

Systems Management Tools And Documentation

8.0.2

Supported Systems

Release Notes

Version

8.0.2

Release Date:

December 2014

Previous Version

8.0.1

Supported Systems for Version 8.0.2

- For information about the supported Systems, the operating systems supported by these systems, and the components that can be installed on these systems, see the *Systems Software Support Matrix* at dell.com/openmanagemanuals and browse to **OpenManage Software 8.0.1**

DVD Structure

This DVD contains Systems Management tools and documentation. When you insert the DVD, the following options are displayed:

- **Server Administrator**

This option allows you to install Server Administrator.

Server Administrator is designed for system administrators to manage systems locally and remotely on a network. Server Administrator allows system administrators to focus on managing their entire network by providing comprehensive one-to-one systems management. For more information on Server Administrator, see the *Server Administrator User's Guide* at dell.com/openmanagemanuals and browse to **OpenManage Server Administrator 8.0.1**

- **iDRAC Service Module**

This option allows you to install iDRAC Service Module.

The Integrated Dell Remote Access Controller(iDRAC) Service Module is a lightweight optional software application that can be installed on Dell's 12th generation of PowerEdge or later servers. The iDRAC Service Module complements iDRAC interfaces – Graphical User Interface (GUI), RACADM CLI and Web Service Management (WSMAN) with additional monitoring data.

iDRAC Service Module v1.0 provides the following services:

- Operating system Information

- Lifecycle Controller Log replication into OS
- Automatic System Recovery
- WMI Management Providers

- **DRAC Command Line Tools**

Application for remote management of systems with DRAC functions.

- **Active Directory Snap-In Utility**

Provides an extension snap-in to Microsoft Active Directory to manage Dell Specific Active Directory objects.

- **IPMI Utilities (Baseboard Management Controller Utilities)**

Application for remote management of BMC functions.

- **Online Documentation**

Links to documentation for systems, systems management software products, peripherals, and RAID controllers in the Support website.

- **View Release Notes**

Displays this Release Notes.

- **Dell OpenManage Suite**

Provides an overview of the Systems Management Suite of products.

For information on installing and a brief overview of the systems management tools, see the *Server Administrator Installation Guide* at **SYSMGMT\sradmin\docs\install_guide** and the *Systems Management Tools and Documentation Installation Guide* at **SYSMGMT\ManagementStation\docs\install_guide** respectively.

The guides mentioned above are also available at **dell.com/openmanagemanuals**.

Contacting Dell

Note: Dell provides several online and telephone-based support and service options. If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog. Availability varies by country and product, and some services may not be available in your area.

To contact Dell for sales, technical support, or customer-service issues:

1. Go to **dell.com/contactdell**.
2. Select your country or region from the interactive world map. When you select a region, the countries for the selected regions are displayed.
3. Select the appropriate language under the country of your choice.
4. Select your business segment. The main support page for the selected business segment is displayed.
5. Select the appropriate option depending on your requirement.

Note: If you have purchased a Dell system, you may be asked for the Service Tag.
