

# Windows Embedded Standard 7 Unified build 7077 for Dell Wyse Thin Clients Release Notes

Software releases are created to correct defects, make enhancements, or add new features. These releases are tested on all current, actively shipping platforms and operating systems as applicable. This release notes contain details on the supported platforms, any changes in the configuration settings and licensing details as well. The bug fixes along with the workarounds are documented in the release notes. Any changes in the feature functionality from an end-user perspective are listed with the description of each feature at a high level.

Current Version: Build number 7077 Release Date: February-2018 Previous Version: Build number 7064

## Release type and definition

This release note contains the following information about Microsoft Windows Embedded Standard 7 release that is intended for Dell Wyse thin clients:

#### Table 1. Release detail and specification

Release detail	Specification	
Operating system	Windows Embedded Standard 7	
Product version	9.09	
Build	7077—Unified MUI build	
System type	32-bit operating system	
Platform	Wyse 3030 thin client with WES7	

Release detail	Specification
Supported languages	<ul> <li>English-United States—en-us</li> <li>German-Germany—de-DE</li> <li>French-France—fr-FR</li> <li>French-Canada—fr-CA</li> <li>Korean-Korea—ko-KR</li> <li>Japanese-Japan—ja-JP</li> <li>Spanish-Spain—es-ES</li> <li>Italian-Italy—it-IT</li> <li>Chinese-Simplified—zh-CN</li> <li>Chinese-Traditional—zh-TW</li> <li>Portuguese-Brazil—pt-BR</li> </ul>
	l

#### General features

## **Dell Thin Client application**

You can view general information about the thin client, system shortcuts, custom fields, RAM disk, auto logon, C-A-D map tool, and support information.

(i) NOTE: By default, the RAM disk size is set to 512 MB.

## **Internet Explorer 11**

Internet Explorer 11—IE 11 is the quickest version of the browser. Microsoft has included support for web standards such as CSS animations, HTML5 spell checking, and improved JavaScript performance. The main security addition to IE 11 is the Enhanced Protected Mode, which locks down parts of the Windows operating system. This feature prevents the browser from accessing the operating system.

## C-A-D map tool

By default, the C-A-D map tool is disabled on the thin client. To enable the C-A-D map tool:

- 1 Log in to the system using administrator privileges.
- 2 Disable the write filter.
- 3 Launch the command prompt from the **Run** window in elevated mode.
- 4 Navigate to <drive C>\windows\system32.
- 5 Run the file **DWKBFilterMon.exe** from the command prompt.
- 6 Click Enable.
- 7 Restart the system.

## **Configuration details**

This section provides configuration details of Windows Embedded Standard 7 operating system on the thin client.

#### **System Center Configuration Manager details**

System Center Configuration Manager details are not displayed in **Programs and Features** and **Dell Thin Client Application**. But, the Configuration Manager Control Panel Applet and SMS Agent Host Service details are displayed. This is because of the Microsoft design.

SMSCFG.ini, clientstate.dat, wedmtrace.log, Ccmstore.sdf, InventoryStore.sdf, StateMessageStore.sdf files, and Service Data folder are included in the File Based Write Filter Exclusion list.

#### Citrix Receiver

USB redirection works for all users of the thin client with all published XenDesktops. This feature is independent of the **Simplify device connections for me** settings in the XenDesktop connection preferences user interface.

## **ENERGY STAR specification**

Windows Embedded Standard 7 meets the ENERGY STAR thin client requirements.

The following are the details in the Control Panel applet for power options:

- · Supports Wake on LAN (WoL) during turn off.
- · Supports Idle state wake up from the sleep mode.
- · Screen off timer is 10 minutes.
- · Sleep timer is 15 minutes.

## Flash.sys

You can enable or disable hostname calculation in flash.sys file. The flash.sys file is located at <a href="https://driverStore/">drive C>/Windows/System32/DriverStore/</a>
FileRepository or at <a href="https://drivers.com/drivers/">driverStore/</a>

- · Ensure that when you alter the MAC ID for a client, hostname calculation is not performed.
- If you change the MAC ID—NIC card change, you must perform a hostname calculation by changing your device name to MINWITHNET.

## Support matrix

#### Table 2. Supported platforms

Operating system	Platform	Build number	Build size	Product version	RAM size	Flash size	BIOS version
Windows Embedded Standard 7	Wyse 3030 thin client with WES7	BEB0_7077_16 GB.exe	8.89 GB (9,556,405,223 bytes)	9.09	4 GB	16 GB	1.0R

#### Table 3. BIOS information

BIOS filename	File size	File type	Wyse BIOS Flash parameters	Configuration file for BIOS settings
10R.fd	4 MB (4,194,304 bytes)	FD File (.fd)	wysebiosflashparams = / bbl /cvar /sd /sn /v / exit /file	wysebiossettingsparams1 = -xhci 1 wysebiossettingsparams2 = -booto HPUCD

#### Table 4. Supported management servers

Management server	Version	Operating system
Wyse Device Manager	5.7.2	Windows Server 2012 R2
Wyse Management Suite	1.1	Windows Server 2012 R2
Microsoft System Center Configuration Manager	Microsoft System Center Configuration Manager 2016  Version 1606  Console Version: 5.0.8412.1313  Site version: 5.0.8412.1000	Windows Server 2016  Version 1607—Operating system Build 14393.1715

#### Table 5. Supported Imaging solution

Imaging solution	Version
WSI	5.0.4
USB Imaging Tool	3.0.0

# Used and free space details

#### Table 6. Used and free space details

Platforms	Flash Size	Used Space	Free Space
Wyse 3030 thin client with WES7	16 GB	10.4 GB	4.45 GB

## **Known issues**

#### Table 7. Known issues

Known issues	Workaround	
PAD imaging does not work.	There is no workaround for the issue in this release.	
When you right-click the text after an image pull operation, the <b>Bluetooth</b> option is not available in the <b>Send To</b> drop-down list.	There is no workaround for the issue in this release.	

Known issues	Workaround		
After you push the WCM configuration through Profile Manager, VMware Horizon client and RDP desktop shortcuts are deleted from the desktop.	There is no workaround for the issue in this release.		
When you manually register the device to Wyse Device Manager server with FQDN address, Wyse Device Agent console displays a message <b>Enter Valid Server IP</b> .	There is no workaround for the issue in this release.		
RAM size is different in the Wyse Device Manager server details and Dell Thin client application.	There is no workaround for the issue in this release.		
Tight NC service starts, but it gets displayed in the taskbar instead of system tray.	There is no workaround for the issue in this release.		
By default, Windows defender is disabled. After you enable, an error message is displayed in Windows Embedded Standard 7 builds.	There is no workaround for the issue in this release.		
When you play an audio file in YouTube with Jabra headphones with wireless module, <b>Low disk space</b> message is displayed after 15 minutes.	There is no workaround for the issue in this release.		
Occasionally, Windows Explorer fails after you connect any Bluetooth device to the client.	There is no workaround for the issue in this release.		
Files received through Bluetooth from one client to another do not work.	Enable Windows Search to resolve this issue. But low memory issue is observed after you enable Windows Search.		
Black screen observed for 15 seconds to 1 minute when you log off and log in to the client.	There is no workaround for the issue in this release.		
Black screen is displayed when you boot the thin client.	There is no workaround for the issue in this release.		
Low memory issue is observed when YouTube videos are played using Bluetooth speakers. This issue is observed only when other applications are running.	There is no workaround for the issue in this release.		
SCCM image push operation— <b>Apply Image</b> —using task sequence may fail with error code 0x80070070.	Manually create the SCCM stand-alone media with the command line parameters.		
You cannot open the local associated file in a Citrix session where PDF published application are configured. This issue is because the drive C mapping of the thin client is restricted in a VDI session.	There is no workaround for the issue in this release.
