

Chassis Management
Controller
Version 4.1

Release Notes

What's New

This release of CMC supports the following features:

- Broadcom 5719 Quad Port 1GB Blade Mezzanine Card.
- Expanded the CMC MIB to contain OIDs for a maximum of 32 servers in the chassis.
- Expanded the CMC MIB to contain OIDs for each server's Chassis Slot number, for all servers present in the chassis.
- Expanded the CMC MIB to contain an OID for the iKVM Version number, if iKVM is present in the chassis.
- Support for iDRAC7 PowerEdge M420 server.

Prerequisites

Supported System

CMC version 4.1 is supported on the following Dell PowerEdge(TM) systems in the Dell PowerEdge M1000e system enclosure:

- Dell PowerEdge M420
- Dell PowerEdge M520
- Dell PowerEdge M600
- Dell PowerEdge M605
- Dell PowerEdge M610
- Dell PowerEdge M610X
- Dell PowerEdge M620
- Dell PowerEdge M710
- Dell PowerEdge M710HD
- Dell PowerEdge M805
- Dell PowerEdge M905
- Dell PowerEdge M910
- Dell PowerEdge M915

Recommended Module Firmware Versions

The following chassis module firmware versions are recommended additionally if CMC version 4.1 is installed:

- iDRAC Firmware Version:
 - 3.35 for Dell PowerEdge M610, M610X, M710, M710HD, M910, M915
 - 1.60 for Dell PowerEdge M600, M605, M805, M905
- iDRAC7 Firmware Version:
 - 1.00 for Dell PowerEdge M620
 - 1.10.10 for Dell PowerEdge M420

- Dell Lifecycle Controller Version:
 - 1.5 for Dell PowerEdge M610, M610X, M710, M710HD, M910, M915
 - 2.0 for Dell PowerEdge M620, M420, M520
- BIOS Version:
 - 1.0.0 for Dell PowerEdge M620, M420
 - 6.1.0 for Dell PowerEdge M610, M610X, M710
 - 5.0.1 for Dell PowerEdge M710HD
 - 2.7.0 for Dell PowerEdge M910
 - 2.6.0 for Dell PowerEdge M915
 - 2.4.0 for Dell PowerEdge M600
 - 5.4.1 for Dell PowerEdge M605
 - 2.3.3 for Dell PowerEdge M805, M905

Supported Web Browsers

CMC version 4.1 is supported on the following web browsers:

- Microsoft Internet Explorer 7: Windows XP 32-bit SP3, Windows Vista SP2 x32 and x64, Windows Server 2003 SP2 x32 and x64, Windows Server 2008 SP2 x32 and x64.
- Microsoft Internet Explorer 8: Windows XP 32-bit SP3, Windows Vista x32 and x64 SP2, Windows 7 x32 and x64, Windows Server 2003 x32 and x64 SP2, Windows Server 2008 x32 and x64, Windows Server 2008 R2 x64.
- Microsoft Internet Explorer 8 (x64): Windows Vista X64 SP2, Windows 7 x64, Windows Server 2003 x64 SP2, Windows Server 2008 x64, Windows Server 2008 R2 x64.
- Microsoft Internet Explorer 9: Windows Vista x32 and x64 SP2, Windows 7 x32 and x64, Windows Server 2008 R2 x64.
- Microsoft Internet Explorer 9 (x64): Windows Vista x64 SP2, Windows 7 x64, Windows Server 2008 R2 x64.
- Mozilla Firefox 6.0: Windows XP 32-bit SP3, Windows Vista x32 and x64 SP2, Windows 7 x32 and x64, Windows Server 2003 x32 and x64 SP2, Windows Server 2008 x32 and x64, Windows Server 2008 R2 x64.
- Mozilla Firefox 7.0: Windows XP 32-bit SP3, Windows Vista x32 and x64 SP2, Windows 7 x32 and x64, Windows Server 2003 x32 and x64 SP2, Windows Server 2008 x32 and x64, Windows Server 2008 R2 x64.

Upgrade

Refer to the "Prerequisites" section for the proper version numbers. The modules should be updated in the following order:

- BIOS
- Lifecycle Controller
- iDRAC6

NOTE: Before you update the server component firmware modules listed above, you must update CMC firmware.

NOTE: To update firmware using Lifecycle Controller, iDRAC firmware must be of version 2.3 or greater.

If manually updating firmware using Dell Update Packages (DUPs), the firmware should be updated in the following order:

- BIOS
- Lifecycle Controller
- iDRAC6

NOTE: To update iDRAC firmware to 3.0 or greater from an iDRAC version less than 2.3, you must first update the iDRAC firmware to version 2.3 before updating to version 3.0 or greater.

Open Issues and Resolutions

- Versions 6.0 and 7.0 of Mozilla Firefox Web Browser do not support IPv6 addresses. You must use URLs that contain a registered hostname to access a CMC or an iDRAC Server that has an IPv6 address. A CMC or an iDRAC Server that also has an IPv4 address is supported.
- Non-English versions of the Online Help for power configuration pages incorrectly state that the required privilege for changing power configuration settings is "Chassis Control Administrator." The correct privilege is "Chassis Configuration Administrator."
- While using the command "racadm config -f" with:
 - CMC 3.21 or later versions of the firmware, make sure that the Remote RACADM client version 6.3.0 or later is installed.
 - CMC with an earlier version of 3.21 firmware, make sure that the Remote RACADM client version earlier than 6.3.0 is installed.
- The Remote RACADM testfeature command (racadm -r <IP Address> testfeature ...) does not support the -d (debug) option.
- For Single Sign-On and Smart Card login, the client system must be a part of the Active Directory domain and Kerberos Realm. On Windows 7, clients under the Local Security Policies must make sure to configure the security option "Network security: Configure encryption types allowed for Kerberos." This policy setting allows you to set the encryption types that Kerberos is allowed to use. The DES_CBC_MD5 encryption type must be selected. If this encryption type is not selected, the encryption type will not be allowed. This setting may affect compatibility with client computers or services and applications.

- When you add a member chassis to a chassis group using the Multi-Chassis Management feature, you cannot specify the group members with an IPv6 address.

Global Support
