Product features

The **Dell P2421** monitor has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD) and LED backlight. The monitor features include:

- 61.13 cm (24.1 in.) viewable area (measured diagonally).
1920 x 1200 (16:10) resolution, plus full-screen support for lower resolutions.
- Wide viewing angle to allow viewing from a sitting or standing position.
- Color gamut of 99% sRGB.
- Digital connectivity with DVI, DisplayPort and HDMI.
- Tilt, swivel, height, and rotate adjustment capabilities.
- Removable stand and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Equipped with 1 USB upstream port and 4 USB downstream ports.
- Plug and play capability if supported by your system.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Power and OSD buttons lock.
- Security lock slot.
- Stand lock.
- ≤ 0.3 W in Standby Mode.
- Optimize eye comfort with a flicker-free screen.

 **WARNING: The possible long-term effects of blue light emission from the monitor may cause damage to the eyes, including eye fatigue, digital eye strain, and so on. ComfortView feature is designed to reduce the amount of blue light emitted from the monitor to optimize eye comfort.**

Plug and play capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so that the system can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings if desired. For more information about changing the monitor settings, see [Operating the monitor](#).

Universal Serial Bus (USB) interface

This section gives you information about the USB ports that are available on the monitor.

NOTE: This monitor is Super-Speed USB 3.0 and High-Speed USB 2.0 compatible.

USB 3.0

Transfer speed	Data rate	Power consumption
Super-Speed	5 Gbps	4.5 W (Max, each port)
High speed	480 Mbps	4.5 W (Max, each port)
Full speed	12 Mbps	4.5 W (Max, each port)

USB 2.0

 **NOTE: USB 3.0 functionality requires a USB 3.0-capable computer.**

 **NOTE: The USB ports on the monitor work only when the monitor is turned On or in Standby mode. If you turn Off the monitor and then turn it On, the attached peripherals may take a few seconds to resume normal functionality.**

LCD monitor quality and pixel policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on Dell Monitor Quality and Pixel Policy, see www.dell.com/support/monitors.

Maintenance guidelines

Cleaning your monitor

 **CAUTION: Read and follow the [Safety instructions](#) before cleaning the monitor.**

 **WARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.**

For best practices, follow the instructions in the list below when unpacking, cleaning, or handling your monitor:

- To clean your anti-static screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the anti-static coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a lightly-dampened, warm cloth to clean the monitor. Avoid using detergent of any kind as some detergents leave a milky film on the monitor.
- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.

Setting up the monitor

Attaching the stand

-  **NOTE: The stand is not installed at the factory when shipped.**
-  **NOTE: The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.**

To attach the monitor stand:

1. Follow the instructions on the flaps of carton to remove the stand from the top cushion that secures it.
2. Remove the stand riser and stand base from the packaging cushion.

3. Insert the stand base blocks fully into the stand slot.
4. Lift the screw handle and turn the screw clockwise.
5. After fully tightening the screw, fold the screw handle flat within the recess.

6. Lift the cover, as shown, to access the VESA area for stand assembly.

7. Attach the stand assembly to the monitor.

- a. Fit the two tabs on the upper part of the stand to the groove on the back of the monitor.
- b. Press the stand down till it snaps into place.

8. Place the monitor upright.

NOTE: Lift the monitor carefully to prevent it from slipping or falling.

9. Remove the cover from the monitor.

Connecting your monitor

-  **WARNING:** Before you begin any of the procedures in this section, follow the [Safety instructions](#).
-  **NOTE:** Dell monitors are designed to work optimally with Dell supplied inbox cables. Dell does not guarantee the video quality and performance when using non-Dell cables.
-  **NOTE:** Route the cables through the cable-management slot before connecting them.
-  **NOTE:** Do not connect all cables to the computer at the same time.
-  **NOTE:** The graphics are used for the purpose of illustration only. Appearance of the computer may vary.

To connect your monitor to the computer:

1. Turn Off your computer and disconnect the power cable.
2. Connect the DisplayPort, HDMI, VGA or DVI cable from your monitor to the computer.

Connecting the DisplayPort (DisplayPort to DisplayPort) cable

Connecting the HDMI cable (optional)

Connecting the VGA cable (optional)

Connecting the DVI cable (optional)

Connecting the USB 3.0 cable

After you have completed connecting the VGA/DisplayPort/HDMI/DVI cable, follow the procedures below to connect the USB 3.0 cable to the computer and complete your monitor setup:

1. Connect the upstream USB 3.0 port (cable supplied) to an appropriate USB 3.0 port on your computer. (See [Bottom view](#) for details.)
2. Connect the USB 3.0 peripherals to the downstream USB 3.0 ports on the monitor.
3. Plug the power cables for your computer and monitor into a nearby outlet.

NOTE: Use the cable slot on the monitor stand to organize the cables.

4. Turn On the monitor and the computer.
If your monitor displays an image, installation is complete. If it does not display an image, see [Universal Serial Bus \(USB\) specific problems](#).

Organizing your cables

After attaching all necessary cables to your monitor and computer, (See [Connecting your monitor](#) for cable attachment,) organize all cables as shown above.

Removing the monitor stand

-  **NOTE:** To prevent scratches on the LCD screen when removing the stand, ensure that the monitor is placed on a soft, clean surface.
-  **NOTE:** The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

To remove the stand:

1. Place the monitor on a soft cloth or cushion.
2. Press and hold the stand release button.
3. Lift the stand up and away from the monitor.

VESA wall mounting (optional)

(Screw dimension: M4 x 10 mm).

Refer to the instructions that come with the VESA-compatible wall mounting kit.

1. Place the monitor panel on a soft cloth or cushion on a stable flat table.
2. Remove the stand. (See [Removing the monitor stand](#))

3. Use a Phillips crosshead screwdriver to remove the four screws securing the plastic cover.
4. Attach the mounting bracket from the wall mounting kit to the monitor.
5. Mount the monitor on the wall. For more information, see the documentation that shipped with the wall mounting kit.

NOTE: For use only with UL or CSA or GS-listed wall mount bracket with minimum weight or load bearing capacity of 14.0 kg.

Operating the monitor

Power on the monitor

Press the Power button to turn On the monitor.

Using the front-panel controls

Use the control buttons on the front of the monitor to adjust settings.

The following table describes the front-panel buttons:

2  Down	Use the Down button to adjust (decrease ranges) items in the OSD menu.
3  OK	Use the OK button to confirm your selection.
4  Back	Use the Back button to go back to the previous menu.

Using the On-Screen Display (OSD) menu

Accessing the menu system

 **NOTE: If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.**

1. Press the  button to launch the OSD menu and display the main menu.

 **NOTE: Auto Adjust is only available when you use the analog (VGA) connector.**

2. Press the  and  buttons to move between the setting options. As you move from one icon to another, the option name is highlighted. See the following table for a complete list of all the options available for the monitor.
3. Press the  or  or  button once to activate the highlighted option.

 **NOTE: The directional buttons (and the OK button) displayed may differ according to the menu you've selected. Use available buttons to make your selection.**

4. Press the  and  buttons to select the desired parameter.
5. Press  to enter the submenu and then use the directional buttons, according to the indicators on the menu, to make your changes.
6. Select the  button to return to the main menu.

Icon	Menu and Submenus	Description

Brightness/Contrast

Use this menu to activate **Brightness/Contrast** adjustment.

Brightness

Brightness adjusts the luminance of the backlight.

Press the  button to increase the brightness and press the  button to decrease the brightness (min. 0 / max. 100).

Contrast

Adjusts the **Brightness** first, and then adjust the **Contrast** only if further adjustment is necessary.

Press the  button to increase the contrast and press the  button to decrease the contrast (min. 0 / max. 100).

The **Contrast** function adjusts the degree of difference between darkness and lightness on the monitor screen.

Auto Adjust

Use this menu to activate automatic setup and adjust menu.

Auto Adjust allows the monitor to self-adjust to the incoming video signal. After using **Auto Adjust**, you can further tune your monitor by using the **Pixel Clock** (Coarse) and **Phase** (Fine) controls under **Display** settings.

Auto Adjustment in Progress...

NOTE: In most cases, **Auto Adjust** produces the best image for your configuration.

NOTE: **Auto Adjust** option is only available when you are using the analog (VGA) connector.

Select the **VGA** input when you are using the VGA connector. Press the  button to confirm the selection.

DVI-D

Select the **DVI-D** input when you are using the DVI-D connector. Press the  button to confirm the selection.

DP

Select the **DP** input when you are using the DisplayPort (DP) connector. Press the  button to confirm the selection.

HDMI

Select the **HDMI** input when you are using the HDMI connector. Press the  button to confirm the selection.

Auto Select

Turning on the function allows you to scan for available input sources.

Reset Input Source

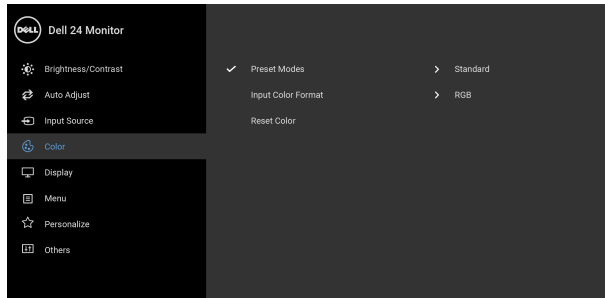

Resets your monitor input settings to the factory settings.

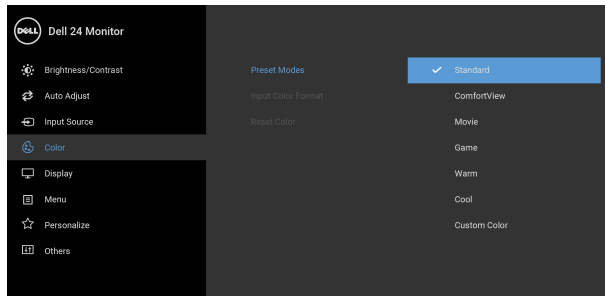

Color

Use **Color** to adjust the color setting mode.

Preset Modes

Allows you to choose from a list of preset color modes.

- **Standard:** Loads the monitor's default color settings. This is the default preset mode.
- **ComfortView:** Decreases the level of blue light emitted from the screen to make viewing more comfortable for your eyes.

WARNING: The possible long-term effects of blue light emission from the monitor may cause personal injury such as digital eye strain, eye fatigue and damage to the eyes. Using monitor for extended periods of time may also cause pain in parts of body such as neck, arm, back and shoulder.

Preset Modes

To reduce the risk of eye strain and neck/arm/back/shoulder pain from using the monitor for long periods of time, we suggest you to:

1. Set the distance of the screen between 20 to 28 in. (50 - 70 cm) from your eyes.
 2. Blink frequently to moisten your eyes or wet your eyes with water after prolonged usage of the monitor.
 3. Take regular and frequent breaks for 20 minutes every two hours.
 4. Look away from your monitor and gaze at a distant object at 20 feet away for at least 20 seconds during the breaks.
 5. Perform stretches to relieve tension in the neck, arm, back, and shoulders during the breaks.
- **Movie:** Loads color settings ideal for movies.
 - **Game:** Loads color settings ideal for most gaming applications.
 - **Warm:** Presents colors at lower color temperatures. The screen appears warmer with a red/yellow tint.
 - **Cool:** Presents colors at higher color temperatures. The screen appears cooler with a blue tint.
 - **Custom Color:** Allows you to manually adjust the color settings.

Use the arrow buttons to adjust the three colors (R, G, B) values and create your own preset color mode.

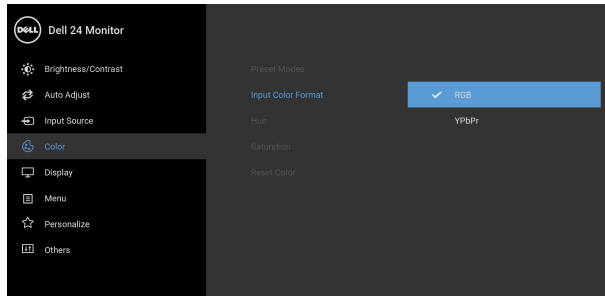

Input Color Format

Allows you to set the video input mode to:

- **RGB:** Select this option if your monitor is connected to a computer (or media player) using the VGA, DVI-D, DisplayPort, or HDMI cable.
- **YPbPr:** Select this option if your media player supports only YPbPr output.

Press the  button to confirm the selection.

Hue

This feature can shift the color of the video image to green or purple. This is used to adjust the desired flesh tone color. Use  or  to adjust the hue from '0' to '100'.

NOTE: Hue adjustment is available only when you select **Movie** or **Game** preset mode.

Saturation

This feature can adjust the color saturation of the video image. Use  or  to adjust the saturation from '0' to '100'.

NOTE: Saturation adjustment is available only when you select **Movie** or **Game** preset mode.

Reset Color

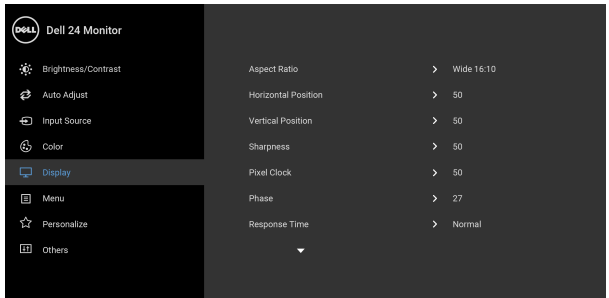

Resets your monitor's color settings to the factory settings.

Display

Use the **Display** menu to adjust images.

Aspect Ratio

Adjusts the image ratio to **Wide 16:10**, **4:3**, or **5:4**.

Horizontal Position

Use  or  to adjust the image left or right (min. 0 / max. 100).

Vertical Position

Use  or  to adjust the image up or down (min. 0 / max. 100).

NOTE: Horizontal Position and **Vertical Position** adjustments are only available for VGA input.

Sharpness This feature can make the image look sharper or softer.

Use  or  to adjust the sharpness from '0' to '100'.

Pixel Clock The **Phase** and **Pixel Clock** adjustments allow you to adjust your monitor to your preference.

Use  or  to adjust for best image quality.

Phase If satisfactory results are not obtained using the **Phase** adjustment, use the **Pixel Clock** (coarse) adjustment and then use **Phase** (fine), again.

NOTE: Pixel Clock and **Phase** adjustments are only available for VGA input.

Response Time Allows you to set the **Response Time** to **Normal** or **Fast**.

Reset Display Resets all display settings to the factory preset values.

Menu

Select this option to adjust the settings of the OSD, such as, the languages of the OSD, the amount of time the menu remains on screen, and so on.

Language

Sets the OSD display to one of the eight languages (English, Spanish, French, German, Brazilian Portuguese, Russian, Simplified Chinese, or Japanese).

Rotation

Rotates the OSD by 90 degrees counter-clockwise and anticlockwise. You can adjust the menu according to your [Display Rotation](#).

Transparency

Select this option to change the menu transparency by pressing the  and  buttons (min. 0 / max. 100).

Timer

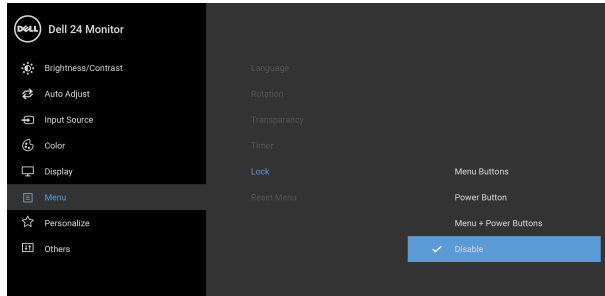

Sets the length of time the OSD will remain active after the last time you pressed a button.

Use  or  to adjust the slider in 1 second increments, from 5 to 60 seconds.

Lock

With the control buttons on the monitor locked, you can prevent people from accessing the controls. It also prevents accidental activation in multiple monitors side-by-side setup.

- **Menu Buttons:** All Menu/function buttons (except the Power button) are locked and not accessible by the user.
- **Power Button:** Only the Power button is locked and not accessible by the user.
- **Menu + Power Buttons:** Both the Menu/function & Power buttons are locked and not accessible by the user.

The default setting is **Disable**.

Alternative Lock Method [for Menu/function buttons]: You can also press and hold the Menu/function button next to the Power button for 4 seconds to set the lock options.

NOTE: To unlock the button(s), press and hold the Menu/function button next to the Power button for 4 seconds.

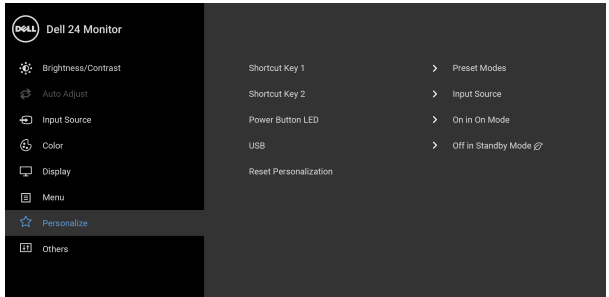

Reset Menu

Resets all OSD settings to the factory preset values.

Personalize

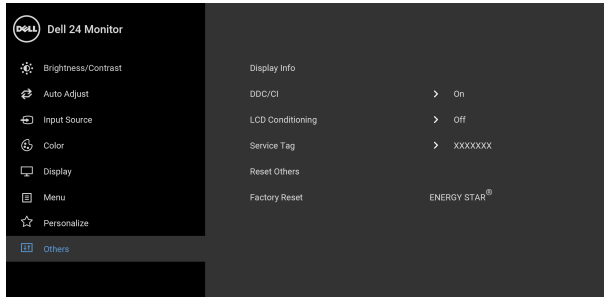

Shortcut Key 1	Allows you to choose a feature from Preset Modes , Brightness/Contrast , Auto Adjust , Input Source , Aspect Ratio , or Rotation and set it as a shortcut key.
Shortcut Key 2	
Power Button LED	Allows you to set the power LED indicator on or off to save energy.
USB	Allows you to enable or disable USB function during monitor standby mode. NOTE: This option is only available when the USB upstream cable is unplugged. If the USB upstream cable is connected, USB follows the USB host power status and the option is not accessible.
Reset Personalization	Resets all settings under the Personalize menu to the factory preset values.

Others

Select this option to adjust the OSD settings, such as **DDC/CI**, **LCD Conditioning**, and so on.

Display Info

Displays the monitor's current settings.

DDC/CI

DDC/CI (Display Data Channel/Command Interface) allows your monitor parameters (brightness, color balance, and etc.) to be adjustable via the software on your computer. You can disable this feature by selecting **Off**. Enable this feature for best user experience and optimum performance of your monitor.

LCD Conditioning

Helps reduce minor cases of image retention. Depending on the degree of image retention, the program may take some time to run. You can enable this feature by selecting **On**.

Service Tag

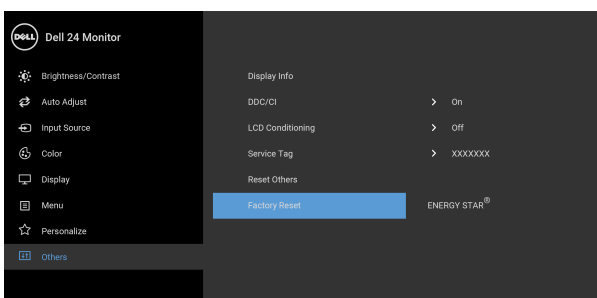

Displays the service tag of your monitor. This string is required when you look for phone support, check your warranty status, update drivers on Dell's website, etc.

Reset Others

Resets all settings under the **Others** menu to the factory preset values.

Factory Reset

Restore all preset values to the factory default settings. These are also the settings for ENERGY STAR[®] tests.

OSD warning message

When the monitor does not support a particular resolution mode, you will see the following message:

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is 1920 x 1200.

 **NOTE: The message may be slightly different according to the connected input signal.**

When you adjust the **Brightness** level for the first time, the following message appears:

 **NOTE: If you select Yes, the message will not appear next time when you intend to change the Brightness setting.**

When **USB** is set to **On in Standby Mode** for the first time, the following message appears:

NOTE: If you select **Yes**, the message will not appear next time when you intend to change the USB setting.

You will see the following message before the **DDC/CI** function is disabled:

You will see the following message before the **Lock** function is activated:

NOTE: The message may be slightly different according to the selected settings.

When the monitor goes into Standby mode, the following message appears:

Activate the computer and wake up the monitor to gain access to the **OSD**.

NOTE: The message may be slightly different according to the connected input signal.

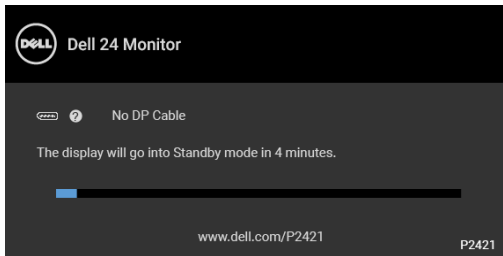

The OSD functions only in the normal operation mode. If you press any button other than the power button during the Standby mode, the following message will appear depending on the selected input:

Activate the computer and the monitor to gain access to the [OSD](#).

NOTE: The message may be slightly different according to the connected input signal.

If either VGA, DVI-D, DisplayPort, or HDMI input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

NOTE: The message may be slightly different according to the connected input signal.

When **Factory Reset** is selected, the following message appears:

See [Troubleshooting](#) for more information.

Setting the maximum resolution

To set the maximum resolution for the monitor:

In Windows[®] 7, Windows[®] 8, and Windows[®] 8.1:

1. For Windows[®] 8 and Windows[®] 8.1 only, select the Desktop tile to switch to classic desktop.
2. Right-click on the desktop and click **Screen Resolution**.
3. Click the dropdown list of the **Screen Resolution** and select **1920 x 1200**.
4. Click **OK**.

In Windows[®] 10:

1. Right-click on the desktop and click **Display settings**.
2. Click **Advanced display settings**.
3. Click the dropdown list of **Resolution** and select **1920 x 1200**.
4. Click **Apply**.

If you do not see 1920 x 1200 as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or portable computer:

- Go to <https://www.dell.com/support>, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (portable or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

Using the tilt, swivel, and vertical extension

NOTE: The following instructions are applicable only for attaching the stand that was shipped with your monitor. If you are attaching a stand that you purchased from any other source, follow the set up instructions that were included with the stand.

Tilt, swivel

With the stand attached to the monitor, you can tilt and swivel the monitor for the most comfortable viewing angle.

NOTE: The stand is not installed at the factory when shipped.

Vertical extension

NOTE: The stand extends vertically up to 130 mm. The figure below illustrates how to extend the stand vertically.

Rotating the monitor

Before you rotate the monitor, your monitor should be fully vertically extended ([Vertical extension](#)) and fully tilted up to avoid hitting the bottom edge of the monitor.

Rotate clockwise

Rotate counterclockwise

- NOTE:** To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. To download the graphics driver, go to www.dell.com/support and see the Download section for Video Drivers for latest driver updates.
- NOTE:** When in the Portrait View Mode, you may experience performance degradation in graphic-intensive applications (3D Gaming and etc.).

Adjusting the rotation display settings of your system

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your system.

 **NOTE: If you are using the monitor with a non-Dell computer, you need to go to the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.**

To adjust the Rotation Display Settings:

1. Right-click on the desktop and click **Properties**.
2. Select the **Settings** tab and click **Advanced**.
3. If you have an ATI graphics card, select the **Rotation** tab and set the preferred rotation.
4. If you have an NVIDIA graphics card, click the **NVIDIA** tab, in the left-hand column select **NVRotate**, and then select the preferred rotation.
5. If you have an Intel[®] graphics card, select the **Intel** graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.

 **NOTE: If you do not see the rotation option or it is not working correctly, go to www.dell.com/support and download the latest driver for your graphics card.**

Troubleshooting

⚠ WARNING: Before you begin any of the procedures in this section, follow the [Safety instructions](#).

Self-test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

1. Turn Off both your computer and the monitor.
2. Unplug the video cable from the computer.
3. Turn On the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

or

or

or

4. This box also appears during normal system operation, if the video cable becomes disconnected or damaged.
5. Turn Off your monitor and reconnect the video cable; then turn On both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

To run the built-in diagnostics:

1. Ensure that the screen is clean (no dust particles on the surface of the screen).
2. Press and hold **Button 4** for about 4 seconds until a pop menu appears.
3. Use **Button 1** or **Button 2** to select the diagnostic tool and use **Button 3** to confirm. A gray test pattern appears at the beginning of the diagnostic program.
4. Carefully inspect the screen for abnormalities.
5. Press **Button 1** again to change the test patterns.
6. Repeat steps 4 and 5 to inspect the display in red, green, blue, black, white, and text screens.
7. Press **Button 1** to end the diagnostic program.
