

# Statement of Volatility – Dell 2360dn

**△ CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

The Dell 2360dn Mono Laser Printer contains both volatile and non-volatile (NV) components. Volatile components lose their data immediately after power is removed from the component. Non-volatile (NV) components continue to retain their data even after power is removed from the component. The following NV components are present on the system board.

**Table 1. List of Volatile and Non-Volatile Components on System Board**

Mono Laser Products	Memory Application	Memory Size	Memory Type	Volatile/ Non-Volatile	User Data
<b>2360dn</b>	Firmware, Usage, Statistics, Configuration	128 MB (code store)	NAND	Non-volatile	Yes
	EEPROM	32 Kb	EEPROM	Non-volatile	Yes
	Base Memory	256 MB	DDR3 SDRAM	Volatile	No
	Optional Memory	N/A	DDR3 SDRAM	Volatile	No
	Cartridge	8 Kb	FRAM	Non-volatile	No
	Imaging Unit	8 Kb	FRAM	Non-volatile	No
	Fuser	N/A	N/A	N/A	N/A

**△ CAUTION:** All other components on the motherboard will lose data if power is removed from the system. Primary power loss (unplugging the power cord) will cause user data on the memory to be lost.

**Notes:**

- EEPROM may be used and could contain user data.
- User Data utilized by memory type.
