Dell™ PowerVault™ DL Backup to Disk Appliance Physical Disk Placement for Automatic Disk Configuration

If your Dell™ PowerVault™ MD1000 enclosure is shipped with eight SATA physical disks in slots 7 through 14, move the disk in slot 7 to slot 0 *before* attaching the MD1000 to the Dell PowerVault DL Backup to Disk Appliance. This will allow you to take full advantage of the automatic disk configuration capability described in the *Dell PowerVault DL Backup to Disk Appliance Quick Start Guide* at **support.dell.com/manuals**.

Alternately, you can also enable full automatic disk configuration by moving all eight physical disks to slots 0 through 7.
