Statement of Volatility – Dell 3333dn/3335dn

⚠ **CAUTION: A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.**

The Dell 3333dn/3335dn Mono Laser Printer contains both volatile and non-volatile (NV) components. Volatile components lose their data immediately after power is removed from the component. Non-volatile (NV) components continue to retain their data even after power is removed from the component. The following NV components are present on the system board.

Table 1. List of Volatile and Non-Volatile Components on System Board

Mono Laser Products	Memory Application	Memory Size	Memory Type	Volatile/ Non-Volatile	User Data
3333dn/3335dn	Firmware, Usage, Statistics, Configuration	128 MB (code store)	NAND	Non-volatile	Yes
	EEPROM	16 Kb	EEPROM	Non-volatile	Yes
	Base Memory	128 MB	SDRAM	Volatile	No
	Scan Memory	64 Kb	EEPROM	Non-volatile	No
	Optional Memory	128, 256, 512 MB	SDRAM	Volatile	No
	Cartridge	16 Kb	EEPROM	Non-volatile	No
	PC Drum	NA	NA	NA	NA
	Fuser	NA	NA	NA	NA

⚠ **CAUTION: All other components on the motherboard will lose data if power is removed from the system. Primary power loss (unplugging the power cord) will cause user data on the memory to be lost.**

Notes:

- EEROM may be used and could contain user data.
- User Data utilized by memory type.
