIMITED TO REPAIR AND REPLACEMENT AS SET FORTH IN THIS LIMITED WARRANTY STATEMENT. ALL EXPRESS AND IMPLIED WARRANTIES FOR THE PRODUCT, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE WARRANTY PERIOD SET FORTH ABOVE AND NO WARRANTIES, WHETHER EXPRESS OR IMPLIED, WILL APPLY AFTER SUCH PERIOD.

SOME STATES (OR JURISDICTIONS) DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE PRECEDING LIMITATION MAY NOT APPLY TO YOU.

DELL DOES NOT ACCEPT LIABILITY BEYOND THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY STATEMENT OR LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION ANY LIABILITY FOR PRODUCTS NOT BEING AVAILABLE FOR USE OR FOR LOST DATA OR SOFTWARE.

SOME STATES (OR JURISDICTIONS) DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE PRECEDING EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.

These provisions apply to Dell's three-year limited warranty only. For provisions of any service contract covering your system, refer to your invoice or the separate service contract that you will receive.

If Dell elects to exchange a system or component, the exchange will be made in accordance with Dell's Exchange Policy in effect on the date of the exchange. In any instance in which Dell issues a Return Material Authorization Number, Dell must receive the product(s) for repair prior to the expiration of the warranty period in order for the repair(s) to be covered by the limited warranty.

 **NOTE:** If you chose one of the available warranty and service options in place of the standard three-year limited warranty described in the preceding text, the option you chose will be listed on your invoice.

Three-Year Limited Warranty (Canada Only)

Dell Computer Corporation ("Dell") manufactures its hardware products from parts and components that are new or equivalent to new in accordance with industry-standard practices. Dell warrants that the hardware products it manufactures will be free from defects in materials and workmanship. The warranty term is three years beginning on the date of invoice, as described in the following text.

Damage due to shipping the products to you is covered under this limited warranty. Otherwise, this limited warranty does not cover damage due to external causes, including accident, abuse, misuse, problems with electrical power, servicing not authorized by Dell, usage not in accordance with product instructions, failure to perform required preventive maintenance, and problems caused by use of parts and components not supplied by Dell.

This limited warranty does not cover any items that are in one or more of the following categories: software; external devices (except as specifically noted); accessories or parts added to a Dell system after the system is shipped from Dell; accessories or parts added to a Dell system through Dell's system integration department; accessories or parts that are not installed in the Dell factory; or DellWare products. Monitors, keyboards, and mice that are Dell-branded or that are included on Dell's standard price list are covered under this limited warranty; all other monitors, keyboards, and mice (including those sold through the DellWare program) are not covered. Batteries for portable computers are covered only during the initial one-year period of this limited warranty.

Coverage During Year One

During the one-year period beginning on the invoice date, Dell will repair or replace products covered under this limited warranty that are returned to Dell's facility. To request warranty service, you must contact Dell's Customer Technical Support within the warranty period. See "Getting Help" in your *User's Guide* to find the appropriate contact information for obtaining customer assistance. If warranty service is required, Dell will issue a Return Material Authorization Number. You must ship the products back to Dell in their original or equivalent packaging, prepay shipping charges, and insure the shipment or accept the risk of loss or damage during shipment. Dell will ship the repaired or replacement products to you freight prepaid if you use an address in Canada, where applicable. Shipments to other locations will be made freight collect.

 **NOTE:** Before you ship the product(s) to Dell, back up the data on the hard-disk drive(s) and any other storage device(s) in the product(s). Remove any removable media, such as diskettes, CDs, or PC Cards. Dell does not accept liability for lost data or software.

Dell owns all parts removed from repaired products. Dell uses new and reconditioned parts made by various manufacturers in performing warranty repairs and building replacement products. If Dell repairs or replaces a product, its warranty term is not extended.

Coverage During Years Two and Three

During the second and third years of this limited warranty, Dell will provide, on an exchange basis and subject to Dell's Exchange Policy in effect on the date of the exchange, replacement parts for the Dell hardware product(s) covered under this limited warranty when a part requires replacement. You must report each instance of hardware failure to Dell's Customer Technical Support in advance to obtain Dell's concurrence that a part should be replaced and to have Dell ship the replacement part. Dell will ship parts (freight prepaid) if you use an address in Canada, where applicable. Shipments to other locations will be made freight collect. Dell will include a prepaid shipping container with each replacement part for your use in returning the replaced part to Dell. Replacement parts are new or reconditioned. Dell may provide replacement parts made by various manufacturers when supplying parts to you. The warranty term for a replacement part is the remainder of the limited warranty term.

You will pay Dell for replacement parts if the replaced part is not returned to Dell. The process for returning replaced parts, and your obligation to pay for replacement parts if you do not return the replaced parts to Dell, will be in accordance with Dell's Exchange Policy in effect on the date of the exchange.

You accept full responsibility for your software and data. Dell is not required to advise or remind you of appropriate backup and other procedures.

General Provisions

DELL MAKES NO EXPRESS WARRANTIES OR CONDITIONS BEYOND THOSE STATED IN THIS LIMITED WARRANTY STATEMENT. DELL DISCLAIMS ALL OTHER WARRANTIES AND CONDITIONS, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SOME STATES (OR JURISDICTIONS) DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR CONDITIONS, SO THIS LIMITATION MAY NOT APPLY TO YOU.

DELL'S RESPONSIBILITY FOR MALFUNCTIONS AND DEFECTS IN HARDWARE IS LIMITED TO REPAIR AND REPLACEMENT AS SET FORTH IN THIS LIMITED WARRANTY STATEMENT. THESE WARRANTIES GIVE YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE (OR JURISDICTION TO JURISDICTION).

DELL DOES NOT ACCEPT LIABILITY BEYOND THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY STATEMENT OR LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION ANY LIABILITY FOR PRODUCTS NOT BEING AVAILABLE FOR USE OR FOR LOST DATA OR SOFTWARE.

SOME STATES (OR JURISDICTIONS) DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE PRECEDING EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.

These provisions apply to Dell's three-year limited warranty only. For provisions of any service contract covering your system, refer to your invoice or the separate service contract that you will receive.

If Dell elects to exchange a system or component, the exchange will be made in accordance with Dell's Exchange Policy in effect on the date of the exchange. In any instance in which Dell issues a Return Material Authorization Number, Dell must receive the product(s) for repair prior to the expiration of the warranty period in order for the repair(s) to be covered by the limited warranty.

 **NOTE:** If you chose one of the available warranty and service options in place of the standard three-year limited warranty described in the preceding text, the option you chose will be listed on your invoice.

One-Year End-User Manufacturer Guarantee (Latin America and the Caribbean Only)

Guarantee

Dell Computer Corporation (“Dell”) warrants to the end user in accordance with the following provisions that its branded hardware products, purchased by the end user from a Dell company or an authorized Dell distributor in Latin America or the Caribbean, will be free from defects in materials, workmanship, and design affecting normal use, for a period of one year from the original purchase date. Products for which proper claims are made will, at Dell’s option, be repaired or replaced at Dell’s expense. Dell owns all parts removed from repaired products. Dell uses new and reconditioned parts made by various manufacturers in performing repairs and building replacement products.

Exclusions

This Guarantee does not apply to defects resulting from: improper or inadequate installation, use, or maintenance; actions or modifications by unauthorized third parties or the end user; accidental or willful damage; or normal wear and tear.

Making a Claim

Claims must be made in Latin America or the Caribbean by contacting the Dell point of sale within the guarantee period. The end user must always supply proof of purchase, indicating name and address of the seller, date of purchase, model and serial number, name and address of the customer, and details of symptoms and configuration at the time of malfunction, including peripherals and software used. Otherwise, Dell may refuse the guarantee claim. Upon diagnosis of a warranted defect, Dell will make arrangements and pay for ground freight and insurance to and from Dell’s repair/replacement center. The end user must ensure that the defective product is available for collection properly packed in original or equally protective packaging together with the details listed above and the return number provided to the end user by Dell.

Limitation and Statutory Rights

Dell makes no other warranty, guarantee or like statement other than as explicitly stated above, and this Guarantee is given in place of all other guarantees whatsoever, to the fullest extent permitted by law. In the absence of applicable legislation, this Guarantee will be the end user's sole and exclusive remedy against Dell or any of its affiliates, and neither Dell nor any of its affiliates shall be liable for loss of profit or contracts, or any other indirect or consequential loss arising from negligence, breach of contract, or howsoever.

This Guarantee does not impair or affect mandatory statutory rights of the end user against and/or any rights resulting from other contracts concluded by the end user with Dell and/or any other seller.

“Total Satisfaction” Return Policy (U.S. and Canada Only)

If you are an end-user customer who bought new products directly from a Dell company, you may return them to Dell within 30 days of the date of invoice for a refund or credit of the product purchase price. If you are an end-user customer who bought reconditioned or refurbished products from a Dell company, you may return them to Dell within 14 days of the date of invoice for a refund or credit of the product purchase price. In either case, the refund or credit will not include any shipping and handling charges shown on your invoice. If you are an organization that bought the products under a written agreement with Dell, the agreement may contain different terms for the return of products than specified by this policy.

To return products, you must contact Dell Customer Service to receive a Credit Return Authorization Number. See “Getting Help” in your *User’s Guide* to find the appropriate contact information for obtaining customer assistance. To expedite the processing of your refund or credit, Dell expects you to return the products to Dell in their original packaging within five days of the date that Dell issues the Credit Return Authorization Number. You must also prepay shipping charges and insure the shipment or accept the risk of loss or damage during shipment. You may return software for refund or credit only if the sealed package containing the diskette(s) or CD(s) is unopened. Returned products must be in as-new condition, and all of the manuals, diskette(s), CD(s), power cables, and other items included with a product must be returned with it. For customers who want to return, for refund or credit only, either applications software or an operating system that has been installed by Dell, the whole system must be returned, along with any media and documentation that may have been included in the original shipment.

This “Total Satisfaction” Return Policy does not apply to DellWare products, which may be returned under DellWare’s then-current return policy. In addition, reconditioned parts purchased through Dell Spare Parts Sales in Canada are nonreturnable.

Primeiros passos/Configuração

Siga as seguintes etapas para conectar dispositivos externos ao computador através do painel de E/S (Entrada/Saída). A traseira do seu computador Dell, incluindo o painel E/S, pode ser diferente dos exemplos mostrados aqui.

1

NOTA: conecte somente um teclado e um mouse.

NOTA: se você tiver um mouse ou teclado compatível com USB (Universal Serial Bus [barramento serial universal]), use os conectores USB na parte traseira do seu computador.

2 Sistema com um conector de vídeo

Sistema com dois conectores de vídeo

conector de vídeo
na placa de expansão

conector de vídeo
na placa de expansão

NOTA: se o seu computador tiver dois conectores de vídeo, o conector de vídeo integrado está desativado e possui uma tampa protetora sobre ele. Use o conector da placa de expansão, conforme mostrado nas ilustrações da direita na etapa 2.

Sistema com um conector de vídeo

Sistema com dois conectores de vídeo

conector de vídeo
na placa de expansão

NOTA: se o seu computador tiver dois conectores de vídeo, o conector de vídeo integrado está desativado e possui uma tampa protetora sobre ele. Use o conector de placa de expansão, conforme mostrado na ilustração à direita na etapa 2.

3

NOTA: se o seu computador tiver dois conectores de áudio, use o conector da placa de expansão, conforme mostrado nas ilustrações à direita na etapa 3.

Verifique se o interruptor do seletor de voltagem está corretamente definido para a sua região. Para mais informações, consulte “Ao utilizar o computador” mais adiante neste documento.

4

⚠ CUIDADO: para evitar choque elétrico, use apenas o cabo de força fornecido e certifique-se de que esteja conectado a uma fonte de força adequadamente aterrada.

5

As ilustrações a seguir mostram as localizações dos botões Liga/Desliga e dos controles do monitor.

Leia o contrato de licença do software e siga as instruções de configuração do sistema operacional na tela.

7

Parabéns! Você completou a configuração do seu sistema.

Dependendo do seu sistema operacional, clique duas vezes no ícone **Guias do usuário** na área de trabalho (mostrado abaixo) ou clique no botão **Iniciar** e, em seguida, selecione **Ajuda e Suporte** para acessar a documentação eletrônica armazenada na sua unidade de disco rígido.

Solução de problemas

A Dell fornece uma série de ferramentas para ajudá-lo se o seu sistema não apresentar o desempenho esperado. Para as informações mais recentes disponíveis para o seu computador sobre solução de problemas, consulte a página de suporte da Dell na Internet no endereço <http://support.dell.com> (em Inglês). Também é possível encontrar descrições das ferramentas da Dell para a solução de problemas na seção “Obtenção de ajuda” do *Guia do usuário on-line*.

Se ocorrerem problemas no computador que exijam a ajuda da Dell, escreva uma descrição detalhada do erro, os códigos de bipe ou os padrões das luzes de diagnósticos; anote o código de serviço expresso e o número da Etiqueta de Serviço abaixo e, em seguida, contate a Dell do mesmo local em que estiver o seu computador.

Consulte “Como encontrar informações e assistência” na página 43 para obter um exemplo dos números de código de serviço expresso e da etiqueta de serviço.

Código de serviço expresso: _____

Número da etiqueta de serviço: _____

O seu computador possui as seguintes ferramentas que podem ajudá-lo a resolver problemas:

PROGRAMA DE DIAGNÓSTICO DA DELL— O Programa de Diagnóstico da Dell testa vários componentes em seu computador e ajuda a identificar a causa dos problemas do computador. Para mais informações, consulte a "Como executar o Programa de Diagnóstico da Dell" na página 61

LUZES DO SISTEMA— Localizadas na frente do computador, essas luzes podem indicar um problema no computador. Para mais informações, consulte o *Guia do usuário*.

LUZES DE DIAGNÓSTICOS— Localizadas na parte traseira do computador, essas luzes podem indicar um problema no computador. Para mais informações, consulte o *Guia do usuário*.

MENSAGENS DO SISTEMA— O computador envia essas mensagens para alertá-lo sobre uma falha atual ou possível. Para mais informações, consulte o *Guia do usuário*.

CÓDIGOS DE BIPE— Uma série de códigos de bipe audíveis emitidos pelo computador podem ajudá-lo a identificar o problema. Para mais informações, consulte o *Guia do usuário*.

Utilização do *Dell OptiPlex ResourceCD*

Para utilizar o *Dell OptiPlex ResourceCD* enquanto estiver executando o sistema operacional Microsoft® Windows®, execute as etapas a seguir.

 **NOTA:** para acessar os drivers de dispositivo e a documentação do usuário, você precisará utilizar o *ResourceCD* enquanto estiver executando o Windows.

- 1 Ligue o computador e deixe que inicialize a área de trabalho do Windows.
- 2 Insira o *Dell OptiPlex ResourceCD* na unidade de CD.

Se estiver utilizando o *Dell OptiPlex ResourceCD* pela primeira vez no seu computador, a janela **ResourceCD Installation (Instalação do ResourceCD)** se abre para informá-lo que o *ResourceCD* começará a instalação.

- 3 Clique em **OK** para continuar.

Para completar a instalação, responda às solicitações do programa de instalação.

- 4 Clique em **Next (Próximo)** na tela **Welcome Dell System Owner (Bem-vindo, proprietário do sistema Dell)**.
- 5 Escolha o **System Model (Modelo de sistema)**, o **Operating System (Sistema operacional)**, o **Device Type (Tipo de dispositivo)** e o **Topic (Tópico)** apropriados.

Drivers para o seu computador

Para exibir uma lista dos drivers de dispositivo para o seu computador, execute as etapas a seguir:

- 1 Clique em **My Drivers (Meus drivers)** no menu suspenso **Tópicos**.

O *ResourceCD* faz uma varredura no hardware do computador e no sistema operacional e depois exibe na tela uma lista dos drivers de dispositivos para a configuração do seu sistema.

- 2 Clique no driver apropriado e siga as instruções para fazer o download do driver para o seu computador.

Para visualizar todos os drivers disponíveis para o seu computador, clique em **Drivers** a partir do menu suspenso **Tópico**.

Como executar o Programa de Diagnóstico da Dell

O Programa de Diagnóstico da Dell é um programa que testa vários componentes em seu computador. Execute este programa sempre que houver um problema no computador para identificar a origem do problema. Você pode executar o Programa de Diagnóstico da Dell a partir da sua unidade de disco rígido ou do *ResourceCD*.

 **AVISO:** se a sua unidade de disco rígido falhar, execute o Programa de Diagnóstico da Dell a partir do *ResourceCD*.

- 1 Ligue o computador (se o computador já estiver ligado, reinicie-o).
- 2 Quando aparecer a mensagem **F2 = Setup** no canto superior direito da tela, pressione <Ctrl><Alt><F10>.

A inicialização do diagnóstico começa imediatamente e, em seguida, o **Diagnostics Menu (Menu de diagnósticos)** aparece.

- 3 Selecione a opção de diagnóstico adequada para o seu computador.
Para usar o diagnóstico, siga as instruções da tela.

Alterando a seqüência de inicialização

Para executar o Programa de Diagnóstico da Dell a partir do *ResourceCD*, execute as etapas a seguir para permitir que o seu computador inicialize a partir do CD:

- 1 Insira o *Dell OptiPlex ResourceCD* na unidade de CD.
- 2 Ligue (ou reinicie) o computador.
- 3 Quando aparecer a mensagem **F2 = Setup** no canto superior direito da tela, pressione <Ctrl><Alt><F8>.

 **NOTA:** esse recurso altera a seqüência de inicialização apenas uma vez. Na próxima inicialização, o computador iniciará de acordo com os dispositivos especificados na configuração do sistema.

O **Boot Device Menu (Menu do dispositivo de inicialização)** aparece.

Se você esperar muito e o logotipo do Windows aparecer, espere até que apareça a área de trabalho do Windows. Em seguida, desligue o computador e tente novamente.

- 4 Selecione a opção **CD-ROM Device (Dispositivo de CD-ROM)**.

Como executar o Diagnóstico da unidade de disco rígido IDE da Dell

O Diagnóstico da unidade de disco rígido IDE da Dell é um utilitário que testa o disco rígido para solucionar ou confirmar uma falha no mesmo.

- 1 Ligue o computador (se já estiver ligado, reinicie-o).
- 2 Quando aparecer a mensagem F2 = Setup no canto superior direito da tela, pressione <Ctrl><Alt><D>.
- 3 Siga as instruções da tela.

Se uma falha for informada, consulte "Problemas na unidade de disco rígido" no *Guia do usuário*.

Instruções de segurança

Use as diretrizes de segurança a seguir para proteger o computador contra possíveis danos e para garantir sua segurança pessoal.

Ao trabalhar dentro do computador

Antes de remover a tampa do computador, siga as etapas abaixo na seqüência indicada.

AVISO: não tente fazer a manutenção do computador sozinho, exceto conforme explicado na documentação on-line da Dell ou de outra forma fornecido a você. Sempre siga rigorosamente as instruções de instalação e serviço.

CUIDADO: há o perigo de uma nova bateria explodir se for instalada incorretamente. Substitua a bateria somente por outra do mesmo tipo ou de tipo equivalente recomendado pelo fabricante. Descarte as baterias usadas de acordo com as instruções do fabricante.

- 1 Desligue o computador e quaisquer periféricos.
- 2 Faça o aterramento tocando uma superfície de metal não pintada no chassi, como o metal ao redor das aberturas do slot da placa na parte de trás do computador, antes de tocar qualquer componente interno do computador.

Enquanto trabalha, toque periodicamente uma superfície de metal não pintada no chassi do computador para dissipar qualquer eletricidade estática que possa prejudicar os componentes internos.

- 3 Desconecte o computador e os periféricos de suas fontes de energia. Além disso, desconecte todas as linhas telefônicas ou de telecomunicações do computador.

Isso reduz o potencial de lesões pessoais ou choque.

Além disso, anote estas regras de segurança quando apropriado:

- Para evitar curto-circuito no seu computador ao desconectar um cabo de rede, desconecte primeiro o cabo do NIC (network interface controller [controlador de interface de rede]) na parte traseira do seu computador e, depois, da tomada da parede. Ao reconectar um cabo de rede ao computador, conecte-o primeiro na tomada de rede e depois no NIC.
- Ao desconectar um cabo, puxe-o pelo seu conector ou pelo loop de alívio de tensão e não pelo cabo em si. Alguns cabos possuem um conector com presilhas de travamento; se estiver desconectando esse tipo de cabo, pressione as presilhas de travamento antes de desconectar o cabo. À medida que você separa os conectores, mantenha-os alinhados para evitar que algum pino do conector fique dobrado. Além disso, antes de conectar um cabo assegure-se de que ambos conectores estejam corretamente alinhados.
- Manuseie os componentes e as placas com cuidado. Não toque os componentes ou os contatos em uma placa. Segure uma placa pelas bordas ou pelo suporte de montagem de metal. Segure um componente, como um chip de microprocessador, pelas bordas, não pelos pinos.

Ao utilizar o computador

Ao utilizar o seu computador, observe as seguintes diretrizes de segurança.

CUIDADO: não opere o seu computador se qualquer tampa (incluindo as tampas do computador, painel, suportes de preenchimento e inserções do painel frontal) tiver sido removida.

- Para evitar danos ao computador, verifique se o interruptor do seletor de voltagem (se existir) na fonte de alimentação está definido para corresponder à fonte de CA (corrente alternada) disponível na sua localidade:
 - 115 Volts (V)/60 Hertz (Hz) na maioria dos países da América do Norte e do Sul e em alguns do Extremo Oriente, como Coréia do Sul e Taiwan

- 100 V/50 Hz no Japão oriental e 100 V/60 Hz no Japão ocidental

NOTA: o interruptor do seletor de voltagem precisa estar na posição de 115 V mesmo que a fonte de CA disponível no Japão seja de 100 V.

- 230 V/50 Hz na maioria dos países europeus, Oriente Médio e Extremo Oriente

Certifique-se também de que o monitor e os periféricos conectados sejam eletricamente classificados para operarem com a fonte de CA disponível em sua localidade.

NOTA: as fontes de alimentação de seleção automática não exigem um interruptor de seleção de voltagem. Sua fonte de alimentação pode não ter este interruptor.

- Para evitar choque elétrico, conecte os cabos de força do computador e dos periféricos a fontes de força adequadamente aterradas. Estes cabos são equipados com plugues de três pinos para ajudar a assegurar o aterramento apropriado. Não use plugues adaptadores nem remova o pino de aterramento de um cabo. Se for necessário usar um cabo de extensão, use um cabo de três fios com conectores adequadamente aterrados.

- Antes de trabalhar dentro do computador, desconecte o computador da fonte de alimentação para evitar choques elétricos ou danos à placa de sistema. Certos componentes da placa de sistema continuam a receber energia no momento em que o computador é conectado à fonte de corrente alternada.

- Para evitar possíveis danos à placa de sistema, espere 15 segundos depois de desligar o computador da tomada para desconectar um dispositivo do mesmo.
- ➔ **AVISO:** observe quando o LED (light-emitting diode [diodo emissor de luz] indicador de força auxiliar da placa de sistema desligar para verificar se a energia do computador está desligada (consulte o *Guia do usuário* para a localização deste LED).
- Para proteger o computador contra oscilações de energia elétrica repentinas e transitórias, use um supressor de surtos de tensão, um estabilizador de linha ou uma UPS (uninterruptible power supply [fonte de alimentação ininterrupta]).
- Verifique se não há objetos sobre os cabos do computador e se esses não estão em locais onde se possa pisar ou tropeçar neles.
- Não respingue líquidos ou alimentos no seu computador. Se o computador for molhado, consulte o *Guia do usuário*.
- Não insira nenhum objeto nas aberturas do computador. Isso pode causar incêndio ou choque elétrico por curto-circuito nos componentes internos.
- Mantenha o computador longe de aquecedores e fontes de calor. Além disso, não bloqueie as aberturas de ventilação. Evite colocar papéis soltos embaixo do computador; não o coloque próximo a uma parede ou em uma cama, sofá ou tapete.

Hábitos ergonômicos para computação

CUIDADO: o uso impróprio e prolongado do teclado pode causar lesões.

CUIDADO: visualizar a tela do monitor por um período de tempo prolongado pode resultar em fadiga visual.

Para conforto e eficiência, observe as regras de ergonomia no *Guia do usuário* ao configurar e utilizar o computador.

Informações sobre regulamentação

EMI (Electromagnetic Interference [interferência eletromagnética]) é qualquer sinal ou emissão, irradiada no espaço livre ou conduzida por fiação de energia ou de sinal, que põe em perigo o funcionamento de um serviço de rádio navegação ou outro serviço de segurança ou que degrada seriamente, obstrui ou interrompe repetidamente um serviço licenciado de comunicação por rádio.

O computador da Dell é projetado para estar de acordo com as regulamentações aplicáveis sobre EMI. Note que as regulamentações da FCC definem quais alterações ou modificações não aprovadas expressamente pela Dell podem anular a autoridade do usuário para operar o equipamento.

NOTA: informações adicionais de regulamentação sobre o seu sistema podem ser encontradas no *Guia do usuário*.

Para comenzar y Configuración

Use los pasos siguientes para conectar dispositivos externos a su equipo por medio del panel de E/S (entrada/salida). La parte posterior de su sistema Dell, incluyendo el panel de E/S, puede parecer diferente del ejemplo que se muestra aquí.

1

NOTA: Conecte sólo un teclado y un mouse.

NOTA: Si tiene un mouse o un teclado compatible con USB (Universal Serial Bus [Bus serie universal]), use los conectores USB de la parte posterior del sistema.

2 Sistema con un conector de vídeo

Sistema con dos conectores de vídeo

conector de vídeo en la tarjeta de expansión

conector de vídeo en la tarjeta de expansión

NOTA: Si su sistema dispone de dos conectores de vídeo, el conector de vídeo integrado está desactivado y tiene instalada una tapa de protección. Use el conector de la tarjeta de expansión, tal como se muestra en las ilustraciones a la derecha del paso 2.

Sistema con un conector de vídeo

Sistema con dos conectores de vídeo

conector de vídeo en
la tarjeta de expansión

NOTA: Si su sistema dispone de dos conectores de vídeo, el conector de vídeo integrado está desactivado y tiene instalada una tapa de protección. Use el conector de la tarjeta de expansión, tal como se muestra en las ilustraciones a la derecha del paso 2.

3

NOTA: Si su sistema dispone de dos conectores de audio, use el de la tarjeta de expansión, tal como se muestra en las ilustraciones a la derecha del paso 3.

Verifique que el interruptor de selección de voltaje está configurado correctamente para el lugar donde se encuentra. Para obtener más información, consulte la sección “Cuando use su sistema” más adelante en este documento.

4

⚠ PRECAUCIÓN: Para ayudar a evitar descargas eléctricas, use sólo el cable de alimentación incluido y verifique que está conectado adecuadamente a una fuente de energía conectada a tierra.

5

Las ilustraciones siguientes muestran las posiciones del botón de encendido y de los controles del monitor.

6

Lea el acuerdo de licencia de software y siga las instrucciones de configuración del sistema operativo que aparecen en la pantalla.

7

¡Felicidades! Ha completado la configuración de su sistema.

Dependiendo del sistema operativo, haga clic en el icono **Guías del usuario** del escritorio (véase a continuación) o haga clic en el botón **Start (Inicio)** y después seleccione **Help and Support (Ayuda y asistencia)** para acceder a la documentación electrónica almacenada en su disco duro.

Solución de problemas

Dell proporciona una serie de herramientas para ayudarlo si su sistema no funciona como se espera. Para obtener la información de solución de problemas más reciente disponible para el sistema, consulte el sitio de asistencia de Dell en <http://support.dell.com>. También puede encontrar descripciones de las herramientas de solución de problemas de Dell en la sección titulada “Obtención de ayuda” de la *Guía del usuario en línea*.

Si se producen problemas en el equipo que exigen la ayuda de Dell, escriba una descripción detallada del error, los códigos de sonido o los patrones luminosos de diagnósticos; registre su código de servicio rápido y el número de etiqueta de servicio; y después póngase en contacto con Dell desde el lugar donde se encuentra su equipo.

Consulte “Búsqueda de información y asistencia” on página 71 para ver un ejemplo del código de servicio rápido y de los números de etiqueta de servicio.

Código de servicio rápido: _____

Número de etiqueta de servicio: _____

Su equipo incluye las herramientas siguientes que pueden ayudarle a resolver un problema:

DIAGNÓSTICOS DELL:— Los Diagnósticos Dell ponen a prueba a varios componentes en su equipo y le ayudan a identificar la causa del problema del equipo. Para obtener más información, consulte "Ejecución de los Diagnósticos Dell" on página 89.

LUCES DEL SISTEMA— Ubicadas en la parte anterior del equipo, estas luces pueden indicar un problema en el equipo. Para obtener más información, consulte la *Guía del usuario*.

LUCES DE DIAGNÓSTICO— Ubicadas en la parte posterior del equipo, estas luces pueden indicar un problema en el equipo. Para obtener más información, consulte la *Guía del usuario*.

MENSAJES DEL SISTEMA— El equipo muestra estos mensajes para advertirle del fallo actual o de un posible fallo. Para obtener más información, consulte la *Guía del usuario*.

CÓDIGOS DE SONIDO— Una serie de códigos de sonido emitidos por el equipo que pueden ayudarle a identificar un problema. Para obtener más información, consulte la *Guía del usuario*.

Utilización del CD *Dell OptiPlex ResourceCD*

Para usar el *Dell OptiPlex ResourceCD* mientras ejecuta el sistema operativo Microsoft® Windows®, realice los pasos siguientes:

 **NOTA:** Para acceder a los controladores de dispositivos y a la documentación del usuario, usted debe usar el *ResourceCD* desde Windows.

- 1 Encienda el equipo y deje que se inicie hasta que aparezca el escritorio de Windows.
- 2 Inserte el *Dell OptiPlex ResourceCD* en la unidad de CD.

Si va a utilizar el *Dell OptiPlex ResourceCD* por primera vez en este equipo, se abre la ventana **ResourceCD Installation (Instalación del ResourceCD)** para informarle que el *ResourceCD* está a punto de iniciar la instalación.

- 3 Haga clic sobre **OK (Aceptar)** para continuar.

Para completar la instalación, responda a las peticiones que ofrece el programa de instalación.

- 4 Haga clic en **Next (Siguiente)** en la pantalla **Welcome Dell System Owner (Bienvenida al propietario del sistema Dell)**.
- 5 Seleccione el **System Model (Modelo del sistema)**, **Operating System (Sistema operativo)**, **Device Type (Tipo de dispositivo)** y **Topic (Tema)** correspondiente.

Controladores para su equipo

Para que aparezca una lista de los controladores de dispositivos de su equipo, realice los pasos siguientes:

- 1 Haga clic en **My Drivers (Mis controladores)** en el menú desplegable **Tema**.

El *ResourceCD* analiza el hardware del equipo y el sistema operativo y seguidamente aparece en la pantalla una lista de los controladores de los dispositivos correspondientes a la configuración de su sistema.

- 2 Haga clic en el controlador apropiado y siga las instrucciones para descargar el controlador en su equipo.

Para ver todas las unidades disponibles del equipo, haga clic en **Controladores** en el menú desplegable **Tema**.

Ejecución de los Diagnósticos Dell

Los Diagnósticos Dell es un programa que prueba varios componentes en su equipo. Ejecute este programa siempre que tenga un problema con el equipo; le ayudará a identificar el origen del problema. Puede ejecutar los Diagnósticos Dell desde la unidad de disco duro o desde el *ResourceCD*.

 **AVISO:** Si falla la unidad de disco duro, ejecute los Diagnósticos Dell desde el *ResourceCD*.

- 1 Encienda el equipo (si su equipo ya está encendido, reinícielo).
- 2 Cuando aparezca F2 = Setup (F2 = Configuración) en la esquina superior derecha de la pantalla, oprima <Ctrl><Alt><F10>.

Los diagnósticos de inicio comienzan inmediatamente; después aparece el **Diagnostics Menu (Menú de diagnósticos)**.

- 3 Seleccione la opción de diagnóstico apropiada para su equipo.
Para utilizar los diagnósticos, siga las instrucciones que aparecen en la pantalla.

Cambio de la secuencia de inicio

Para ejecutar los Diagnósticos Dell desde el *ResourceCD*, realice los pasos siguientes para conseguir que su equipo se inicie desde el CD:

- 1 Inserte el *Dell OptiPlex ResourceCD* en la unidad de CD.
- 2 Encienda (o reinicie) el equipo.
- 3 Cuando aparezca F2 = Setup (F2 = Configuración) en la esquina superior derecha de la pantalla, oprima <Ctrl><Alt><F8>.

 **NOTA:** Esta característica cambia la secuencia de inicio sólo una vez. Durante el inicio siguiente, el equipo se inicia según los dispositivos especificados en la Configuración del sistema.

Aparece el **Boot Device Menu (Menú de dispositivo de inicio)**.

Si espera demasiado y aparece el logotipo de Windows, siga esperando hasta que aparezca el escritorio de Windows. Después apague el equipo e inténtelo de nuevo.

- 4 Seleccione la opción **CD-ROM Device (Dispositivo de CD-ROM)**.

Ejecución de los diagnósticos de la unidad de disco duro IDE de Dell

Los Diagnósticos de la unidad de disco duro IDE de Dell es una utilidad que prueba la unidad de disco duro para localizar problemas o confirmar un fallo de la unidad de disco duro.

- 1 Encienda el equipo (si su equipo ya está encendido, reinícielo).
- 2 Cuando aparezca F2 = Setup (F2 = Configuración) en la esquina superior derecha de la pantalla, oprima <Ctrl><Alt><D>.
- 3 Siga las instrucciones que aparecen en la pantalla.

Si se indica un fallo, consulte “Problemas de la unidad de disco duro” en la *Guía del usuario*.

Instrucciones de seguridad

Utilice las directrices de seguridad para ayudar a proteger su equipo de posibles daños y garantizar su propia seguridad personal.

Al trabajar en el interior de su equipo

Antes de desmontar la cubierta de la PC, realice los pasos siguientes en la secuencia indicada.

 **AVISO:** No intente dar servicio al equipo, a excepción de lo que se explica en sus documentos de Dell en línea u otros documentos proporcionados para usted. Siga siempre las instrucciones de instalación y servicio al pie de la letra.

 **PRECAUCIÓN: Existe el peligro de que una nueva batería explote si se instala incorrectamente. Reemplace la batería únicamente con otra del mismo tipo o su equivalente recomendado por el fabricante. Deseche las baterías agotadas de acuerdo con las instrucciones del fabricante.**

- 1 Apague el equipo y todos los periféricos.
- 2 Conéctese a tierra tocando una superficie metálica sin pintura en el chasis, tal como el metal alrededor de aberturas de las ranuras para tarjetas en la parte posterior del equipo, antes de tocar cualquier objeto en el interior de su equipo.

Conforme trabaje, toque periódicamente una superficie metálica sin pintura en el chasis del equipo para disipar la electricidad estática que podría dañar los componentes internos.

- 3 Desconecte su equipo y los periféricos de sus fuentes de energía. Asimismo, desconecte las líneas de teléfono o de telecomunicaciones conectadas al equipo.

Al hacerlo reduce la posibilidad de sufrir lesiones personales o descargas eléctricas.

Además, tome nota de las pautas de seguridad siguientes cuando sea pertinente:

- Para evitar que se produzca un cortocircuito en el equipo cuando se desconecte un cable de red, primero desconecte el cable del NIC (network interface controller [controlador de interfaces de red]) de la parte posterior del equipo y después del conector de red de la pared. Cuando vuelva a conectar un cable de red al equipo, conecte primero el cable al enchufe de la red y después al NIC.
- Cuando desconecte un cable, tire de su conector o de su lazo liberador de tensión, y no del cable mismo. Algunos cables tienen un conector con lengüetas de seguro. Si está desconectando este tipo de cable, oprima las lengüetas hacia adentro antes de desconectarlo. Cuando separe conectores, manténgalos alineados para evitar doblar las patas de conexión. Asimismo, antes de conectar un cable, asegúrese de que los conectores estén orientados y alineados correctamente.
- Maneje con cuidado los componentes y las tarjetas. No toque los componentes ni los contactos de las tarjetas. Sujete las tarjetas por sus bordes o por su soporte metálico de montaje. Sujete componentes tales como un chip de microprocesador por sus bordes y no por sus patas.

Cuando use su sistema

Al utilizar el sistema, observe las directrices de seguridad siguientes.

PRECAUCIÓN: No utilice el equipo con la o las cubiertas (inclusive las cubiertas de la PC, los biseles, los soportes de relleno y las carátulas del panel anterior) desmontadas.

- Con el fin de evitar daños a su equipo, asegúrese de que el interruptor de selección de voltaje en el suministro de energía esté fijado igual que la corriente alterna disponible en su área:
 - 115 voltios (V)/60 hertzios (Hz) en la mayoría de las regiones de América del Norte y del Sur y en algunos países del Lejano Oriente, tales como Corea del Sur y Taiwán
 - 100 V/50 Hz en el este de Japón y 100 V/60 Hz en el oeste de Japón

 **NOTA:** El interruptor de selección de voltaje debe estar colocado en la posición de 115V, a pesar de que la corriente alterna disponible en Japón es de 100 voltios (V).

- 230 V/50 Hz en la mayoría de las regiones de Europa, el Medio Oriente y el Lejano Oriente

También asegúrese que su monitor y los periféricos conectados estén clasificados eléctricamente para operar con la corriente alterna disponible en su localidad.

 **NOTA:** Los suministros de alimentación de selección automática no requieren un interruptor de selección de voltaje. Su suministro de energía puede no disponer de este interruptor.

- Con el fin de prevenir una descarga eléctrica, conecte el equipo y los cables de alimentación de los periféricos a una fuente de energía conectada apropiadamente a tierra. Estos cables cuentan con enchufes de tres clavijas para asegurar una conexión adecuada a tierra. No utilice enchufes adaptadores ni retire la clavija de conexión a tierra de ningún cable. Si necesita utilizar un cable de extensión, utilice un cable de tres líneas con enchufes adecuadamente conectados a tierra.

- Antes de trabajar dentro del equipo, desconecte el sistema para evitar descargas eléctricas o daños en la placa base. Ciertos componentes de la placa base siguen recibiendo corriente mientras el equipo está conectado a la corriente alterna.
- Para ayudar a evitar posibles daños en la placa base, espere 15 segundos después de desenchufar el sistema antes de desconectar un dispositivo del equipo.

AVISO: Observe cuando se apaga el indicador del LED (light-emitting diode [diodo emisor de luz]) de la alimentación auxiliar de la placa base para verificar que el sistema está apagado (consulte la *Guía del usuario* para ver el lugar donde se encuentra este diodo emisor de luz).

- Para proteger su equipo contra cambios repentinos en la alimentación eléctrica, utilice un protector contra sobrevoltajes, un acondicionador de línea o una UPS (Uninterruptible Power Supply [sistema de energía ininterrumpida]).
- Asegúrese de que no haya ningún objeto encima de los cables del equipo y que los cables no estén en un lugar donde uno pueda tropezarse con ellos o pisarlos.
- No derrame alimentos o líquidos sobre su equipo. Si se moja el equipo, consulte la *Guía del usuario*.
- No introduzca ningún objeto por las aberturas de su equipo. Puede ocasionar un incendio o sufrir un choque eléctrico al provocar un cortocircuito entre los componentes internos.
- Mantenga el equipo alejado de radiadores y fuentes de calor. Asimismo, no obstruya las rendijas de ventilación. Procure no dejar papeles sueltos debajo del equipo; no ponga el equipo dentro de una unidad cerrada o sobre una cama, un sofá o una alfombra.

Hábitos de ergonomía con su equipo

 **PRECAUCIÓN:** La utilización inapropiada o prolongada del teclado puede ocasionarle una lesión.

 **PRECAUCIÓN:** El mirar la pantalla del monitor durante períodos prolongados puede causar fatiga ocular.

Para asegurar su comodidad y eficiencia, observe las pautas de ergonomía en su *Guía del usuario* al instalar y utilizar su equipo.

Información reglamentaria

La EMI (Electromagnetic Interference [interferencia electromagnética]) es cualquier señal o emisión, irradiada en el espacio o conducida mediante cables de alimentación o de señales, que pone en peligro el funcionamiento de dispositivos de navegación por radio u otros dispositivos de seguridad o que degrada seriamente, obstruye o interrumpe repetidamente un servicio de radiocomunicaciones con licencia.

Su sistema Dell está diseñado para cumplir las regulaciones aplicables referentes a EMI. Los cambios o las modificaciones no aprobados expresamente por Dell podrían anular la autoridad del usuario para operar el equipo.

 **NOTA:** En la *Guía del usuario* puede encontrar más información regulatoria referente a su sistema.

Garantía de fabricante para el usuario final por un año (únicamente Latinoamérica y el Caribe)

Garantía

Dell Computer Corporation (“Dell”) garantiza al usuario en acuerdo con las siguientes provisiones que los productos de hardware que llevan su marca, adquiridos por el usuario por medio de una compañía de Dell o un distribuidor de Dell autorizado en Latinoamérica o el Caribe, estará libre de defectos en materiales, mano de obra y diseño que puedan afectar su uso normal por un periodo de un año a partir de la fecha original de compra. Los productos para los cuales se hace un debido reclamo serán, según la decisión de Dell, reparados o reemplazados a cuenta de Dell. Dell owns all parts removed from repaired products. Dell utiliza piezas nuevas y reacondionadas hechas por varios fabricantes cuando hace reparaciones y en la fabricación de productos de reemplazo.

Exclusiones

Esta garantía no es aplicable a defectos resultantes por: instalación, uso o mantenimiento inadecuado o incorrecto; acciones o modificaciones por terceras personas no autorizadas o por el usuario; daños accidentales o intencionales; o por desgaste normal.

Cómo realizar una reclamación

Las reclamaciones deben ser hechas en Latinoamérica o el Caribe poniéndose en contacto con el lugar de ventas de Dell dentro del periodo de garantía. El usuario siempre debe proporcionar un comprobante de adquisición, indicando el nombre y la dirección del vendedor, la fecha de adquisición, números de serie y de modelo, nombre y dirección del cliente, y los detalles de los síntomas y de la configuración al momento en el que ocurrió la falla, incluyendo los dispositivos periféricos y el software que se estaba utilizando. De lo contrario, Dell puede rehusar la demanda. Una vez diagnosticado un defecto bajo la garantía, Dell se encargará del problema y pagará el envío por tierra, así como el seguro de ida y venida al centro de reparación y reemplazo Dell. El usuario se debe encargar de que el producto defectuoso esté disponible para ser recogido debidamente empaquetado en la caja original o en una caja protectora similar junto con los detalles que se mencionan anteriormente y el número de devolución proporcionado al usuario por Dell.

Limitación y derechos estatutarios

Dell no ofrece ninguna otra garantía o declaración similar que la explícitamente descrita anteriormente y esta garantía se da en lugar de toda otra garantía, al máximo permitido por la ley. En la ausencia de leyes aplicables esta garantía será el único y exclusivo recurso del usuario en contra de Dell o cualquiera de sus socios, y ni Dell ni cualquiera de sus socios serán responsables por la pérdida de ganancias o contratos, o cualquier otra pérdida indirecta o por consecuencia que resulte del descuido, violación de contrato o cualquier otro evento.

Esta garantía no perjudica o afecta los derechos estatutarios obligatorios del usuario en contra y/o cualesquiera otros derechos que resulten de otros contratos entre el usuario y Dell y/o cualquier otro vendedor.
