

Dell Storage Integration Tools for VMware Version 5.1 Release Notes

Current Version: 5.1.1
Release Date: 2020-01
Previous Version: 5.1

Topics:

- [Revision History](#)
- [Software Requirements](#)
- [New Features and Enhancements in Version 5.1](#)
- [Issues Fixed in Version 5.1.1](#)
- [Known Issues](#)
- [Usage Constraints](#)
- [Installation Instructions](#)
- [Support Resources](#)

This document describes the new features, enhancements, and known issues in the Dell Storage Integration Tools for VMware (DSITV) version 5.1.

Revision History

Revision	Date	Description
A	August 2019	Initial release
B	January 2020	Update for version 5.1.1

Software Requirements

The following lists identify the minimum software requirements for the DSITV components.

- [Replay Manager Service for VMware \(RMSV\)](#)
 - Storage Center OS version 7.1
 - Replay Manager Explorer version 7.8
 - VMware ESX/ESXi version 6.5-6.7
 - VMware vCenter Server version 6.5-6.7
- [Dell Storage vSphere Web Client Plugin](#)
 - Dell Storage Manager (Enterprise Manager): 2018 R1
 - Storage Center OS version 7.1
 - VMware ESXi version 6.5-6.7
 - VMware vCenter Web Server version 6.5-6.7

NOTE: FluidFS is no longer supported beginning with DSITV version 5.1.

NOTE: The Dell Storage Manager Data Collector is also required for the Dell Storage vSphere Web Client Plugin version 5.1. See the *Dell Storage Manager Installation Guide* for information about installing Data Collector.

New Features and Enhancements in Version 5.1

Version 5.1 of the Dell Storage vSphere Web Client plug-in provides the following new features and enhancements:

- Support for Dell Storage Manager 2019 R1
- Support for VMware vCenter Server version 6.7
- Support for VMware ESXi 6.7

Issues Fixed in Version 5.1.1

The following issue has been fixed in version 5.1.1:

Issue	Description
RMSV-90	Extra Snapshot created on same day for scheduled Backup Set.

Known Issues

The following is a known issue in this release.

Upgrade is not supported from 4.x to 5.1

Description	The DSITV 4.x appliance is a 32-bit architecture, and DSITV 5.1 appliance is upgraded to 64-bit architecture. Due to the architecture incompatibility, an upgrade from version 4.x to version 5.1 is not supported.
Workaround	<ul style="list-style-type: none">• For Replay Manager Service for VMware (RMSV), you need to migrate data from RMSV version 1.4 to RSMV version 2.0 or later• For VSWP, you need to unregister DSITV version 4.1.x, and register DSITV version 5.1
Applies to	vSphere Web Client Plugin VSWP version 4.1.x, and RMSV version 1.4.

Usage Constraints

Cross-platform replication – that is, replicating data between PS Series volumes and SC Series volumes – is not supported in DSITV 5.1.

Installation Instructions

See the *Dell Storage Integration Tools for VMware Administrator's Guide* for instructions on installing the Dell Storage Integration Tools for VMware, including:

- Replay Manager Service for VMware (RMSV)
- Dell Storage vSphere Web Client Plugin

Support Resources

The following support resources are available for the Dell Storage Integration Tools for VMware.

Related Publications

The following documentation is available for the Dell Storage Integration Tools for VMware:

- *Dell Storage Integration Tools for VMware Administrator's Guide*
Provides instructions for installing DSITV and configuring the following applications:
 - Replay Manager Service for VMware (RMSV)
 - Dell Storage vSphere Web Client Plugin
- *Dell Storage vSphere Web Client Plugin Administrator's Guide*

Describes how to use the Dell Storage vSphere Web Client Plugin to manage Dell Storage Centers with the VMware vSphere Web Client.

- *Dell Storage Manager Administrator's Guide*

Provides configuration and management instructions for Dell Storage Manager.

- *Replay Manager Administrator's Guide*

Describes how to install Replay Manager and how to use the software to back up and restore data on a server.

Notes, Cautions, and Warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.
