Intel 10G 4P X520/I350 rNDC— Information Update

The following table lists the Dell PowerEdge systems and the minimum BIOS versions required to support the Intel Ethernet 10G 4P X520/I350 rack Network Daughter Card (rNDC) on your system.

NOTE: You may encounter errors if the BIOS version on your system is earlier than the version listed in the following table.

PowerEdge System	Minimum BIOS Version
R720	1.3.6
R620	1.3.6
R820	1.2.6

To upgrade the BIOS, go to **dell.com/support** and download the latest system BIOS version. Follow the instructions included in the compressed download file to install the update on your system.
