Dell PowerConnect W-Series Instant Access Point

Quick Start Guide

This Quick Start Guide will assist you to quickly connect and configure Dell PowerConnect W-Series Instant Access Point (IAP). To learn more about Dell PowerConnect W-Series Instant Access Points and for detailed configuration information, see the *Dell PowerConnect W-Series Instant Access Point 6.1.2.3-2.0.0.0 User Guide* at support.dell.com/manuals.

Getting Started

1. **Get an IP address**—You will require an IP address to connect to a network. To get an IP address from a DHCP server in your network:

   a. Connect the IAP to an intermediate gateway router or switch that has connectivity to the DHCP server.

   > **Note:** Use the Enet0 port on W-IAP134/135 for uplink connections to a switch or router. The Enet1 port does not provide wired connectivity.
   b. Power on the IAP. The IAP receives an IP address provided by the switch or router. Power the IAP either by plugging to an Ethernet cable coming from a 802.3af Power over Ethernet (PoE) switch or device, or by connecting it to an AC adapter.

   > **Note:** After the IAP starts up, it will try to do DHCP if static IP configuration is not available. If DHCP times out, a default IP within 169.254.x.y/16 subnet will be configured on the IAP.

2. **Connect to the provisioning Wi-Fi network**—Connect a wireless enabled client to the provisioning Wi-Fi network. The provisioning network name is **instant**. Table 1 shows how to find the **instant** wireless network using Windows 7 or Mac OS. Click the wireless network icon and select **instant network**.
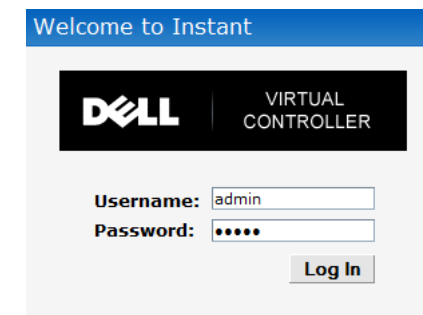

Table 1 *Connect to the provisioning network in Microsoft Windows and Apple Mac OS)*

Microsoft Windows

Apple Mac OS

3. **Log in to the Dell PowerConnect W-Series Instant Access Point WebUI**—Open a web browser and navigate to instant.dell-pcw.com/ to access the Dell Instant login screen. If you enter any other URL, you are redirected to the **Dell PowerConnect W-Series Instant Access Point** login screen. In the login screen, as shown in Figure 1, enter the following credentials:

   - Username - **admin**
   - Password - **admin**

Figure 1 *WebUI Login Screen*

4. **Select the Country Code**—A **Country Code** box, as shown in Figure 2 might appear after you successfully log in to the WebUI. Select your country code from the drop-down menu.
Figure 2 *Country Code box*

> **Note:** The Country Code option will not appear, and cannot be set for IAPs designated for US, Japan, and Israel.

Creating a Network

Dell PowerConnect W-Series Instant Access Point Access Point user interface is a standard web based interface that allows you to configure and monitor an IAP network.
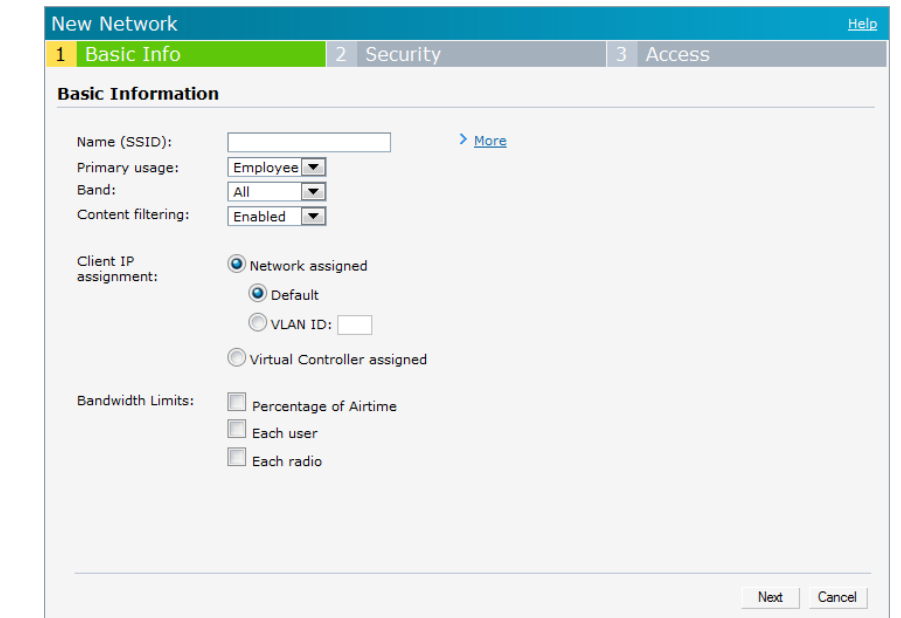

5. In the **Network** window, click the **New** link, as shown in Figure 3.

Figure 3 *Instant User Interface*

6. The **New Network** window appears, as shown in Figure 4.

Figure 4 *New Network window*

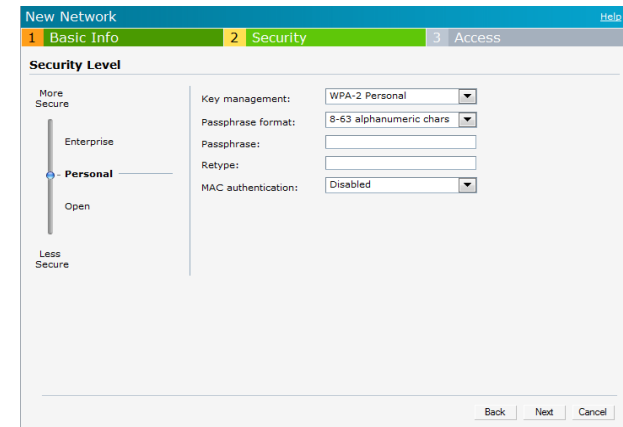

7. In the **Basic Info** tab, shown in Figure 4, enter a name for the network in the **Name (SSID)** text box. Click **Next** to continue.

8. In the **Security** tab, shown in Figure 5, enter a passphrase in the **Passphrase and Retype** fields. Click **Next** to continue.

> **Note:** It is recommended that you note the passphrase for future use.

Figure 5 *Security tab*

> **Note:** For additional security level options, refer to the *Dell PowerConnect W-Series Instant Access Point 6.1.2.3-2.0.0.0 User Guide.*

9. In the **Access** tab, the default option is **Unrestricted**. For information about the Network-based and Role-based access rule settings, see the *Dell PowerConnect W-Series Instant Access Point 6.1.2.3-2.0.0.0 User Guide* at **support.dell.com/manuals**.

**Figure 6** *Access tab*

10. Click **Finish** to close the window. The new network that you created is now added to the **Networks** window.

Verifying WebUI and LEDs

After setting up Dell PowerConnect W-Series Instant Access Point and adding a network, you can use the WebUI and the LEDs to verify the operating status of the Dell PowerConnect W-Series Instant Access Point.

Using the WebUI—Verify the newly created network is displayed in the **Networks** window, as shown in Figure 7.

Figure 7 *Verify the newly added wireless network*

11. Disconnect client from the instant provisioning network.

12. Connect client to the network you created, as described in step 2.

13. Login to the Dell PowerConnect W-Instant Access Point WebUI, as in step 3.

The instant provisioning network is automatically deleted and should no longer be present.

> **Note:** It is recommended that you change the administrator login password. For more information, see *Management Authentication Settings* in the *Dell PowerConnect W-Series Instant Access Point 6.1.2.3-2.0.0.0 User Guide* at **support.dell.com/manuals**.

- **Using LEDs**—Use the LEDs to verify the operating status of the IAP. The LED functionality is described in the Install Guide included with your Dell Instant Access Point in the section titled Verifying Post-Installation Connectivity.
  - PWR: Steady Green indicating that power is on and the device is ready.
  - ENET: Green or Amber (depending on Ethernet link speed).
  - 11A/N: Steady Green or OFF, indicating the state of the 5GHz radio.
  - 11B/G/N: Steady Green, indicating the state of the 2.4GHz radio.

> **Note:** Use the Enet0 port on W-IAP134/135 for uplink connections to a switch or router. The Enet1 port does not provide wired connectivity.
