Version 1.5 Support Matrix based on release 1803

Notes, cautions, and warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

About this Manual

This manual provides information about supported software and hardware configurations for Dell EMC Hybrid Cloud System for Microsoft.

This manual is valid for all versions of Dell EMC Hybrid Cloud System for Microsoft.

NOTE: The information in this manual is subject to change without notice. Contact your Dell EMC Support representative for more information.

NOTE: Where appropriate, this manual lists both the minimum supported version and the latest supported version. Dell EMC recommends using the latest supported version.

IMPORTANT: The recommendations and guidelines in this document are based on industry best practices, CPS Standard architecture requirements, and Dell EMC lab testing. If not followed, the functionality and or management of the solution may not work as designed or expected, and problem resolution may be limited, delayed, or not viable.

CAUTION: The addition of any non-DHCS hardware to your system will cause the Patch and Update process to fail.

Switches

The Dell Hybrid Cloud System for Microsoft uses Dell Networking S4048-ON, which is a 10/40GbE top-of-rack open networking switch. It is a high-density, 1RU 48-port 10GbE switch with six 40GbE uplinks and ultra-low-latency, non-blocking performance to ensure line-rate performance.

The solution supports the following firmware version:

Table 5. S4048-ON
