

Dell License Manager  
Version 1.0.1

# Readme

Dell License Manager is a deployment tool for iDRAC software licenses. Software licenses can be used to enable iDRAC features such as virtual media support on licensable servers after the servers have left the factory. To use the license manager, inventory licensable servers and deploy licenses obtained from the online licensing portal (<http://www.dell.com/support/retail/lkm>).

## Resolved Issues

### License Date Processing

- When importing licenses containing timestamps with an improperly formatted time zone you may have received the following errors:  
*D1050 Parse error: String was not recognized as a valid DateTime.*  
*E1012 Error processing file: <filename> - Unable to parse license.*
- When inventorying servers which do not report the date of license sale, you may have received the following errors:  
*E3012 Communication error obtaining inventory on: <host> - String was not recognized as valid DateTime*

These errors are resolved in this version.
