## PDR62

**Message** The rebuild failed due to errors on the target *arg1*.

**Arguments**

- **arg1** = physical disk

**Detailed Description** It is not possible to rebuild data that resides on a defective disk.

**Recommended Response Action** Replace the target disk. If a rebuild does not automatically start after replacing the disk, then initiate the Rebuild task. You may need to assign the new disk as a hot spare to initiate the rebuild.

**Category** Storage (PDR = Physical Disk)

# PFM Event Messages

## PFM0001

<b>Message</b>	The value of <i>arg1</i> is greater than the upper critical threshold.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = name</li></ul>
<b>Detailed Description</b>	The utilization value of the sensor identified in the message is higher than the upper critical threshold.
<b>Recommended Response Action</b>	Check the work load of the server and reduce the workload if necessary to bring the system performance into required ranges. For more information about the specified values, see the relevant product documentation available at the support site.
<b>Category</b>	System Health (PFM = System Performance Event)
<b>Severity</b>	Severity 1 (Critical)
<b>LCD Message</b>	The value of <name> is greater than the upper critical threshold.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PFM0002

<b>Message</b>	The value of <i>arg1</i> is greater than the upper warning threshold.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = name</li></ul>
<b>Detailed Description</b>	The utilization value of the sensor identified in the message is higher than the upper warning threshold.
<b>Recommended Response Action</b>	Check the work load of the server and reduce the workload if necessary to bring the system performance into required ranges. For more information about the specified values, see the relevant product documentation available at the support site.
<b>Category</b>	System Health (PFM = System Performance Event)

## PFM0003

**Message** The value of *arg1* is less than the lower warning threshold.

**Arguments**

- ***arg1*** = name

**Detailed Description** The utilization value of the sensor identified in the message is lower than the lower warning threshold value.

**Recommended Response Action** The workload on server is almost zero. Consider assigning additional workloads to the server.

**Category** System Health (PFM = System Performance Event)

**Severity** Severity 3 (Informational)

**Redfish Event Type**

*No alerts are applicable for this message*

## PFM0004

**Message** The value of *arg1* is within specified limits.

**Arguments**

- ***arg1*** = name

**Detailed Description** The value of the sensor identified in the message is within specified limits.

**Recommended Response Action** No response action is required.

**Category** System Health (PFM = System Performance Event)

## PR34

**Message** *arg1* failed after exceeding retry attempt limit.

**Arguments**

- ***arg1*** = job ID

**Detailed Description** The job was attempted but failed unexpectedly. An AC Power loss, system crash, or other interruption during the job processing can cause this failure.

**Recommended Response Action** Recreate and resubmit the job.

**Category** Configuration (PR = Part Replacement)

## PR35

**Message** Power Supply slot *arg1* firmware update will be performed during next system reboot.

**Arguments**

- ***arg1*** = PS slot number

**Detailed Description** The Part Replacement feature has detected a firmware difference for the power supply and will start the firmware update process upon system reboot.

**Recommended Response Action** No response action is required.

**Category** Configuration (PR = Part Replacement)

## PR36

**Message** Version change detected for *arg1* firmware. Previous version: *arg2* , Current version: *arg3*

- Arguments**
- ***arg1*** = device name
  - ***arg2*** = previous version
  - ***arg3*** = current version

**Detailed Description** The system has detected a different firmware version than previously recorded for the indicated device. This may be due to a firmware update, rollback, or part replacement.

**Recommended Response Action** No response action is required.

# PST Event Messages

## PST0000

<b>Message</b>	Unrecognized Post Code.
<b>Detailed Description</b>	The BIOS provided a progress code to the iDRAC, but that progress code is not recognized by the current iDRAC firmware.
<b>Recommended Response Action</b>	Do one of the following: 1) Update the iDRAC firmware. 2) Restart the system and retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Unrecognized Post Code.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0001

<b>Message</b>	System Power On.
<b>Detailed Description</b>	System BIOS detected the system is turned on.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	System Power On.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0002

<b>Message</b>	CPU Microcode load.
<b>Detailed Description</b>	System BIOS has started loading the processor microcode.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)

<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	CPU Microcode load.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0003

<b>Message</b>	Chipset Initialization.
<b>Detailed Description</b>	System BIOS has started chipset initialization.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Started chipset initialization.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0004

<b>Message</b>	Memory Configuration.
<b>Detailed Description</b>	System BIOS has started memory configuration.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Memory configuration started.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0005

<b>Message</b>	Shadow BIOS.
<b>Detailed Description</b>	System BIOS has started copying image from flash to system memory.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)

**LCD Message** Shadow BIOS operation started.

**Redfish Event Type**

*No alerts are applicable for this message*

## PST0006

**Message** Multiprocessor Initialization.

**Detailed Description** System BIOS has started initialization multiprocessor support.

**Recommended Response Action** No response action is required.

**Category** System Health (PST = BIOS POST)

**Severity** Severity 3 (Informational)

**LCD Message** Started multiprocessor initialization.

**Redfish Event Type**

*No alerts are applicable for this message*

## PST0007

**Message** POST processing start.

**Detailed Description** System BIOS has started power on self test.

**Recommended Response Action** No response action is required.

**Category** System Health (PST = BIOS POST)

**Severity** Severity 3 (Informational)

**LCD Message** Started power on self test (POST).

**Redfish Event Type**

*No alerts are applicable for this message*

## PST0008

**Message** System Management Mode (SMM) initialization.

**Detailed Description** System BIOS has started System Management Mode (SMM) initialization.

**Recommended Response Action** No response action is required.

**Category** System Health (PST = BIOS POST)

**Severity** Severity 3 (Informational)

**LCD Message** System Management Mode (SMM) initialization.

## Redfish Event Type

## PST0014

<b>Message</b>	Extended Memory test completed.
<b>Detailed Description</b>	System completed extended memory test.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Extended Memory test completed.
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## PST0064

<b>Message</b>	Display sign-on.
<b>Detailed Description</b>	System BIOS is displaying power on splash screen.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Display sign-on.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0065

<b>Message</b>	PCI configuration.
<b>Detailed Description</b>	System BIOS is configuring PCI devices.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	PCI configuration.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0080

<b>Message</b>	An issue was detected. System at boot F1/F2 prompt. Requires entry to continue.
<b>Detailed Description</b>	System is at the F1/F2 prompt because the system BIOS detected an issue other than "No bootable devices".
<b>Recommended Response Action</b>	Check post display screen for details. Press F1 to continue boot, or press F2 to go to setup.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 2 (Warning)
<b>LCD Message</b>	System BIOS at F1/F2 prompt.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0081

<b>Message</b>	No bootable devices.
<b>Detailed Description</b>	System is at F1/F2 prompt because the system BIOS was unable to detect a bootable device.
<b>Recommended Response Action</b>	Make sure a bootable device is attached to the system and enabled in BIOS setup. If device is attached and enabled, remove and reapply power to server. If the problem persists, contact your service provider. Refer to the product documentation to choose a convenient contact method.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 1 (Critical)
<b>LCD Message</b>	No bootable devices found. Check bootable devices.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0082

<b>Message</b>	In BIOS Setup Menu.
<b>Detailed Description</b>	System is at the BIOS Setup Menu.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	In BIOS Setup Menu.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0083

<b>Message</b>	In BIOS Boot Menu.
<b>Detailed Description</b>	System is at the BIOS Boot Menu.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	In BIOS Boot Menu.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0084

<b>Message</b>	Automated Task application.
<b>Detailed Description</b>	System started the Automated Task application.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Automated Task application.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0085

<b>Message</b>	Performing CSIOR.
<b>Detailed Description</b>	System is performing CSIOR (Collect System Inventory on Restart).
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Performing CSIOR.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0086

<b>Message</b>	In Lifecycle Controller.
<b>Detailed Description</b>	System BIOS has launched the Lifecycle Controller user interface.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	In Lifecycle Controller.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0087

<b>Message</b>	Initializing iDRAC.
<b>Detailed Description</b>	System BIOS is initializing iDRAC.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Initializing iDRAC
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0088

<b>Message</b>	Preparing to Boot.
<b>Detailed Description</b>	System BIOS is preparing to boot the system.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>LCD Message</b>	Preparing to Boot.
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0089

<b>Message</b>	A problem was detected during Power-On Self-Test (POST).
<b>Detailed Description</b>	A problem was detected during Power-On Self-Test (POST). The next logged message contains more specific details for the detected issue.
<b>Recommended Response Action</b>	Review the next logged message for the recommended response action to resolve the problem.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0090

<b>Message</b>	A problem was detected related to the previous server boot.
<b>Detailed Description</b>	A problem was detected related to the previous server boot. The next logged message contains more specific details for the detected issue.
<b>Recommended Response Action</b>	Review the next logged message for the recommended response action to resolve the problem.
<b>Category</b>	System Health (PST = BIOS POST)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## PST0091

<b>Message</b>	A problem was detected in Memory Reference Code (MRC).
<b>Detailed Description</b>	A problem was detected in Memory Reference Code (MRC). The next logged message contains more specific details for the detected issue.
<b>Recommended Response Action</b>	Review the next logged message for the recommended response action to resolve the problem.

## PSU100

**Message** Power supply *arg1* is offline.

**Arguments**

- ***arg1*** = power supply unit

**Detailed Description** The power supply unit identified in the message is offline, because of the one of the following reasons: 1) The power supply unit is not correctly seated. 2) The power cable may not be connected properly or disconnected. 3) The power supply unit has failed. 4) There is an input power failure.

**Recommended Response Action** Do one of the following to resolve the issue: 1) reseal the power supply unit. 2) Reconnect the power cable to the power supply unit. 3) Install a new power supply unit 4) Restore the input power supply.

## PSU1000

**Message** Power supply cable has been removed from *arg1*.

**Arguments**

- ***arg1*** = PSU Sensor Name

**Detailed Description** The power supply unit is not receiving input AC power. The power cable may not be connected properly or removed. This can happen if there is an AC failure or problems with the power strip attached to the enclosure power supply.

**Recommended Response Action** Reconnect the power cable to the power supply unit if it was disconnected. Restore the input AC power supply. Make sure the power supply is restored to the enclosure from the mains.

## PSU1001

**Message** *arg1* has failed.

**Arguments**

- **arg1** = PSU Sensor Name

**Detailed Description** The enclosure detected that a power supply unit has failed.

**Recommended Response Action** Check for other messages related to the state of the power supply unit/enclosure. These may help determine the cause of this event. Contact technical support if the issue still persists.

## PSU1003

**Message** *arg1* is switched OFF.

**Arguments**

- ***arg1*** = PSU Sensor Name

**Detailed Description** The power supply is not providing any power. This may be because the power supply switch is in the off position or the power supply has failed.

**Recommended Response Action** Check whether the power switch on the power supply unit is turned off or on. If it is turned off, turn it on. If the problem is not corrected, verify that the power cord is attached and functional. See the storage hardware documentation for more information.

## PSU8521

**Message** PSU *arg1* exceeded upper temperature threshold and has been turned off.

**Arguments**

- ***arg1*** = slotnum

**Detailed Description** The power supply unit (PSU) identified in the message was turned off because the temperature exceeded the high temperature threshold in the unit.

**Recommended Response Action** Remove and reinsert the PSU or remove AC power and reapply power to the PSU to get it functional again.

**Category** Audit (PSU = Power Supply)

**Severity** Severity 1 (Critical)

**Trap/EventID** 8329

**Redfish Event Type** Alert

## PSU8522

**Message** PSU *arg1* reported input under voltage fault and has been turned off.

**Arguments**

- ***arg1*** = slotnum

**Detailed Description** The power supply unit (PSU) identified in the message was turned off because the input under voltage fault occurred.

**Recommended Response Action** 1) Check PSU AC input power source. 2) Remove AC power and reapply power to the PSU to get it functional again. 3) If the issue persists, contact technical support.

**Category** Audit (PSU = Power Supply)

**Severity** Severity 1 (Critical)

## PSU8523

**Message** PSU *arg1* reported input over current fault and has been turned off.

**Arguments**

- **arg1** = slotnum

**Detailed Description** The power supply unit (PSU) identified in the message was turned off because the input over current fault occurred.

**Recommended Response Action** 1) Verify system load is within PSU capacity and no short circuits are present in the system. 2) Remove AC power and reapply power to the PSU to get it functional again. 3) If the issue persists, contact technical support.

# PSU8524

**Message** The system power is automatically recovered because of an AC brownout in the power supply unit (PSU).

**Detailed Description** The system power is automatically recovered because of an AC brownout in the power supply unit (PSU).

**Recommended Response Action** Do one of the following: 1) Make sure that the system load is within the power capacity of power supply unit (PSU) and no short circuit exists.2) Make sure that the AC input to the PSU is correct. For information about input voltage specifications, see the "CMC Technical Guide". 3) Disconnect the power supply and reconnect. If the issue persists, contact your service provider.

## Arguments

- **arg1** = PSU number

**Detailed Description** The power supply unit (PSU) identified in the message is disabled because of a mismatch in the input voltage and therefore the PSU is not supported on the server.

**Recommended Response Action** Install a power supply unit (PSU) that has similar input voltage. For information about supported PSUs, see the product documentation available on the support site.

## PWR8557

**Message** The System Input Power Cap is too low to be enforced using the current Power Supply configuration.

**Detailed Description** The current Power Cap setting cannot be enforced. This may be the result of changing the redundancy mode or by changing the PSUs. The power cap setting must be increased to be usable.

**Recommended Response Action** Increase the Power Cap value. To increase the Power Cap do one of the following: 1) Using CMC Web interface: Select "Chassis Overview" -> Power -> Configuration and then adjust System Input Power Cap values. 2) Run the following RACADM command at the command line interface: "config -g cfgChassisPower -o cfgChassisPowerCap <value>". Try setting the power cap above the lower bound displayed on the power configuration page.

## PWR8560

**Message** Unable to turn on I/O Module *arg1* due to insufficient chassis power.

**Arguments**

- ***arg1*** = IOM slot name

**Detailed Description** Unable to turn on the I/O Module identified in the message due to insufficient chassis power.

**Recommended Response Action** Utilize the Chassis Management Controller/Management Module (CMC/MM) web interface to check available power and I/O Module power requirements. If sufficient power is available, restart the CMC/MM and retry the operation. If sufficient power is not available due to an insufficient number of PSUs, add additional PSU(s) and reinsert the I/O Module.

## PWR8561

**Message** Unable to power on server *arg1* because of iDRAC communication issue.

**Arguments**

- ***arg1*** = server number

**Detailed Description** The Chassis Management Controller is unable to communicate with the Server iDRAC service processor and the server could not be powered on. This situation may occur when iDRAC is rebooting.

**Recommended Response Action** Wait for three minutes and then retry the operation. If the issue persists, remove and reinsert the server and wait for the iDRAC to finish restarting.

**Category** Audit (PWR = Power Usage)

**Severity** Severity 1 (Critical)

## PWR8562

**Message** Unable to power on the server *arg1* before power on timer expired.

**Arguments**

- ***arg1*** = server number

**Detailed Description** Unable to power on the server before the power on timer has expired. This happens if the server did not show power on status change within 30 seconds after the power on operation was initiated. This issue may also occur when iDRAC is rebooting.

**Recommended Response Action** The Server may need more time to power on. Wait for ten seconds and check the power status. If the server was not powered on, retry the operation. If the issue persists, remove and reinsert the server, wait for the iDRAC to complete startup, and retry the operation.

## PWR8563

**Message** Unable to turn on Server *arg1* due to I/O fabric inconsistency.

**Arguments**

- ***arg1*** = server number

**Detailed Description** The Server identified in the message did not turn on due to a fabric mismatch between the I/O Module and the Mezzanine card on the Server.

**Recommended Response Action** Make sure that the hardware compatibility between the I/O Module (IOM) and the Mezzanine (Mezz) card is correct. Check the M1000e Hardware Manual for correct component compatibility.

## PWR8564

**Message** Unable to turn on the Server *arg1* because the power request exceeded the System Input Power Cap.

**Arguments**

- ***arg1*** = slot number

**Detailed Description** The server identified in the message was not turned on because the available power is less than the requested power.

**Recommended Response Action** Utilize the Chassis Management Controller web interface to check the System Input Max Power Capacity Power and server power requirements. If sufficient power is available, retry the operation. Otherwise, increase the System Input Power Cap value.

## PWR8565

**Message** Unable to turn off the Server *arg1* due to iDRAC communication issue.

**Arguments**

- ***arg1*** = server number

**Detailed Description** The Chassis Management Controller is unable to communicate with the iDRAC service processor for the Server identified in the message and the Server could not be turned off. This situation may occur when iDRAC is rebooting.

**Recommended Response Action** Do the following: 1) Wait for a few minutes for the iDRAC service processor to complete startup. 2) Retry the operation. 3) If the issue persists, reset the iDRAC and wait a few minutes for the iDRAC startup to complete before retrying the operation.

## PWR8567

**Message** Unable to turn off Server *arg1* on a power cycle action.

**Arguments**

- ***arg1*** = server number

**Detailed Description** Unable to turn off the Server on a power cycle operation. This happens if the Server did not show a "power off" status change within the expected time.

**Recommended Response Action** The Server could have taken more time to turn off than expected. If the Server is turned off, turn on to complete the power cycle. If the Server has not completed a power cycle, retry the operation.

## PWR8568

**Message** Server *arg1* did not gracefully shutdown before the timer expired.

**Arguments**

- ***arg1*** = slot number

**Detailed Description** The server identified in the message did not gracefully shutdown before the CMC shutdown timer expired. This happens if the server did not show power off status change within 60 seconds after the operation was initiated, or if the OS in the server has not successfully shutdown.

**Recommended Response Action** Check if the OS in the server identified in the message has successfully shutdown, if not, manually complete the shutdown or wait for the shutdown to complete normally. If the issue persists, perform a forced power down of the server identified in the message.

## PWR8583

<b>Message</b>	Chassis Management Controller is unable to turn on server- <i>arg1</i> because unacknowledged 110V PSUs are present.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = slot number</li></ul>
<b>Detailed Description</b>	To enable 110V operation, the Allow 110VAC Operation feature must be enabled. If the feature is not enabled, the server turn-on operation will not be processed.
<b>Recommended Response Action</b>	On the Power Configuration page, in the Web UI, select the Allow 110VAC Operation for power supplies and retry the operation. Using the RACADM utility, run the following command, "racadm config -g cfgChassisPower -o cfgChassisAllow110VACOperation 1".

## PWR8596

**Message** Chassis Management Controller is unable to turn on server- *arg1* because PSU redundancy is lost and the available power is insufficient.

## Arguments

- **arg1** = slot number

**Detailed Description** The Chassis Management Controller cannot turn on the server identified in the message, because PSU redundancy is lost or PSUs are removed. Sufficient power is not available for the operation.

**Recommended Response Action** Make sure there is enough power supply to distribute power. Go to, the Chassis Overview > Power > Power Budget Status. In the Total Input Power Available For Allocation field, view the available power. To add more power, insert more PSUs or remove unused components from the chassis. When enough power is available, retry the operation.

**Category** Audit (PWR = Power Usage)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

## PWR8597

**Message** The Power Supply Unit (PSU) *arg1* is turned off because it is not supported by the Chassis.

## Arguments

- **arg1** = PSU number

**Detailed Description** The identified Power Supply Unit (PSU) is turned off because it is not supported by the Chassis.

**Recommended Response Action** Replace the PSU identified in the message with an appropriate unit, and then retry the operation. For a list of PSUs that are compatible, consult the system Owners Manual or contact your service provider.

## PWR8598

**Message** The Power Supply Unit (PSU) *arg1* is turned off because it is not compatible with the other PSUs used in the Chassis.

## Arguments

- **arg1** = PSU number

**Detailed Description** The Power Supply Unit (PSU) identified in the message is turned off because it is not compatible with the other PSUs in the Chassis.

**Recommended Response Action** Replace the PSU with an appropriate unit, and then retry the operation. For a list of PSUs that are compatible, consult the system Owners Manual or contact your service provider.

## PWR8601

<b>Message</b>	The multinode sled power button is disabled.
<b>Detailed Description</b>	The power buttons for all multinode sleds in the chassis are disabled. The operation to disable the power button is only applicable to the multinode sleds available, and does not affect other servers in the chassis.
<b>Recommended Response Action</b>	To enable the chassis power button use the CMC RACADM command line interface (CLI) or CMC Web interface. At the CLI, enter "racadm config -g cfgChassisPower -o cfgChassisSledPowerButtonEnable 1". Using the Web interface, click Server Overview > Power > Control. Clear the Disable power button for all multinode sleds in the chassis" check box.

## PWR8654

**Message** Chassis Management Controller (CMC) is unable to send power allocation information to the component *arg1* - *arg2* .

**Arguments**

- ***arg1*** = component name
- ***arg2*** = component id

**Detailed Description** CMC could not successfully send the power allocation information to the component identified in the message, because either iDRAC is stopped after the power allocation was sent by CMC or the communication between CMC and iDRAC has ended.

**Recommended Response Action** Perform a Virtual Reseat operation of the component, and then retry the operation. To virtually reseat a component, log in to the CMC Web interface, select Chassis Overview > Troubleshooting > Reset Components > select the option corresponding to the component, and then click Virtual Reseat.

## PWR8655

**Message** Chassis Management Controller (CMC) is unable to turn on the component *arg1* - *arg2* because of insufficient power. The minimum required power is *arg3* AC Watts, but only *arg4* AC Watts is available.

**Arguments**

- ***arg1*** = component name
- ***arg2*** = slot number

- **arg3** = min power
- **arg4** = available power

Detailed Description	CMC could not successfully turn on the component identified in the message, because of insufficient power available.
Recommended Response Action	Make sure there is sufficient power available, and then retry the operation. To view the available power, on the CMC Web interface, click Chassis Overview > Power > Power Budget Status. The available power is displayed in the Total Input Power Available For Allocation field. To increase available power, add more PSUs or remove unused components from the Chassis.

## PWR8656

Message	Chassis Management Controller (CMC) is unable to turn on the component <i>arg1</i> - <i>arg2</i> because of insufficient power.
Arguments	<ul style="list-style-type: none"> <li>· <b>arg1</b> = component name</li> <li>· <b>arg2</b> = slot number</li> </ul>
Detailed Description	CMC could not successfully turn on the component identified in the message, because of insufficient power available.
Recommended Response Action	Make sure there is sufficient power available, and then retry the operation. To increase available power, add more PSUs, use PSUs with higher voltage inputs or a higher power rating, remove unused components from the Chassis, or change the redundancy policy to Redundancy Alerting Only or Non-redundant.

## PWR8669

Message Unable to turn on the server *arg1* because of an inconsistency between the chassis and server components.

Arguments

- *arg1* = server number

Detailed Description The server identified in the message could not be successfully turned on because of incompatibility between the chassis PCIe components and mezzanine card.

Recommended Response Action Make sure that the chassis PCIe components and mezzanine card are compatible. For information about compatibility of hardware components, see the Modular System Chassis Hardware Manual available at the support site.

## PWR8670

Message Unable to turn on server *arg1* because the required power *arg2* AC Watts exceeds the subsystem Connector Limit *arg3* AC Watts for IO modules, Blowers and Servers.

## Arguments

- **arg1** = slot ID
- **arg2** = power level
- **arg3** = power limit

**Detailed Description** The server identified in the message cannot be turned on if the Connector Limit for the subsystems identified in the message is exceeded .

**Recommended Response Action** Make sure the system operates within the subsystem Connector Limit for the components specified. To review power budget information select Chassis Overview -> Power -> Budget Status. Turn off unused components within the subsystem to make power available for the server to turn on or turn off low priority servers and try the operation again.

## PWR8672

**Message** The server in slot *arg1* does not have a *arg2* mezzanine card in slot *arg3* .

- Arguments**
- ***arg1*** = server slot number
  - ***arg2*** = card type
  - ***arg3*** = mezzanine position number

**Detailed Description** The server identified in the message does not have a card in the Mezzanine slot as identified in the message. A mezzanine card position is identified with the following numbers: For quarter-width server, the position number is 1. For half-width server mezzanine C & B maps to position numbers 1 & 2 respectively. For full-width server, mezzanine C & B on the upper- or left part of the server maps to position numbers 1 & 2 respectively. Mezzanine C & B on the lower- or right part of the server maps to position numbers 3 & 4 respectively.

**Recommended Response Action** Insert a mezzanine card in the slot identified in the message.

# PWR8690

**Message** Unable to turn on the server *arg1* because of an inconsistency between the I/O module and mezzanine card.

**Arguments**  
· ***arg1*** = server number

**Detailed Description** The server identified in the message could not be successfully turned on because of incompatibility between the I/O module and mezzanine card.

**Recommended Response Action** Make sure that the I/O module and mezzanine card are compatible. For information about compatibility of hardware components, see the Modular System Chassis Hardware Manual.

## RAC Event Messages

### RAC001

<b>Message</b>	The command was successful.
<b>Detailed Description</b>	The command was successful.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC002

<b>Message</b>	General failure.
<b>Detailed Description</b>	An unknown error occurred.
<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command. 2) Reset iDRAC and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC003

<b>Message</b>	Missing required parameter <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = parameter name</li></ul>
<b>Detailed Description</b>	One or more required parameters for the method are missing.
<b>Recommended Response Action</b>	Refer to the profile document and provide the required parameters.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC004

<b>Message</b>	Invalid parameter value for <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = parameter</li></ul>
<b>Detailed Description</b>	The parameter value for the given parameter is invalid.
<b>Recommended Response Action</b>	Provide a valid parameter value for specified parameter.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC005

<b>Message</b>	Mismatch in AttributeName and AttributeValue count.
<b>Detailed Description</b>	The name value pairs do not match in the input specified in the method invocation parameters.
<b>Recommended Response Action</b>	Provide a valid (AttributeName, AttributeValue) pair.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC006

<b>Message</b>	The attribute value cannot be changed because it is of read-only type.
<b>Detailed Description</b>	The attribute value cannot be changed because it is of read-only type.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC007

<b>Message</b>	The attribute value is outside the acceptable range.
<b>Detailed Description</b>	The attribute value is outside the acceptable range.
<b>Recommended Response Action</b>	Enter a value within the range and retry the operation. For more information about the acceptable range, refer to the Dell Lifecycle Controller Remote Services Quick Start Guide and DCIM Profile Documents available at the support site.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC008

<b>Message</b>	Invalid boolean Value
----------------	-----------------------

<b>Detailed Description</b>	The attribute boolean value is not valid for the specified attribute.
<b>Recommended Response Action</b>	Provide valid boolean value for the specified attribute.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC009

<b>Message</b>	Input string length exceeds maximum length.
<b>Detailed Description</b>	The requested operation cannot be completed because the length of the input string exceeds maximum length allowed.
<b>Recommended Response Action</b>	Verify the string length and retry the operation. Refer to the Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC010

<b>Message</b>	Input contains invalid character.
<b>Detailed Description</b>	The input value for the attribute being set contains characters that are not allowed.
<b>Recommended Response Action</b>	Retry the operation using valid input characters. Refer to the Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0100

<b>Message</b>	The Smart Card is removed. Further communication is not possible.
<b>Detailed Description</b>	Communication with the Smart Card has been lost.
<b>Recommended Response Action</b>	Insert a valid Smart Card and try again.
<b>Category</b>	Audit (RAC = RAC Event)

**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0101

**Message** The inserted Smart Card is not valid or the Smart Card reader is not supported.  
**Detailed Description** The data returned is not in a known format.  
**Recommended Response Action** This error may occur because:1. Smart Card is invalid. Insert a valid Smart Card and try again. 2. Check connection between reader and system.3. There may be an issue with the Smart Card reader. Try reinstalling the reader driver or use a different reader.  
**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0102

**Message** The Smart Card Logon plug-in is not installed. Install the plug-in from the iDRAC Web GUI to log in using Smart Card.  
**Detailed Description** The software to communicate with the Smart Card is not loaded in this browser. Smart Card can be used for log in only if the appropriate Smart Card software is installed in the browser.  
**Recommended Response Action** Install the plug-in prompted by the iDRAC Web GUI to log in using Smart Card.  
**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0103

**Message** This browser does not support Smart Card logon on iDRAC. Use Internet Explorer version 7.0 or later to use this feature.  
**Detailed Description** Smart Card login is only supported in newer versions of Internet Explorer.  
**Recommended Response Action** See the iDRAC help text or documentation for a list of supported browsers.  
**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**

*No alerts are applicable for this message*

## RAC0104

<b>Message</b>	An incorrect PIN was entered.
<b>Detailed Description</b>	An invalid PIN was entered. Too many log in attempts with a Smart Card login can result in a user being locked out of the system.
<b>Recommended Response Action</b>	1. Enter a valid Smart Card PIN and try again.2. Use a different Smart Card.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0105

<b>Message</b>	The Smart Card reader cannot be detected. Check whether the reader is installed correctly.
<b>Detailed Description</b>	Communication with the Smart Card reader cannot be established, or is lost.
<b>Recommended Response Action</b>	This error may occur because:1. Check connection between reader and system.2. There may be an issue with the Smart Card reader. Try reinstalling the reader driver or use a different reader.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0106

<b>Message</b>	The Smart Card cannot be detected. Insert the Smart Card correctly.
<b>Detailed Description</b>	Communication with the Smart Card reader is established and a Smart Card is inserted, but there are problems reading the Smart Card.
<b>Recommended Response Action</b>	This error may occur because:1. Make sure the Smart Card is seated correctly.2. Smart Card is invalid. Insert a valid Smart Card and try again. 3. Check connection between reader and system.4. There may be an issue with the Smart Card reader. Try reinstalling the reader driver or use a different reader.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0107

<b>Message</b>	The inserted Smart Card cannot be recognized. Ensure that the correct Smart Card CSP drivers are installed.
<b>Detailed Description</b>	Communication with the Smart Card reader is established and a Smart Card is inserted, but there are problems accessing the Smart Card. The appropriate Cryptographic Service Provider (CSP) drivers are not installed.
<b>Recommended Response Action</b>	There may be an issue with the Smart Card Cryptographic Service Provider (CSP) drivers. Use the client OS to install CSP driver. If the OS has problem with Smart Card, then there will have problem using the Smart Card. So make sure Smart Card can login with Windows OS.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0108

<b>Message</b>	An internal error is encountered. Insert a valid Smart Card and try again.
<b>Detailed Description</b>	A non-specific error is detected when accessing the Smart Card.
<b>Recommended Response Action</b>	Review the error message preceding or following this message.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC011

<b>Message</b>	A configuration Job already exists, cannot process more set operations.
<b>Detailed Description</b>	A Job has already been scheduled to apply pending iDRAC attribute values. Additional configuration operations are not allowed while there is a configuration Job pending execution.
<b>Recommended Response Action</b>	Wait for the scheduled Job to complete before setting more attributes.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0113

<b>Message</b>	Remote Syslog Port value is invalid: Valid range is 1-65535 or 0x1-0xFFFF.
<b>Detailed Description</b>	Data entered is not an integer value in the valid range of numbers.
<b>Recommended Response Action</b>	Enter a Remote Syslog Port number. Expected range: [1-65535 or 0x1-0xFFFF].
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0115

<b>Message</b>	The Destination IP Address value is invalid.
<b>Detailed Description</b>	The IPv4 address does not conform to the addressing standard or the supported IPv4 address range.
<b>Recommended Response Action</b>	Enter the Destination IP Address value between [1.0.0.0 - 223.255.255.255 excluding: 127 (first octet), 0 or 255 (last octet)].
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0116

<b>Message</b>	Invalid Destination IPv6 Address.
<b>Detailed Description</b>	The entered IPv6 address does not conform to the addressing standard or the supported IPv6 address range.
<b>Recommended Response Action</b>	Enter a valid Destination IPv6 Address.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0117

<b>Message</b>	SD card is unavailable.
----------------	-------------------------

<b>Detailed Description</b>	The SD card is not present, or communication with the SD card is lost. This could result in reduced functionality and capabilities.
<b>Recommended Response Action</b>	This error may occur because: 1. Make sure the SD card is seated correctly. 2. The SD card is invalid. Insert a valid SD card of size greater than 256MB and try again.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0118

<b>Message</b>	Unsupported vFlash SD card detected.
<b>Detailed Description</b>	The SD card is not a valid vFlash SD card. The use of non-Dell media prevents the use of some extended capabilities and functions.
<b>Recommended Response Action</b>	Insert a supported vFlash SD card.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC012

<b>Message</b>	Unable to perform the operation because of insufficient user privileges.
<b>Detailed Description</b>	The user credentials supplied do not have sufficient privileges to perform the operation.
<b>Recommended Response Action</b>	Retry the operation with user credentials authorized for the requested operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0120

<b>Message</b>	The selected partition size exceeds the available space.
<b>Detailed Description</b>	Requested partition size exceeds the available space.
<b>Recommended Response Action</b>	Enter a partition size smaller than the unused space on the vFlash SD card.

**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0121

**Message** SD card is not initialized.  
**Detailed Description** SD card not readable. The card must be initialized.  
**Recommended Response Action** Initialize the SD card before it can be used.  
**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0124

**Message** Invalid label: Label must be exclusively alphanumeric characters.  
**Detailed Description** All characters in the label must be alphanumeric.  
**Recommended Response Action** Enter all alphanumeric characters.  
**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0126

**Message** The label value is invalid. Expected range: 1-6 alphanumeric characters.  
**Detailed Description** The label field is empty. A label is required to create an empty partition.  
**Recommended Response Action** Enter a label that contains one to six alphanumeric characters.  
**Category** Audit (RAC = RAC Event)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## RAC0127

<b>Message</b>	The specified size must be a non-fractional numeric value.
<b>Detailed Description</b>	Size must be a whole number.
<b>Recommended Response Action</b>	Enter a whole number for the size field.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0128

<b>Message</b>	An error has occurred in vFlash.
<b>Detailed Description</b>	A non-specific error has been detected while accessing the vFlash.
<b>Recommended Response Action</b>	Try the operation again in a few minutes. If the problem persists, reset iDRAC before trying the operation again.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0129

<b>Message</b>	An error has occurred while initializing the SD card.
<b>Detailed Description</b>	No status response was returned after completing the initialization request.
<b>Recommended Response Action</b>	Try reinitializing the card again in a few minutes.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC013

<b>Message</b>	Unable to run the method because an invalid FGDD is entered.
----------------	--

<b>Detailed Description</b>	The method cannot be run because an invalid FQDD is entered.
<b>Recommended Response Action</b>	Enter a valid FQDD and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0130

<b>Message</b>	An error has occurred while creating a partition.
<b>Detailed Description</b>	A separate message will provide more detail about this error which was detected while creating the vFlash partition.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0131

<b>Message</b>	An error has occurred while deleting a partition.
<b>Detailed Description</b>	A separate message will provide more detail about this error which was detected while deleting the vFlash partition.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0132

<b>Message</b>	An error has occurred while formatting a partition.
<b>Detailed Description</b>	A separate message will provide more detail about this error which was detected while formatting the vFlash partition.
<b>Recommended Response Action</b>	No response action is required.

<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0133

<b>Message</b>	An error has occurred while downloading a partition.
<b>Detailed Description</b>	A non-specific error has been detected when downloading the partition.
<b>Recommended Response Action</b>	Try downloading the partition again in a few minutes. If the problem persists, reset iDRAC before trying the operation again.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0134

<b>Message</b>	This operation is unavailable for non-vFlash SD cards.
<b>Detailed Description</b>	The SD card is not a valid vFlash SD card. The use of non-Dell media prevents the use of some extended capabilities and functions.
<b>Recommended Response Action</b>	Insert a valid vFlash SD card.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0135

<b>Message</b>	An error has occurred while detaching a partition.
<b>Detailed Description</b>	A separate message will provide more detail about this error which was detected while detaching the vFlash partition.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0136

<b>Message</b>	An error has occurred while attaching a partition.
<b>Detailed Description</b>	A separate message will provide more detail about this error which was detected while attaching the vFlash partition.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0137

<b>Message</b>	An error has occurred while changing the read-write state for the partition.
<b>Detailed Description</b>	A separate message will provide more detail about this error which was detected while changing the read-write state of the vFlash partition.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0138

<b>Message</b>	A valid certificate is not loaded.
<b>Detailed Description</b>	The retrieved certificate came back as a null or empty document.
<b>Recommended Response Action</b>	Upload a valid certificate.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC014

<b>Message</b>	Unable to run the method because an invalid attribute name is entered.
<b>Detailed Description</b>	The method cannot be run because an invalid attribute name is entered.
<b>Recommended Response Action</b>	Enter a valid attribute name and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0140

<b>Message</b>	Firmware update has failed.
<b>Detailed Description</b>	The firmware update process returned an Update Failed status.
<b>Recommended Response Action</b>	Try the firmware update again in a few minutes. If the problem persists, try uploading the firmware through another interface such as Web GUI, RACADM, or DUPs.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0141

<b>Message</b>	Firmware update verification failed: The update status is unknown.
<b>Detailed Description</b>	Firmware update verification process failed; the firmware update status is unknown.
<b>Recommended Response Action</b>	Verify if the firmware has been updated by checking the new firmware version number. If it has not been updated try the firmware update again in a few minutes. If the problem persists, try uploading the firmware through another interface such as Web GUI, RACADM, or DUPs.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0142

<b>Message</b>	File is not valid for iDRAC firmware update.
----------------	--

<b>Detailed Description</b>	The firmware update process identified an invalid firmware image.
<b>Recommended Response Action</b>	Upload a valid iDRAC firmware image.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0146

<b>Message</b>	Firmware rollback has failed.
<b>Detailed Description</b>	Firmware rollback operation failed.
<b>Recommended Response Action</b>	Try the operation after a few minutes. If the problem persists, reset iDRAC and repeat the operation.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0147

<b>Message</b>	Rollback firmware is not available.
<b>Detailed Description</b>	Firmware rollback image is missing or is corrupt.
<b>Recommended Response Action</b>	Upload a new firmware image.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC0148

<b>Message</b>	Unable to retrieve the batteries information. The system is powered off.
<b>Detailed Description</b>	While the system is powered off it is unable to retrieve information about the batteries.
<b>Recommended Response Action</b>	Turn the system on to view this information.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)

## Redfish Event Type

*No alerts are applicable for this message*

# RAC0149

<b>Message</b>	Unable to retrieve the fan information. The system is powered off.
<b>Detailed Description</b>	While the system is powered off it is unable to retrieve information about the fans.
<b>Recommended Response Action</b>	Turn the system on to view this information.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC015

<b>Message</b>	Unable to run the method because the input value is not one of the possible values for AttributeName <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = attribute name</li></ul>
<b>Detailed Description</b>	The input attribute value is not valid for the attribute identified in the message.
<b>Recommended Response Action</b>	Provide valid attribute value for the attribute identified in the message and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC0150

<b>Message</b>	Unable to retrieve the intrusion sensor information. The system is powered off.
<b>Detailed Description</b>	While the system is powered off it is unable to retrieve information about system intrusion.
<b>Recommended Response Action</b>	Turn the system on to view this information.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0151

<b>Message</b>	Unable to retrieve the removable flash media information. The system is powered off.
<b>Detailed Description</b>	While the system is powered off it is unable to retrieve information about removable flash media.
<b>Recommended Response Action</b>	Turn the system on to view this information.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)

## RAC027

<b>Message</b>	Unable to set values for Speed or Duplex because Auto Negotiation is Enabled.
<b>Detailed Description</b>	Unable to set static values for Speed or Duplex when the Auto Negotiation attribute is enabled.
<b>Recommended Response Action</b>	Disable Auto Negotiation in order to set values for Speed or Duplex.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0270

<b>Message</b>	IPv4 and IPv6 are disabled.
<b>Detailed Description</b>	This is a warning message that continuing this operation does not allow subsequent GUI interactions to this NIC.
<b>Recommended Response Action</b>	Enable IPv4 or IPv6 before continuing the operation.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0271

<b>Message</b>	Continuing will lock user account.
<b>Detailed Description</b>	Locking the user account prevents them from gaining access to iDRAC.
<b>Recommended Response Action</b>	Press OK to lock this user account. This action will prevent future access for this user. If undesired press Cancel.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0272

<b>Message</b>	Disabling NIC will prevent the user from accessing the iDRAC remotely through Web GUI, Remote Racadm, Ssh, and Telnet. Local Racadm and serial interface will continue to work.
----------------	---

<b>Detailed Description</b>	If the Enable NIC checkbox is cleared, remote access to iDRAC is disabled.
<b>Recommended Response Action</b>	Disable NIC only if remote access is undesired.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0273

<b>Message</b>	iDRAC access will be limited to running the Racadm utility on the local server or using the serial interface.
<b>Detailed Description</b>	If the Enable NIC checkbox is cleared, remote access to iDRAC is disabled.
<b>Recommended Response Action</b>	Enable remote access to access iDRAC remotely.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0274

<b>Message</b>	See the iDRAC user documentation for more information on using the Racadm utility or the serial interface.
<b>Detailed Description</b>	If the Enable NIC checkbox is cleared, remote access to iDRAC is disabled.
<b>Recommended Response Action</b>	See iDRAC user documentation for more information on using racadm.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0275

<b>Message</b>	Click OK to disable the NIC. Click Cancel to keep the setting unchanged.
<b>Detailed Description</b>	If the Enable NIC checkbox is cleared, remote access to iDRAC is disabled.
<b>Recommended Response Action</b>	Disable NIC only if remote access is undesired.
<b>Category</b>	Audit (RAC = RAC Event)

## RAC0294

<b>Message</b>	The Character Accumulate Interval value is invalid. Expected range: 1-255.
<b>Detailed Description</b>	The amount of time iDRAC waits before sending a partial Serial Over LAN (SOL) data packet. This parameter is specified in milliseconds. It is recommended to use 10 milliseconds for optimal performance.
<b>Recommended Response Action</b>	Enter a valid Character Accumulate Interval value. Expected range: 1-255.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0295

<b>Message</b>	The Character Send Threshold value is invalid. Expected range: 1-255.
<b>Detailed Description</b>	This is the number of characters per Serial Over LAN (SOL) data packet. When the number of characters accepted by iDRAC is equal to or greater than the Character Send Threshold value, iDRAC starts transmitting SOL data packets that contain the numbers of characters equal to or less than the Character Send Threshold value. If a packet contains fewer characters than this value, it is defined to be a partial SOL data packet. It is recommended to use 255 characters for optimal performance.
<b>Recommended Response Action</b>	Enter a valid Character Send Threshold value. Expected range: 1-255.
<b>Category</b>	Audit (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC041

Message The set operation on the event filters failed.

Detailed Description The event filters set operation did not complete successfully due to invalid input parameters.

<b>Recommended Response Action</b>	Verify the specified input parameters and retry the operation. Refer to the Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC042

<b>Message</b>	Invalid number of input parameters.
<b>Detailed Description</b>	The number of input parameters provided is not valid to perform the operation.
<b>Recommended Response Action</b>	Verify that all required parameters are provided. Refer to the Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC043

<b>Message</b>	Unable to update some event filter settings.
<b>Detailed Description</b>	Some event filter settings were not updated due to problems encountered processing the input parameters.
<b>Recommended Response Action</b>	Verify the input parameters provided and retry the operation. Refer to the Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC044

<b>Message</b>	Unable to update some event filter settings.
<b>Detailed Description</b>	Some event filter settings were not updated due to problems encountered processing the input parameters.
<b>Recommended Response Action</b>	Verify the input parameters provided and retry the operation. Refer to the Lifecycle Controller-Remote Services documentation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## RAC045

<b>Message</b>	Event filter does not exist for input parameter combination.
<b>Detailed Description</b>	The combination of input parameters provided did not match any event filters.
<b>Recommended Response Action</b>	Verify the combination of input parameters and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC046

<b>Message</b>	Unsupported event notification for the event filter specified.
<b>Detailed Description</b>	The event notification selected is not supported for the event filter specified.
<b>Recommended Response Action</b>	Refer to the iDRAC User Guide and Lifecycle Controller documentation and retry the operation with a valid event notification selection on the specified filter.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC047

<b>Message</b>	Unsupported event action for the specified event filter.
<b>Detailed Description</b>	The event action selected is not supported for the event filter specified.
<b>Recommended Response Action</b>	Refer to the iDRAC User Guide and Lifecycle Controller documentation and retry the operation with a valid event action selection on the specified filter.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC048

<b>Message</b>	The operation was successful.
<b>Detailed Description</b>	The operation completed successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC049

<b>Message</b>	Resource allocation failure.
<b>Detailed Description</b>	The operation did not complete successfully because of lack of memory or file space in the iDRAC.
<b>Recommended Response Action</b>	Reset the iDRAC and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC050

<b>Message</b>	Invalid country code.
<b>Detailed Description</b>	The country code is not entered in the correct format or does not exist. Refer to ISO 3166 for the correct country code format.
<b>Recommended Response Action</b>	Enter country code in the correct format as defined in ISO 3166. For example, United States = US.

<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0500

<b>Message</b>	There are no batteries to be displayed.
----------------	---

<b>Detailed Description</b>	Batteries cannot be displayed. This error may occur if the host system is powered off or there is a bad or disconnected cable for batteries connected to the controller.
<b>Recommended Response Action</b>	1. Check if the host system is powered off or shutdown. 2. Verify that the batteries are connected properly.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0501

<b>Message</b>	There are no physical disks to be displayed.
<b>Detailed Description</b>	Physical disks cannot be displayed. This error may occur if the host system is powered off or the physical disks are removed. This may result in communication loss while retrieving controller data.
<b>Recommended Response Action</b>	1. Check if the host system is powered off or shutdown. 2. Check if the physical disks are inserted into the enclosure or attached to the backplane. 3. There are no out-of-band capable controllers detected.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0502

<b>Message</b>	There are no virtual disks to be displayed.
<b>Detailed Description</b>	Virtual disks cannot be displayed. This error may occur if the host system is powered off or there are no virtual disks created.
<b>Recommended Response Action</b>	1. Check if the host system is powered off or shutdown. 2. Check if virtual disks are created.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0503

<b>Message</b>	There are no out-of-band capable controllers to be displayed.
<b>Detailed Description</b>	Out-of-band controllers cannot be displayed. This error may occur if the host system is powered off, or controllers are removed or disconnected.

<b>Recommended Response Action</b>	Check if the host system is powered off or shutdown.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0504

<b>Message</b>	There are no enclosures to be displayed.
<b>Detailed Description</b>	Enclosures cannot be displayed. This error may occur if the host system is powered off, there is no enclosure connected to the controller, or there is a bad or disconnected adapter cable for the enclosure.
<b>Recommended Response Action</b>	1. Check if the host system is ON. 2. Check if the Storage Enclosure is ON. 3. Verify that the adapter cables are properly connected and there are no bent pins.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0505

<b>Message</b>	There are no devices to be displayed.
<b>Detailed Description</b>	Devices are not displayed. This error may occur because these components are removed or disconnected.
<b>Recommended Response Action</b>	1. Check if the host system is ON. 2. Check if the Storage Enclosure is ON. 3. Verify that the adapter cables are properly connected and there are no bent pins.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0506

<b>Message</b>	You do not have privileges to perform this operation.
<b>Detailed Description</b>	This error occurs when the user tries to access a program or function that is beyond user granted privileges.
<b>Recommended Response Action</b>	Contact the system administrator to perform the operation or grant the required privileges.
<b>Category</b>	Storage (RAC = RAC Event)
<b>Severity</b>	Severity 1 (Critical)

## RAC0513

<b>Message</b>	There are no virtual disks to be displayed.
<b>Detailed Description</b>	There are no virtual disks to be displayed. There may be no virtual disks created, the controller(s) may not be in RAID mode, or there may be pending creation or deletion jobs that have not completed.
<b>Recommended Response Action</b>	Check the following: 1) Check if the server is turned off. If the server is turned off, turn it on and wait until POST completes. 2) If no virtual disks are created, to start the virtual disk creation process, click <code>#{create_virtuallink}</code> . 3) If create virtual disk operation(s) are in a pending state, complete the creation process. To complete the virtual disk(s) creation, go to the Pending Operations page and create a configuration job on the appropriate controller. 4) If delete virtual disk operation(s) are in pending state, then cancel the operation. To cancel delete virtual disk pending operation(s), go to the Pending Operations page and delete all pending operation(s) on the appropriate controller. 5) If the Controller(s) are in HBA mode, switch the controller(s) to RAID mode. To switch controller(s) to RAID mode using the F2 System Setup utility, go to Device Settings > RAID Controller > Controller Management > Advanced Controller Management > Switch to RAID mode.

## RAC0514

<b>Message</b>	Unable to create virtual disk(s) on the selected controller.
<b>Detailed Description</b>	Virtual disk(s) cannot be created because of one or more reasons identified in the Recommended Response Action.
<b>Recommended Response Action</b>	Check the following: 1) If no physical disk drives are available for virtual disk (VD) creation, install additional physical disk drives. 2) If the maximum number of VDs that can be created on the controller has been reached, a new VD cannot be created until an existing VD is deleted. 3) If the maximum number of VDs supported by drive

group has been created, a new VD cannot be created until an existing VD is deleted from the selected drive group. 4) If the physical disk drive(s) are in non-RAID mode, convert them to RAID mode by pressing Ctrl+R while restarting the server, and then select the required controller. Press F2 and select the Convert to RAID capable option, and then complete the operation. 5) If a job is currently running or scheduled on the selected controller, the job must be completed or deleted before attempting a new operation. Status of the scheduled job can be viewed and managed on the Job Queue page on iDRAC. Click Job Queue link to view the status of the scheduled jobs.

<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0770

<b>Message</b>	Unable to connect to the remote system because incorrect network information is entered.
<b>Detailed Description</b>	The network connection to the remote system cannot be started because incorrect network information is entered.
<b>Recommended Response Action</b>	Enter correct network data and retry the operation. To reset the network properties, on the graphical user interface (GUI), in the left pane, click Network. On the Network page, type appropriate data in the fields, and then click Save. For more information about description of data to be entered in the fields, press F1 on the GUI to read the online help information. To reset network properties by using RACADM command run "racadm set iDRAC.RFS" at the command line (CLI). If the issue persists contact your service provider.
<b>Category</b>	Configuration (RAC = RAC Event)

<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0771

<b>Message</b>	Unable to install iDRAC Service Module (iSM) because the iSM DUP cannot be mounted on to the host OS partition.
<b>Detailed Description</b>	The iDRAC Service Module (iSM) cannot be installed because the iSM DUP cannot be mounted on to the host operating system (OS).
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Updates (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0772

<b>Message</b>	Unable to modify the BIOS configuration settings because the Lifecycle Controller or Collect System Inventory on Restart (CSIOR), or both the features are disabled.
----------------	--

<b>Detailed Description</b>	The BIOS configuration settings cannot be modified because the Lifecycle Controller or Collect System Inventory on Restart (CSIOR), or both the features are disabled.
<b>Recommended Response Action</b>	Enable the Lifecycle Controller and Collect System Inventory on Restart (CSIOR) features, and then retry the operation. To enable these features: Press F2(System Setup) when the company logo is displayed. On the System Setup page, click iDRAC Settings > Lifecycle Controller. Select Enabled corresponding to Lifecycle Controller and CSIOR.
<b>Category</b>	Configuration (RAC = RAC Event)

<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0773

<b>Message</b>	Unable to modify the BIOS configuration settings because a BIOS configuration job is already running.
<b>Detailed Description</b>	The BIOS configuration settings cannot be modified because a BIOS configuration job is already running.
<b>Recommended Response Action</b>	Wait till the current BIOS configuration job is completed, and then retry the operation. To view the status of a job, on the iDRAC Settings page, click Job Queue.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC0774

<b>Message</b>	Unable to display the BIOS attributes either because attributes are not present in the registry, a Lifecycle Controller Wipe operation has been performed, or there is an internal error.
<b>Detailed Description</b>	The BIOS attributes cannot be displayed either because attributes are not present in the registry, a Lifecycle Controller Wipe operation has been performed, or there is an internal error.
<b>Recommended Response Action</b>	Retry the operation after doing the following: 1) Start the server. 2) Press F2 (System Setup) when the company logo is displayed. 3) On the System Setup page, click iDRAC Settings; Lifecycle Controller. Select Enabled corresponding to Lifecycle Controller and CSIOR. 4) After Lifecycle Controller and CSIOR are enabled, restart the system and make sure that the inventory collection operation completes successfully.

## RAC083

**Message** Unable to import the file because the chunk size value entered is greater than the import file size.

**Detailed Description** The file cannot be imported because the chunk size value entered is greater than the import file size.

<b>Recommended Response Action</b>	Make sure that chunk size entered is less than import file size, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC084

<b>Message</b>	The Clear Transfer Session operation is successfully completed.
<b>Detailed Description</b>	The Clear Transfer Session operation is successfully completed and the corresponding files or folders are deleted on the basis of input value entered.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC085

<b>Message</b>	Unable to complete the Import File operation because an invalid Cycle Redundancy Check (CRC) checksum parameter is entered.
<b>Detailed Description</b>	The files are imported in chunks. When the last chunk is transferred, the CRC must be entered. However, if the CRC is incorrect, all the previous chunks imported are deleted and the import operation must be tried again.
<b>Recommended Response Action</b>	Make sure that the correct CRC checksum is entered by using MD5 algorithm, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC086

<b>Message</b>	Unable to transfer the file because the chunk size value entered is more than the maximum chunk size limit (512 KB).
<b>Detailed Description</b>	The file cannot be transferred because the chunk size value entered is more than the maximum chunk size limit (512 KB).

<b>Recommended Response Action</b>	Make sure that the chunk size value is less than the maximum limit and retry the operation.

## RAC1016

<b>Message</b>	The specified user already exists. Duplicate user names are not allowed.
<b>Detailed Description</b>	iDRAC does not allow duplicate user names for each of the 16 users.
<b>Recommended Response Action</b>	Make sure that each of the 16 user names are unique.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1017

<b>Message</b>	Successfully modified the object value and the change is in pending state.
<b>Detailed Description</b>	Any staged operation requires a job and system reboot to apply the object values.
<b>Recommended Response Action</b>	To apply modified value, create a configuration job and reboot the system. To create the commit and reboot jobs, use "jobqueue" command. For more information about the "jobqueue" command, see RACADM help.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1018

<b>Message</b>	The specified object or syntax is invalid.
<b>Detailed Description</b>	This occurs when an incorrect syntax is used or an incorrect object is specified during the command invocation.
<b>Recommended Response Action</b>	Make sure to use the correct syntax and correct object names, and retry the operation. For information related to the corresponding group, see RACADM help or the RACADM Users Guide.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1019

<b>Message</b>	The specified object is not supported for the current system configuration.
----------------	---

<b>Detailed Description</b>	Some objects have dependencies on other objects that are required to perform a task. The specified object is not available because of such dependencies.
<b>Recommended Response Action</b>	Verify the object dependency using "racadm help <device class>.<group name>.<object name>", and retry the operation. For example, racadm help NIC.VndrConfigGroup.1.VirtWWPN.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1020

<b>Message</b>	No objects are available under the specified group for the current system configuration.
<b>Detailed Description</b>	Some objects have dependencies on other objects that are required to perform a task. The specified group does not contain any objects, because the dependent objects are not part of the current system configuration.
<b>Recommended Response Action</b>	Verify the dependencies of the objects under the specified group using "racadm help <device class>.<group name>", and retry the operation. For example, "racadm help NIC.lscsiSecondTgtParams".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1021

<b>Message</b>	NIC objects are not available in the current system configuration.
<b>Detailed Description</b>	NIC objects are not available if NIC devices are not installed in the system, or if some iDRAC services are busy.
<b>Recommended Response Action</b>	Make sure the NIC devices are correctly installed in the system and retry the operation after the Collect System Inventory On Restart (CSIOR) feature has updated the system inventory. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1023

<b>Message</b>	Unable to create the configuration job.
<b>Detailed Description</b>	Configuration jobs are created only if at least one object on the device or component (for example, NIC.Slot.1 or BIOS) has a pending value to be applied.

<b>Recommended Response Action</b>	Make sure that there is at least one object on the specified device or component that has a pending value, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1024

<b>Message</b>	Successfully scheduled a job.
<b>Detailed Description</b>	The pending value is applied during the next reboot of system.
<b>Recommended Response Action</b>	Verify the job status using "racadm jobqueue view -i JID_XXXX" command.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1025

<b>Message</b>	The specified object is read-only and cannot be modified due to an object dependency.
<b>Detailed Description</b>	Some objects have dependencies on other objects that are required to perform a task. However, some of the objects are read-only because of the current system configuration and the values of the dependent objects.
<b>Recommended Response Action</b>	Verify the object dependency using "racadm help <device class>.<group name>.<object name>", and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1026

<b>Message</b>	A custom signing certificate does not exist.
<b>Detailed Description</b>	A custom signing certificate must be present in the system to delete or download the certificate.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)

## Redfish Event Type

*No alerts are applicable for this message*

# RAC1027

<b>Message</b>	Successfully sent the alert for the specified event to the configured destination.
<b>Detailed Description</b>	A test event was generated and the alert was successfully sent to the destination.
<b>Recommended Response Action</b>	Verify if the alerts were received by the configured destination. Otherwise, reconfigure the destination and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC1028

<b>Message</b>	Unable to download the specified certificate type.
<b>Detailed Description</b>	The certificate cannot be downloaded if the certificate type specified is not correct.
<b>Recommended Response Action</b>	Make sure to specify correct value for the certificate type (-t) option, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC1029

<b>Message</b>	Unable to delete the specified certificate type.
<b>Detailed Description</b>	The certificate cannot be deleted if the certificate type specified is not "3".
<b>Recommended Response Action</b>	Make sure to specify "3" for the certificate type (-t) option, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1030

Message	The custom signing certificate was deleted.
Detailed Description	The custom signing certificate present on iDRAC was deleted.
Recommended Response Action	No response action is required.
Category	Configuration (RAC = RAC Event)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## RAC1031

Message	Unable to delete the custom signing certificate.
Detailed Description	The custom signing certificate on iDRAC cannot be deleted because of an internal error.
Recommended Response Action	Verify if iDRAC has a custom signing certificate. If it has the certificate, retry the operation. If the issue persists, contact your service provider.
Category	Configuration (RAC = RAC Event)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## RAC1032

Message	<i>arg1</i> jobs was cancelled by the user.
Arguments	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = Job ID or ALL</li></ul>
Detailed Description	The job specified in the message were cancelled.
Recommended Response Action	No response action is required.
Category	Configuration (RAC = RAC Event)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## RAC1033

<b>Message</b>	Unable to retrieve the server component software inventory.
<b>Detailed Description</b>	The server component software inventory cannot be retrieved because of an internal error.
<b>Recommended Response Action</b>	Make sure to enable Collect System Inventory On Restart (CSIOR) feature, reboot the server, and retry the operation. If CSIOR is already enabled, restart iDRAC using "racadm racreset" command, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1034

<b>Message</b>	This action will ungracefully turn off the server.
<b>Detailed Description</b>	This operation will cause the server to shutdown immediately. This may result in the applications losing data.
<b>Recommended Response Action</b>	Before continuing, exit all the programs running on this server, and make sure that there is no inbound and outbound traffic associated with this server. Inability to do so may prevent all the servers in the chassis from accessing the shared-storage devices for up to two minutes. To continue the operation, enter a -f at the end of command "racadm serveraction powerdown -f", and then retry.
<b>Category</b>	System Health (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1035

<b>Message</b>	There are no pending values to be cleared.
<b>Detailed Description</b>	The command is unable to clear the pending state for attributes of the specified component because there are no pending values.
<b>Recommended Response Action</b>	Make sure that there is at least one attribute on the specified device has a pending value, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1036

<b>Message</b>	Successfully cleared pending attribute(s) for the group specified.
<b>Detailed Description</b>	Successfully cleared pending values for attributes in the group specified.
<b>Recommended Response Action</b>	To verify, run the RACADM command "racadm get group".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1037

<b>Message</b>	Unable to clear pending attribute(s).
<b>Detailed Description</b>	Unable to clear pending attribute(s). This may be because the FQDD entered is incorrect.
<b>Recommended Response Action</b>	Check that the FQDD entered is correct. View the Help information by running the RACADM command "racadm help clearpending".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1038

<b>Message</b>	Unable to clear pending values for the specified component.
<b>Detailed Description</b>	Unable to clear pending values for the specified component. This may be because there is an existing configuration job for the component.
<b>Recommended Response Action</b>	Make sure that a config job is not scheduled for this component. For more information, view the help command by running the RACADM command "racadm jobqueue help delete".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1039

# RAC1072

**Message** Unable to set maximum non critical threshold value of *arg1* , because the value entered is less than, or equal to the minimum critical threshold value.

**Arguments**

- ***arg1*** = System Board Inlet Temp

**Detailed Description** The maximum non critical threshold value identified in the message cannot be set, because the value entered is less than or equal to the minimum critical threshold value.

**Recommended Response Action** Check the minimum critical threshold level using an appropriate RACADM command. For example, to view the minimum critical threshold value of a sensor, run the racadm getsensorinfo command at the command line interface, and then retry the operation. For more information about other RACADM commands, run the racadm help command.

## RAC1073

**Message** Unable to reset the threshold value of sensor *arg1* because the capability to reset this sensor threshold value is not supported.

**Arguments**

- ***arg1*** = sensor name

**Detailed Description** The threshold value of the sensor identified in the message cannot be successfully set because the capability reset the sensor threshold value is not supported.

**Recommended Response Action** No response action is required. For more information about resetting the threshold level of a sensor, run the "racadm getsensorinfo" command at the command line interface (CLI), and then retry the operation.

# RAC1110

<b>Message</b>	Unable to run the command, because an incorrect Proxy port number was entered.
<b>Detailed Description</b>	Unable to run the command, because an incorrect Proxy port number was entered. The Proxy port value must be a positive integer.
<b>Recommended Response Action</b>	Enter only numbers for a Proxy port value.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC1111

<b>Message</b>	Unable to delete the pending values or operations of the specified device.
<b>Detailed Description</b>	Unable to clear pending values or operations from the specified storage device because there are no pending operations for the specified device.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC1112

<b>Message</b>	Unable to delete the pending values for the specified device because the iDRAC internal storage is in use by a currently running job.
<b>Detailed Description</b>	Unable to clear the pending state from the attributes for a RAID object. A job is currently running and iDRAC internal storage is in use.
<b>Recommended Response Action</b>	Retry the operation after any currently running jobs have completed. Jobs can be monitored by running the racadm command "racadm jobqueue view".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1113

<b>Message</b>	Unable to perform the preview operation because the options -b, -c, -w, and -s must not be used with the --preview option.
<b>Detailed Description</b>	The configuration XML preview operation cannot be executed because the -b, -s, and -w options must not be used with the --preview option.
<b>Recommended Response Action</b>	Remove the -b, -w, and -s options when using the --preview option and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1114

<b>Message</b>	Configuration XML file preview operation job is initiated. Job ID = <i>arg1</i>
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = job ID</li></ul>
<b>Detailed Description</b>	The configuration XML preview operation was successfully initiated and has generated a job with the job ID identified in the message.
<b>Recommended Response Action</b>	Monitor the status of the preview operation job by running the racadm command "racadm jobqueue view -i <job ID>".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1115

<b>Message</b>	Unable to run the command, because of insufficient user privileges.
<b>Detailed Description</b>	The command could not be successfully run, because of insufficient privileges for the username supplied.
<b>Recommended Response Action</b>	Make sure that you have appropriate privileges, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1116

<b>Message</b>	Unable to run the command, because the restart flag entered is incorrect.
<b>Detailed Description</b>	The command could not be successfully run, because an incorrect "restart flag" value was entered in the command.
<b>Recommended Response Action</b>	Enter a correct flag value. The recommended values are "true" and "false". Make sure that you have entered the correct value, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1117

<b>Message</b>	Unable to run the command.
<b>Detailed Description</b>	The operation specified in the command could not be successfully completed.
<b>Recommended Response Action</b>	Retry the operation after 2 minutes. If the problem persists, contact your service provider.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1118

<b>Message</b>	Successfully initiated the update operation specified in the command.
<b>Detailed Description</b>	Successfully initiated the update operation specified in the command.
<b>Recommended Response Action</b>	To know about the status of a command that is initiated, run the following command: <code>racadm jobqueue view -l &lt;job ID&gt;</code> .
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1119

<b>Message</b>	Unable to generate a comparison report for the specified repository.
----------------	--

<b>Detailed Description</b>	The command could not be successfully run because of one or more of the following reasons:1. The command does not have "--verifycatalog" in it.2. The updates available on the repository are not applicable for the operation that is requested.
<b>Recommended Response Action</b>	To generate a comparison report, type "--verifycatalog" in the racadm command, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1120

<b>Message</b>	Unable to run the command, because an incorrect Proxy type is entered.
<b>Detailed Description</b>	The command could not be successfully run, because an incorrect Proxy type value was entered for the -pt option.
<b>Recommended Response Action</b>	Make sure that you entered either "http" or "https" as the proxy type. Enter the correct type, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1121

<b>Message</b>	Unable to run the command, because the data entered for connecting to the Proxy server is insufficient.
<b>Detailed Description</b>	The command could not be successfully run, because one or more values about the proxy server was not entered.
<b>Recommended Response Action</b>	Make sure that you enter the following data, and then retry the operation:- proxy server address- proxy user name- proxy password.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1122

<b>Message</b>	The specified group or object is not supported on the server.
<b>Detailed Description</b>	One or more of the group or component attributes specified in the operation do not exist on the targeted server.
<b>Recommended Response Action</b>	No response action is required.

**Category** Configuration (RAC = RAC Event)

**Severity** Severity 3 (Informational)

**Redfish Event Type**

*No alerts are applicable for this message*

## RAC1123

**Message** Unable to perform the operation because Fibre Channel (FC) attributes are not available in the current server configuration.

**Detailed Description** Fibre Channel (FC) objects are not available if Fibre Channel devices are not installed in the server, or if some iDRAC services are busy.

**Recommended Response Action** Do the following: 1) Power off and remove AC or DC power from the server. 2) Make sure the Fibre Channel devices are correctly installed in the server. 3) Restart the server to allow the Collect System Inventory On Restart (CSIOR) feature to update the server inventory. 4) Retry the operation. If the issue persists, contact your service provider.

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## RAC1128

**Message** The -l option must be specified if -u and -p options are used.

**Detailed Description** Any operation involving remote share (CIFS) cannot continue if the location (-l option) is not specified. The -u and -p options represent the user name and password for the remote share, and -l represents the location of the remote share.

**Recommended Response Action** Make sure to specify the location (-l option) of the remote share along with the user name and password, and retry the operation. To view the list of options that can be used for the required subcommand, run the RACADM command "racadm help <subcommand>".

**Category** Configuration (RAC = RAC Event)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## RAC1129

**Message** Unable to modify the BootOnce object.

**Detailed Description** The BootOnce object could not be modified, because the FirstBootDevice object is set to either F10, F11, or BIOS.

<b>Recommended Response Action</b>	Configure the FirstBootDevice object to values other than F10, F11, or BIOS and retry the set operation for the BootOnce object. For more information about possible FirstBootDevice values, run the RACADM command "racadm help idrac.serverboot.firstbootdevice".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1130

<b>Message</b>	Unable to complete the operation. This feature is not supported on the currently-used platform.
<b>Detailed Description</b>	The requested operation could not be successfully completed because of an unsupported version of BIOS, Lifecycle Controller or Unified Server Configurator, and/or iDRAC firmware.
<b>Recommended Response Action</b>	Verify whether or not a correct version of BIOS, Lifecycle Controller, and/or iDRAC firmware is installed. For more information on the appropriate firmware version required, refer to the RACADM Command Line Reference Guide. Also check if there is a limitation in terms of platforms such as monolithic or modular, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)

# RAC1163

**Message** The peak utilization value of out-of-band performance monitoring sensor *arg1* is successfully reset.

**Arguments**

- ***arg1*** = sensor name

**Detailed Description** The peak utilization value of out-of-band performance monitoring sensor identified in the message is successfully reset.

**Recommended Response Action** No response action required.

**Category** Configuration (RAC = RAC Event)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# RAC1164

**Message** A remote diagnostics operation is currently running and not completed.

**Detailed Description** A remote diagnostics operation is already under execution and another operation can be started only after the current execution is completed.

**Recommended Response Action** Initiate another diagnostics operation only after the currently running operation is completed.

**Category** Configuration (RAC = RAC Event)

**Severity** Severity 2 (Warning)

## Redfish Event Type

# RAC1180

<b>Message</b>	A USB device is inserted in the front panel USB Management port and is in use by the server operating system.
<b>Detailed Description</b>	A USB Device inserted in the front panel USB Management port and is in use by the server operating system. The device needs to not be in use in order to change the port mode settings.
<b>Recommended Response Action</b>	Remove and reinsert the USB device and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC1181

<b>Message</b>	Unable to change USB Management Port mode.
<b>Detailed Description</b>	USB Management Port state cannot be changed because of an unknown hardware or firmware issue.
<b>Recommended Response Action</b>	To change the Management Port mode settings do the following: If a device is present, remove and reinsert the USB device from the front panel USB Management port and retry the operation. If the issue persists restart the iDRAC and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC1182

<b>Message</b>	Unable to retrieve information for the Power group or attribute because the server is not PMBus capable.
<b>Detailed Description</b>	The server instrumentation can not provide any information related to power because PMBus capability is not present or the PSU(s) with PMBus capability have been removed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC1183

<b>Message</b>	Unable to assign IP addresses 169.254.0.3 and 169.254.0.4 to the device OSBMC USBNIC because the IP addresses entered are reserved for the iDRAC Direct feature.
<b>Detailed Description</b>	The IP addresses 169.254.0.3 and 169.254.0.4 cannot be assigned to the device identified in the message because the IP addresses entered are reserved for the iDRAC Direct feature.
<b>Recommended Response Action</b>	Enter another appropriate IP address, and then retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)

## RAC941

<b>Message</b>	Successfully initiated the export operation. This operation may take several minutes to complete.
<b>Detailed Description</b>	A system configuration profile export operation may take several minutes to complete depending on the system configuration.
<b>Recommended Response Action</b>	Monitor the job status using "racadm jobqueue view -i <Job ID>".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC942

<b>Message</b>	Successfully initiated the import operation. This operation may take several minutes to complete and may cause multiple system restarts while device firmware and configuration are applied.
<b>Detailed Description</b>	The system configuration profile import operation is initiated. No other operations can be performed on the system while the system configuration server profile is being imported from the system configuration profile.
<b>Recommended Response Action</b>	Monitor the job status using "racadm jobqueue view -i <Job ID>".
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC943

<b>Message</b>	Warning: Collect System Inventory On Restart (CSIOR) feature is disabled.
<b>Detailed Description</b>	The Collect System Inventory On Restart (CSIOR) feature is currently disabled. If the system inventory is not up-to-date, the system configuration profile that is being copied will not have the latest inventory information.

<b>Recommended Response Action</b>	To get latest inventory information, cancel the current export job, run "racadm set LifecycleController.LCAttributes.CollectSystemInventoryOnRestart 1" to enable CSIOR, and re-initiate the export operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC944

<b>Message</b>	Unable to create the configuration job.
<b>Detailed Description</b>	A configuration job cannot be created if Lifecycle Controller is disabled.
<b>Recommended Response Action</b>	Run "racadm set LifecycleController.LCAttributes.LifecycleControllerState 1" to enable Lifecycle Controller, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RAC945

<b>Message</b>	Invalid object value specified.
<b>Detailed Description</b>	The dedicated NIC or shared NIC scan time value is not between 5 and 255 seconds.
<b>Recommended Response Action</b>	Make sure to set the scan time value between 5 and 255 seconds, and retry the operation. For more information, see RACADM help.

# RAC998

<b>Message</b>	IPv6 cannot be enabled.
<b>Detailed Description</b>	IPv6 cannot be enabled if iDRAC NIC is disabled.
<b>Recommended Response Action</b>	Enable iDRAC NIC using "racadm set iDRAC.NIC.Enable < 1   Enabled >" command and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# RAC999

<b>Message</b>	The object DNSFromDHCP6 cannot be enabled.
<b>Detailed Description</b>	DNSFromDHCP6 cannot be enabled if iDRAC IPv6 AutoConfig is disabled.
<b>Recommended Response Action</b>	Enable IPv6 AutoConfig using "racadm set iDRAC.IPv6.AutoConfig < 1   Enabled >" command, and retry the operation.
<b>Category</b>	Configuration (RAC = RAC Event)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## RDU8517

Message CMC *arg1* : no action allowed while firmware update is in progress

Arguments

- ***arg1*** = slot number

Detailed Description No failover or other action can occur while a CMC firmware update is in progress.

Recommended Response Action No response action is required. Wait until the firmware update is complete and retry the operation.

## RDU8519

**Message** Unable to communicate with peer CMC *arg1* .

**Arguments**  
· *arg1* = slot number

**Detailed Description** The communication between the primary and standby CMCs was lost. This may occur when the CMC identified in the message is restarting, or a firmware update operation is in progress. If the issue persists, a failover will occur.

**Recommended Response Action** Wait for 10 minutes for: 1)Firmware update operations to complete and 2) The CMC to finish restarting. If the communication is not reestablished, remove and reinsert the CMC.

## RED023

<b>Message</b>	Lifecycle Controller in use. This job will start when Lifecycle Controller is available.
<b>Detailed Description</b>	The Lifecycle Controller is unable to access internal storage currently in use by another operation.
<b>Recommended Response Action</b>	Make sure all other Lifecycle Controller operations are finished and retry the operation. Using the iDRAC Web UI, select Server (on 12th and 13th Generation servers) or Maintenance (on 14th Generation Servers) and then Job Queue, check the job queue for unfinished jobs and wait for the jobs to finish before retrying the operation. Also, check whether there are update packages being executed in the server OS and wait for these operations to finish before retrying the operation. For remote web services API access, make sure that the GetRemoteServicesAPIStatus method returns Ready status, and then retry the operation. If OS Deploy has been enabled then boot the server into LC UI to clear. Always exit LC UI using "Exit" and not by removing power.

# RFL Event Messages

## RFL2000

**Message** Internal Dual SD Module *arg1* is present.

- Arguments**
- ***arg1*** = name

**Detailed Description** None.

**Recommended Response Action** No response action is required.

**Category** System Health (RFL = IDSMD Media)

**Severity** Severity 3 (Informational)

**Trap/EventID** 2211

**Redfish Event Type** Alert

## RFL2002

**Message** Internal Dual SD Module *arg1* is offline.

**Arguments**

- ***arg1*** = name

**Detailed Description** The SD card module is installed but may be improperly installed or configured incorrectly.

**Recommended Response Action** Reinstall the SD module.

**Category** System Health (RFL = IDSDM Media)

**Severity** Severity 2 (Warning)

**Trap/EventID** 2210

**LCD Message** Internal Dual SD Module <name> is offline.

## RFL2004

Message Failure detected on Internal Dual SD Module *arg1*.

Arguments

- ***arg1*** = name

Detailed Description The SD card module is installed but improperly configured or failed to initialize.

Recommended Response Action Reinstall the SD module and remove and reinstall SD cards.

Category System Health (RFL = IDSDM Media)

Severity Severity 1 (Critical)

## SEC0612

<b>Message</b>	The default username and password is currently in use. It is recommended to immediately change the default credentials.
<b>Detailed Description</b>	The default username and password is currently in use and unauthorized access to the iDRAC may occur because the default values are widely known. This is a severe security risk.
<b>Recommended Response Action</b>	To change the credentials using RACADM command, run the following at the command line interface (CLI): "racadm set iDRAC.Users.<index>.Password <new password string>". Alternately, to disable the default credential in use message, run "racadm config -g cfractuning -o cfgRacTuneDefCredentialWarningEnable 0".

## SEC0700

<b>Message</b>	Warning: Default username and password are currently in use. It is strongly recommended to change the default password before configuring the property. Else, it causes a severe security risk for iDRAC.
<b>Detailed Description</b>	If the property name is configured without changing the default password, iDRAC may be accessible on the Internet. This causes a severe security risk for iDRAC.
<b>Recommended Response Action</b>	To change the password, run the following racadm command: racadm set iDRAC.Users.<index>.Password <new password string>.Alternatively, to avoid this warning message, run the following racadm command: racadm set iDRAC.Tuning.DefaultCredentialWarning Disable.

## SEL1501

<b>Message</b>	Chassis management controller/Management Module (CMC/MM) redundancy is lost.
<b>Detailed Description</b>	An action or failure has taken place that breaks CMC/MM redundancy. This includes loss of network connection, hardware failures, firmware update, firmware mismatch between CMCs/MMs, CMC/MM reset, and unplugging a CMC/MM.
<b>Recommended Response Action</b>	Check CMC/MM network cables and network connections. Check that CMC/MM firmware versions match.

## SIOM Event Messages

### SIOM0001

Message SAS IOM *arg1* could not establish communication with SAS IOM *arg2* due to a communication fault.

Arguments

- ***arg1*** = IOM name1
- ***arg2*** = IOM name2

**Detailed Description** The SAS IOM devices identified in the message could not communicate with each other via the inter IOM link.

**Recommended Response Action** Reseat the SAS IOM devices one at a time and retry the operation. For information about managing SAS IOM devices, refer to the OpenManage Enterprise Modular Version Users Guide available on the support site.

**Category** System Health (SIOM = SAS IOM)

## SIOM0027

**Message** SAS IOM *arg1* has a configuration that is not consistent with chassis.

**Arguments**

- ***arg1*** = IOM name

**Detailed Description** This event indicates that the foreign SAS IOMs are inserted to the chassis.

**Recommended Response Action** The configuration mismatch could be due to incorrect switch movement. Do one of the following: 1) Replace the switch. 2) Run the ForceActive command at the command line interface to override the mismatch and use the local configuration, and then apply to both switches.

## SIOM0072

**Message** The SAS IOM has a degraded SAS connection between IOM *arg1* and storage enclosure in chassis slot *arg2* .

**Arguments**

- ***arg1*** = IOM NAME
- ***arg2*** = Chassis Slot Name

**Detailed Description** The SAS IOM has a degraded SAS connection between a SAS IOM and a storage enclosure identified in the message.

**Recommended Response Action** Do the following: 1) Make sure that the compute sleds that have storage assignment to affected storage enclosures are turned off and then reset the storage enclosure.2) If the issue persists, reseal the storage expanders one at a time.3) If problem persists, reseal the IOM.

## SRV009

Message There was an issue retrieving System information for SupportAssist.

**Detailed Description** There was an issue retrieving System information from the iDRAC. This may be because Collect System Inventory on Restart (CSIOR) feature is disabled and has never executed or the iDRAC Remote Services API status may not be in the Ready state.

**Recommended Response Action** Make sure the Collect System Inventory on Restart (CSIOR) is enabled and has run at least once before retrying this operation. For remote web services API access, make sure the GetRemoteServicesAPIStatus method returns Ready status before trying this operation. If the issue persists, reset iDRAC and retry the operation.

## SRV031

<b>Message</b>	The OS Collector application is unable to communicate with WMI services.
<b>Detailed Description</b>	The OS Collector application is unable to communicate with the WMI service. This may be because the user context the application is running in does not have appropriate access privileges or firewall/security settings are preventing retrieving registry and software data from WMI.
<b>Recommended Response Action</b>	Do the following: 1) Make sure the user context the OS Collector application is running in has the appropriate privileges to access WMI. Make sure that firewall or security settings are set to allow access and retry the operation. 2) If the issue persists, restart the WMI service and retry the operation. 3) If the issue continues to persist, restart the server OS and retry the operation.

**Message** Unable to create the SupportAssist job for *arg1*.

**Arguments**

- ***arg1*** = Job name

**Detailed Description** The SupportAssist job identified in the message cannot be created.

**Recommended Response Action** Do the following: 1) If job count has reached maximum count supported (256 jobs for iDRAC9), reduce the job count by deleting one or more jobs. To delete all completed jobs using RACADM command line utility, type "racadm jobqueue delete --all" or using iDRAC GUI via Maintenance->Job Queue. Once jobs are deleted retry the operation. 2) If the issue persists, reset the iDRAC and then retry the operation. To reset the iDRAC using RACADM command line utility, type "racadm racreset" or using iDRAC GUI via Maintenance->Diagnostics->Reset iDRAC.

**Detailed Description** The SupportAssist registration contact and shipping information cannot be retrieved because data is either missing or corrupted.

**Recommended Response Action** Do the following: 1) Retry the operation. 2) If the issue persists, Reset the iDRAC configuration and re-register the server for SupportAssist and then retry the operation. To reset the iDRAC configuration using the RACADM command line utility, enter "racadm racresetcfg". After resetting the iDRAC configuration, to re-register the server for SupportAssist using the RACADM command line utility, enter "racadm supportassist register".

# SSD1012

**Message** The Remaining Rated Write Endurance Threshold for SAS and SATA SSDs is set to *arg1* .

## Arguments

- **arg1** = value

**Detailed Description** The Remaining Rated Write Endurance (RRWE) Threshold for SAS and SATA solid state devices has been modified. A warning alert when the RRWE for any SAS or SATA SSD falls below the threshold set by the user.

**Recommended Response Action** No response action is required.

**Category** Storage (SSD = SSD Devices)

**Severity** Severity 3 (Informational)

**OMSA Event ID** 2448

# STOR Event Messages

## STOR001

<b>Message</b>	The command is successfully run.
<b>Detailed Description</b>	The command is successfully run.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR003

<b>Message</b>	Missing parameter.
<b>Detailed Description</b>	Required parameter is missing.
<b>Recommended Response Action</b>	Refer to the RAID profile to determine required parameters.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR004

<b>Message</b>	Invalid parameter value
<b>Detailed Description</b>	Provided parameter value is not valid.
<b>Recommended Response Action</b>	Refer to the RAID profile to determine the valid parameters values.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR006

<b>Message</b>	Unable to complete the operation.
<b>Detailed Description</b>	The operation could not be completed because of an issue with the management controller (either the iDRAC or the Chassis Management Controller/Management Module (CMC/MM)) that is managing the storage.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR007

<b>Message</b>	Unable to allocate resources.
<b>Detailed Description</b>	The operation could not be completed because of insufficient memory space on the management controller (either the iDRAC or the Chassis Management Controller/Management Module (CMC/MM)) managing the storage.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR009

<b>Message</b>	Unable to complete the operation because either the Fully Qualified Device Descriptor (FQDD) entered did not match any virtual drive (VD), the physical drives available, or the operation is not supported on the physical drive (s).
<b>Detailed Description</b>	The operation cannot be completed because either the Fully Qualified Device Descriptor (FQDD) entered did not match any virtual drive (VD), the physical drives available, or the operation is not supported on the physical drive (s).
<b>Recommended Response Action</b>	Make sure of the following and retry the operation: 1) A physical drive or virtual drive with the FQDD entered exists. 2) The physical drive (s) supports the operation being tried. For more information about supported physical drives, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## STOR010

<b>Message</b>	Unable to complete the operation either because the RAID level entered is not supported by the controller, or the current RAIDType of "MD Software RAID" does not allow the operation.
<b>Detailed Description</b>	The operation cannot be completed either because the RAID level entered is not supported by the controller, or the current RAIDType of "MD Software RAID" does not allow the operation.
<b>Recommended Response Action</b>	Enter a valid RAID level and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0101

<b>Message</b>	No RAID controller is displayed.
<b>Detailed Description</b>	No RAID controller data to display. The system is powered off, no RAID controller is present in the system, or the RAID controller is not connected to the system.
<b>Recommended Response Action</b>	Check if the server has power, RAID controller is available, and that a RAID controller is connected to the system.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0102

<b>Message</b>	No batteries are displayed.
<b>Detailed Description</b>	No battery data to display. The system is powered off, batteries are not present on the system, batteries are not connected to the RAID controller, or the batteries are depleted.
<b>Recommended Response Action</b>	Check if the server has power, batteries are available, and batteries are connected to the RAID controller.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0103

<b>Message</b>	No physical disks are displayed.
<b>Detailed Description</b>	No physical disk data to display. The system is powered off, physical disks are not present on the system, or physical disks are not connected to the enclosure or backplane.
<b>Recommended Response Action</b>	Check if the server has power, physical disks are available, and physical disks are connected to the enclosure or backplane.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0104

<b>Message</b>	No virtual disks are displayed.
<b>Detailed Description</b>	No virtual disk data to display. The system is powered off, physical disks are not present on the system, or virtual disks are not created.
<b>Recommended Response Action</b>	Check if the server has power, physical disks are available, and virtual disks are created.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0105

<b>Message</b>	No enclosures are displayed.
<b>Detailed Description</b>	No enclosure data to display. The system is powered off, enclosures are not present on the system, or enclosures are not connected to the RAID controllers.
<b>Recommended Response Action</b>	Check if the server has power, enclosures are available, and enclosures are connected to the RAID controllers.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0106

<b>Message</b>	Fans are not connected to enclosures or data about fans is unavailable.
<b>Detailed Description</b>	No fan data to display. The system is powered off, no fan enclosures are present in the system, or the fans are not connected to the enclosures.
<b>Recommended Response Action</b>	Check if the server has power, enclosure fan is available, and fan is connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0107

<b>Message</b>	EMMs are not connected to enclosures or data about EMMs is unavailable.
<b>Detailed Description</b>	No EMMs data to display. The system is powered off, no enclosure EMMs are present, or the EMMs are not connected to the enclosures.
<b>Recommended Response Action</b>	Check if the server has power, EMMs are available, and EMMs are connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0108

<b>Message</b>	Temperature probes are not connected to enclosures or data about temperature is unavailable.
<b>Detailed Description</b>	No temperature data to display. The system is powered off, no enclosure temperature probes are present in the system, or the temperature probes are not connected to the enclosures.
<b>Recommended Response Action</b>	Check if the server has power, enclosure temperature probe is available, and temperature probe is connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0109

<b>Message</b>	Power supply unit is not connected to the enclosure or data about power supply unit is unavailable.
<b>Detailed Description</b>	No power supply unit data to display. The system is powered off, no power supply unit is present in the system, or the power supply unit is not connected to the enclosure.
<b>Recommended Response Action</b>	Check if the server has power, enclosure power supply unit is available, and power supply unit is connected to the enclosure.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR011

<b>Message</b>	Stripe size not supported on controller.
<b>Detailed Description</b>	The operation cannot be completed because the stripe size entered is not supported by the controller.
<b>Recommended Response Action</b>	Enter a valid stripe size and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0110

<b>Message</b>	Invalid Fully Qualified Device Descriptor (FQDD).
<b>Detailed Description</b>	The specified Fully Qualified Device Descriptor (FQDDs) system component name is invalid.
<b>Recommended Response Action</b>	Verify that the correct Fully Qualified Device Descriptor (FQDD) system component name is specified. See the help text (The help text for the raid subcommand can be obtained by running "racadm help raid") or documentation for valid FQDD system component names.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR011

<b>Message</b>	Invalid reference key.
<b>Detailed Description</b>	The specified reference key is invalid.
<b>Recommended Response Action</b>	Verify that the correct reference key is specified. See the help text or documentation for valid reference keys.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR012

<b>Message</b>	Provided Physical disk not valid for this operation.
<b>Detailed Description</b>	One or more of the specified physical disks cannot be used for the operation requested. Physical disk protocol and media type, along with other physical disk characteristics like Secure Encryption and T10 protection, need to match the requirements of the requested operation.
<b>Recommended Response Action</b>	Make sure the specified physical disk has the appropriate protocol and media type for the requested operation. Specify a different physical disk with a state appropriate for the requested operation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR013

<b>Message</b>	One or more storage device(s) are not in a state where the operation can be completed.
<b>Detailed Description</b>	One or more storage device(s) are in a state that prevents the operation from completing.
<b>Recommended Response Action</b>	Make sure the specified storage devices are in a state appropriate for the requested operation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR015

<b>Message</b>	Maximum virtual disks allowed for this controller has been reached.
<b>Detailed Description</b>	A new virtual disk cannot be created because the maximum number of virtual disks are already created.
<b>Recommended Response Action</b>	A new virtual disk cannot be created until one is deleted.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR016

<b>Message</b>	The physical disk specified is not large enough to be a hot spare for this virtual disk.
<b>Detailed Description</b>	The physical disk drive cannot be assigned as the hot-spare of this virtual disk because the capacity of the physical disk is not sufficient.
<b>Recommended Response Action</b>	Specify a physical disk with a larger capacity or replace the specified physical disk with one with more capacity, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR017

<b>Message</b>	The specified Virtual Disk is not valid for the operation.
<b>Detailed Description</b>	The virtual disk specified is not compatible with the requested operation or a specified operation parameter is not appropriate for the virtual disk type specified.
<b>Recommended Response Action</b>	Make sure the operation parameters are appropriate for the virtual disk type. Specify a compatible virtual disk for the requested operation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR018

<b>Message</b>	No foreign configurations detected.
<b>Detailed Description</b>	This operation did not detect any foreign drives. This may be because no foreign drives are present or the only foreign drives are in a secured locked state.
<b>Recommended Response Action</b>	If the only foreign drives present are in a secured locked state, run a secure erase operation on the drives to securely erase data or unlock these drives and retry the operation. Otherwise the operation was not successful because there are no foreign drives.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR019

<b>Message</b>	The specified passphrase is not valid.
<b>Detailed Description</b>	The passphrase specified does not follow the passphrase character criteria of the controller character.
<b>Recommended Response Action</b>	Enter a passphrase that meets the passphrase character criteria of the controller, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR020

<b>Message</b>	A controller key is already present.
<b>Detailed Description</b>	The controller key cannot be set because a key is already present.
<b>Recommended Response Action</b>	Delete the current key and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# STOR0200

**Message** Array Manager is installed on the system.

**Detailed Description** Installing Storage Services and Array Manager on the same system is not a supported configuration. Storage Services is not installed on a system where Array Manager is installed.

**Recommended Response Action** Uninstall either Storage Services or Array Manager and retry the operation.

**Category** Storage (STOR = Storage)

# STOR0201

**Message** Unable to determine whether the system has the minimum required versions of the RAID controller drivers and firmware.

**Detailed Description** Unable to determine whether the system has the minimum required versions of the RAID controller drivers.

**Recommended Response Action** See the Readme file on the installation media for driver and firmware requirements. If Storage Services experiences performance problems, make sure that minimum supported versions of the drivers and firmware are installed. For a list of correct driver and firmware versions, contact the service provider.

## STOR0202

**Message** The configuration file (Path: *arg1* ) that contains firmware and driver information for *arg2* is not updated or is incorrectly formatted to complete the comparison.

**Arguments**

- ***arg1*** = file path
- ***arg2*** = controller name

**Detailed Description** Storage Services is unable to determine whether the system has the minimum required versions of the RAID controller firmware and drivers because a configuration file is not readable, corrupted, or has missing data.

**Recommended Response Action** Reinstall Server Administrator and Storage Services.

**Category** Storage (STOR = Storage)

## STOR0212

**Message** The *arg1* has failed.

**Arguments**

- ***arg1*** = device name

**Detailed Description** The device (physical disk or an enclosure) identified in the message has failed. The device (physical disk or an enclosure) failure was detected while performing a rescan. However, physical disk failures are also detected during a check consistency operation.

**Recommended Response Action** Replace the identified device. A failed device is indicated with a red color "X" status icon. Perform a rescan after replacing the failed device.

## STOR023

<b>Message</b>	Unable to perform configuration operations because a configuration job for the device already exists.
<b>Detailed Description</b>	Unable to perform configuration operations because a configuration job for the device already exists.
<b>Recommended Response Action</b>	Wait for the current job for the device to complete or cancel the current job before attempting more configuration operations on the device.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR024

<b>Message</b>	Unable to create a configuration job because a configuration job for the device already exists.
<b>Detailed Description</b>	Configuration changes for the specified device are already scheduled.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR025

<b>Message</b>	Unable to delete any pending configuration because the configuration job is already scheduled.
<b>Detailed Description</b>	The pending configuration cannot be deleted because the configuration job is already scheduled.
<b>Recommended Response Action</b>	Delete the current configuration job for the device to stop pending configuration changes.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR026

<b>Message</b>	A configuration job was not created because there are no pending configuration changes.
<b>Detailed Description</b>	A configuration job was not created because there are no pending configuration changes.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR027

<b>Message</b>	Virtual Disk name is not supported.
<b>Detailed Description</b>	Setting the Virtual disk name is not a valid operation on the specified controller.
<b>Recommended Response Action</b>	Do not specify the virtual disk name and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR028

<b>Message</b>	Virtual disk not found.
<b>Detailed Description</b>	The requested operation cannot be completed because the specified virtual disk is not found.
<b>Recommended Response Action</b>	Provide a valid virtual disk FQDD (Fully Qualified Device Descriptor) and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR029

<b>Message</b>	Physical disk not found.
----------------	--------------------------

<b>Detailed Description</b>	The requested operation cannot be completed because the specified physical disk is not found.
<b>Recommended Response Action</b>	Provide a valid physical disk FQDD (Fully Qualified Device Descriptor) and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR030

<b>Message</b>	Controller not found.
<b>Detailed Description</b>	The requested operation cannot be completed because the specified controller is not found.
<b>Recommended Response Action</b>	Provide a valid controller FQDD (Fully Qualified Device Descriptor) and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR031

<b>Message</b>	Lifecycle Controller is not enabled.
<b>Detailed Description</b>	For 11G systems: System Services must be enabled to perform the requested operation. System Services has been disabled through the iDRAC configuration utility accessed by pressing CTRL+E on boot up or through a remote operation. For 12G and above generations: Lifecycle Controller must be enabled to perform the requested operation. Lifecycle Controller has been disabled by pressing F2 Setup, selecting iDRAC Configuration, and selecting Lifecycle Controller Settings on boot up or through a remote operation.
<b>Recommended Response Action</b>	For 11G systems: Use the iDRAC configuration utility to enable the System Services by pressing on the CTRL+E option on boot up at the targeted system. For 12G and above generations: Use F2 Setup, select iDRAC Configuration, and select Lifecycle Controller Settings, to enable the Lifecycle Controller on boot up of the targeted system.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR032

<b>Message</b>	Lifecycle Controller is currently in use.
----------------	---

<b>Detailed Description</b>	Lifecycle Controller is unable to gain access to internal storage because it is in use by another application or operation.
<b>Recommended Response Action</b>	Wait for current Lifecycle Controller operation to complete. Verify that the system is 1) Not currently in Lifecycle Controller Configuration utility 2) Not waiting for user intervention at F1/F2 POST error 3) Not in any of the device or controller Option ROMs and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR033

<b>Message</b>	Invalid parameter value for Start/Until Time.
<b>Detailed Description</b>	The requested operation cannot be completed because an invalid value is specified for Start/Until Time.
<b>Recommended Response Action</b>	Enter a valid Start/Until Time and retry the operation. For more information about the Start/Until Time, see the RAID Profile specification.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR034

<b>Message</b>	Invalid parameter value for RebootJobType.
<b>Detailed Description</b>	The requested operation cannot be completed because an invalid value is specified for RebootJobType.
<b>Recommended Response Action</b>	Enter a valid RebootJobType value and retry the operation. For more information about the RebootJobType parameter, see the RAID Profile specification.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR035

<b>Message</b>	Unable to perform operation because either the number of storage objects specified is insufficient or the storage objects are not in a required state to perform this operation.
<b>Detailed Description</b>	Unable to perform operation because either the number of storage objects specified is insufficient or the storage objects are not in a required state to perform this operation.

<b>Recommended Response Action</b>	Check the number and state of storage objects and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR036

<b>Message</b>	Unable to perform operation because there are one or more Secure Virtual Disks associated with the controller.
<b>Detailed Description</b>	Unable to perform operation because there are one or more Secure Virtual Disks associated with the controller.
<b>Recommended Response Action</b>	Delete the Secure Virtual Disk(s) associated with this controller and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR037

<b>Message</b>	Missing required parameter <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = parameter name</li></ul>
<b>Detailed Description</b>	Unable to complete the requested operation because one or more input parameters identified in the message are not specified.
<b>Recommended Response Action</b>	Enter all the required parameters and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR038

<b>Message</b>	Invalid parameter value for <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = parameter name</li></ul>

<b>Detailed Description</b>	Unable to complete the requested operation because one or more input parameters identified in the message are not valid.
<b>Recommended Response Action</b>	Specify a valid value for identified parameter.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR039

<b>Message</b>	Mismatch in AttributeName and AttributeValue count.
<b>Detailed Description</b>	Unable to complete the requested operation because of a mismatch in the number of AttributeName and AttributeValue values specified.
<b>Recommended Response Action</b>	Specify a valid number of AttributeName and AttributeValue pair values and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR040

<b>Message</b>	Invalid AttributeName <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = attribute name</li></ul>
<b>Detailed Description</b>	Unable to complete the requested operation because an invalid AttributeName value is specified.
<b>Recommended Response Action</b>	Specify a valid AttributeName value for the attribute identified in the message and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR041

<b>Message</b>	Invalid value for AttributeName <i>arg1</i>
----------------	---

<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b>arg1</b> = attribute name</li> </ul>
<b>Detailed Description</b>	Unable to complete the requested operation because an invalid value for the attribute identified in the message is specified.
<b>Recommended Response Action</b>	Specify a valid value for the attribute identified in the message and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR042

<b>Message</b>	Unsupported value for AttributeName <i>arg1</i>
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b>arg1</b> = attribute name</li> </ul>
<b>Detailed Description</b>	Unable to complete the requested operation because the attribute value specified is not supported in the current configuration.
<b>Recommended Response Action</b>	Specify a value for the attribute identified in the message by using one of the possible values currently available for that attribute.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR043

<b>Message</b>	One or more selected physical disk drives are part of virtual disk that is not Secondary RAID Level 0.
<b>Detailed Description</b>	One or more physical disk drives selected for the operation are part of a virtual disk that is not Secondary RAID Level 0.
<b>Recommended Response Action</b>	This operation is not supported unless the previous virtual disk on the selected physical disk drives are deleted first. To perform the operation, delete any virtual disk on the selected physical disks drives and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR044

<b>Message</b>	All physical disks specified are not part of the same disk group.
<b>Detailed Description</b>	One or more physical disks specified to create virtual disk (VD) is not valid because it is not part of the same disk group.
<b>Recommended Response Action</b>	Enumerate existing virtual disks to find the physical disks of the same disk group. Specify physical disks that are of the same disk group and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR045

<b>Message</b>	StartingLBA and Size parameters are required to create a virtual disk.
<b>Detailed Description</b>	The specified physical disks have fragmented disk space, therefore StartingLBA and Size parameters are required to be specified in order to create a virtual disk.
<b>Recommended Response Action</b>	Specify StartingLBA and Size parameters and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR046

<b>Message</b>	The specified StartingLBA and Size values combination result in an overlapping virtual disk.
<b>Detailed Description</b>	Unable to complete the create virtual disk operation because the StartingLBA and Size value combination results in an overlapping virtual disk.
<b>Recommended Response Action</b>	Refer to the users guide to provide the correct StartingLBA and Size combination values.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR047

<b>Message</b>	Unable to change the value of attribute <i>arg1</i> because it is ReadOnly.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = attribute</li></ul>
<b>Detailed Description</b>	Unable to change the value of the attribute identified in the message because it is ReadOnly.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# STOR058

<b>Message</b>	The operation cannot be completed either because the operation is not supported on the target device, or the RAIDType of "MD Software RAID" does not allow the operation.
<b>Detailed Description</b>	Unable to complete the operation either because the operation is not supported on the target device, or the RAIDType of "MD Software RAID" does not allow the operation.
<b>Recommended Response Action</b>	Do the following and retry the operation: 1) Make sure that the target device supports the operation. 2) Make sure that if the RAIDType is set to "MD Software RAID" ensure that is the desired value. For more information, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# STOR059

<b>Message</b>	The requested operation is not currently valid because there are no virtual disks on the controller.
<b>Detailed Description</b>	The requested operation cannot be completed because there are no virtual disks (VD) available on the specified controller.
<b>Recommended Response Action</b>	Create a virtual disk and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# STOR060

<b>Message</b>	Configuration operations are not supported on the specified storage controller.
<b>Detailed Description</b>	The requested operation is not supported on the specified storage controller.
<b>Recommended Response Action</b>	For more information about supported operations, see the documentation specific for the targeted storage controller.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR061

<b>Message</b>	Initializing virtual disk is not supported on the RAID controller.
<b>Detailed Description</b>	The initializing virtual disk operation is not supported on the target device.
<b>Recommended Response Action</b>	For more information about supported operations, see the documentation specific for the targeted RAID controller or the Lifecycle Controller Remote Services Quick Start Guide.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR062

<b>Message</b>	One or more physical disks specified are full and cannot be used to create additional virtual disks.
<b>Detailed Description</b>	One or more physical disks specified are full and cannot be used to create additional virtual disks.
<b>Recommended Response Action</b>	Make sure all physical disks specified to create a virtual disk have the required amount of free space and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR063

<b>Message</b>	Unable to assign the specified virtual disk to multiple Virtual Adapters in single assignment mode.
<b>Detailed Description</b>	In order to prevent data loss, the system has prevented the assignment of a Virtual Disk to multiple Virtual Adapters because the clustered assignment mode is not enabled.
<b>Recommended Response Action</b>	Enable clustered assignment mode or unassign the virtual disk from the Virtual Adapter it is currently assigned to and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR064

<b>Message</b>	One or more physical disks specified for creating a virtual disk do not have the same block size.
----------------	---

<b>Detailed Description</b>	Unable to create the requested virtual disk because the physical disks specified did not have the same block size.
<b>Recommended Response Action</b>	Verify that the physical disks selected for creating the virtual disk have the same block size and retry the operation. The block size can be determined by reviewing the physical disk inventory and checking the BlockSize property for each physical disk.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR065

<b>Message</b>	One or more physical disks specified for creating a virtual disk are not T10 Protection Information capable.
<b>Detailed Description</b>	Unable to create the requested virtual disk because one or more specified physical disk(s) is not T10 Protection Information capable.
<b>Recommended Response Action</b>	Verify that the physical disks selected for creating a virtual disk are T10 Protection Information capable, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR066

<b>Message</b>	Controller is not T10 Protection Information capable.
<b>Detailed Description</b>	The requested operation did not succeed because the selected RAID controller is not T10 Protection Information capable.
<b>Recommended Response Action</b>	Verify that the RAID controller selected for the operation is T10 Protection Information capable, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR067

<b>Message</b>	Controller does not support uneven span RAID10 virtual disks.
<b>Detailed Description</b>	The operation did not succeed since the selected controller does not support creating uneven span RAID10 virtual disks.

<b>Recommended Response Action</b>	The selected controller is not capable of creating an uneven span RAID10 virtual disk. Specify the proper span length and span depth combination for creating RAID10 virtual disk on the selected controller, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR068

<b>Message</b>	Unable to perform the requested RAID configuration because the Lifecycle Controller version on the server does not have the necessary capabilities.
<b>Detailed Description</b>	The requested RAID configuration operation did not succeed because the Lifecycle Controller version on the target server does not have the necessary capabilities.
<b>Recommended Response Action</b>	Check the Lifecycle Controller version on the target server and update it with the latest version available.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR069

<b>Message</b>	Unable to run the <i>arg1</i> method, because the number of elements entered for VDPPropNameArray and VDPPropValueArray is unequal.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>• <b><i>arg1</i></b> = method name</li> </ul>
<b>Detailed Description</b>	The method name identified in the message could not be successfully completed, because the number of elements entered for VDPPropNameArray and VDPPropValueArray is not equal.
<b>Recommended Response Action</b>	Enter equal number of elements (pair value), and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR070

<b>Message</b>	Unable to run the WS-MAN method <i>arg1</i> , because an invalid parameter <i>arg2</i> is entered.
----------------	--

<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b>arg1</b> = method name</li> <li>· <b>arg2</b> = parameter name</li> </ul>
<b>Detailed Description</b>	The method name identified in the message could not be successfully completed, because the number of elements entered for VPropNameArray and VPropValueArray is not equal.
<b>Recommended Response Action</b>	Enter a valid parameter, and then retry the operation. For more information about a valid parameter, refer to the SimpleRAIDProfile document available at DellTechCenter <a href="http://en.community.dell.com/techcenter/extras/m/white_papers/20263535.aspx">http://en.community.dell.com/techcenter/extras/m/white_papers/20263535.aspx</a> .
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0701

<b>Message</b>	Storage objects are unavailable in the current system configuration.
<b>Detailed Description</b>	There are no RAID controllers, physical disks or virtual disks discovered by instrumentation that can be configured.
<b>Recommended Response Action</b>	Storage objects are unavailable in the current system configuration. Make sure that the storage devices are installed in the system, and then retry the operation after the Collect System Inventory On Restart (CSIOR) feature has updated the system inventory. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR0702

<b>Message</b>	The value entered for the <i>arg1</i> option is invalid
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b>arg1</b> = option name</li> </ul>
<b>Detailed Description</b>	The value entered for the option name identified in the message is invalid.
<b>Recommended Response Action</b>	For more information, run the RACADM command "racadm raid help createvd".
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR071

<b>Message</b>	The Span Count is not valid for creating a RAID 10. Valid Span counts are <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = valid span counts</li></ul>
<b>Detailed Description</b>	The configuration operation could not be performed because the specified span count is not valid.
<b>Recommended Response Action</b>	Enter a valid span count, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR072

<b>Message</b>	iDRAC Service Module (ISM) is either not present or not running on the server OS.
<b>Detailed Description</b>	The configuration operation could not be performed because it requires iDRAC Service Module (ISM) service to be present and running in the server Operating System.
<b>Recommended Response Action</b>	Make sure the iDRAC Service Module (ISM) service is running on the server Operating System and then retry the operation. Refer to the iDRAC User Guide for installing and starting ISM.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR073

<b>Message</b>	The iDRAC Service Module version present on the server OS does not support the requested PCIe SSD (NVMe) device operation.
<b>Detailed Description</b>	The iDRAC Service Module version present on the server OS does not support the requested PCIe SSD (NVMe) device operation.
<b>Recommended Response Action</b>	Update the Dell iDRAC Service Module (ISM) to the version that supports the requested operation on the PCIe SSD (NVMe) device.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR074

<b>Message</b>	The requested RAID configuration operation is not allowed because the controller is currently in HBA mode.
<b>Detailed Description</b>	The requested RAID configuration operation will not be allowed because the RAID controller is currently in HBA mode.
<b>Recommended Response Action</b>	In order to perform a RAID configuration operation, change the controller mode to RAID and retry the operation. For switching to RAID mode using the F2 System Setup utility, go to Device Settings > "RAID Controller "> Controller Management > Advanced Controller Management > Switch to RAID mode.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR075

<b>Message</b>	The operation cannot be performed because the enclosure configuration mode (Split or Unified) change request is pending.
<b>Detailed Description</b>	The requested operation could not be completed because there is an operation pending to change the enclosure configuration mode (Split or Unified). This operation is exclusive because it involves changing the RAID backplane topology.
<b>Recommended Response Action</b>	Do one of the following: 1) Create a job to complete the pending enclosure mode change request operation, allow the job to complete, restart the server, and then retry the operation. 2) Cancel any pending operations on the RAID controller, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR076

<b>Message</b>	Enclosure configuration mode (Split/Unified) cannot be changed because there are already pending operations.
<b>Detailed Description</b>	The requested operation could not be completed because at least one other pending operation was found on the RAID controller. This operation needs exclusivity because it involves changing RAID backplane topology.
<b>Recommended Response Action</b>	Do one of the following: 1) Create a job to complete the pending operations, allow the job to complete, and then retry the operation. 2) Cancel any pending operations on the RAID controller, and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR077

<b>Message</b>	Unable to change Patrol Read State since Patrol Read Mode is not set to Manual.
<b>Detailed Description</b>	A Patrol Read State change operation cannot be performed if the Patrol Read Mode is not set to Manual.
<b>Recommended Response Action</b>	Change the Patrol Read Mode to Manual before performing a Patrol Read State change operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR078

<b>Message</b>	The requested operation requires a reboot type that does not match the reboot type required for pending operations.
<b>Detailed Description</b>	The requested operation cannot be performed because it involves server reboot type which is different than the reboot type of pending operations. Combining operations with different reboot types for the same RAID controller is not supported by iDRAC.
<b>Recommended Response Action</b>	Cancel any pending operations on the RAID controller and then retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR079

<b>Message</b>	The device does not support this operation or is in a state that does not allow this operation.
<b>Detailed Description</b>	The requested operation cannot be performed because it is either not supported by the device or the device was not in the right state to perform the operation.
<b>Recommended Response Action</b>	Make sure the device supports the requested operation. If the operation is supported, then make sure the server is turned on and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR081

<b>Message</b>	The job could not be created because the reboot type selected for the job creation and the reboot type required for pending operations do not match.
<b>Detailed Description</b>	The job could not be created because the reboot type selected for the job creation and the reboot type required for pending operations do not match.
<b>Recommended Response Action</b>	Change the reboot type for job creation and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR082

<b>Message</b>	The operation cannot be stopped or cancelled because the operation is not currently running.
<b>Detailed Description</b>	The operation cannot be stopped or canceled because the operation is not currently running.
<b>Recommended Response Action</b>	Make sure the operation is running before attempting to cancel or stop the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR083

<b>Message</b>	The Physical Disk(s) specified are too small to create a Virtual Disk of the requested size.
<b>Detailed Description</b>	The Physical Disk(s) specified are too small to create a Virtual Disk of the requested size.
<b>Recommended Response Action</b>	Specify Physical Disk FGDD IDs of physical disk drive(s) that have a larger disk space, and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR084

<b>Message</b>	Unable to create the job because another job is currently running
<b>Detailed Description</b>	The requested job cannot be run because another job is currently running. Two options for running jobs on multiple storage controllers are: 1) Run the jobs on each controller individually. Wait for each job to complete before starting the configuration and job creation on the next controller. 2) Schedule multiple jobs to run at a later time using the scheduling options.
<b>Recommended Response Action</b>	Make sure that the currently running job is completed, and then retry the operation. If necessary, recreate the configuration and the job. For information about running jobs on multiple storage controllers, see the iDRAC Online Help or iDRAC Users Guide.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR085

<b>Message</b>	Unable to assign the virtual disk (VD) to a virtual adapter (VA) because the VD is already assigned to a VA.
<b>Detailed Description</b>	The virtual disk (VD) specified in the operation cannot be assigned to virtual adapter (VA) because the VD is already assigned to a VA.
<b>Recommended Response Action</b>	Make sure that the VD specified in the operation is not assigned to a VA, and then retry the operation. To check if a VD is already assigned, run the WS-Man command: enumerate DCIM_VirtualDiskView class.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR086

<b>Message</b>	Unable to change the high availability (HA) mode of RAID storage because the servers are turned on.
<b>Detailed Description</b>	The high availability (HA) mode of RAID storage cannot be changed because the servers are turned on.
<b>Recommended Response Action</b>	Turn off all the servers in the chassis and retry the operation.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR087

<b>Message</b>	Unable to start the configuration operation because the System Lockdown mode is enabled.
<b>Detailed Description</b>	The configuration operation cannot be started because the System Lockdown mode is enabled.
<b>Recommended Response Action</b>	Make sure that the Lockdown.1#SystemLockdown attribute is set to Disabled in the DCIM_LiDracCardEnumeration class by running the WS-Man get command at the command line interface (CLI), and then retry the operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR088

<b>Message</b>	Unable to complete the operation because the enclosure FQDD (Fully Qualified Device Descriptor) specified in the input is not valid.
<b>Detailed Description</b>	The requested operation cannot be completed because the enclosure FQDD (Fully Qualified Device Descriptor) specified in the input is not valid.
<b>Recommended Response Action</b>	Enter a valid enclosure FQDD (Fully Qualified Device Descriptor) and retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR089

<b>Message</b>	The storage configuration operation is successfully completed and the change is in pending state.
<b>Detailed Description</b>	The storage configuration operation is successfully completed and the change is in pending state.
<b>Recommended Response Action</b>	To apply the configuration operation immediately, create a configuration job using the --realtime option. To create the necessary real-time job, run the jobqueue command. For more information about jobqueue command, run the racadm help jobqueue command.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR090

<b>Message</b>	Unable to create a virtual disk because an invalid combination of span count or number of disks was entered for the RAID level selected.
<b>Detailed Description</b>	Unable to create a virtual disk because an invalid combination of span count or disks passed was entered for the RAID level selected.
<b>Recommended Response Action</b>	Enter a span count value (-sc option) or number of disks (-pdkey option) that is appropriate for the RAID level selected. See the PERC Controller Users Guide for valid span count and number of disks required for a raid level. Retry the operation by running the RACADM storage createvd command with the appropriate options.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR092

<b>Message</b>	Unable to run the configuration operation on the controller because foreign configuration import operation is in progress.
<b>Detailed Description</b>	The requested configuration operation cannot be run because a foreign configuration import operation on the controller is already in progress.
<b>Recommended Response Action</b>	Wait for the import process to complete before running any configuration operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR093

<b>Message</b>	Unable to run the configuration operation because the controller is not available for the import process.
<b>Detailed Description</b>	The configuration operation cannot be performed because the controller is not available for import process.
<b>Recommended Response Action</b>	Make sure an operation is not pending on the controller. If an operation is pending, wait for the operation to complete or cancel the pending operation and then retry the operation. Refer to the storage controller documentation for compatibility information.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR094

<b>Message</b>	The storage configuration operation is successfully completed and the change is in pending state.
<b>Detailed Description</b>	The storage configuration operation is successfully completed and the change is in pending state.
<b>Recommended Response Action</b>	To apply the configuration operation immediately, create a configuration job using the --realTime option. To apply the configuration after restarting the server, create a configuration job using the -r option. To create the necessary real-time and restart jobs, run the jobqueue command. For more information about jobqueue command, run the racadm help jobqueue command.
<b>Category</b>	Storage (STOR = Storage)

## STOR095

<b>Message</b>	Storage operation is successfully completed.
<b>Detailed Description</b>	Storage operation is successfully completed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR096

<b>Message</b>	Unable to create a virtual disk because the disk space size value entered for the virtual disk is less than the lower limit value (100 MB).
<b>Detailed Description</b>	A virtual disk cannot be created because the disk space size value entered for the virtual disk is less than the lower limit value (100 MB).
<b>Recommended Response Action</b>	Enter a value (the -size option) equal or higher than 100 MB, and then retry the operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# STOR097

**Message** Unable to complete the operation because the memory size of the physical disk drive is less than the available or entered virtual disk size.

**Detailed Description** A virtual disk cannot be created because the memory size of the physical disk drive is less than available or entered virtual disk size.

**Recommended Response Action** Enter the FQDD of a physical disk drive that has a larger disk space, and then retry the operation. To view a list of physical disk drives and associated disk space, run the RACADM command "racadm storage get pdisks -o -p size". To view a list of virtual disks and associated size, run the RACADM command "racadm storage get vdisks -o -p size".

## STOR1

**Message** A device *arg1* is in an unknown state.

**Arguments**

- ***arg1*** = device name

**Detailed Description** The controller cannot communicate with a device. The state of the device cannot be determined. There may be a bad or loose cable, or a missing device, or a problem with the driver or firmware.

**Recommended Response Action** See the storage hardware documentation for information on checking the cables. Check for problems with any enclosures attached to the system. Verify that the controller has a supported version of the driver and firmware. Rebooting the system may resolve this problem.

<b>Message</b>	Unable to start the operation because the operation is not supported on the NVMe RAID drives.
<b>Detailed Description</b>	The operation cannot be started because the operation is not supported on the NVMe RAID drives. The RAIDMode may not match the RAIDType or the SoftwareRAIDMode requested.
<b>Recommended Response Action</b>	Set the NVMeMode attribute of BIOS to NonRAID and retry the operation. To set the NonRAID mode, see the staged objects example of setting Single-Object in the SET command section of the iDRAC RACADM CLI Reference guide available on the support site. To verify the setting by using iDRAC graphical user interface (GUI), click Configuration > BIOS Settings > NVMe Settings.

## STOR13

Message	Unable to set the operation mode of the newly inserted storage sled in slot <i>arg1</i> to Split Single or Split Dual Host, because the storage sled has only one PERC controller.
Arguments	<ul style="list-style-type: none"> <li><i>arg1</i> = slot number</li> </ul>
Detailed Description	The operation mode of the newly inserted storage sled in the slot identified in the message cannot be set because the storage sled has only one PERC controller. The operation mode will only be Join after part replacement.
Recommended Response Action	Make sure that the newly inserted storage sled has the same number of PERC controllers as the previous storage sled so that the new sled will have the same operation mode after part replacement.

## STOR14

Message The peripheral sled in slot *arg1* initialization is not complete.

Arguments  
 · ***arg1*** = slot number

Detailed Description Peripheral sled initialization is not successful with following possible reasons: 1) FRU is not functioning. 2) Sled internal components are not responding. 3) Component power state is not good. 4) Hardware configuration errors.

Recommended Response Action Do the following: 1) Check system log for further information about the issue, 2) Remove and re-insert the peripheral sled identified in the message or virtually reset the sled, 3) Reset the CMC and wait for a few minutes for the CMC to finish restarting. If the issue persists, contact your service provider.

## STOR15

Message The storage sled *arg1* is improperly configured.

## Arguments

- **arg1** = slot number

**Detailed Description** The storage sled identified in the message was inserted in a location which does not support split dual host operation mode. The storage sled can functionally work in the current location with only primary PERC controller enabled.

**Recommended Response Action** Do one of the following: 1) Change the operating mode of the storage sled identified in the message. 2) Insert the storage sled to a different slot.

## STOR311

<b>Message</b>	A firmware update was applied to a drive that requires a DC power cycle (cold boot). If the drive is in an external enclosure, the updated firmware will only be activated after a DC power cycle of the enclosure.
<b>Detailed Description</b>	A drive firmware update was applied but requires a DC power cycle (cold boot) to activate. If the drive is internal to the system performing the update, no further action is required. If the drive is in an external enclosure, the enclosure must be turned off and then turned on in order for the updated drive firmware to activate.
<b>Recommended Response Action</b>	If the drive is internal to the system performing the update, no further action is required. If the drive is in an external enclosure, the enclosure must be turned off and then turned on in order for the updated drive firmware to activate. After turning off the external enclosure, wait for drives to spin down before turning the enclosure back on. The drive firmware will activate after the enclosure is turned back on.

## STOR314

<b>Message</b>	Unable to start the reconfiguration operation on the virtual drive because a reconfiguration operation is either in pending state or already running.
<b>Detailed Description</b>	The reconfiguration operation cannot be started on the virtual drive because a reconfiguration operation is either in pending state or already running.
<b>Recommended Response Action</b>	Do one of the following: 1) Commit and run the pending reconfiguration operation and retry the operation. 2) Cancel the currently running or pending reconfiguration operation and retry the new reconfiguration operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR315

<b>Message</b>	Unable to perform the reconfiguration operation because the storage controller does not support reconfiguring a Virtual Disk that has more than one span.
<b>Detailed Description</b>	Certain RAID levels require a Virtual Disk to have more than one span. Reconfiguration operation on these Virtual Disks is not supported by the storage controller.
<b>Recommended Response Action</b>	Make sure that the Virtual Disk has a single span and retry the reconfiguration operation. For information about the RAID levels that have a single span, see the Lifecycle Controller Users Guide available at the support site.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR316

<b>Message</b>	Unable to perform the reconfiguration operation because the storage controller does not support reconfiguration of a Virtual Disk that is part of a disk group that has multiple Virtual Disks.
<b>Detailed Description</b>	This occurs when a disk group is sliced to create multiple Virtual Disks. Reconfiguration of such sliced Virtual Disks is not supported.
<b>Recommended Response Action</b>	Make sure that the physical disk group has a single Virtual Disk and retry the reconfiguration operation.

<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR317

<b>Message</b>	Unable to perform the reconfiguration operation because the number of physical disks specified in the disk group is not as per the permitted range.
<b>Detailed Description</b>	A disk drive group has a limit on the minimum and maximum number of disk drives it can have on the basis of its Virtual Disk RAID level. When a reconfiguration operation is specified with additional physical disks the total number of physical disks should be in the disk groups permissible range.
<b>Recommended Response Action</b>	Enter the correct number of physical disks for the reconfiguration operation and retry the operation. The number of physical disks in a disk group must be within the disk groups permissible range. For information about the minimum and maximum possible physical disks in a disk group, see the Lifecycle Controller Users Guide available at the support site.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR318

<b>Message</b>	Unable to perform the reconfiguration operation because the Virtual Disk size specified is invalid.
<b>Detailed Description</b>	Expansion of storage capacity of a Virtual Disk is limited by the disk space of its physical disks and the Virtual Disk RAID level. Based on these two values there is a maximum limit on the capacity expansion size of a Virtual Disk.
<b>Recommended Response Action</b>	Make sure that the Virtual Disk size specified for the reconfiguration operation is less than or equal to the maximum possible value. For information about the maximum possible value, see the Lifecycle Controller Users Guide available at the support site.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR319

<b>Message</b>	Unable to perform the reconfiguration operation because a reconfiguration operation is already in progress for the Virtual Disk.
<b>Detailed Description</b>	The storage controller only allows one reconfiguration operation at a time on a Virtual Disk. A new reconfiguration operation cannot be requested until the currently executing reconfiguration operation is complete or is canceled.

<b>Recommended Response Action</b>	There are two possible actions. 1) Wait for the current reconfiguration operation to complete and then retry the new reconfiguration operation. 2) Cancel the current reconfiguration operation and then start the new reconfiguration operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR320

<b>Message</b>	Unable to start the reconfiguration operation because the requested reconfiguration operation is invalid.
<b>Detailed Description</b>	The storage controller does not support online capacity expansion and RAID level migration of a Virtual Disk at the same time.
<b>Recommended Response Action</b>	There are two Reconfiguration operations possible on a Virtual Disk 1) Online Expansion of the storage capacity 2) RAID level migration . Only one of the above two operations can be specified in a Reconfiguration operation. Make sure that only one of the above two operation types is requested and retry the operation. Also make sure that if provided, the Virtual Disk size is at least 1% of the maximum expansion size possible. Also make sure that if provided, the new Virtual Disk RAID level is different from the existing raid level.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR321

<b>Message</b>	Unable to complete the operation because one or more physical disk drives selected for the operation are currently used by another operation.
<b>Detailed Description</b>	The operation cannot be completed because one or more physical disk drives selected for the operation is currently used by another operation.
<b>Recommended Response Action</b>	Do one of the following and retry the operation: 1) Wait for the current operation to complete. 2) Select a drive that is free for the operation.
<b>Category</b>	Storage (STOR = Storage)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## STOR322

<b>Message</b>	Unable to complete the operation because the controller does not support replacement operations or its Copyback mode is not set to ON.
----------------	--

<b>Detailed Description</b>	The operation cannot be completed because the controller does not support Replacement operations or its Copyback mode is not set to ON.
<b>Recommended Response Action</b>	Do the following and retry the operation: 1) Make sure that the controller supports the Replacement operation. 2) The Copyback Mode is enabled. To set the Copyback Mode to ON on a 13th Generation PowerEdge server using iDRAC GUI, navigate to Storage > Controllers > Setup > Configure Controller Properties > Copyback Mode > Action > Set to ON and Apply. To set it to ON on a 14th Generation PowerEdge server using iDRAC GUI, navigate to Configuration > Storage Configuration > Select the Controller > Select the Copyback mode > Add to Pending Operations > Apply.

## STOR5

Message Redundancy lost. *arg1*

Arguments  
· ***arg1*** = VD/Enclosure Name

**Detailed Description** A virtual disk or enclosure has lost data redundancy. In the case of a virtual disk, one or more physical disks included in the virtual disk have failed. Due to the failed physical disk or disks, the virtual disk is no longer maintaining redundant (mirrored or parity) data. The failure of an additional physical disk will result in lost data. In the case of an enclosure, more than one enclosure component has failed. For example, the enclosure may have suffered the loss of all fans or all power supplies.

**Recommended Response Action** Identify and replace the failed components. To identify the failed component, select the Storage object and click the Health subtab. The controller status displayed on the Health subtab indicates whether a controller has a failed or degraded component. Click the controller that displays a Warning or Failed status. This action displays the controller Health subtab which displays the status of the individual controller components. Continue clicking the components with a Warning or Failed status until you identify the failed component. See Storage Health for more information. See the enclosure documentation for information on replacing enclosure components and for other diagnostic information.

## SUP Event Messages

### SUP001

Message	Insufficient parameters provided.
Detailed Description	Insufficient Parameters provided for the WSMAN command.
Recommended Response Action	Make sure the parameters are correct and in the right number and format and retry the action.
Category	Updates (SUP = Firmware Update Job)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

### SUP002

Message	Job creation failure.
Detailed Description	Could not create a new job because of a network error or an unresponsive iDRAC.
Recommended Response Action	Retry the action. If this fails, reboot the iDRAC.
Category	Updates (SUP = Firmware Update Job)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

### SUP003

Message	Invalid URI, target or reboot flag.
---------	-------------------------------------

<b>Detailed Description</b>	One of the uniform resource input (URI) string, target or reboot flag parameters is missing or exceeds the prescribed length.
<b>Recommended Response Action</b>	Verify that the URI, target or reboot flag parameter values are correct and retry the action.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP005

<b>Message</b>	Invalid reboot value.
<b>Detailed Description</b>	Reboot value specified is not supported.
<b>Recommended Response Action</b>	Verify the reboot value and retry the action. Current options available are 1)Power Cycle 2) Graceful shutdown without forced shutdown 3) Graceful shutdown with forced shutdown (~10 minutes wait time).
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP006

<b>Message</b>	Update package downloading - Delete failed.
<b>Detailed Description</b>	The DUP is being downloaded and the update cannot be deleted while the download is in progress.
<b>Recommended Response Action</b>	Wait until the update package is downloaded and retry the action. The download can take more than 5 minutes depending on network speed and size of the update package.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP007

<b>Message</b>	iDRAC busy - Delete failed.
<b>Detailed Description</b>	The iDRAC communication channel is open and being used by another process; this can be caused by an open session of Lifecycle Controller or Unified Server Configurator locally on the server.
<b>Recommended Response Action</b>	If Lifecycle Controller / Unified Server Configurator (USC) is in use, wait until it has exited and retry the action. Otherwise retry after 30 seconds to check if network connectivity caused this error.

<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP009

<b>Message</b>	Driver pack update in progress - Delete failed.
<b>Detailed Description</b>	Because of the size of the driver pack, the update process removes the older version of the driver pack from the system before installing the newer version. For that reason, the driver pack update cannot be deleted.
<b>Recommended Response Action</b>	Wait for the Driver Pack update to complete. To revert to the previous version of the update, download and update the firmware to the version desired.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0100

<b>Message</b>	Firmware update operation failed.
<b>Detailed Description</b>	The firmware update operation failed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0101

<b>Message</b>	Unable to get firmware update status.
<b>Detailed Description</b>	Unable to get the update status.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0102

<b>Message</b>	Invalid TFTP IP address specified.
<b>Detailed Description</b>	The TFTP IP Address specified is invalid.
<b>Recommended Response Action</b>	Specify a valid TFTP IP Address.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0103

<b>Message</b>	TFTP IP address is not reachable.
<b>Detailed Description</b>	The specified TFTP server is not reachable.
<b>Recommended Response Action</b>	Check if the TFTP server is alive.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0104

<b>Message</b>	TFTP Source path too long.
<b>Detailed Description</b>	The source path needs to be lesser than 64 characters.
<b>Recommended Response Action</b>	Enter a source path < 64 characters.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0105

<b>Message</b>	Invalid firmware image
----------------	------------------------

<b>Detailed Description</b>	The firmware image provided by the user is not valid.
<b>Recommended Response Action</b>	Provide a valid firmware image.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0106

<b>Message</b>	Unable to locate firmware image file in specified path.
<b>Detailed Description</b>	There is no firmware image present at the specified path.
<b>Recommended Response Action</b>	Check if the firmware image is present at the specified path.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0107

<b>Message</b>	File path too long.
<b>Detailed Description</b>	The file path provided as a parameter is too long.
<b>Recommended Response Action</b>	Shorten the length of the string given as file path by either moving the file or renaming the folders along the path.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0108

<b>Message</b>	A firmware update operation is already in progress.
<b>Detailed Description</b>	The firmware update is in progress and another update cannot be done.
<b>Recommended Response Action</b>	Wait for the update operation to conclude and then re-try.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SUP0109

<b>Message</b>	A TFTP IP address has not been specified but is required.
<b>Detailed Description</b>	The firmware update cannot proceed without the TFTP IP address.
<b>Recommended Response Action</b>	Specify the TFTP IP address.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# SUP011

<b>Message</b>	Invalid Job ID specified.
<b>Detailed Description</b>	The specified Job ID was not found in the job queue.
<b>Recommended Response Action</b>	Verify the job ID and retry the action. Retrieve all open jobs by issuing the GetAllJobs command.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# SUP0110

<b>Message</b>	Uninitializing firmware update services. Please wait.
<b>Detailed Description</b>	The firmware update is being uninitialized.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0111

**Message** Timeout waiting for firmware update process to complete.

**Detailed Description** Firmware Update time-out occurred.

**Recommended Response Action** Re-try the firmware update process.

**Category** Updates (SUP = Firmware Update Job)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SUP0112

**Message** The -p option is not currently supported for remote RACADM and the operating system being used.

**Detailed Description** The requested option is not available for remote racadm/operating system.

**Recommended Response Action** No response action is required.

**Category** Updates (SUP = Firmware Update Job)

**Severity** Severity 3 (Informational)

**Redfish Event Type**

*No alerts are applicable for this message*

## SUP0113

**Message** TFTP firmware update is currently disabled.

**Detailed Description** The cfgRhostsFwUpdateTftpEnable object must be set.

**Recommended Response Action** Set the cfgRhostsFwUpdateTftpEnable object in cfgRemoteHosts group using config subcommand.

**Category** Updates (SUP = Firmware Update Job)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SUP0114

**Message** The firmware update operation could not be completed successfully.

<b>Detailed Description</b>	The firmware update process failed.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0115

<b>Message</b>	A firmware update is currently in progress. Unable to reset the RAC at this time.
<b>Detailed Description</b>	The rac cannot be reset, while the firmware update is in progress.
<b>Recommended Response Action</b>	Wait for the firmware update to finish.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0116

<b>Message</b>	The RAC configuration has initiated restoration to factory defaults. Please wait up to a minute for this process to complete before accessing the RAC again.
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0117

<b>Message</b>	Firmware rollback initiated successfully. The iDRAC will now reset to complete the firmware rollback operation.
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)

**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP0118

**Message** iDRAC reset failed. Please reset the iDRAC manually to complete the firmware rollback operation.  
**Detailed Description** Success message.  
**Recommended Response Action** Manually reset the iDRAC.  
**Category** Updates (SUP = Firmware Update Job)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP0119

**Message** Firmware rollback failed  
**Detailed Description** Success message.  
**Recommended Response Action** No response action is required.  
**Category** Updates (SUP = Firmware Update Job)  
**Severity** Severity 1 (Critical)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP0120

**Message** Preparing for firmware update. Please wait.  
**Detailed Description** Success message.  
**Recommended Response Action** No response action is required.  
**Category** Updates (SUP = Firmware Update Job)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP0121

<b>Message</b>	Firmware update in progress [ <i>arg1</i> percent complete]
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = Extent of completion</li></ul>
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0122

<b>Message</b>	Firmware update completed successfully
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0123

<b>Message</b>	Firmware update completed successfully. The RAC is in the process of resetting. Your connection will be lost. Please wait up to a minute before starting a new session.
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	Re-connect to the iDRAC after a minute.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0124

<b>Message</b>	Firmware update is not currently in progress
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0125

<b>Message</b>	Current firmware update status is unknown
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0126

<b>Message</b>	Firmware update in progress. Please wait.
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0127

<b>Message</b>	Verifying firmware image
----------------	--------------------------

<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0128

<b>Message</b>	Ready for firmware update
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP0129

<b>Message</b>	Resetting the RAC. Please wait.
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP013

<b>Message</b>	Update in progress - Delete failed.
<b>Detailed Description</b>	The update process is underway and cannot be deleted.
<b>Recommended Response Action</b>	Do not try to delete the job when the update process is underway. To revert to the previous version of the update, download and update the firmware to the version desired or run the rollback command to go back to the previous version.
<b>Category</b>	Updates (SUP = Firmware Update Job)

**Severity** Severity 2 (Warning)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP0130

**Message** TFTP firmware update has been initiated. This update process may take several minutes to complete.  
**Detailed Description** Success message.  
**Recommended Response Action** No response action is required.  
**Category** Updates (SUP = Firmware Update Job)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP0131

**Message** FTP firmware update has been initiated. This update process may take several minutes to complete.  
**Detailed Description** Success message.  
**Recommended Response Action** No response action is required.  
**Category** Updates (SUP = Firmware Update Job)  
**Severity** Severity 3 (Informational)  
**Redfish Event Type**

## SUP014

**Message** Unknown error - Delete failed.  
**Detailed Description** An unknown error was encountered while trying to delete the job.  
**Recommended Response Action** Retry the action. If this fails, reboot the iDRAC.  
**Category** Updates (SUP = Firmware Update Job)  
**Severity** Severity 1 (Critical)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SUP015

<b>Message</b>	Input parameters values should not be NULL.
<b>Detailed Description</b>	One of the parameters specified received a NULL value that prevented the action from completing.
<b>Recommended Response Action</b>	Correct the parameter value and retry the command.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP016

<b>Message</b>	Job cannot be scheduled.
<b>Detailed Description</b>	Only jobs with the job status of Downloading / Downloaded / Pending Reboot can be scheduled.
<b>Recommended Response Action</b>	In case there is an update job, wait until the job status is Downloaded and then retry the action.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP017

<b>Message</b>	Invalid start time.
<b>Detailed Description</b>	The specified start time is invalid.
<b>Recommended Response Action</b>	Start Time should be in the form YYYYMMDDHHMMSS. Or it should be TIME_NOW to specify an immediate update or reboot. Verify the specified start time and retry the action.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP018

<b>Message</b>	Invalid until time.
----------------	---------------------

<b>Detailed Description</b>	The specified until time is invalid.
<b>Recommended Response Action</b>	Until Time should be in the form YYYYMMDDHHMMSS. Verify the specified until time and retry the action.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP019

<b>Message</b>	Lifecycle Controller is not enabled.
<b>Detailed Description</b>	For 11G systems: System Services must be enabled to perform the requested operation. System Services has been disabled through the iDRAC configuration utility accessed by pressing CTRL+E on boot up or through a remote operation. For 12G and above generations : Lifecycle Controller must be enabled to perform the requested operation. Lifecycle Controller has been disabled by pressing F2 Setup, selecting iDRAC Configuration, and selecting Lifecycle Controller Settings on boot up or through a remote operation.
<b>Recommended Response Action</b>	For 11G systems: Use the iDRAC configuration utility to enable the System Services by pressing on the CTRL+E option on boot up at the targeted system. For 12G and above generations: Use F2 Setup, select iDRAC Configuration, and select Lifecycle Controller Settings, to enable the Lifecycle Controller on boot up of the targeted system.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP020

<b>Message</b>	The specified job was deleted
<b>Detailed Description</b>	The specified job was successfully deleted from the job queue.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP021

<b>Message</b>	Diagnostics, Driver Pack or Lifecycle Controller update is a direct update and cannot be scheduled.
----------------	---

<b>Detailed Description</b>	Diagnostics and Lifecycle Controller or Unified Server Configurator updates are direct updates and cannot be scheduled.
<b>Recommended Response Action</b>	Do not schedule Lifecycle Controller or Unified Server Configurator or Diagnostics Jobs.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP022

<b>Message</b>	Job store has reached the maximum storage limit.
<b>Detailed Description</b>	JobStore file has exceeded the size limit. Delete all unneeded JobIDs from the job store.
<b>Recommended Response Action</b>	New JobID cannot be stored. Manually delete the failed jobs and retry the operation.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP023

<b>Message</b>	Duplicate JobID provided as inputs for scheduling.
<b>Detailed Description</b>	Duplicate/Invalid JobID was provided as input for scheduling.
<b>Recommended Response Action</b>	Verify the job ID and retry the action. Retrieve all open jobs by issuing the GetAllJobs command.
<b>Category</b>	Updates (SUP = Firmware Update Job)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SUP024

<b>Message</b>	InstanceID value provided for the update operation is invalid
<b>Detailed Description</b>	The InstanceID value provided for update operation is invalid.
<b>Recommended Response Action</b>	Enumerate inventory, copy the InstanceID value and provide that value for the update operation.
<b>Category</b>	Updates (SUP = Firmware Update Job)

# SWC Event Messages

## SWC0001

**Message** Unable to save the network settings.

**Detailed Description** The network cable may not be connected or an internal error occurred. For more information about the failure, see Lifecycle Log.

**Recommended Response Action** Verify the network cable is connected and retry the operation. If the problem persists:1) Turn off the system and disconnect the power cord.2) Wait for five seconds.3) Reconnect the power cord, turn on the system, and retry the operation.

**Category** Configuration (SWC = Software Config)

**Severity** Severity 1 (Critical)

## SWC0088

<b>Message</b>	Unable to retrieve the iDRAC DHCP IP address.
<b>Detailed Description</b>	The DHCP IP address of iDRAC cannot be retrieved because a network cable is not connected or a DHCP server is not functioning.
<b>Recommended Response Action</b>	Make sure that the network cable is connected, DHCP server is turned on, and then retry the operation. If the issue persists, perform the following steps: 1) Turn off the server and disconnect the power cord. 2) Wait for five seconds. 3) Reconnect the power cord, turn on the server, and then retry the operation.

## SWC5003

**Message** System Controller (SC) has either stopped functioning or is updating a firmware version.

**Detailed Description** The System Controller (SC) has either stopped functioning or is updating a firmware version.

<b>Recommended Response Action</b>	Make sure that the System Controller is functioning.
<b>Category</b>	System Health (SWC = Software Config)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SWC5004

<b>Message</b>	System Controller (SC) has restarted functioning.
<b>Detailed Description</b>	System Controller (SC) has started functioning again because either a server health issue is resolved or SC has completed a firmware update process.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	System Health (SWC = Software Config)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SWC5005

<b>Message</b>	Unable to update the System Controller (SC) firmware.
<b>Detailed Description</b>	The System Controller (SC) firmware cannot be updated. For information about the causes, see SEL Event Data Byte 2.
<b>Recommended Response Action</b>	Retry the SC firmware update operation. If the issue persists, try updating by using a different firmware update file.
<b>Category</b>	Updates (SWC = Software Config)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SWC5006

<b>Message</b>	System Controller (SC) Firmware Update Successful.
<b>Detailed Description</b>	System Controller (SC) reported a successful Firmware Update.
<b>Recommended Response Action</b>	No response action required.
<b>Category</b>	Updates (SWC = Software Config)

## SWC8500

**Message** Unable to generate Profile with [ *arg1* ] settings.  
**Arguments**  
· ***arg1*** = number of entries  
**Detailed Description** Unable to communicate with iDRAC.

**Recommended Response Action** Check if iDRAC is ready and system is running properly. Utilize the RACADM command by running "racadm getversion" to list all the servers and make sure the iDRAC version is displayed. If the iDRAC is listed as Not Ready then wait until it becomes ready. A Virtual Reseat may be required.

## SWC8531

**Message** Chassis Management Controller unable to set iDRAC administrator role for root user account.

**Detailed Description** The Chassis Management Controller is unable to set the administrator role for the iDRAC root user. This can happen if the communication to the iDRAC from CMC is non-functional or iDRAC is rebooting.

**Recommended Response Action** If communications with the iDRAC is not functioning, reset the iDRAC and retry the operation after a few minutes. Run the RACADM command "racadm ping server-<slot number> " to check the communications. If the communications are not functional, restart the iDRAC by performing a Virtual Reset of the server using the RACADM command "racadm racreset -m server-<slot id>".

## SWC8532

**Message** Chassis Management Controller is unable to set chassis assigned QuickDeploy IP addresses because the starting IP address cannot accommodate all iDRACs.

**Detailed Description** The starting IP address specified cannot accommodate all the servers. The starting iDRAC IPv4 Address specifies the static IPv4 address of the iDRAC located in the first slot. The static IPv4 address of each subsequent iDRAC is calculated as a slot number increment of this IPv4 address.

**Recommended Response Action** Make sure there are enough IPv4 addresses for all the iDRACs and then retry the operation.

## SWC8564

**Message** Unable to clear the Boot Identity profile from the server in slot *arg1* because there is no response from the server iDRAC.

**Arguments**

- ***arg1*** = server slot number

**Detailed Description** The Boot Identity profile from the server identified in the message cannot be cleared because there is no response from the server iDRAC. A MAC Address conflict is possible if the server retains virtual MAC Address values and they are also allocated to another server.

**Recommended Response Action** Make sure that the server is not used until the Persistence Policy settings are returned to default values and the Virtual MAC Address settings have been cleared. Persistence Policy settings can be reset to default values by resetting the server iDRAC to factory default settings. If the iDRAC cannot be reset to default values, contact your service provider before attempting to use the server.

## SWC8603

**Message** Unable to apply profile to server *arg1* using Quick Deploy feature, because the CSIOR feature on Server *arg2* is disabled.

**Arguments**

- ***arg1*** = slot number
- ***arg2*** = slot number

**Detailed Description** The selected profile cannot be applied to the server identified in the message, because the Collect System Inventory On Restart (CSIOR) feature on the server is disabled.

**Recommended Response Action** Make sure that CSIOR on the server identified in the messages is enabled and retry the operation. For 11th generation servers, to enable CSIOR, restart the server, and select the Ctrl-E setup. Select System Services, and enable CSIOR. For 12th generation and above, to enable CSIOR using Lifecycle Controller GUI, restart the server, click <F2> when the companys logo is displayed. On the iDRAC Settings page, click Lifecycle Controller, and enable CSIOR.

## SWC8605

Message Quick Deploy Profile: Server *arg1* generation information is not recognized.

Arguments

- ***arg1*** = server number

Detailed Description Information about the server identified in the message is not recognized.

Recommended Response Action Restart the Chassis Management Controller (CMC) and retry the operation. The CMC can be restarted by using the Web UI interface and selecting Chassis Overview > Troubleshooting > Reset Components and then select the Reset/Failover CMC button. If the issue persists, contact your service provider.

## SWC8606

Message Quick Deploy Profile: Timeout exceeded while waiting for remote services ready on Server *arg1*.

Arguments

- ***arg1*** = server number

Detailed Description The server identified in the message never reported that remote services were ready.

**Recommended Response Action** Make sure that the iDRAC on the server identified in the message is operating properly and that Lifecycle Controller is enabled, then retry the operation. If the issue persists, perform a virtual reset of the server and retry the operation. The server can be virtually reset by using the CMC Web UI interface and selecting Chassis Overview > Troubleshooting > Reset Components and then select Virtual Reset from the drop down operation for the server identified in the message.

## SWC8608

**Message** Server Profiles: unable to access server: *arg1* for operation [ *arg2* ] because of one or more of the following reasons: 1) iDRAC is not ready. 2) Lifecycle Controller of the server is disabled.

**Arguments**

- ***arg1*** = slot number
- ***arg2*** = wsman operation

**Detailed Description** The CMC was unable to perform the operation described in the message because of one or more of the following reasons: 1) iDRAC is not ready. 2) Lifecycle Controller of the server is disabled.

**Recommended Response Action** Make sure that iDRAC on the server identified in the message is operating and that Lifecycle Controller is enabled, and then retry the operation. If the issue persists, perform a virtual reseal of the server and retry the operation. To perform a virtual reseal of the server, on CMC Web interface, select Chassis Overview -> Troubleshooting -> Reset Components. On the Reset Components page, select Virtual Reseat from the drop-down menu for the server identified in the message.

## SWC8627

**Message** Unable to configure the storage array in slot *arg1* , because there is no communication between Chassis Management Controller (CMC) and the storage device.

**Arguments**

- ***arg1*** = slot number

**Detailed Description** Unable to configure storage array. This could happen if CMC could not communicate with storage device.

**Recommended Response Action**

1. Reset iDRAC by using the graphical user interface (GUI): Click Chassis Overview > Troubleshooting > Reset Components. In the Reset Server section, from the Reset drop-down menu, select iDRAC Reset corresponding to the server iDRAC to be reset, and then click Apply Selection. Or, reset iDRAC by running the following command at the command line interface (CLI): `racadm racreset -m server-n.2`. Reset Chassis Management Controller (CMC) by using the GUI: Click Chassis Overview > Troubleshooting > Reset Components, and then click Reset/Failover CMC. Or, reset CMC by running the following command at the CLI: `racadm racreset`. For more information about the syntax and parameters used, see the iDRAC 8/7 v2.30.30.30 RACADM CLI Guide and the Chassis Management Controller Version 5.0 for Dell PowerEdge M1000e RACADM Command Line Reference Guide available on the support site.

## SWC9004

<b>Message</b>	The requested SecureBoot Certificate Import operation cannot be completed.
<b>Detailed Description</b>	The SecureBoot Certificate Import operation cannot be completed because of one or more of the following reasons: corrupted input file (Certificate or UEFI Driver/op-ROM/boot loader file), invalid file, invalid file encoding format, input file (Certificate or UEFI Driver/op-ROM/boot loader file) is not found, the policy that is being updated already exists, insufficient space in certificate store and internal error.
<b>Recommended Response Action</b>	Enter valid parameters and retry the operation. If the issue persists, free some space in the certificate store by deleting few certificates, restart iDRAC, and then retry the operation.

## SWC9005

**Message** The requested SecureBoot Certificate Export operation cannot be completed.

**Detailed Description** The requested operation was not successful because: 1. Operation is not allowed when SecureBoot policy is Standard. 2. Record not found. 3. Destination not reachable. 4. Destination has insufficient access rights. 5. Internal error.

**Recommended Response Action** Make sure that the destination has enough free space, or is not read-only. Retry the operation with valid input parameters. If the problem persists, reboot the iDRAC and retry the operation.

## SWU8556

<b>Message</b>	Unable to configure the sled network uplink on sled <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b><i>arg1</i></b> = slot number</li> </ul>
<b>Detailed Description</b>	The sled network uplink on the sled identified in the message could not be configured. The servers on the sled may not have expected network connectivity.

**Recommended Response Action** Perform a Virtual Reseat operation, and then retry the operation. To virtually reseat a server 1) Using the CMC Web UI, go to Chassis Overview > Troubleshooting > Reset Components, and then select slot for the component identified in the message and apply the Virtual Reseat or 2) Run the following RACADM command at the command line interface: "racadm serveraction -f -m sled-<slot number> reseat".

## SWU8561

<b>Message</b>	Unable to downgrade the firmware version because the current hardware configuration does not support rollback to the earlier firmware version.
<b>Detailed Description</b>	The firmware version selected for rollback does not support the current chassis hardware configuration.
<b>Recommended Response Action</b>	Make sure that firmware version selected for rollback is supported for the current hardware configuration, such as I/O modules, PSU modules, and servers. For example, a newer generation PSU may not work with an earlier iDRAC or CMC firmware. For more information, see the platform Owners Manual or CMC or iDRAC Release Notes for details.

# SYS Event Messages

## SYS001

Message	The operation was successful.
Detailed Description	The operation requested successfully completed.
Recommended Response Action	No response action is required.
Category	Configuration (SYS = System Info)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS002

Message	Unable to perform the operation due to an unknown error in iDRAC.
Detailed Description	The operation did not complete successfully because of an unknown error in iDRAC.
Recommended Response Action	Retry the action. If the issue persists, reset iDRAC.
Category	Configuration (SYS = System Info)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS003

Message	Missing parameters: <i>arg1</i> .
Arguments	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = parameter names</li></ul>
Detailed Description	One or more required parameters needed for the operation are missing.
Recommended Response Action	Refer to the Lifecycle Controller Remote Services documentation and retry the operation with the required parameters.
Category	Configuration (SYS = System Info)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS004

**Message** Invalid parameter value for *arg1* .

**Arguments**

- ***arg1*** = parameter name

**Detailed Description** The value provided for the specified parameter is invalid.

**Recommended Response Action** Refer to the Lifecycle Controller Remote Services documentation and retry the operation with a valid value for the identified parameter.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS005

**Message** AttributeName array and AttributeValue array element count mismatch.

**Detailed Description** The AttributeName input array and AttributeValue input array do not have the same number of elements.

**Recommended Response Action** Verify AttributeName and AttributeValue pairs match and are valid. Refer to the Lifecycle Controller Remote Services documentation.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS006

**Message** Unable to set read only attribute: *arg1*

**Arguments**

- ***arg1*** = attribute name

**Detailed Description** The attribute being set is currently read-only and cannot be changed.

**Recommended Response Action** Refer to the Lifecycle Controller Remote Services documentation for the specific attribute behavior.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS007

**Message** Input out of range for *arg1* .

**Arguments**

- ***arg1*** = attribute name

**Detailed Description** The input value for the attribute being set is not within the acceptable range for the attribute.

**Recommended Response Action** Refer to the Lifecycle Controller-Remote Services documentation for the specific attribute and retry the operation with valid value within the range of the attribute.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS008

**Message** Invalid boolean in value for attribute: *arg1* .

**Arguments**

- ***arg1*** = attribute name

**Detailed Description** The input value for the specified attribute is not a valid boolean value for the attribute.

**Recommended Response Action** Refer to the Lifecycle Controller-Remote Services documentation and provide a valid boolean value for the specified attribute.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS009

**Message** String exceeds maximum length for attribute: *arg1*

**Arguments**

- ***arg1*** = attribute name

**Detailed Description** Length of string for specified attribute exceeded the maximum length allowed.

**Recommended Response Action** Check Lifecycle Controller-Remote Services documentation and retry the command with string value length less than maximum length allowed.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS010

**Message** Invalid character in value for attribute: *arg1*

**Arguments**

- ***arg1*** = attribute name

**Detailed Description** The input value for the specified attribute is not valid.

**Recommended Response Action** Refer to Lifecycle Controller-Remote Services documentation and provide valid attribute value for the specified attribute.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS011

**Message** Pending configuration values are already committed, unable to perform another set operation.

**Detailed Description** A configuration job is scheduled to apply pending set attribute operations. Set operations are not allowed if there is an existing configuration job for a component.

**Recommended Response Action** Wait for the scheduled job to complete or delete the configuration jobs before attempting more set attribute operations.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS012

**Message** User privileges are not sufficient to perform operation.

**Detailed Description** The user credentials provided do not have appropriate privileges to perform the operation requested.

**Recommended Response Action** Retry operation using user credentials that have appropriate privileges to perform the operation.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS013

Message	Invalid attribute name: <i>arg1</i> .
Arguments	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = attribute name</li></ul>
Detailed Description	The attribute name provided for the requested operation does not exist on the target system or is invalid.
Recommended Response Action	For more information, see Lifecycle Controller-Remote Services documentation.
Category	Configuration (SYS = System Info)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS014

Message	Invalid value for attribute: <i>arg1</i>
Arguments	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = attribute name</li></ul>
Detailed Description	The value provided for the identified attribute is invalid.
Recommended Response Action	For more information, refer to the Lifecycle Controller-Remote Services documentation and provide a valid value for the identified attribute.
Category	Configuration (SYS = System Info)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS015

Message	Job created successfully.
Detailed Description	The requested job has been created.
Recommended Response Action	No response action is required.
Category	Configuration (SYS = System Info)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS016

<b>Message</b>	Job completed with errors
<b>Detailed Description</b>	All the operations in the Job were attempted, but some did not complete successfully.
<b>Recommended Response Action</b>	Review the Job content and verify the values are correct. For more information, see Lifecycle Controller Remote Services documentation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS017

<b>Message</b>	Job did not complete successfully.
<b>Detailed Description</b>	The job did not complete successfully.
<b>Recommended Response Action</b>	Verify the reason for the unsuccessful completion of the job by inspecting the Lifecycle Log entries related to the job. Correct the underlying cause of the unsuccessful completion and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS018

<b>Message</b>	Job completed successfully.
<b>Detailed Description</b>	The submitted job completed successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS019

<b>Message</b>	Required dependency input not found.
----------------	--------------------------------------

<b>Detailed Description</b>	The input is missing a required dependency necessary for the operation.
<b>Recommended Response Action</b>	Provide the required dependency and retry. For more information, see Lifecycle Controller Remote Services documentation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS020

<b>Message</b>	Invalid required Attribute value.
<b>Detailed Description</b>	The value provided for the required attribute is invalid.
<b>Recommended Response Action</b>	The value specified is not valid. Refer to the Lifecycle Controller Remote Services documentation for more information.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS021

<b>Message</b>	Unable to set the value for <i>arg1</i>
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b><i>arg1</i></b> = attribute name</li> </ul>
<b>Detailed Description</b>	The operation did not complete successfully because of incorrect parameters or internal firmware issues.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, do one of the following: 1) verify the value being set is correct, 2) reset the iDRAC.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS022

<b>Message</b>	Resource allocation failure.
<b>Detailed Description</b>	The operation could not complete because of an internal resource allocation issue with the firmware.
<b>Recommended Response Action</b>	Reset the iDRAC and retry the operation.

<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS023

<b>Message</b>	No configuration changes pending.
<b>Detailed Description</b>	There are no pending values to change.
<b>Recommended Response Action</b>	Ensure there are pending values for the attributes that need to be set and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS024

<b>Message</b>	Unable to complete the operation because attribute dependency checking did not complete successfully.
<b>Detailed Description</b>	Unable to complete the operation because attribute dependency checking did not complete successfully. This attribute is dependent on a related attribute that has an incorrect value. The related attribute is the parent in a parent-child value dependency relationship and has an affect on what values the child attribute can have.
<b>Recommended Response Action</b>	Make sure the dependency related attribute has the correct value and retry the operation. For more information on attribute dependency, Refer to the Dell Lifecycle Controller Remote Services Quick Start Guide and Profile Documents available at the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS025

<b>Message</b>	Unable to delete pending configuration.
<b>Detailed Description</b>	There are no pending configurations to be deleted.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)

## SYS043

<b>Message</b>	Successfully exported Server Configuration Profile.
<b>Detailed Description</b>	The current configuration of the system components (BIOS, RAID, NIC, iDRAC, and so on) was written to a Server Configuration Profile and successfully copied to the specified location.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS044

<b>Message</b>	Unable to export one or more component configurations.
<b>Detailed Description</b>	Unable to collect the configuration information for one or more components. An internal error occurred while processing component information.
<b>Recommended Response Action</b>	Enable Collect System Inventory On Restart (CSIOR) using Lifecycle Controller and restart the system. Make sure that inventory collection is complete before retrying the operation. For more information, see the Lifecycle Controller Users Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS045

<b>Message</b>	Unable to copy the Server Configuration Profile to the network share.
<b>Detailed Description</b>	An error occurred while copying the Server Configuration Profile to the network share.
<b>Recommended Response Action</b>	If the file is being exported to an NFS share, make sure that it is accessible from iDRAC. If the file is being exported to a CIFS share, make sure that it is accessible from iDRAC by using share access credentials with the appropriate privileges. If the share is by using http or https protocol, make sure that you have correctly configured the share and it can be accessible by using iDRAC.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS046

<b>Message</b>	Unable to import the Server Configuration Profile from the network share.
<b>Detailed Description</b>	An error occurred while copying the Server Configuration Profile from the network share.
<b>Recommended Response Action</b>	If the file is being copied from an NFS share, make sure that it is accessible from iDRAC. If the file is being copied from a CIFS share, make sure that it is accessible from iDRAC using the share credentials provided. Test the network share access using the Test Network Connection method. For more information, see the Lifecycle Controller Users Guide.

<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS047

<b>Message</b>	Input file for import configuration is not compliant with the configuration schema.
<b>Detailed Description</b>	The input file is not compliant with the system configuration schema.
<b>Recommended Response Action</b>	Make sure that the input file is compliant with the system configuration schema published on delltechcenter.com/lc in the LC profile Schema Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS048

<b>Message</b>	Server Configuration Profile contains invalid characters, <i>arg1</i> at line <i>arg2</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = character</li><li>· <b><i>arg2</i></b> = line</li></ul>
<b>Detailed Description</b>	The operation expected a valid profile that is compliant with the system configuration schema. However, the Server Configuration Profile does not contain valid profile content.
<b>Recommended Response Action</b>	View the file in any Web browser to check for invalid characters. Remove the invalid characters and make sure that the file is a valid XML and is compliant with the system configuration schema published on delltechcenter.com/lc in the LC profile Schema Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## SYS050

<b>Message</b>	The Server Configuration Profile for import configuration is not compliant with schema nesting checks.
<b>Detailed Description</b>	The Server Configuration Profile for the import configuration operation is not compliant with schema nesting checks. Only RAID controllers can have nested Component nodes up to a maximum nesting depth of three.
<b>Recommended Response Action</b>	Make sure that the Server Configuration Profile is compliant with the system configuration schema published on <a href="http://delltechcenter.com/lc">delltechcenter.com/lc</a> in the LC profile Schema Guide. Only RAID controllers can have nested Component nodes.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS051

<b>Message</b>	The system could not be shut down within the specified time.
<b>Detailed Description</b>	Sometimes, the operating system on the server may not allow a graceful shutdown or may not complete within the specified graceful shutdown timeout. This error indicates that the system could not be shutdown within the time specified. The default timeout value is 5 minutes and the maximum value allowed is 1 hour.
<b>Recommended Response Action</b>	Retry the operation with a longer specified graceful shutdown timeout or with the system shutdown option.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS052

<b>Message</b>	Analyzing iDRAC, System, or Lifecycle Controller configuration for changes to be applied.
<b>Detailed Description</b>	Configuration changes that do not require a system restart are currently being applied.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS053

<b>Message</b>	Successfully imported and applied Server Configuration Profile.
<b>Detailed Description</b>	Configuration changes specified in the Server Configuration Profile were successfully applied.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS054

<b>Message</b>	No configuration changes requiring a system restart need to be applied.
<b>Detailed Description</b>	The current configuration for components that require staged configuration already match the configuration specified by the input file. A system restart to apply staged configuration is not required.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS055

<b>Message</b>	Import of Server Configuration Profile operation completed with errors.
<b>Detailed Description</b>	The configuration specified in the Server Configuration Profile was applied, but there were some errors. The Lifecycle Controller Log contains the details of the component configurations that did not complete successfully.
<b>Recommended Response Action</b>	Review the Lifecycle Controller Log and identify the configuration changes that did not complete successfully. Retry those changes in a separate operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS056

<b>Message</b>	Waiting for the system to shut down.
<b>Detailed Description</b>	Waiting for the system to shut down before applying configuration changes.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS057

<b>Message</b>	Exporting Server Configuration Profile.
<b>Detailed Description</b>	The current system configuration is being collected and the Server Configuration Profile is being generated.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS058

<b>Message</b>	Applying configuration changes.
<b>Detailed Description</b>	Running Lifecycle Controller Automated Task Execution application in Unified Extensible Firmware Interface (UEFI) environment to apply configuration changes.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS059

<b>Message</b>	Component configuration successfully changed.
----------------	---

<b>Detailed Description</b>	Configuration changes for the component identified by the Fully Qualified Device Descriptor (FQDD) were successfully applied.
<b>Recommended Response Action</b>	No response action is required. See Lifecycle Log for details.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS060

<b>Message</b>	Component configuration completed with errors.
<b>Detailed Description</b>	Some configuration changes for the component identified by the Fully Qualified Device Descriptor (FQDD) in the configuration job results were not successfully applied.
<b>Recommended Response Action</b>	Export the Lifecycle Log and identify the configuration changes that did not complete or retrieve the configuration results using the GetConfigResults() method. Retry those changes that did not complete in a separate import operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS061

<b>Message</b>	Unable to complete component configuration.
<b>Detailed Description</b>	Some configuration changes for the component identified by the Fully Qualified Device Descriptor (FQDD) in the configuration job results were not successfully applied.
<b>Recommended Response Action</b>	Export the Lifecycle Log and identify the configuration changes that did not complete or retrieve the configuration results using the GetConfigResults() method. Retry those changes that did not complete in a separate import operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS062

<b>Message</b>	Input file for import configuration operation is invalid. The expected profile root element was not found.
<b>Detailed Description</b>	The input file for the import configuration operation does not contain a valid profile root element.

<b>Recommended Response Action</b>	Open the input file in any Web browser to check for invalid content before the expected root element. Correct the invalid content and make sure that the profile is compliant to the system configuration schema before retrying the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS063

<b>Message</b>	Input file for import configuration operation is invalid. The expected root element was not closed.
<b>Detailed Description</b>	The input file for the import configuration operation does not contain a closed root element.
<b>Recommended Response Action</b>	Open the input file in any Web browser to check for invalid content before the expected root element. Correct the invalid content and make sure that the profile is compliant to the system configuration schema before retrying the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS064

<b>Message</b>	Input file for import configuration operation is invalid at line <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = line</li></ul>
<b>Detailed Description</b>	The input file for the import configuration operation contains invalid XML data at the line specified.
<b>Recommended Response Action</b>	Open the input file in any Web browser to check for invalid content before the expected root element. Correct the invalid content and make sure that the XML file is compliant to the system configuration schema before retrying the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS065

<b>Message</b>	Input file for import configuration operation cannot be found or opened.
<b>Detailed Description</b>	An internal error occurred opening the input configuration XML file. An iDRAC reset is required.

<b>Recommended Response Action</b>	Reset iDRAC and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS066

<b>Message</b>	No changes detected for iDRAC, System, or Lifecycle Controller configuration.
<b>Detailed Description</b>	No iDRAC, System, or Lifecycle Controller configuration changes were applied. The settings specified in the system configuration XML input file match the current configuration for these components.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS067

<b>Message</b>	Unable to complete application of configuration profile values.
<b>Detailed Description</b>	Some or all configuration actions during the import of configuration profile operation did not complete successfully. The configuration action details are logged into the Lifecycle Log.
<b>Recommended Response Action</b>	Export the Lifecycle Log and identify the configuration changes that did not successfully complete. Resolve any issues with the configuration profile content and retry the import operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS068

<b>Message</b>	Configuration changes that require system reboot were not applied.
<b>Detailed Description</b>	Some configuration changes that require system reboot were not applied because the values specified in the input XML file are incorrect.
<b>Recommended Response Action</b>	Use the GetConfigResults() method to get the configuration job results or export the Lifecycle Log and review the configuration job results to identify the errors. Make changes to the input XML to correct the errors. Retry the import operation.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS069

**Message** No changes were applied since the current component configuration matched the requested configuration.

**Detailed Description** The settings specified in the system configuration XML file match the current configuration for all components.

**Recommended Response Action** No response action is required.

**Category** Configuration (SYS = System Info)

**Severity** Severity 3 (Informational)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS070

**Message** Configuration changes that require system reboot were not applied.

**Detailed Description** The configuration changes that require system reboot into the UEFI environment on the system did not complete for all components.

**Recommended Response Action** No response action is required.

## SYS071

**Message** Server Configuration Profile export operation timed-out.

<b>Detailed Description</b>	The export of Server Configuration Profile did not complete because the operation took too long.
<b>Recommended Response Action</b>	Make sure the Collect System Inventory On Restart (CSIOR) Lifecycle Controller setting is enabled and reboot the system. Retry the operation after CSIOR has completed. If the problem persists, reset iDRAC by pressing the System ID button for at least 15 seconds and retry the operation after iDRAC has fully restarted.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS072

<b>Message</b>	Server Configuration Profile import operation timed-out.
<b>Detailed Description</b>	The import of Server Configuration Profile did not complete as the operation took too long.
<b>Recommended Response Action</b>	Delete all jobs, reset iDRAC by pressing the System ID button for at least 15 seconds, and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS073

<b>Message</b>	Unable to apply changes that require system reboot because the Lifecycle Controller State setting is disabled in the Server Configuration Profile.
<b>Detailed Description</b>	The import of Server Configuration Profile operation completed with errors because the Lifecycle Controller State was disabled in the input profile. Configuration changes requiring a system reboot were not applied.
<b>Recommended Response Action</b>	Enable the Lifecycle Controller State setting and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS074

<b>Message</b>	Unable to apply configuration changes because another configuration job is in progress.
<b>Detailed Description</b>	Unable to apply configuration changes because another configuration job is in progress.
<b>Recommended Response Action</b>	Wait until the current configuration job is complete and retry the operation.

<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS075

<b>Message</b>	Unable to perform the import operation because the specified file does not exist on the remote share.
<b>Detailed Description</b>	Unable to perform the import operation because the specified file does not exist on the remote share.
<b>Recommended Response Action</b>	Make sure the import configuration file exists on the remote share before retrying the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS076

<b>Message</b>	Invalid or unsupported component specified in the input configuration profile.
<b>Detailed Description</b>	The configuration profile contains a component node that is not supported.
<b>Recommended Response Action</b>	Make sure the input configuration profile only specifies supported component. Check the import operation job configuration results for the unsupported profile node.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS077

<b>Message</b>	Unable to perform the preview operation because the specified file does not exist on the remote share.
<b>Detailed Description</b>	Unable to perform the preview operation because the specified system configuration XML file does not exist on the remote share.
<b>Recommended Response Action</b>	Make sure the configuration XML file to be previewed exists on the remote share before retrying the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS078

<b>Message</b>	Unable to retrieve the Server Configuration Profile from the network share for preview.
<b>Detailed Description</b>	Unable to retrieve the Server Configuration Profile from the network share for the requested preview operation. This may be due to issues with network accessibility.
<b>Recommended Response Action</b>	If the configuration profile is on an NFS share, make sure that the network share is accessible from iDRAC. If the configuration profile is on a CIFS share, make sure that the network share is accessible from iDRAC using the share credentials specified. Test the network share access using the Test Network Connection method. For more information, see the Lifecycle Controller Users Guide.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS079

<b>Message</b>	The Preview operation indicates the input file for Server Configuration Profile is not compliant with the configuration profile schema.
<b>Detailed Description</b>	The Preview operation indicates the input file for Server Configuration Profile is not compliant with the configuration profile schema.
<b>Recommended Response Action</b>	Make sure that the input file is compliant with the system configuration XML schema published on <a href="http://www.delltechcenter.com/lc">www.delltechcenter.com/lc</a> .
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS080

<b>Message</b>	Preview of Server Configuration Profile import operation indicated that no configuration changes will be successful.
<b>Detailed Description</b>	Preview of Server Configuration Profile import operation indicates that no changes will be applied successfully. This is likely due to a mismatch between the actual target system components and component FGDDs specified in the configuration profile.
<b>Recommended Response Action</b>	Make sure that the input file is compliant with the system configuration schema published on <a href="http://www.delltechcenter.com/lc">www.delltechcenter.com/lc</a> and contains valid FGDDs that represent actual components in the target system.

## SYS081

<b>Message</b>	Successfully previewed Server Configuration Profile import operation.
<b>Detailed Description</b>	Successfully previewed Server Configuration Profile import operation.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## SYS082

<b>Message</b>	Completed the preview of Server Configuration Profile import operation. Some changes specified in the configuration profile will not be successfully applied in an import operation.
<b>Detailed Description</b>	The request to preview the Server Configuration Profile import operation completed. Some changes specified in the configuration profile will not be successfully applied in an import configuration profile operation.
<b>Recommended Response Action</b>	Identify the configuration changes that cannot be completed successfully by 1) Export the Lifecycle Log review the configuration results in the entries for the preview job or 2) Retrieve the preview operation configuration results using the GetConfigResults() method. Retry those changes that did not complete in a separate import operation.
<b>Category</b>	Configuration (SYS = System Info)

## SYS115

<b>Message</b>	The power cord sensor is non-functional.
<b>Detailed Description</b>	The power cord sensor becomes non-functional because of one of the following reasons: 1) The power cable may not be connected properly or disconnected. 2) The power cord sensor in the power supply unit has failed. However, the power supply unit may still function. 3) There is an input power failure.
<b>Recommended Response Action</b>	Do of the following to resolve the issue: 1) Reconnect the power cord to the power supply unit. 2) Replace the power supply unit that has the failed power cord sensor, with a new power supply unit. 3) Make sure that the input power supply is restored.
<b>Category</b>	System Health (SYS = System Info)

## SYS120

**Message** Unable to complete the operation because the OS Collector is taking too much time. The operation is cancelled.

**Detailed Description** The OS Collector application did not complete its task within the maximum allowed time and the operation is cancelled. This may be because the server OS is not supported by the OS Collector application and the application is unable to function correctly.

**Recommended Response Action** Do the following: 1) Make sure that the OS Collector application supports the OS installed on the server. If the OS is not supported, the OS Collector may not function correctly. 2) Reinstall the latest OS Collector on the iDRAC, and then retry the operation. To install the OS Collector using the iDRAC Web UI, get the latest OC Collector update package and then select the Update and Rollback link from the iDRAC Web UI home page and upload the install package. If the issue persists, contact your service provider.

# SYS125

**Message** OS Collector: Unable to communicate with WMI services.

**Detailed Description** The OS Collector application is unable to communicate with the WMI service. This may be because the user context the application is running in does not have appropriate access privileges or firewall/security settings are preventing retrieving registry and software data from WMI.

**Recommended Response Action** Do the following: 1) Make sure the user context the OS Collector application is running in has the appropriate privileges to access WMI. Make sure that firewall or security settings are set to allow access and retry the operation. 2) If the issue persists, restart the WMI service and retry the operation. 3) If the issue continues to persist, restart the server OS and retry the operation.

## SYS163

**Message** The iDRAC is restarting to complete the System Erase operation. Do not restart server until the iDRAC restarts.

**Detailed Description** The iDRAC environment has changed and the iDRAC must be restarted to apply the changes requested. Normal operation will return after the restart has completed. One exception is, the iDRAC has been reset to its default settings. In this case additional setup is required to use the iDRAC. For more information, see the iDRAC Users Guide.

**Recommended Response Action** No response action is required.

## SYS164

**Message** Access to Lifecycle Controller internal storage was not acquired.

**Detailed Description** The System Erase operation attempted to access Lifecycle Controller internal storage that is already being accessed by another function. Exclusive access to the internal storage is required for the System Erase operation. The System Erase operation attempts Lifecycle Controller internal storage access for 10 minutes. After the timeout the current job completes with an unsuccessful status.

**Recommended Response Action** Check the server and make sure that it is not in BIOS POST startup processing or stopped in the POST phase of startup. The server can also be stopped during POST because the <F2> is pressed or Option ROM setup utilities are being used. After the BIOS startup has completed, retry the operation.

## SYS177

<b>Message</b>	There was an issue retrieving Hardware data.
<b>Detailed Description</b>	There was an issue retrieving Hardware data from the iDRAC internal storage. This may be because Collect System Inventory on Restart (CSIOR) feature is disabled and has never executed or the iDRAC Remote Services API status may not be in the Ready state.
<b>Recommended Response Action</b>	Make sure the Collect System Inventory on Restart (CSIOR) is enabled and has run at least once before retrying this operation. For remote web services API access, make sure the GetRemoteServicesAPIStatus method returns Ready status before trying this operation. If the issue persists, reset iDRAC and retry the operation.

## SYS226

<b>Message</b>	Unable to transfer a file, <i>arg1</i> , because of the reason described by the code <i>arg2</i> sent by the HTTP remote host server.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = filename</li><li>· <b><i>arg2</i></b> = http response code</li></ul>
<b>Detailed Description</b>	The file cannot be transferred because of the reason described by the code identified in the message. For every unsuccessful file transfer, the HTTP remote host server returns an error code, where each code has a description about the reason for failure.
<b>Recommended Response Action</b>	View the HTTP remote host server documentation to resolve the issue. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (SYS = System Info)

## SYS258

Message Unable to transfer a file, *arg1*, because there is a problem with the remote host servers security certificate.

Arguments  
· *arg1* = filename

Detailed Description The remote host server certificate was validated against the uploaded certificate and the validation did not succeed. The remote host server certificate does not correspond to the uploaded verification certificate. The certificate subject name, CN part, may not match the domain name used. If the uploaded certificate is correct, the IP address of the remote host server may be incorrect, the certificate may be expired or this error could indicate a Man-In-The-Middle attack in progress.

Recommended Response Action Make sure that the following are correct and retry the operation: a) the file transfer parameters b) the uploaded certificate corresponds to the remote host server c) the certificate subject name, CN part, matches the domain name used.

## SYS264

**Message** Unable to transfer a file, *arg1* , because the proxy server was incapable of performing the file transfer operations.

**Arguments**

- *arg1* = filename

**Detailed Description** Unable to transfer a file because the proxy server was incapable of performing the file transfer operations even when the network connection is available to the proxy server.

**Recommended Response Action** Make sure that correct proxy settings and file transfer parameters are set, and then retry the operation. If the issue persists, try connecting to a different proxy.

## SYS265

**Message** Unable to transfer a file, *arg1* , because the remote host server did not allow file transfer operations.

**Arguments**  
· ***arg1*** = filename

**Detailed Description** The file cannot be transferred because the remote host server did not allow file transfer operations even when the remote host is successfully contacted.

**Recommended Response Action** Make sure that the file transfer parameters and credentials, and remote host server configuration are correct, and then retry the operation.

**Category** Configuration (SYS = System Info)

## SYS268

**Message** Unable to transfer a file, *arg1* , because the proxy operation is taking longer time than the set time limit.

**Arguments** . *arg1* = filename

**Detailed Description** The file cannot be transferred because the proxy operation is taking longer time than the set time limit of the proxy configuration. The other possible reasons are: 1) issue in the network 2) remote host server may not be turned on 1) remote host server is turned on but not functioning 4) an issue in protocol negotiation.

**Recommended Response Action** Check the file transfer parameters, health of the remote host, the proxy time limit configuration and then retry the operation.

# SYS315

**Message** Unable to transfer a file, *arg1* , because of the reason described by the code *arg2* sent by the FTP remote host server.

**Arguments**

- ***arg1*** = filename
- ***arg2*** = ftp response code

**Detailed Description** The file cannot be transferred because of the reason described by the code identified in the message. For every unsuccessful file transfer, the FTP remote host server returns an error code, where each code has a description about the reason for failure.

**Recommended Response Action** View the FTP remote host server documentation to resolve the issue. If the issue persists, contact your service provider.

# SYS400

**Message** Unable to successfully complete the precondition check operations such as Open Data Protocol (OData) Version, If-Match request-header, and If-Not-Modified request-headers.

**Detailed Description** The precondition check operation such as Open Data Protocol (OData) Version, If-Match request-header, and If-Not-Modified request-headers cannot be completed.

**Recommended Response Action** Make sure that the prerequisites specified for the request are satisfied. For more information about the prerequisites, see the Redfish Specification and Redfish Users Guide available on the support site.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS401

<b>Message</b>	Unable to complete the operation because the media type entered is not supported.
<b>Detailed Description</b>	The operation cannot be successfully completed because the media type entered is not supported.
<b>Recommended Response Action</b>	Enter a media type that is supported and retry the operation. For more information about the supported media types, see the Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS402

<b>Message</b>	Unable to run the method because the requested HTTP method is not allowed.
<b>Detailed Description</b>	The method cannot be run because the requested HTTP method is not allowed.
<b>Recommended Response Action</b>	Enter a valid HTTP method and retry the operation. For information about valid methods, see the Redfish Users Guide available on the support site.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS403

<b>Message</b>	Unable to complete the operation because the resource <i>arg1</i> entered in not found.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = resource name</li></ul>
<b>Detailed Description</b>	The operation cannot be successfully completed because the resource identified in the message does not exist.
<b>Recommended Response Action</b>	Enter the correct resource and retry the operation. For information about valid resource, see the Redfish Users Guide available on the support site.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS404

<b>Message</b>	Unable to complete the operation because the If-Match request header is missing.
<b>Detailed Description</b>	The operation cannot be successfully completed because the If-Match request header is missing.
<b>Recommended Response Action</b>	Make sure that the If-Match request header is entered and retry the operation. For information about the necessary headers, see the Redfish specification and Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS405

<b>Message</b>	Unable to complete the operation because the JSON data format entered is invalid.
<b>Detailed Description</b>	The request cannot be successfully completed because the JSON data format entered is invalid.
<b>Recommended Response Action</b>	Do the following and the retry the operation: 1) Enter the correct JSON data format and retry the operation. 2) Make sure that no syntax error is present in JSON data format. 3) Make sure that a duplicate key is not present in JSON data format.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS406

<b>Message</b>	Unable to start the configuration operation because the System Lockdown mode is enabled.
<b>Detailed Description</b>	The configuration operation cannot be started because the System Lockdown mode is enabled.
<b>Recommended Response Action</b>	Make sure that the Lockdown.1.SystemLockdown attribute is set to Disabled by running the HTTP PATCH method on "Managers OemAttributes" Redfish API, and then retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS407

<b>Message</b>	Unable to complete the operation because the value <i>arg1</i> entered for the query parameter <i>arg2</i> is invalid.
----------------	--

#### Arguments

- **arg1** = value
- **arg2** = query param

**Detailed Description** The operation cannot be completed because the value entered for the query parameter identified in the message is invalid.

**Recommended Response Action** Enter a valid value and retry the operation. The minimum value that can entered for top query parameter is 1.

**Category** Audit (SYS = System Info)

**Severity** Severity 2 (Warning)

#### Redfish Event Type

*No alerts are applicable for this message*

## SYS408

**Message** Only one task ID is displayed in the response.

**Detailed Description** Only one task ID is displayed. By default, the location response header displays information about only one task ID.

**Recommended Response Action** To view all task IDs, run the "Tasks" Redfish API.

**Category** Audit (SYS = System Info)

**Severity** Severity 3 (Informational)

#### Redfish Event Type

*No alerts are applicable for this message*

## SYS409

**Message** Unable to set the object properties because an incorrect object value is entered.

**Detailed Description** The object properties cannot be set because an incorrect object value is entered.

**Recommended Response Action** Enter a valid object value and retry the operation. For information about recommended values, see the schema or the attribute registry based on the type of resource.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

#### Redfish Event Type

*No alerts are applicable for this message*

## SYS410

**Message** Unable to modify the attribute because the attribute is read-only and depends on other attributes.

<b>Detailed Description</b>	The attribute cannot be modified because the attribute is read-only and depends on other attributes. Some attributes have dependencies on other attributes that are required to perform a task. However, some of the attributes are read-only because of the current system configuration and the values of the dependent attributes.
<b>Recommended Response Action</b>	Verify if the attribute has dependency on other attributes and retry the operation. To verify, view the attribute registry based on the type of resource.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS411

<b>Message</b>	Unable to upload the file because the file size is greater than specified limit.
<b>Detailed Description</b>	The file cannot be uploaded because the file size is greater than specified limit.
<b>Recommended Response Action</b>	Make sure that the file size is less than the specified limit. For information about specified limit, see the Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS412

<b>Message</b>	Unable to upload the file because of unknown internal issues.
<b>Detailed Description</b>	The file cannot be uploaded because of unknown internal issues.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, reset the iDRAC, and then retry the operation. Reset the iDRAC by using the "Manager Reset Actions" Redfish API.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS413

<b>Message</b>	The operation successfully completed.
<b>Detailed Description</b>	The operation successfully completed as all conditions have been met.
<b>Recommended Response Action</b>	No response action is required.

<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS414

<b>Message</b>	A new resource is successfully created.
<b>Detailed Description</b>	A new resource is successfully created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS415

<b>Message</b>	Unable to complete the operation because an invalid username and/or password is entered, and therefore authentication failed.
<b>Detailed Description</b>	The operation cannot be completed because an invalid username and/or password is entered, and therefore authentication failed.
<b>Recommended Response Action</b>	Enter valid user name and password and retry the operation.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS416

<b>Message</b>	Unable to complete the operation because the username and/or password is not entered, and therefore authentication failed.
<b>Detailed Description</b>	The operation cannot be completed because the username and/or password is not entered, and therefore authentication failed.
<b>Recommended Response Action</b>	Enter valid user name and password and retry the operation.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS417

**Message** Unable to complete the operation because the value *arg1* entered for the query parameter *arg2* is out of range *arg3* .

## Arguments

- ***arg1*** = value
- ***arg2*** = query param
- ***arg3*** = range

**Detailed Description** The operation cannot be successfully completed because the value entered for the query parameter is out of range as identified in the message.

**Recommended Response Action** Enter a query parameter value within range and retry the operation.

**Category** Audit (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS418

**Message** Unable to send the test event because the Alert service is disabled.

**Detailed Description** The test event cannot be sent because the Alert service is disabled.

**Recommended Response Action** Enable the attribute IPMILan.1.AlertEnable by using the PATCH operation on the Redfish OemAttributes URL, and then retry the operation.

**Category** Configuration (SYS = System Info)

**Severity** Severity 3 (Informational)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS419

**Message** Unable to complete the operation because the Redfish attribute is disabled.

**Detailed Description** The operation cannot be successfully completed because the Redfish attribute is disabled.

**Recommended Response Action** Make sure that the Redfish.1.Enable attribute is set to Enabled by running the HTTP PATCH method on "Managers OemAttributes" Redfish API, and then retry the operation.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS420

**Message** Unable to complete the operation because the Redfish URI version *arg1* is not supported.

**Arguments**

- ***arg1*** = version

**Detailed Description** The operation cannot be completed because the Redfish URI version identified in the message is not supported.

**Recommended Response Action** Enter a valid URI version and retry the operation. For information about valid URI versions, see the Redfish Users Guide available on the support site.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS421

**Message** The Active Directory object DCLookupByUserDomain cannot be disabled, because the DCLookupDomainName object of Active Directory is not configured.

**Detailed Description** The Active Directory object DCLookupByUserDomain cannot be disabled, because the DCLookupDomainName object of Active Directory is not configured.

**Recommended Response Action** Configure the DCLookupDomainName object by using the PATCH operation on the Redfish OemAttributes URL, and then retry the operation.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS422

**Message** Unable to display the ETag in the response headers because of unknown internal issues.

**Detailed Description** The ETag in the response headers cannot be displayed because of unknown internal issues.

**Recommended Response Action** Retry the operation. If the issue persists, reset the iDRAC, and then retry the operation. Reset the iDRAC by using the "Manager Reset Actions" Redfish API.

**Category** Audit (SYS = System Info)

**Severity** Severity 1 (Critical)

## Redfish Event Type

*No alerts are applicable for this message*

## SYS423

<b>Message</b>	Unable to send the test event because there are no subscriptions.
<b>Detailed Description</b>	The test event cannot be sent because there are no subscriptions.
<b>Recommended Response Action</b>	Create a subscription using HTTP POST operation to the URI of the subscription resource.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS424

<b>Message</b>	Unable to complete the operation because the value <i>arg1</i> entered for the property <i>arg2</i> is of different type than the property can accept.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = value</li><li>· <b><i>arg2</i></b> = property</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the value entered for the property identified in the message is of invalid type.
<b>Recommended Response Action</b>	Enter a valid value in the expected type for the property in the request body and retry the operation. For information about valid values, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS425

<b>Message</b>	Unable to complete the operation because the value <i>arg1</i> entered for the property <i>arg2</i> is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = value</li><li>· <b><i>arg2</i></b> = property</li></ul>
<b>Detailed Description</b>	The operation cannot be completed because the value entered for the property identified in the message is not supported.
<b>Recommended Response Action</b>	Enter a valid value for the property in the request body and retry the operation. For information about valid values, see the iDRAC Users Guide available on the support site.

## SYS428

**Message** Unable to complete the operation because the property *arg1* is a required property and must be included in the request.

Arguments	<ul style="list-style-type: none"><li>· <b>arg1</b> = property</li></ul>
Detailed Description	The operation cannot be completed because the property identified in the message is not supplied as part of the request.
Recommended Response Action	Make sure that the property is in the request body and has a valid value, and retry the operation.
Category	Configuration (SYS = System Info)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS429

Message	Unable to complete the operation because the property <i>arg1</i> is not in the list of valid properties for the resource.
Arguments	<ul style="list-style-type: none"><li>· <b>arg1</b> = property</li></ul>
Detailed Description	The operation cannot be completed because the property is not in the list of valid properties for the resource.
Recommended Response Action	Remove the unknown property from the request body and retry the operation.
Category	Configuration (SYS = System Info)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS430

Message	The operation is successfully completed.
Detailed Description	The operation is successfully completed. The configuration changes will become effective after restarting the host server next time.
Recommended Response Action	No response action is required. However, to make them immediately effective, restart the host server.
Category	Audit (SYS = System Info)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS431

<b>Message</b>	Unable to apply the configuration changes because an import or export operation is currently in progress.
<b>Detailed Description</b>	The import or export configuration changes cannot be applied because an import or export operation is currently in progress.
<b>Recommended Response Action</b>	Wait for the current import or export operation to complete and retry the operation. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS432

<b>Message</b>	Unable to set the Power Cap value because the PowerCapSetting feature is disabled.
<b>Detailed Description</b>	The Power Cap value cannot be set because the PowerCapSetting feature is disabled.
<b>Recommended Response Action</b>	Enable the PowerCapSetting feature by using the PATCH operation on the Redfish OemAttributes URL, and then retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS433

<b>Message</b>	Unable to upload the server configuration profile data because the file type used for the data file is not in the JSON or XML format.
<b>Detailed Description</b>	The server configuration profile data cannot be uploaded because the file type used for the data file is not in the JSON or XML format.
<b>Recommended Response Action</b>	Make sure that the file format used is of JSON or XML format, and then retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS434

<b>Message</b>	Unable to upload the firmware image because the file extension is not supported.
<b>Detailed Description</b>	The operation cannot be completed because the uploaded firmware image file extension is not supported.
<b>Recommended Response Action</b>	Make sure to use a valid firmware image and retry the operation. For information about the supported file extension types, see the Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS435

<b>Message</b>	Unable to retrieve the BIOS configuration data either because the system inventory is not collected, Lifecycle Controller Wipe operation is performed, or because of a system error.
<b>Detailed Description</b>	The BIOS configuration data cannot be retrieved either because the system inventory is not collected, Lifecycle Controller Wipe operation is performed, or because of a system error.
<b>Recommended Response Action</b>	Enable the Lifecycle Controller CSIOR (Collect System Inventory on Restart) feature, collect the system inventory, and then retry the operation. To enable CSIOR and Lifecycle Controller respectively perform the PATCH operation for these attributes on the Redfish OemAttributes URL.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS436

<b>Message</b>	Unable to create the job because the Start Time entered is invalid.
<b>Detailed Description</b>	The job cannot be created because the Start Time entered is invalid.
<b>Recommended Response Action</b>	Enter the Start Time in the String format, and then retry the operation For example, YYYY-MM-DDTHH:MM:SS. For more information about recommended Start Time format, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS437

<b>Message</b>	Unable to create the job because the EndTime value entered is less than 5 minutes of StartTime value.
<b>Detailed Description</b>	The job cannot be created because the EndTime value entered is less than 5 minutes of StartTime value.
<b>Recommended Response Action</b>	Enter an EndTime value that is greater than 5 minutes of the StartTime value.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS438

<b>Message</b>	Unable to reset the Secure Boot keys because the installed BIOS version does not support the operation.
<b>Detailed Description</b>	The Secure Boot keys cannot be reset because the installed BIOS version does not support the operation.
<b>Recommended Response Action</b>	Update the BIOS to the latest version and retry the operation. For information about updating BIOS, see the iDRAC Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS439

<b>Message</b>	Unable to complete the operation because the Secure Boot policy is set to Standard.
<b>Detailed Description</b>	The operation cannot be completed because the Secure Boot policy is set to Standard.
<b>Recommended Response Action</b>	Reset the Secure Boot policy to Custom by performing the PATCH operation for the SecureBootPolicy attribute on the Redfish Bios URL.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS440

<b>Message</b>	Unable to Create Job because the End Time entered is invalid.
----------------	---

<b>Detailed Description</b>	The Job creation cannot be done because the End Time entered is invalid.
<b>Recommended Response Action</b>	Enter the End Time in the String format, and then retry the operation For example, YYYY-MM-DDTHH:MM:SS. For more information about recommended End Time format, see the iDRAC Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS441

<b>Message</b>	Unable to complete the operation because the index <i>arg1</i> entered is not a valid offset in the array.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b><i>arg1</i></b> = index</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the index entered as identified in the message is not a valid offset in the array.
<b>Recommended Response Action</b>	Enter a valid index within the limits of the array and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS442

<b>Message</b>	Unable to start the installation because more than one firmware inventory component URI is entered.
<b>Detailed Description</b>	The installation process cannot be started because more than one firmware inventory component URI is entered.
<b>Recommended Response Action</b>	Enter only one firmware inventory component URI for installation and retry the operation. For information about the allowed URIs, see the Schema and Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS443

<b>Message</b>	Unable to configure the object because the object has dependencies on other objects that must be present for successful configuration.
----------------	--

<b>Detailed Description</b>	The object cannot be configured because the object has dependencies on other objects that must be present for successful configuration.
<b>Recommended Response Action</b>	Verify the object dependency by using AttributeRegistry available in the Service Root Registries URI.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS444

<b>Message</b>	Unable to set the attribute value because it depends on other attribute(s).
<b>Detailed Description</b>	The attribute value cannot be set because it depends on other attribute(s).
<b>Recommended Response Action</b>	Change the value on the other attribute and retry the operation. For information about attribute dependency, see the Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS445

<b>Message</b>	Unable to complete the operation because the value <i>arg1</i> entered for the query parameter <i>arg2</i> is invalid.
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b><i>arg1</i></b> = value</li> <li>· <b><i>arg2</i></b> = query param</li> </ul>
<b>Detailed Description</b>	The operation cannot be completed because the value entered for the query parameter is invalid as identified in the message.
<b>Recommended Response Action</b>	Enter a valid value and retry the operation. For information about valid values, see the Redfish Users Guide available on the support site.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS446

<b>Message</b>	The requested operation cannot be completed because of an internal error.
----------------	---

<b>Detailed Description</b>	The requested operation cannot be completed because of an internal error.
<b>Recommended Response Action</b>	Retry the operation after a few minutes. If the issue persists, contact your service provider.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS447

<b>Message</b>	Unable to create the job because the time MaintenanceWindowStartTime entered is invalid.
<b>Detailed Description</b>	The job cannot be created because the time entered is invalid.
<b>Recommended Response Action</b>	Enter Time in the String format, and then retry the operation For example, YYYY-MM-DDTHH:MM:SS(+/-)HH:MM. Make sure the input TimeZone matches with iDRAC TimeZone. For more information about recommended Time format, see the iDRAC Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS448

<b>Message</b>	Enter a MaintenanceWindowDurationInSeconds value that is greater than 300 seconds of the MaintenanceWindowStartTime value.
<b>Detailed Description</b>	The job cannot be created because the MaintenanceWindowDurationInSeconds value entered is less than 300 seconds of MaintenanceWindowStartTime value.
<b>Recommended Response Action</b>	Enter a MaintenanceWindowDurationInSeconds value that is greater than 300 seconds of the MaintenanceWindowStartTime value.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS449

<b>Message</b>	The Active Directory objects DCLookupEnable or GCLookupEnable cannot be enabled because IPv4.DNS1, IPv4.DNS2, IPv6.DNS1, or IPv6.DNS2 is not configured.
<b>Detailed Description</b>	The Active Directory objects DCLookupEnable or GCLookupEnable cannot be enabled, because IPv4.DNS1, IPv4.DNS2, IPv6.DNS1 or IPv6.DNS2 is not configured.

**Recommended Response Action** Configure IPv4.DNS1, IPv4.DNS2, IPv6.DNS1 or IPv6.DNS2 by using Redfish OEM Attributes Patch operation, and retry the operation. For more information about configuring the attributes, see the iDRAC Users Guide available on the support site.

**Message** Unable to complete the operation because the query parameter *arg1* is not supported.

**Arguments**

- **arg1** = query type

**Detailed Description** The operation cannot be completed because the query parameter entered as identified in the message is not supported.

**Recommended Response Action** Enter a valid query parameter and retry the operation. For information about supported query parameters, see the iDRAC Users Manual available on the support site.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS452

**Message** The "request body" element is not allowed for the action: *arg1* .

**Arguments**

- ***arg1*** = action name

**Detailed Description** The "request body" element is not allowed for the action identified in the message.

**Recommended Response Action** Delete the "request body" element and retry the operation. For more information about recommended formats, see the Schema and Redfish Users Guide available on the support site.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS453

**Message** Unable to perform the insert operation because the image file *arg1* is of a different type than the insert operation supported by *arg2* .

**Arguments**

- ***arg1*** = image file name
- ***arg2*** = instance name

**Detailed Description** The insert operation cannot be performed because the image file is of a different type than the insert operation supported by the instance identified in the message.

**Recommended Response Action** Do the following the retry the operation: 1) Check if the image file is valid and of support type. iDRAC supports only the .ISO files for CD and .IMG file for removable drive. 2) Check if the action is performed on the correct device.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# SYS454

**Message** Unable to perform the requested operation because the attribute entered is not supported by implementation.

**Detailed Description** The requested operation cannot be performed because the attribute entered is not supported by implementation.

**Recommended Response Action** Enter the implementation supported attribute in the recommended format and retry the operation. For information about the recommended formats, see the iDRAC Redfish API Guide available on the support site.

Category	Configuration (SYS = System Info)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS455

Message	Unable to change the current system configuration because the attributes entered already exist.
Detailed Description	The current system configuration cannot be changed because the attributes entered already exist.
Recommended Response Action	Enter the system configuration attributes other than the existing one. For more information about viewing the current system configuration, see the iDRAC with Lifecycle Controller Redfish API Guide available on the support site.
Category	Configuration (SYS = System Info)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS456

Message	Unable to process requested query <i>arg1</i> because the value entered <i>arg2</i> is not supported by the implementation.
Arguments	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = query parameter</li><li>· <b><i>arg2</i></b> = value</li></ul>
Detailed Description	The requested query cannot be processed because the query parameter contains a value not supported by the implementation.
Recommended Response Action	Remove the element identified in the message and retry the operation. For information about supported queries, see the Redfish Users Guide available on the support site.
Category	Configuration (SYS = System Info)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## SYS457

Message	Unable to complete the operation because the value entered for the query parameter <i>arg1</i> is invalid.
Arguments	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = query parameter</li></ul>
Detailed Description	The operation cannot be completed because the value entered for the query parameter is invalid.

<b>Recommended Response Action</b>	Enter a valid value for the query parameter and retry the operation. For information about recommended values for the query parameters, see the Redfish Users Guide available on the support site.
<b>Category</b>	Audit (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS458

<b>Message</b>	Unable to Process the request because the value entered for the parameter <i>arg1</i> is not supported by the implementation.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = parameter</li></ul>
<b>Detailed Description</b>	The request cannot be processed because the value entered for the parameter identified in the message is not supported by the implementation.
<b>Recommended Response Action</b>	Correct the value of the parameter identified in the message and retry the operation. For information about supported values, see the Redfish Users Guide available on the support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8500

<b>Message</b>	Delay Auto-throttle sent to <i>arg1</i> server(s). <i>arg2</i> <i>arg3</i>
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = number of servers</li><li>· <b><i>arg2</i></b> = error string</li><li>· <b><i>arg3</i></b> = errors</li></ul>
<b>Detailed Description</b>	The Chassis Management Controller (CMC) sent messages to delay power throttling to all capable servers in the chassis. This was done because the CMC firmware was updated or a failover was initiated. If specific server errors are shown in the message, verify that the iDRAC and Lifecycle Controller firmware versions on those servers is updated to the most current version available.
<b>Recommended Response Action</b>	If no errors are shown, no response is required. If errors are listed in the message, navigate to the named servers and make sure that iDRAC and Lifecycle Controller firmware versions are the latest available.

## SYS8501

**Message** The current configuration of Chassis Management Controller (CMC) components is written to a chassis configuration XML file, and then copied to the specified location.

**Detailed Description** The current configuration of Chassis Management Controller (CMC) components is written to a chassis configuration XML file, and then copied to the specified location.

**Recommended Response Action** No response action is required.

**Category** Configuration (SYS = System Info)

**Severity** Severity 3 (Informational)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS8502

**Message** Unable to export the chassis configuration XML file to network shares such as Network File System (NFS) or Common Internet File System (CIFS) because they are not accessible.

**Detailed Description** The system configuration XML file cannot be exported to network shares such as Network File System (NFS) or Common Internet File System (CIFS) because they are not accessible.

**Recommended Response Action** 1) If the file is being exported to an NFS, make sure that NFS is accessible from CMC. 2) If the file is being exported to a CIFS share, make sure that CIFS is accessible from CMC by using share access credentials with appropriate privileges.

**Category** Configuration (SYS = System Info)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## SYS8503

**Message** The current chassis configuration is being collected and the chassis configuration XML file is being generated.

<b>Detailed Description</b>	The current chassis configuration is being collected and the chassis configuration XML file is being generated.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8504

<b>Message</b>	Unable to import the chassis configuration XML file from network shares such as Network File System (NFS) or Common Internet File System (CIFS) because they are not accessible.
<b>Detailed Description</b>	The chassis configuration XML file cannot be imported from network shares such as Network File System (NFS) or Common Internet File System (CIFS) because they are not accessible.
<b>Recommended Response Action</b>	1) If the file is being copied from an NFS share, make sure that it is accessible from CMC. 2) If the file is being copied from a CIFS share, make sure that it is accessible from CMC using the share credentials provided. Test the network share access by using the Test Network Connection method.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8505

<b>Message</b>	Unable to import the chassis configuration operation because the input file for chassis configuration XML is not compliant with configuration schema.
<b>Detailed Description</b>	The chassis configuration import operation cannot be completed because the input file is not compliant with the chassis configuration XML schema.
<b>Recommended Response Action</b>	Make sure that the input file is compliant with the chassis configuration schema. For more information, see the Chassis cloning, backup, and restore with Configuration profiles white paper available on Dell TechCenter website.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8506

<b>Message</b>	Configuration changes specified in the chassis configuration XML file are successfully applied.
<b>Detailed Description</b>	Configuration changes specified in the chassis configuration XML file are successfully applied.

<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8507

<b>Message</b>	The chassis configuration XML file is imported but with some configuration changes that did not complete successfully.
<b>Detailed Description</b>	The chassis configuration XML file is imported but with some configuration changes that did not complete successfully. The Chassis Log contains information about the component configurations that did not complete successfully.
<b>Recommended Response Action</b>	Review the Chassis Log and identify the configuration changes that did not complete successfully. Retry those changes in a separate operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8508

<b>Message</b>	Unable to successfully apply the chassis configuration XML file values.
<b>Detailed Description</b>	Some or all configuration actions during the import of configuration XML operation did not complete successfully. The configuration action details are logged in to the Chassis Log.
<b>Recommended Response Action</b>	See the Chassis Log and identify the configuration changes that did not successfully complete. Resolve any issues with the configuration XML content and retry the import operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8509

<b>Message</b>	Unable to import the chassis configuration XML file from network shares such as Network File System (NFS) or Common Internet File System (CIFS) because the file does not exist on the network share.
<b>Detailed Description</b>	The chassis configuration XML file cannot be imported because the file does not exist on the specified network share.

<b>Recommended Response Action</b>	Make sure that the chassis configuration file exists on the CIFS or NFS, and then retry the import operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8510

<b>Message</b>	The chassis configuration XML input file contains unsupported DOCTYPE tags that may cause security issues.
<b>Detailed Description</b>	The chassis configuration XML input file contains unsupported DOCTYPE tags that may cause security issues. The XML DOCTYPE tag is not supported in chassis configuration XML files.
<b>Recommended Response Action</b>	Check the input XML file for DOCTYPE XML tags and delete them before retrying the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8511

<b>Message</b>	The requested changes were not applied because the current component configuration is same as the requested ones.
<b>Detailed Description</b>	The settings specified in the chassis configuration XML file match the current configuration for all components.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8512

<b>Message</b>	The chassis configuration XML properties are currently being applied to CMC.
<b>Detailed Description</b>	The chassis configuration XML properties are currently being applied to CMC.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (SYS = System Info)

**Severity** Severity 3 (Informational)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SYS8513

**Message** The requested changes are not applied because the Service Tag of the Chassis Management Controller (CMC) does not match with the specified chassis configuration XML file.  
**Detailed Description** The requested changes are not applied because the Service Tag of the Chassis Management Controller (CMC) does not match with the specified chassis configuration XML file.  
**Recommended Response Action** Make sure the chassis configuration XML file selected for the operation has the same Service Tag value as the CMC the changes are being applied to.  
**Category** Configuration (SYS = System Info)  
**Severity** Severity 2 (Warning)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SYS8514

**Message** Unable to configure chassis because the input XML file for chassis configuration is not compliant with the XML schema.  
**Detailed Description** The chassis cannot be configured because the input XML file for chassis configuration is not compliant with the configuration XML schema.  
**Recommended Response Action** Make sure that the XML file schema used for chassis configuration is compliant with the schema defined in the Lifecycle Controller XML Schema Guide on the Tech Center support site.  
**Category** Configuration (SYS = System Info)  
**Severity** Severity 2 (Warning)  
**Redfish Event Type**  
*No alerts are applicable for this message*

## SYS8515

**Message** Unable to configure chassis because the input XML file for chassis configuration contains invalid character *arg1* at line *arg2* .  
**Arguments**

- ***arg1*** = character
- ***arg2*** = line number

**Detailed Description** The chassis cannot be configured because the input XML file for chassis configuration is not compliant with the configuration XML schema.

<b>Recommended Response Action</b>	View the file in any Web browser to check for invalid characters. Delete the invalid characters and make sure that the file is a valid XML file, and is compliant with the configuration XML schema.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8516

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not compliant with the schema nesting check parameters.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not compliant with the schema nesting check parameters. Only RAID controllers can have nested Component nodes.
<b>Recommended Response Action</b>	Make sure that the XML file schema used for chassis configuration is compliant with the schema defined in the Lifecycle Controller XML Schema Guide on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8517

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not valid and does not contain the XML root element.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not valid and does not contain the XML root element.
<b>Recommended Response Action</b>	Open the file in a Web browser to check for the presence of invalid content before an expected root element. Correct the invalid content and make sure that the chassis configuration XML file is compliant to the chassis configuration schema described in the Lifecycle Controller XML Schema Guide available on the Tech Center website.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8518

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not valid and the XML root element is not closed.
----------------	--

<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not valid and the XML root element is not closed.
<b>Recommended Response Action</b>	Open the file in a Web browser to check for the presence of invalid content before an expected root element. Correct the invalid content and make sure that the chassis configuration XML file is compliant with the chassis configuration schema described in the Lifecycle Controller XML Schema Guide available on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8519

<b>Message</b>	Unable to import the configuration properties of chassis because the input XML file for importing chassis configuration is not valid at line <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"> <li>· <b><i>arg1</i></b> = line number</li> </ul>
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because the input XML file for importing chassis configuration is not valid at line identified in the message.
<b>Recommended Response Action</b>	Open the input file in a Web browser to check for the presence of invalid content at the line number identified in the message. Correct the invalid content and make sure that the chassis configuration XML file is compliant with the chassis configuration schema described in the Lifecycle Controller XML Schema Guide available on the Tech Center support site.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## SYS8520

<b>Message</b>	Unable to import the configuration properties of chassis because either the input XML file for importing chassis configuration cannot be opened or is not found.
<b>Detailed Description</b>	The configuration properties of chassis cannot be imported because either the input XML file for importing chassis configuration cannot be opened or is not found.
<b>Recommended Response Action</b>	Reset the Chassis Management Controller (CMC) and retry the operation.
<b>Category</b>	Configuration (SYS = System Info)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# TMP1000

**Message** *arg1* exceeded the maximum warning threshold.

**Arguments**

- ***arg1*** = tempsensor name

**Detailed Description** The enclosure is too hot. A variety of factors can cause the excessive temperature. For example, a fan may have failed, the thermostat may be set too high, or the room temperature may be too hot.

**Recommended Response Action** Check for factors that may cause overheating. For example, verify that the enclosure fan is working. You should check the thermostat settings and examine whether the enclosure is located near a heat source. Make sure the enclosure has enough ventilation and that the room temperature is not too hot. Refer to the enclosure documentation for more diagnostic information.

# TMP503

**Message** The *arg1* sensor state has changed to a warning state with a value of *arg2* degrees Celsius.

- Arguments**
- ***arg1*** = sensor name
  - ***arg2*** = temperature

**Detailed Description** The temperature sensor identified in the message is faulty, or the temperature exceeds the warning threshold. This condition can cause system performance issues and degradation in the monitoring capability of the system.

**Recommended Response Action** Verify the Embedded System Management (ESM) Log for any sensor related faults. If there is a failed sensor, replace the system board. For more information, contact your service provider. Otherwise, change the warning threshold for the temperature sensor (if applicable) such that it corresponds to the hardware configuration.

## TMP8500

**Message** I/O Module *arg1* temperature exceeded operating range.

**Arguments**

- ***arg1*** = iom slot name

**Detailed Description** The temperature of the I/O Module identified in the message has increased beyond the operational range. Thermal protection shut down the I/O Module. Factors external to the I/O Module may have caused this situation.

**Recommended Response Action** Check the chassis event log for fan issues and fix any issues present. If no fan issues are detected, check chassis ambient temperature and make sure the temperature is within operating range. Utilize the RACADM command "racadm getsensorinfo" to check the chassis ambient temperature.

# TMP8503

**Message** Temperature of NIC adapter in slot *arg1* is greater than normal operating range possibly due to an issue in the cooling system or a fan that is no longer functioning correctly.

**Arguments**

- *arg1* = slot number

**Detailed Description** The NIC adapter in the slot identified in the message may have temperature related issues. The device temperature suggests degraded cooling or possibly a fan not functioning correctly on the adapter card (if adapter card has a fan).

**Recommended Response Action** The cooling system may have issues. Contact your authorized Customer Service representative for further assistance.

## UEFI0029

<b>Message</b>	Unable to initialize iDRAC because of some critical issues.
<b>Detailed Description</b>	iDRAC could not be initialized because of some critical issues. Continuing to boot may result in unexpected power loss because of unknown power inventory and unavailability of features such as remote out of band access, active power management, thermal management, inventory collection, LCD, or system error reporting.
<b>Recommended Response Action</b>	Do one of the following: 1) Remove input power from the system, wait for 30 seconds, and re-apply input power. Turn on the system. 2) Update the iDRAC firmware. 3) Continue to boot. Note: This may result in unexpected power loss because of unknown power inventory and unavailability of features such as remote out of band access, active power management, thermal management, inventory collection, LCD, or system error reporting.

<b>Detailed Description</b>	Unable to communicate with iDRAC because of an issue in the iDRAC Keyboard Controller Style (KCS) Intelligent Platform Management Interface (IPMI). Continuing to boot may result in unexpected power loss because of unknown power inventory and unavailability of features such as remote out of band access, active power management, thermal management, inventory collection, LCD, or system error reporting.

**Recommended Response Action** Do one of the following: 1) Remove input power from the system, wait for 30 seconds, and re-apply input power. Turn on the system. 2) Update the iDRAC firmware on the system.

## UEFI0072

**Message** Unable to load the firmware from *arg1* because of the Secure Boot policy.

**Arguments**

- ***arg1*** = device name

**Detailed Description** When the Secure Boot feature is enabled, the system BIOS authenticates each UEFI driver against the Secure Boot policy. If a UEFI driver does not meet the policy criteria, the system BIOS does not load or execute the UEFI driver and displays this message at the end of POST. The Secure Boot policy consists of authorized and unauthorized X.509 certificates; signed drivers must chain to an authorized certificate. The policy may also authorize hash values of individual UEFI driver images. Users can configure the Secure Boot feature and the Secure Boot policy in F2 System Setup > System BIOS > Security Settings page.

**Recommended Response Action** If the Secure Boot feature is not desired, disable it in System Setup > System BIOS > Security Settings page. Otherwise, do the following: 1) Make sure the firmware on the failing device is up-to-date. 2) If subsequent failures occur, review the Secure Boot Policy Summary in System Setup > System BIOS > Security Settings page. The device firmware must be authorized by a public key or hash value in the Authorized Signature Database. The public key or hash value must not be present in the Forbidden Signature Database.

## UEFI0073

**Message** Unable to boot *arg1* because of the Secure Boot policy.

## Arguments

- **arg1** = Boot Option name

## Detailed Description

When the Secure Boot feature is enabled, the system BIOS authenticates each boot option against the Secure Boot policy. If a boot option does not meet the policy criteria, the system BIOS does not boot to the boot option and displays this message. The Secure Boot policy consists of authorized and unauthorized X.509 certificates; signed boot images must chain to an authorized certificate. The policy may also authorize hash values of individual boot images. Users can configure the Secure Boot feature and the Secure Boot policy in System Setup > System BIOS > Security Settings page.

## Recommended Response Action

If the Secure Boot feature is not desired, disable it in System Setup > System BIOS > Security Settings page. Otherwise, do the following: 1) review the Secure Boot Policy Summary in F2 System Setup > System BIOS > Security Settings page. The boot option must be authorized by a public key or hash value in the Authorized Signature Database. 2) If the boot option is not authorized but it can be trusted, enter System Setup > System BIOS > Security Settings page, set Secure Boot Policy to Custom, and add a entry for the boot option in the Authorized Signature Database (System Setup > System BIOS > Security Settings > Custom Policy Settings > Authorized Signature Database > Import Database Entry).

# UEFI0074

## Message

The Secure Boot policy has been modified since the last time the system was started.

## Detailed Description

The system BIOS logs this message after detecting a change in Secure Boot policy settings. Such a change may result from user configuration or a system BIOS update. Changes to the following settings trigger this message: 1) Secure Boot (Enable/Disable) 2) Secure Boot Policy (Standard/Custom) 3) Platform Key 4) Key Exchange Keys 5) Authorized Signature Database (db) 6) Forbidden Signature Database (dbx).

## Recommended Response Action

Review the Secure Boot policy settings in System Setup > System BIOS > Security Settings page. If policy changes were expected, no action is necessary. Otherwise, modify the Secure Boot policy settings as needed.

## UEFI0284

<b>Message</b>	Unable to import Secure Boot policy data because the format of the data is incompatible with the Secure Boot databases.
<b>Detailed Description</b>	The BIOS cannot accept the Secure Boot policy data from the management console because the format of the data is incompatible with the BIOS Secure Boot databases. Secure Boot policy data consists of a Platform Key (PK), Key Exchange Key (KEK) database, Authorized Signature Database (db), and Forbidden Signature Database (dbx). The contents of PK and KEK must follow the Distinguished Encoding Rules (DER) X.509 certificate format. Each entry in db and dbx must follow the DER X.509 certificate format or consist of a hash value generated by a Secure Hash Algorithm (SHA-256, SHA-384, or SHA-512).
<b>Recommended Response Action</b>	Make sure certificates follow the Distinguished Encoding Rules (DER) X.509 certificate format. Hash values in the Secure Boot policy must be 32 bytes, 48 bytes, or 64 bytes in size. Also make sure the data for the Platform Key (PK) and Key Exchange Key (KEK) database contain only certificates, not hash values. If the import operation includes multiple policy objects (certificates or hash values), determine the failing object by retrying the operation with one object at a time.

## UEFI0285

<b>Message</b>	Unable to send Secure Boot policy data to iDRAC because of an issue in the iDRAC Shared Memory Architecture (SMA) Intelligent Platform Management Interface (IPMI).
<b>Detailed Description</b>	The BIOS cannot send Secure Boot policy data (certificates and hash values) to iDRAC because of an issue in the iDRAC Shared Memory Architecture (SMA) Intelligent Platform Management Interface (IPMI). This means management consoles will not display the latest Secure Boot policy data because BIOS is not synchronized with iDRAC. Synchronization must occur before using management consoles to configure Secure Boot policy data.
<b>Recommended Response Action</b>	Do one of the following: 1) Remove input power from the system, wait for 30 seconds, and re-apply input power. Turn on the system. 2) Update the iDRAC firmware on the system.

## UEFI0326

<b>Message</b>	One or more memory errors have occurred during the Double Data Rate (DDR) memory channel initialization on the memory slot <i>arg1</i> .
<b>Arguments</b>	<ul style="list-style-type: none"> <li><i>arg1</i> = slot number</li> </ul>
<b>Detailed Description</b>	One or more memory errors have occurred during the Double Data Rate (DDR) memory channel initialization on the memory slot identified in the message. This can be because of control clock lookback training error.
<b>Recommended Response Action</b>	Disconnect the input power to the system, reseal the DIMM, reconnect the power, and then restart. If the issue persists, replace the faulty DIMM installed in the slot identified in the message.

## UEFI0329

**Message** One or more memory errors have occurred during the Double Data Rate (DDR) memory channel initialization on the memory slot of Socket *arg1*, Channel *arg2*.

**Arguments**

- ***arg1*** = CPU numbers
- ***arg2*** = channel numbers

**Detailed Description** One or more memory errors have occurred during the Double Data Rate (DDR) memory channel initialization on the memory slot identified in the message. Entire channel is disabled. This can be because of the unsupported DDR frequency.

**Recommended Response Action** Disconnect the input power to the system, reseal the DIMM, reconnect the power, and then restart. If the issue persists, replace the faulty DIMM installed in the slot identified in the message.

**Category** System Health (UEFI = UEFI Event)

## UEFI0343

**Message** Unable to boot the system because either the backplane signal cable is not installed properly or is damaged.

**Detailed Description** System boot cannot be completed because either the backplane signal cable is not installed properly or is damaged. When the backplane power cable is installed but the backplane signal cable is not not installed, the voltage level of the backplane becomes less than the expected 5V, potentially leading to data loss and other issues.

**Recommended Response Action** Turn off the server and reinstall or replace the backplane signal cable. For more information about the cable connections, see the Owners Manual of the system available on the support site.

## USR0034

**Message** Login attempt alert for *arg1* from *arg2* using *arg3* , IP will be blocked for *arg4* seconds.

**Arguments**

- ***arg1*** = username
- ***arg2*** = IP Address
- ***arg3*** = interface name

- **arg4** = seconds

Detailed Description	The account identified in the message is temporarily disabled because of consecutive unsuccessful Login attempts to iDRAC from the IP address identified in the message.
Recommended Response Action	Contact the iDRAC administrator and make sure the username and password credentials used are correct. Check the Lifecycle Controller Log (LC Log) to see if more unauthorized iDRAC access attempts are occurring than would be expected due to forgotten account names or passwords.

## USR0152

**Message** Unable to connect the remote VNC session, because an incorrect VNC password was entered from the IP *arg1*.

Arguments

- **arg1** = IP address

Detailed Description

Could not successfully connect to the remote VNC session, because an incorrect VNC password was entered from the IP address identified in the message.

Recommended Response Action

Enter the correct VNC password and retry the operation.

Message

Logging off the remote VNC session from the IP address *arg1* , because the session timed out.

Arguments

- **arg1** = IP address

Detailed Description

The VNC client is logged off from the IP address identified in the message.

Recommended Response Action

To re-establish the remote VNC session, log in again using the VNC client.

## VDR Event Messages

### VDR1

**Message** *arg1* failed.

**Arguments**

- ***arg1*** = VD Name

**Detailed Description** A storage component such as a physical disk or an enclosure has failed. The failed component may have been identified by the controller while performing a task such as a rescan or a check consistency.

**Recommended Response Action** Replace the failed component. You can identify which component has failed by locating the component that has a red "X" for its status. Perform a rescan after replacing the failed component.

**Category** Storage (VDR = Virtual Disk)

## VDR100

Message *arg1* is unavailable because of incompatibilities with the current controller.

Arguments

- **arg1** = virtual disk

Detailed Description The virtual disk identified in message cannot be used because of missing features on the current controller. The features may be missing because they are not available in the firmware version on the controller or the necessary licenses are not installed.

Recommended Response Action Update the controller firmware and license to match the peer controller.

## VDR110

**Message** Unrecoverable storage medium error detected on *arg1* .

**Arguments**

- ***arg1*** = virtual disk name

**Detailed Description** This alert is generated when an unrecoverable storage medium error is detected on the virtual disk. This error can be a prelude to the physical disk becoming non-functional.

**Recommended Response Action** Make sure a hot spare to the Virtual Disk identified in the message is available and back up the data on the virtual disk.

**Category** Storage (VDR = Virtual Disk)

**Severity** Severity 1 (Critical)

**OMSA Event ID** 2417

**OMSA Trap ID** 120400

## VDR114

**Message** Hot Spare Protection policy deviation with severity set at Informational level occurred for *arg1* .

**Arguments**

- ***arg1*** = virtual disk names

**Detailed Description** The number of hot spares available for the virtual disks identified in the message are not compliant with Hot Spare Protection policy, whose severity is set at Informational level.

**Recommended Response Action** Make appropriate assignments of hotspares to meet the policy.

## VDR16

**Message** Consistency check of *arg1* failed.

**Arguments**

- ***arg1*** = virtual disk

**Detailed Description** A physical disk included in the virtual disk failed or there is an error in the parity information. A failed physical disk causes errors in parity information.

**Recommended Response Action** Check that all the physical disks of the virtual disk are in a healthy condition. Replace any disks that are not healthy and restart the operation. If this is not the problem, delete the virtual disk and restore the data to the disk from a backup copy.

## VDR31

**Message** Controller cache is preserved for missing or offline *arg1* .

**Arguments**

- ***arg1*** = VD Name

**Detailed Description** The controller is getting disconnected from its virtual disk, while Input Output (IO) is in-progress.

**Recommended Response Action** Try importing foreign disks, if any. Check if the enclosure containing the Virtual Disk is disconnected from the controller. Insert any disks that are reported missing or failed. If the enclosure or disks were removed intentionally, the preserved cache can be discarded. See storage hardware documentation for more information on performing these steps.

## VDR32

**Message** Background initialization has started for *arg1* .

**Arguments**

- ***arg1*** = virtual disk

**Detailed Description** Background initialization of a virtual disk has started. This is an automated process that writes the parity or mirror data on newly created virtual disks.

**Recommended Response Action** No response action is required.

## VDR49

**Message** *arg1* is permanently degraded.

**Arguments**

- ***arg1*** = VD Name

**Detailed Description** A redundant virtual disk has lost redundancy. This may occur when the virtual disk suffers the failure of more than one physical disk. In this case, both the source physical disk and the target disk with redundant data have failed. A rebuild is not possible because there is no longer redundancy.

**Recommended Response Action** Replace the failed disks and restore from backup.

**Category** Storage (VDR = Virtual Disk)

**Severity** Severity 1 (Critical)

**Trap/EventID** 4353

**OMSA Event ID** 2310

## VDR50

**Message** Background Initialization (BGI) completed with uncorrectable errors on *arg1*.

**Arguments**

- ***arg1*** = virtual disk

**Detailed Description** The background initialization task encountered errors that cannot be corrected. The virtual disk contains physical disks that have unusable disk space or disk errors that cannot be corrected.

**Recommended Response Action** Review other messages to identify whether the physical disk that has errors. If the virtual disk is redundant, you can replace the physical disk and continue using the virtual disk. If the virtual disk is non-redundant, you need to recreate the virtual disk after replacing the physical disk. After replacing the physical disk, run a consistency check to verify the data.

## VDR52

**Message** The consistency check found inconsistent parity data on *arg1* .

**Arguments**

- ***arg1*** = virtual disk

**Detailed Description** The data on physical disk members of the virtual disk does not match. Redundancy may be lost.

**Recommended Response Action** Rerun the consistency check task. If you receive this message again, verify the health of the physical disks included in the virtual disk. See the storage hardware documentation for more information. Review messages for significant messages related to the physical disks. If a physical disk has a problem, replace it and restore from a backup copy. Contact technical support if the issue persists.

## VDR56

**Message** Redundancy of *arg1* has been degraded.

**Arguments**

- ***arg1*** = virtual disk

**Detailed Description** This message occurs when a physical disk in the disk group was removed or when a physical disk included in a redundant virtual disk fails. Because the virtual disk is redundant (uses mirrored or parity information) and only one physical disk has failed, the virtual disk can be rebuilt. Typically, the virtual disk (E.g. RAID 6) has multiple redundant disks and there is a problem with one of them.

**Recommended Response Action** Replace the missing or failed physical disk.

**Category** Storage (VDR = Virtual Disk)

## VDR57

**Message** Background Initialization in *arg1* corrected medium error.

**Arguments**

- ***arg1*** = VD Name

Detailed Description	A disk media error was detected while the controller was completing a background task. A bad disk block was identified. The disk block has been remapped.
Recommended Response Action	Consider replacing the disk. If you receive this alert frequently, ensure to replace the disk. It is recommended to routinely back up your data.

CMC		✓*					✓*

## VDR58

**Message** Bad block medium error is detected at block *arg1* on *arg2* .

**Arguments**

- **arg1** = args
- **arg2** = VD Name

Detailed Description	Virtual disk bad blocks are due to presence of unrecoverable bad blocks on one or more member physical disks.
Recommended Response Action	Recovering a physical disk bad block depends on the RAID level and state of the virtual disk. If a virtual disk is redundant, the controller can recover a bad block on a physical disk. If a virtual disk is not redundant, then the physical disk bad block results in a virtual disk bad block.

## VDR60

Message *arg1* initialization is in progress on *arg2* .

Arguments

- ***arg1*** = initialization type
- ***arg2*** = virtual disk

Detailed Description There are two modes of virtual disk initialization, full and fast. This initialization type identified in the message is running on the virtual disk identified in the message.

Recommended Response Action No response action is required.

## VDR7

Message *arg1* has failed.

## Arguments

- **arg1** = virtual disk

**Detailed Description** One or more physical disks included in the virtual disk have failed. If the virtual disk is non-redundant (does not use mirrored or parity data), then the failure of a single physical disk can cause the virtual disk to fail. If the virtual disk is redundant, then more physical disks have failed than you can rebuild using mirrored or parity information.

**Recommended Response Action** Create a new virtual disk and restore from a backup.

## VDR8

**Message** *arg1* is degraded either because the physical disk drive in the drive group is removed or the physical disk drive added in a redundant virtual drive has failed.

## Arguments

- **arg1** = virtual disk

**Detailed Description** The virtual drive on the Controller identified in the message is degraded either because the physical disk drive in the drive group is removed or the physical disk drive added in a redundant virtual drive has failed.

**Recommended Response Action** Do the following and retry the operation: 1) Insert a physical disk drive. After the drive is inserted, the previous data is automatically rebuilt by the system. 2) If not already done, configure a hot-spare for the virtual drive. 3) If a physical disk drive is removed from the disk drive group, either replace the disk or restore the original disk drive.

## VF Event Messages

### VF001

Message	Command successful.
Detailed Description	The command was successful.
Recommended Response Action	No response action is required.
Category	Configuration (VF = vFlash Media)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

### VF002

Message	General failure.
Detailed Description	The operation did not complete successfully because of an internal issue with the firmware.
Recommended Response Action	Do one of the following: 1) Rerun the command after about 2 minutes 2) Reset iDRAC and rerun the command.
Category	Configuration (VF = vFlash Media)
Severity	Severity 1 (Critical)
Redfish Event Type	<i>No alerts are applicable for this message</i>

### VF003

Message	Missing required parameter: <i>arg1</i>
---------	---

Arguments	<ul style="list-style-type: none"> <li>· <b>arg1</b> = parameter name</li> </ul>
Detailed Description	The required input parameter identified in the message is missing.
Recommended Response Action	Refer the iDRAC and Lifecycle Controller User Guides for the required input parameters for this method.
Category	Configuration (VF = vFlash Media)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## VF004

Message	Invalid value for the parameter: <i>arg1</i>
Arguments	<ul style="list-style-type: none"> <li>· <b>arg1</b> = parameter name</li> </ul>
Detailed Description	The value of the input parameter identified in the message is not a valid value.
Recommended Response Action	Refer the iDRAC and Lifecycle Controller User Guides for the required input parameters for this method.
Category	Configuration (VF = vFlash Media)
Severity	Severity 2 (Warning)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## VF005

Message	Empty partition creation successful
Detailed Description	A partition with no image was created.
Recommended Response Action	No response action is required.
Category	Configuration (VF = vFlash Media)
Severity	Severity 3 (Informational)
Redfish Event Type	<i>No alerts are applicable for this message</i>

## VF006

Message	Empty partition creation failed
Detailed Description	Creating a partition without image failed.

<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command after about 2 minutes 2) Reset iDRAC and rerun the command.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF0060

<b>Message</b>	Unable to perform the requested operation. Make sure the SD card is inserted and enabled.
<b>Detailed Description</b>	The SD card was not detected. Therefore, the requested operation cannot be completed.
<b>Recommended Response Action</b>	Verify whether the SD card is inserted and enabled, then re-try.
<b>Category</b>	System Health (VF = vFlash Media)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF007

<b>Message</b>	Image partition creation successful
<b>Detailed Description</b>	A partition with an image was created.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF008

<b>Message</b>	Image partition creation did not complete successfully.
<b>Detailed Description</b>	Creating a partition with an image did not complete successfully.
<b>Recommended Response Action</b>	Do one of the following: 1) Rerun the command after about 2 minutes, 2) Reset iDRAC and rerun the command.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## VF009

**Message** Partition formatting successful

**Detailed Description** The specified partition was formatted.

**Recommended Response Action** No response action is required.

**Category** Configuration (VF = vFlash Media)

**Severity** Severity 3 (Informational)

**Redfish Event Type**

*No alerts are applicable for this message*

## VF010

**Message** Partition formatting did not complete successfully.

**Detailed Description** Formatting the specified partition did not complete successfully.

**Recommended Response Action** Do one of the following: 1) Rerun the command after about 2 minutes 2) Reset iDRAC and rerun the command.

**Category** Configuration (VF = vFlash Media)

**Severity** Severity 1 (Critical)

**Redfish Event Type**

*No alerts are applicable for this message*

## VF011

**Message** Wrong password

**Detailed Description** The specified password was not correct.

**Recommended Response Action** Verify the password supplied.

**Category** Configuration (VF = vFlash Media)

**Severity** Severity 2 (Warning)

**Redfish Event Type**

*No alerts are applicable for this message*

## VF012

<b>Message</b>	SD card not present
<b>Detailed Description</b>	There is no SD card detected.
<b>Recommended Response Action</b>	Check the SD card slot.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF013

<b>Message</b>	SD card locked
<b>Detailed Description</b>	The SD card is locked by another operation.
<b>Recommended Response Action</b>	Rerun the command after about 2 minutes.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF014

<b>Message</b>	vFlash not disabled.
<b>Detailed Description</b>	Enabling vFlash was not successful because the vFlash feature is not disabled.
<b>Recommended Response Action</b>	The vFlash is enabled and any attempt to enable it will not be successful.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF015

<b>Message</b>	vFlash not enabled.
----------------	---------------------

<b>Detailed Description</b>	Disabling vFlash was not successful because the vFlash feature is not enabled.
<b>Recommended Response Action</b>	The vFlash is disabled and an attempts to disable it will not be successful.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF016

<b>Message</b>	SD card is read only
<b>Detailed Description</b>	The SD card is not writable.
<b>Recommended Response Action</b>	Check the write-protection tab of the SD card.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF017

<b>Message</b>	SD card not initialized
<b>Detailed Description</b>	The SD card is not initialized.
<b>Recommended Response Action</b>	In order to perform this operation, first initialize the SD Card.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF018

<b>Message</b>	Invalid partition index
<b>Detailed Description</b>	The specified partition index is not valid for the command.
<b>Recommended Response Action</b>	Check that the partition exists.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

# VF019

<b>Message</b>	Not enough space on SD card
<b>Detailed Description</b>	The SD card is full.
<b>Recommended Response Action</b>	Check all the partitions, delete the ones that are not necessary and try this operation again.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# VF020

<b>Message</b>	Exceeded maximum number of partitions
<b>Detailed Description</b>	The number of partitions exceeded the maximum number allowed on a SD card.
<b>Recommended Response Action</b>	This SD card has reached the partition limit. Delete any partitions that are not necessary and try again.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# VF021

<b>Message</b>	Exceeded maximum partition size of 4GB
<b>Detailed Description</b>	The size specified is greater than the maximum allowed for a partition.
<b>Recommended Response Action</b>	Try a partition size that is smaller than 4GB and the available space on the card.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF022

<b>Message</b>	Partition size below minimum
<b>Detailed Description</b>	The size specified is lower than the minimum allowed for a partition.
<b>Recommended Response Action</b>	Try a larger partition size.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF023

<b>Message</b>	Partition label not unique
<b>Detailed Description</b>	Partition with this label exists. Duplicate labels are not supported.
<b>Recommended Response Action</b>	Try a different partition label.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF024

<b>Message</b>	Partition locked
<b>Detailed Description</b>	The partition is locked by another operation.
<b>Recommended Response Action</b>	Wait for the partition to be unlocked and check the partition status to see if it is attached.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF025

<b>Message</b>	Partition is read only
----------------	------------------------

<b>Detailed Description</b>	Partition is read only.
<b>Recommended Response Action</b>	To perform a write operation on this partition, change its access type to read-write and try this operation again.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF026

<b>Message</b>	Partition index in use
<b>Detailed Description</b>	This partition index has already been used.
<b>Recommended Response Action</b>	This partition index has already been used. Try a different index.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF027

<b>Message</b>	Partition already attached
<b>Detailed Description</b>	This partition is attached and attempts to attach it will fail.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF028

<b>Message</b>	Partition already detached
<b>Detailed Description</b>	This partition is detached and attempts to detach it will fail.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)

## Redfish Event Type

*No alerts are applicable for this message*

# VF029

**Message** Insufficient permission

**Detailed Description** The user account credentials provided for this vFlash operation do not have the correct privileges. Virtual Media Access privilege is required to perform vFlash SD Card media operations.

**Recommended Response Action** Use a different user account the has Virtual Media Access privilege.

**Category** Configuration (VF = vFlash Media)

## Redfish Event Type

*No alerts are applicable for this message*

# VF031

**Message** Invalid partition label.

**Detailed Description** The specified partition label is not a valid label.

**Recommended Response Action** Try a label that complies with the standards for an OS volume label.

**Category** Configuration (VF = vFlash Media)

**Severity** Severity 2 (Warning)

## Redfish Event Type

*No alerts are applicable for this message*

## VF032

<b>Message</b>	Invalid partition type.
<b>Detailed Description</b>	The specified partition type is not a valid type.
<b>Recommended Response Action</b>	Try a partition type that is supported.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF033

<b>Message</b>	Invalid partition format type.
<b>Detailed Description</b>	The specified format type is not a valid type.
<b>Recommended Response Action</b>	Try a format type that is supported.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF034

<b>Message</b>	Invalid partition access type.
<b>Detailed Description</b>	The specified partition access type is not a valid type.
<b>Recommended Response Action</b>	Try a partition access type that is supported.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF035

<b>Message</b>	Invalid image.
----------------	----------------

<b>Detailed Description</b>	The image file is not valid.
<b>Recommended Response Action</b>	Check the image file provided.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF036

<b>Message</b>	Attach partition successful.
<b>Detailed Description</b>	The partition was attached.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF037

<b>Message</b>	Attach partition operation did not complete successfully.
<b>Detailed Description</b>	The attaching partition operation did not complete successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF038

<b>Message</b>	Detach partition successful
<b>Detailed Description</b>	The partition was detached.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 3 (Informational)

## Redfish Event Type

*No alerts are applicable for this message*

# VF039

<b>Message</b>	Detach partition operation did not complete successfully.
<b>Detailed Description</b>	The detaching partition operation did not complete successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# VF040

<b>Message</b>	Image hash verification was not successful.
<b>Detailed Description</b>	The downloaded image did not successfully complete the hash verification.
<b>Recommended Response Action</b>	Try the download again. If this issue persists, check the network connectivity.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

# VF041

<b>Message</b>	Remote mount was not successful.
<b>Detailed Description</b>	The remote share could not be mounted.
<b>Recommended Response Action</b>	Try the operation again. If this problem persists, check your login credentials and network.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF042

<b>Message</b>	Remote file missing.
<b>Detailed Description</b>	The remote file could not be found.
<b>Recommended Response Action</b>	Check the mount area.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF043

<b>Message</b>	Remote file too large.
<b>Detailed Description</b>	The file size is too large to be used.
<b>Recommended Response Action</b>	Try a smaller file.
<b>Category</b>	Configuration (VF = vFlash Media)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VF044

<b>Message</b>	TFTP download operation was not successful.
<b>Detailed Description</b>	File transfer was not successful. This could be because of network problems or an operational problem with the file server.
<b>Recommended Response Action</b>	Try the download again. If the issue persists, validate that the network share is operational.
<b>Category</b>	Configuration (VF = vFlash Media)

## VFL Event Messages

### VFL0001

<b>Message</b>	The vFlash SD Card operation is successful.
<b>Detailed Description</b>	The requested operation for the vFlash SD Card completed successfully.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VFL = vFlash Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VFL0002

<b>Message</b>	Unable to query the vFlash media status.
<b>Detailed Description</b>	The status of vFlash SD Card or the vFlash media partition cannot be obtained, because some of the iDRAC services are busy.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, restart the iDRAC and retry the operation. If the issue continues to persist, contact your service provider.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VFL0003

<b>Message</b>	Partition <i>arg1</i> does not exist.
<b>Arguments</b>	<ul style="list-style-type: none"><li>· <b><i>arg1</i></b> = partition number</li></ul>
<b>Detailed Description</b>	The partition number identified in the message cannot be queried, because identified partition does not exist.
<b>Recommended Response Action</b>	Use a partition number of an existing partition for the requested operation.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VFL0004

<b>Message</b>	Unable to perform the vFlash media operation.
<b>Detailed Description</b>	The requested vFlash media operation could not be performed, because some of the iDRAC services are busy.
<b>Recommended Response Action</b>	Retry the operation. If the issue persists, restart the iDRAC and retry the operation. If the issue continues to persist, contact your service provider.
<b>Category</b>	Configuration (VFL = vFlash Event)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VFL0005

<b>Message</b>	No vFlash partitions exist.
<b>Detailed Description</b>	There are no vFlash partitions available currently for the display.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	

*No alerts are applicable for this message*

## VFL0007

<b>Message</b>	No vFlash SD card is present.
<b>Detailed Description</b>	The operations could not be completed because a vFlash SD Card is not detected.
<b>Recommended Response Action</b>	Confirm an SD Card is present in the vFlash SD Card reader slot. Otherwise, insert an SD Card and retry the operation.
<b>Category</b>	System Health (VFL = vFlash Event)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>

## VLT Event Messages

### VLT0100

Message Processor module *arg1* voltage is less than the lower warning threshold.

Arguments · **arg1** = name

Detailed Description System hardware detected an over voltage or under voltage condition.If multiple voltage exceptions occur consecutively the system may power down in failsafe mode.

Recommended Response Action 1) Review system logs for power supply exceptions.2) Remove the processor module. Inspect processor socket for bent pins. 3) If the problem persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

 · ***arg1*** = name

Detailed Description System hardware detected an over voltage or under voltage condition. If multiple voltage exceptions occur consecutively the system may power down in failsafe mode.

Recommended Response Action 1) Review system logs for power supply exceptions. 2) Reduce system to minimum configuration, inspect and re-install system cables. 3) If the problem persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

## VLT0300

**Message** CPU *arg1 arg2* voltage is less than the lower warning threshold.

**Arguments**

- ***arg1*** = number
- ***arg2*** = name

**Detailed Description** Low voltages may be the result of a problem with the voltage regulator or a problem with the processor. The low voltage may cause the processor to fail to operate.

**Recommended Response Action** 1) Turn system off and remove input power for one minute. Re-apply input power and turn system on. 2) Make sure the processor is seated correctly. 3) If the issue still persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

## VLT0301

**Message** CPU *arg1 arg2* voltage is less than the lower critical threshold.

**Arguments**

- **arg1** = number
- **arg2** = name

**Detailed Description** Low voltages may be the result of a problem with the voltage regulator or a problem with the processor. When the critical threshold is crossed, the processor will fail to operate. The system may power down.

**Recommended Response Action** 1) Turn system off and remove input power for one minute. Re-apply input power and turn system on. 2) Make sure the processor is seated correctly. 3) If the issue still persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

## VLT0302

**Message** CPU *arg1 arg2* voltage is greater than the upper warning threshold.

**Arguments**

- ***arg1*** = number
- ***arg2*** = name

**Detailed Description** High voltages may be the result of problem with the voltage regulator or a problem with the processor. Elevated voltages may result in damage to the processor or other electronic components inside the system.

**Recommended Response Action** 1) Turn system off and remove input power for one minute. Re-apply input power and turn system on. 2) Make sure the processor is seated correctly. 3) If the issue still persists, contact technical support. Refer to the product documentation to choose a convenient contact method.

## VLT400

**Message** The *arg1* sensor has failed with a value *arg2* Volts.

**Arguments**

- ***arg1*** = sensor name
- ***arg2*** = voltage

**Detailed Description** A voltage sensor identified in the message may have failed. This condition can cause system performance issues and degradation in the monitoring capability of the system.

**Recommended Response Action** Do one of the following to resolve the issue: 1) Verify the Embedded System Management (ESM) Log for any sensor related faults. If there is a failed sensor, replace the system board. 2) Re-configure the system to a minimum configuration, and verify if the sensor displays a normal value, otherwise replace the system board. 3) If the sensor identified is a processor voltage sensor, remove the processor module and inspect processor socket, and replace if required. If the issue persists, contact your service provider.

## VRM Event Messages

### VRM0009

**Message** No Virtual Media devices are currently connected.

**Detailed Description** No virtual media was found to disconnect.

**Recommended Response Action** No response action is required.

**Category** System Health (VRM = Virtual Console)

**Severity** Severity 1 (Critical)

**Redfish Event Type**

*No alerts are applicable for this message*

## VRM0010

<b>Message</b>	Unable to disconnect Virtual Media devices.
<b>Detailed Description</b>	The virtual media could not be disconnected. Possible reason is that it might be in use.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0011

<b>Message</b>	The Virtual Media image server is not currently connected.
<b>Detailed Description</b>	The Virtual Media server is already disconnected.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0012

<b>Message</b>	The Virtual Media image server is already connected.
<b>Detailed Description</b>	The Virtual Media server is already connected.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0013

<b>Message</b>	Virtual Media services is currently attached to the USB interface. It must be detached before the image server can be connected.
<b>Detailed Description</b>	Simultaneously connecting Virtual Media and USB interface is not possible.
<b>Recommended Response Action</b>	Detach the USB interface and re-try.
<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Severity 2 (Warning)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0014

<b>Message</b>	Unable to determine current state of Virtual Media USB interface.
<b>Detailed Description</b>	Racadm tool was unable to get the status of the USB interface.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Severity 1 (Critical)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0015

<b>Message</b>	Virtual Console is ENABLED
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0016

<b>Message</b>	Virtual Console is DISABLED
----------------	-----------------------------

<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0017

<b>Message</b>	Virtual Media disconnect operation successful
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0018

<b>Message</b>	Virtual Media image server operation successful
<b>Detailed Description</b>	Success message.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	Configuration (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)
<b>Redfish Event Type</b>	<i>No alerts are applicable for this message</i>

## VRM0019

<b>Message</b>	Remote Image is now Configured
<b>Detailed Description</b>	The Remote Image is now configured and ready to use.
<b>Recommended Response Action</b>	No response action is required.
<b>Category</b>	System Health (VRM = Virtual Console)
<b>Severity</b>	Severity 3 (Informational)

# Getting help

Topics:

- [Contacting Dell](#)
- [Documentation feedback](#)
- [Accessing system information by using QRL](#)
- [Locating the Service Tag of your system](#)

## Contacting Dell

Dell provides several online and telephone based support and service options. If you do not have an active internet connection, you can find contact information about your purchase invoice, packing slip, bill, or Dell product catalog. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical assistance, or customer service issues:

- 1 Go to [Dell.com/support](https://Dell.com/support).
- 2 Select your country from the drop-down menu on the lower right corner of the page.
- 3 For customized support:
  - a Enter your system Service Tag in the **Enter your Service Tag** field.
  - b Click **Submit**.The support page that lists the various support categories is displayed.
- 4 For general support:
  - a Select your product category.
  - b Select your product segment.
  - c Select your product.The support page that lists the various support categories is displayed.
- 5 For contact details of Dell Global Technical Support:
  - a Click [Global Technical Support](#).
  - b The **Contact Technical Support** page is displayed with details to call, chat, or e-mail the Dell Global Technical Support team.

## Documentation feedback

You can rate the documentation or write your feedback on any of our Dell EMC documentation pages and click **Send Feedback** to send your feedback.

## Accessing system information by using QRL

You can use the Quick Resource Locator (QRL) to get immediate access to the information about your system. The QRL is located on the top of the system cover and provides access to generic information about your system. If you want to access information specific to the system service tag, such as configuration and warranty, you can access QR code located on the system Information tag. Ensure that your smart phone or tablet has the QR code scanner installed.

The QRL includes the following information about your system:

- How-to videos
- Reference materials, including the Owner's Manual, LCD diagnostics, and mechanical overview

- A direct link to Dell to contact technical assistance and sales teams
- 1 Go to **Dell.com/QRL** and navigate to your specific product or
  - 2 Use your smart phone or tablet to scan the model-specific Quick Resource (QR) code on your PowerEdge system or in the Quick Resource Locator section.

## Locating the Service Tag of your system

You can identify your system using the unique Express Service Code and Service Tag. Pull out the information tag in front of the system to view the Express Service Code and Service Tag. Alternatively, the information may be on a sticker on the chassis of the system. The mini Enterprise Service Tag (EST) is found on the back of the system. This information is used by Dell to route support calls to the appropriate personnel.

**Figure 1. Locating Service Tag of your system**

- |   |                               |   |   |
|---|-------------------------------|---|---|
| 1 | information tag (front view)  | 2 | information tag (back view)                       |
| 3 | OpenManage Mobile (OMM) label | 4 | iDRAC MAC address and iDRAC secure password label |
