140 1 Scope

141 The Dell Role Based Authorization Profile describes the properties and interfaces for executing system
142 management tasks related to the authorization. The profile standardizes and aggregates the description
143 for the platform's basic properties into a system view representation and provides static methodology for
144 the clients to query the system views without substantial traversal of the model.

691 **8 Methods**

692 This section details the requirements for supporting extrinsic methods for the CIM elements defined by
693 this profile.

694 **8.1 DCIM_IPMIRoleBasedAuthorizationService.AssignRoles()**

695 The invocation of “Assign Roles” shall follow the following steps:

- 696 1. Enumerate DCIM_LANIdentity or DCIM_SerialIdentity
697 2. Enumerate DCIM_IPMIRole for LAN Identities or DCIM_IPMISOLRole for Serial Identities
698 3. Call AssignRoles with references to an instance of each class.
