## Security Considerations

The access privileges for different operations are handled internally by the OpsMgr. This can be set up using the **User Roles** option under **Administration** → **Security** feature in the OpsMgr console. The profile of your role determines what actions you can perform.

For more information on security considerations, see the documentation for Microsoft System Center 2012 Operations Manager, System Center 2012 SP1 Operations Manager, Microsoft System Center Operations Manager 2007 R2, or the Microsoft Systems Centre Essentials 2010 Online Help at [technet.microsoft.com](http://technet.microsoft.com).
