USER NOTES FOR ALL SUPPORTED WINDOWS OPERATING SYSTEMS
==========================================================================
```

* On systems supporting Windows operating systems, you can only

upgrade features that are already installed. You can add features
from "Add/Remove Programs" after applying the upgrade.

* After an "Unattended Installation" completes, a new console window
  must be opened. The CLI commands must be executed from that
  window. It is not possible to execute CLI commands from the same
  console window in which Management Station is installed.
