

Dell Latitude 5480

Owner's Manual

Notes, cautions, and warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.

Working on your computer

GUID-6678B449-E61B-463B-A9D1-AB5A04B63651

Safety instructions

Use the following safety guidelines to protect your computer from potential damage and to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have read the safety information that shipped with your computer.
- A component can be replaced or, if purchased separately, installed by performing the removal procedure in reverse order.

- ⚠ WARNING:** Disconnect all power sources before opening the computer cover or panels. After you finish working inside the computer, replace all covers, panels, and screws before connecting to the power source.
- ⚠ WARNING:** Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance
- ⚠ CAUTION:** Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.
- ⚠ CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface that is grounded to ground yourself before you touch the computer to perform any disassembly tasks.
- ⚠ CAUTION:** Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.
- ⚠ CAUTION:** When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.
- ⓘ NOTE:** The color of your computer and certain components may appear differently than shown in this document.

GUID-82258B8D-DC8F-4D55-97C8-3CEC2FB560A4

Before working inside your computer

- 1 Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
- 2 Turn off your computer.
- 3 If the computer is connected to a docking device (docked), undock it.
- 4 Disconnect all network cables from the computer (if available).

⚠ CAUTION: If your computer has an RJ45 port, disconnect the network cable by first unplugging the cable from your computer.

- 5 Disconnect your computer and all attached devices from their electrical outlets.
- 6 Open the display.
- 7 Press and hold the power button for few seconds, to ground the system board.

⚠ CAUTION: To guard against electrical shock unplug your computer from the electrical outlet before performing Step # 8.

⚠ CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface at the same time as touching a connector on the back of the computer.

- 8 Remove any installed ExpressCards or Smart Cards from the appropriate slots.

GUID-44E70DF4-10EF-4B31-835C-0CB24976C844

After working inside your computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

⚠ CAUTION: To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

- 1 Replace the battery.
- 2 Replace the base cover.
- 3 Connect any external devices, such as a port replicator or media base, and replace any cards, such as an ExpressCard.
- 4 Connect any telephone or network cables to your computer.

⚠ CAUTION: To connect a network cable, first plug the cable into the network device and then plug it into the computer.

- 5 Connect your computer and all attached devices to their electrical outlets.
- 6 Turn on your computer.

GUID-52C8386F-7013-4A8E-912D-2DF589CA6CA4

Turning off your computer

GUID-B70C8BD7-325C-424F-8DF4-80728A0080AB

Turning off your computer — Windows 10

⚠ ข้อควรระวัง: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer .

- 1 Click or tap .
- 2 Click or tap  and then click or tap **Shut down**.

📌 หมายเหตุ: Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 6 seconds to turn them off.

GUID-8CC3ED6C-E9FF-44E2-B71A-23182D871043

Turning off your computer — Windows 7

⚠ CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

- 1 Click **Start**.
- 2 Click **Shut Down**.

 **NOTE:** Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 6 seconds to turn them off.

Hot key combination

Some keys on your keyboard have two icons on them. These keys can be used to type alternate characters or to perform secondary functions. To type the alternate character, press Shift and the desired key. To perform secondary functions, press **Fn** and the desired key. The following table shows the features hot key combination:

Table 1. Hot key combination

Features	Function
Fn+F1	Mute audio
Fn+F2	Decrease volume
Fn+F3	Increase volume

Features	Function
Fn+F4	Microphone Mute
Fn+F5	NUM Lock
Fn+F6	Scroll Lock
Fn+F8	Switch to external display
Fn+F9	Search
Fn+F10 (optional)	Increase keyboard backlight brightness
Fn+F11	Decrease brightness
Fn+F12	Increase brightness
Fn+Esc	Toggle Fn-key lock
Fn+PrntScr	Turn off/on wireless
Fn+Insert	Sleep
Fn+Right arrow key	End
Fn+Left arrow	Home

NOTE: You can define the behavior of the shortcut keys by pressing Fn+Esc or by changing Function Key Behavior in BIOS setup program.

Removing and installing components

This section provides detailed information on how to remove or install the components from your computer.

GUID-47F49C22-1B34-4F97-8A48-A42C1C806FC7

Recommended tools

The procedures in this document require the following tools:

- Phillips #0 screwdriver
- Phillips #1 screwdriver
- Small plastic scribe

GUID-B415CF53-F1E0-49C0-99EF-78E812ED7644

Subscriber Identity Module(SIM) board

GUID-B60E529B-4F7B-45A4-B667-79763588242A

Installing the Subscriber Identification Module (SIM) card

- 1 Insert a paperclip or a SIM card removal tool into the pinhole [1].
- 2 Pull the SIM card tray to remove it [2].
- 3 Place the SIM card on the SIM card tray.
- 4 Push the SIM card tray into the slot until it clicks into place.

GUID-F756B8D6-3E2F-43AB-ABD3-9FF1E990F1C8

Removing the Subscriber Identification Module (SIM) card

⚠ CAUTION: Removing the SIM card when the computer is on may cause data loss or damage the card. Ensure your computer is turned off or the network connections are disabled.

- 1 Insert a paperclip or a SIM card removal tool into the pinhole on the SIM card tray.
- 2 Pull the SIM card tray to remove it.
- 3 Remove the SIM card from the SIM card tray.
- 4 Push the SIM card tray into the slot until it clicks into place.

GUID-DA12D285-BE8F-419A-BADD-8C7CE1AEEE1A

Base cover

GUID-1A1FFC0F-932A-4FF2-8E1C-5A116DCF1D11

Removing base cover

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 To remove the base cover:
 - a Loosen the M2.5*6.3 captive screws that secure the base cover to the computer [1].
 - b Pry the base cover from the edge and lift the base cover away from the computer [2].

ⓘ NOTE: You may need a plastic scribe to pry the base cover from the edges.

GUID-D70ABEB0-6F90-402C-AAD7-0DA3B63BC22E

Installing base cover

- 1 Place the base cover to align with the screw holders on the computer.
- 2 Tighten the M2.5 captive screws to secure the base cover to the computer.
- 3 Follow the procedure in [After working inside your computer](#).

GUID-2F290758-2CFF-42C3-A93C-DC0EF3A54A0F

Battery

GUID-F2983803-7011-4A0B-A9BA-59C560417C6B

Removing battery

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the [base cover](#).
- 3 To remove the battery:
 - a Disconnect the battery cable from the connector on the system board [1].
 - b Remove the M2*6 captive screw that secures the battery to the computer [2].

① **NOTE:** The number of screws will vary depending on the type of battery installed.

c Lift the battery from the computer [3].

① **NOTE:** Discharge the battery as much as possible before removing from the system. This can be done by disconnecting the A/C adapter from the system (while the system is turned on) to allow the system to drain the battery.

d Unroute the cable from the routing channel [1] and remove the cable from the battery.

GUID-33E02BE1-560A-4CDF-AC33-37EEC8C32AA7

Installing battery

- 1 Insert the battery into the slot on the computer.
- 2 Route the battery cable through the routing channels.
- 3 Tighten the M2*6 captive screw to secure the battery to the computer.
- 4 Connect the battery cable to the connector on the system board.
- 5 Install the [base cover](#).
- 6 Follow the procedure in [After working inside your computer](#).

Solid State Drive — optional

Removing optional M.2 Solid State Drive (SSD)

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
- 3 To remove the SSD card:
 - a Peel the adhesive Mylar shield that secures the SSD card [1].

NOTE: Need to be removed carefully in order to be reused on the replacement SSD.

 - b Remove the M2*3 screw that secures the SSD to the computer [2].
 - c Slide and lift the SSD from the computer [3].

- 4 To remove the SSD frame:
 - a Remove the M2*3 screw that secures the SSD frame to the computer [1].
 - b Lift the SSD frame away from the computer [2].

GUID-CD5C30B4-0C16-4456-A4EE-5527B28A633B

Installing optional M.2 SSD

- 1 Insert the SSD clip into the slot on the computer.
- 2 Replace the M2*3 screw to secure the SSD clip to the computer.
- 3 Insert the SSD into the connector on the computer.
- 4 Place the Mylar shield over the SSD.
- 5 Install the:
 - a battery
 - b base cover
- 6 Follow the procedure in [After working inside your computer](#).

GUID-DA236FEA-AA29-400C-89C3-C25D4B9DE6F3

Hard drive

GUID-0960E075-7239-4F68-9536-49C2E8860BB5

Removing hard drive assembly

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:

- a [base cover](#)
 - b [battery](#)
- 3 To remove the hard drive assembly:
- a Disconnect the hard drive cable from the connector on the system board.
 - b Remove the screws that secure the hard drive assembly to the computer.
 - c Lift the hard drive assembly away from the computer.

GUID-F21F347B-8874-4078-BA1F-BF13EE9D3A2A

Installing hard drive assembly

- 1 Insert the hard drive assembly into the slot on the computer.
- 2 Tighten the screws to secure the hard drive assembly to the computer.
- 3 Connect the hard drive cable to the connector on the hard drive and on the system board.
- 4 Install the:
 - a [battery](#)
 - b [base cover](#)
- 5 Follow the procedures in [After working inside your system](#).

GUID-B369D04D-3080-4AE8-912A-8F95B80E032D

Coin cell battery

GUID-818A6717-FC02-4136-BB4C-80CBB848E677

Removing the coin cell battery

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
- 3 To remove the coin cell battery:
 - a Disconnect the coin cell battery cable from the connector on the system board [1].
 - b Lift the coin cell battery to release from the adhesive and lift it away from the system board [2].

GUID-9B940A02-5A03-42B9-BD1B-FFB1882DF817

Installing coin cell battery

- 1 Affix the coin cell battery on the system board.
- 2 Connect the coin cell battery cable to the connector on the system board.
- 3 Install the:
 - a battery
 - b base cover
- 4 Follow the procedure in [After working inside your computer](#).

GUID-CCAA203F-6E60-4661-BC9C-1EED5672FD0D

WLAN card

GUID-B9430252-89EB-445C-8F3F-7E83FAB9CE1F

Removing WLAN card

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery

- 3 To remove the WLAN card:
 - a Remove the M2*3 screw that secures the WLAN card to the computer [1].
 - b Remove the metal bracket that secures the WLAN cables [2].
 - c Disconnect the WLAN cables from the connectors on the WLAN card [3].
 - d Lift the WLAN card away from the connector [4].

GUID-CDBFF66F-8DB2-42BF-BA73-E2677B4C888F

Installing WLAN card

- 1 Insert the WLAN card into the connector on the system board.
- 2 Connect the WLAN cables to the connectors on the WLAN card.
- 3 Place the metal bracket to secure the WLAN cables.
- 4 Tighten the M2*3 screw to secure the WLAN card to the computer.
- 5 Install the:
 - a battery
 - b base cover
- 6 Follow the procedure in [After working inside your computer](#).

GUID-11835ECE-B208-48CF-86B8-CADB55E2FB64

WWAN card (Optional)

This is optional as the system might not ship with WWAN card.

GUID-5A74771B-C048-4ABC-A056-1C82883BC739

Removing the WWAN card

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
- 3 To remove the WWAN card:
 - a Remove the screw that secures the WWAN card.
 - b Disconnect the WWAN cables from the connectors on the WWAN card.
 - c Unroute the WWAN cables from the routing channel.
 - d Remove the WWAN card from the computer.

GUID-22A5F426-F8E6-4CA5-981B-057E97C4F520

Installing the WWAN card

- 1 Insert the WWAN card into the slot on the computer.
- 2 Route the WWAN cables through the routing channel.
- 3 Connect the WWAN cables to the connectors on the WWAN card.
- 4 Replace the screw to secure the WWAN card to the computer.
- 5 Install the:
 - a [battery](#)
 - b [base cover](#)
- 6 Follow the procedure in [After working inside your computer](#).

GUID-B4BFAFB3-4A6A-47FD-A777-9CA7EF95C20B

Memory modules

GUID-04A5C57B-73F9-4E1D-959B-3F158B0CD16F

Removing memory module

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
- 3 To remove the memory module:
 - a Pry the clips securing the memory module until the memory module pops-up [1].
 - b Lift the memory module away from the connector [2].

GUID-64ACB17D-24A6-456E-964B-63FE0BF74C17

Installing memory module

- 1 Insert the memory module on the memory connector until the clips secure the memory module.
- 2 Install the:
 - a battery
 - b base cover
- 3 Follow the procedure in [After working inside your computer](#).

GUID-D995663C-CF3C-48E7-AFAE-CA47CB6BAD67

Keyboard

GUID-8216DEA8-E2D4-4327-8108-1AC3AAB531B

Removing keyboard trim

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Pry the keyboard trim from the edges [1] and lift it away from the computer [2].

NOTE: Use a plastic scribe to pry the keyboard trim from the edges.

GUID-31F233DE-CF45-499A-9397-202FF7747F1D

Installing keyboard trim

- 1 Place the keyboard trim on the keyboard and press along the edges as well as in between the rows of keys until it clicks in place.
- 2 Follow the procedure in [After working inside your computer](#).

GUID-78031CE9-7C8C-4807-B462-F7DC3D6B280B

Removing keyboard

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
 - c [keyboard trim](#)
- 3 Lift the latch and disconnect the keyboard cable from the connector.

NOTE: There may be different number of cables to disconnect based on the keyboard type.

- 4 Turn over the computer and open the display.
- 5 To remove the keyboard:
 - a Remove the M2*2 screws that secure the keyboard to the computer [1].
 - b Pry the keyboard from the edge and lift it away from the computer [2].

⚠ WARNING: Make sure you pull the keyboard cable routed under the computer to avoid any damage to the keyboard cable.

GUID-E25E2DB5-3353-41F9-B827-3DD4E68DE9CC

Installing keyboard

- 1 Hold the keyboard and route the keyboard cable through the placeholder.
- 2 Place the keyboard to align with the screw holders on the computer.
- 3 Tighten the M2*2 screws to secure the keyboard to the computer.
- 4 Connect the keyboard cable to the connector.
- 5 Install the:
 - a [keyboard trim](#)
 - b [battery](#)
 - c [base cover](#)
- 6 Follow the procedure in [After working inside your computer](#).

Heat sink

Removing heatsink

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
- 3 To remove the heat sink:

NOTE: This section is for the UMA model only.

- a Remove the M2*3 screws that secure the heat sink on the system board [1].
- b Lift the heat sink away from the system board [2].

Installing heat sink

- 1 **NOTE:** This section is for UMA model only.
Place the heat sink on the system board.
- 2 Tighten the M2*3 screws to secure the heat sink to the computer.

- 3 Install the:
 - a battery
 - b base cover
- 4 Follow the procedure in [After working inside your computer](#).

GUID-9CAB0F1B-03D0-41E6-A1CE-CD35C5879D22

System fan

GUID-D218A63E-048B-4A60-A160-1CA978FD2D37

Removing the system fan

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WWAN card (optional)
 - d hard drive assembly(optional)
 - e chassis frame

- 3 To remove the system fan:

NOTE: This section is for UMA model only.

- a Disconnect the system fan cable from the connector on the system board [1].
- b Lift the system fan away from the computer [2].

GUID-15C24BE1-D4B5-488A-AF84-42253753B618

Installing the system fan

- 1 Place the system fan into the slot on the computer.
- 2 Connect the system fan cable to the connector on the system board.
- 3 Install the:
 - a chassis frame
 - b WWAN card(optional)
 - c hard drive assembly(optional)
 - d battery
 - e base cover
- 4 Follow the procedure in [After working inside your computer](#).

GUID-533F671B-CE7F-422E-AF5B-742BAE7BCF2F

Power connector port

GUID-FE9ABFCB-5A90-4033-9757-FFE9868A781B

Removing power connector port

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
- 3 To remove the power connector port:
 - a Remove the M2*3 screw that secures the display cable to the computer [1].
 - b Disconnect the power connector port cable from the connector on the system board [2].
 - c Remove the M2*3 screw to release the metal bracket that secures the power connector port [3].
 - d Lift the metal bracket [4].
 - e Lift the power connector port away from the computer [5].

GUID-7D386AEF-9D92-4772-ABEC-46C82961D105

Installing power connector port

- 1 Align the power connector port along the grooves on the slot and push it down.
- 2 Place the metal bracket on the power connector port.
- 3 Tighten the M2*3 screw to secure the power connector port to the computer
- 4 Connect the power connector port cable to the connector on the system board.
- 5 Tighten the M2*3 screw to secure the display cable to the computer.
- 6 Install the:
 - a battery
 - b base cover
- 7 Follow the procedure in [After working inside your computer](#).

Chassis frame

Removing chassis frame

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a [base cover](#)
 - b [battery](#)
 - c [WLAN card](#)
 - d [WWAN card \(optional\)](#)
 - e [hard drive assembly\(optional\)](#)
 - f [SSD card](#)
- 3 To release the chassis frame:
 - a Release the WLAN and WWAN cables from the routing channels [1].
 - b Lift the latch and disconnect the keyboard cable from the connector [2].

 **NOTE:** There may be more than one cable to disconnect based on the keyboard type.

- 4 To remove the chassis frame:
 - a Remove the M2*2, M2*3, and M2*5 screws that secure the chassis frame to the computer [1].
 - b Lift the chassis frame away from the computer [2].

GUID-D314C8BA-7987-4AD4-8D5B-734D9574D936

Installing chassis frame

- 1 Place the chassis frame on the computer.
 - 2 Tighten the M2*2, M2*3, and M2*5 screws to secure the chassis frame to the computer.
 - 3 Connect the keyboard cable to the connector.
- NOTE:** There may be more than one cable to connect based on keyboard types.
- 4 Route the WLAN and WWAN(optional) cables through the routing channels.
 - 5 Install the:
 - a SSD card
 - b WLAN card
 - c WWAN card(optional)
 - d hard drive assembly(optional)
 - e battery
 - f base cover
 - 6 Follow the procedure in [After working inside your system](#).

System board

Removing system board

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a SIM card
 - b base cover
 - c battery
 - d keyboard trim
 - e keyboard
 - f WLAN card
 - g WWAN card (optional)
 - h hard drive assembly(optional)
 - i SSD card
 - j memory module
 - k coin cell battery
 - l heatsink
 - m system fan
 - n chassis frame
- 3 Disconnect the following cables from the system board:
 - a Speaker [1]
 - b LED board [2]
 - c Touchpad [3]

4 To release the system board:

- a Remove the M2*2 screw that secures the display cable [1].
- b Lift the metal bracket that secures the display cable [2].
- c Disconnect the display cable from the connectors on the system board [3].

NOTE: This step is applicable only for IR camera.

- d Disconnect the power connector port cable from the connector on the system board [4].
- e Remove the M2*2 screws that secure the metal bracket[5].

NOTE: The metal bracket secures the DisplayPort over USB Type-C.

- f Lift the metal bracket away from the system board [6].

- 5 To remove the system board:
- a Remove the M2*2 screws that secure the system board to the computer [1].
 - b Lift the system board away from the computer [2].

GUID-10E67F1C-0F16-4E35-9F78-359F844A7C42

Installing system board

- 1 Align the system board with the screw holders on the computer.
- 2 Tighten the M2*2 screws to secure the system board to the computer.
- 3 Place the metal bracket to secure the DisplayPort over USB Type-C.
- 4 Tighten the M2*2 screws to secure the metal bracket on the DisplayPort over USB Type-C.
- 5 Connect the power connector port cable to the connector on the system board.
- 6 Connect the display cables to the connectors on the system board.
- 7 Place the metal bracket to secure the display cable.
- 8 Tighten the M2*2 screw to secure the metal bracket.
- 9 Connect the following cables:
 - a touchpad
 - b USH board
 - c LED board
- 10 Install the:
 - a chassis frame
 - b system fan
 - c heat sink
 - d coin cell battery
 - e memory module
 - f SSD card
 - g WLAN card

- h WWAN card(optional)
- i hard drive assembly(optional)
- j keyboard
- k keyboard trim
- l battery
- m base cover
- n SIM card

11 Follow the procedure in [After working inside your computer](#).

GUID-DE9B5E4F-18F8-4F59-B121-3CD195D2962D

SmartCard module

GUID-80D0AC50-1FA1-4623-BB16-9EDA7178E139

Removing smart card reader board

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WLAN card
 - d WWAN card (optional)
 - e hard drive assembly(optional)
 - f SSD card
 - g chassis frame
- 3 To remove the smart card reader board:
 - a Remove the screws that secure the smart card reader board to the palmrest [1].
 - b Slide and remove the smart card reader from the slot [2].

GUID-88B139AF-8E85-4127-8F5D-7A3728CA7CB8

Installing smart card reader board

- 1 Insert the smart card reader board to align with the tabs on the chassis..
- 2 Tighten the screws to secure the smart card reader board to the computer.
- 3 Affix the smart card reader board cable and connect the cable to the connector.
- 4 Install the:
 - a chassis frame
 - b SSD card
 - c WLAN card
 - d WWAN card(optional)
 - e hard drive assembly(optional)
 - f battery
 - g base cover
- 5 Follow the procedure in [After working inside your computer](#).

Speaker

Removing speaker

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c keyboard trim
 - d keyboard
 - e WLAN card
 - f WWAN card (optional)
 - g hard drive assembly(optional)
 - h SSD card
 - i memory module
 - j coin cell battery
 - k system fan
 - l heat sink
 - m chassis frame
 - n system board
- 3 To remove the speakers:
 - a Release the speaker cable through the routing channels [1].
 - b Lift the speaker away from the computer [2].

Installing speaker

- 1 Insert the speaker module aligning it with the nodes on the chassis.
- 2 Route the speaker cable through the routing channels.
- 3 Install the:
 - a system board
 - b chassis frame
 - c system fan
 - d heat sink
 - e coin cell battery
 - f memory module
 - g SSD card
 - h hard drive assembly(optional)
 - i WWAN card(optional)
 - j WLAN card
 - k keyboard trim
 - l keyboard
 - m battery
 - n base cover
- 4 Follow the procedure in [After working inside your computer](#).

Display assembly

Removing display assembly

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WLAN card
 - d WWAN card (optional)
 - e hard drive assembly(optional)
 - f display hinge cover
- 3 To disconnect the display cable:
 - a Release the WLAN and WWAN cables from the routing channels [1].
 - b Remove the M2*5 screw that secures the display cable bracket to the computer [2].
 - c Remove the display cable bracket that secures the display cable [3].
 - d Disconnect the display cable from the connector on the system board [4].
 - e Remove the screw to release the display cable from the computer [5].

- 4 To release the display assembly:
 - a Remove the M2*5 screws that secure the display assembly to the computer [1].
 - b Release the WLAN cable, WWAN cable and display cable through the routing channels [2] [3].

- 5 Turn over the computer.
- 6 To remove the display assembly:
 - a Remove the screws that secure the display assembly to the computer [1].
 - b Open the display [2].

- c Lift the display assembly from the computer.

GUID-D1C98DB5-4818-4929-9814-556DCAB839B9

Installing display assembly

- 1 Place the chassis on the edge of a plane surface.
- 2 Align the display assembly to align with the screw holders on the computer.
- 3 Tighten the M2*5 screws to secure the display assembly to the computer.
- 4 Connect the display cable to the connector on the system board.
- 5 Place the metal bracket to secure the display cable.
- 6 Tighten the M2*5 screws to secure the display cable.
- 7 Route the WLAN and WWAN cables through the routing channels.
- 8 Install the:
 - a [display hinge cover](#)
 - b [hard drive assembly\(optional\)](#)
 - c [WLAN card](#)
 - d [WWAN card\(optional\)](#)
 - e [battery](#)
 - f [base cover](#)
- 9 Follow the procedure in [After working inside your computer](#).

Display bezel

Removing display bezel

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c display hinge cover
 - d WLAN card
 - e WWAN card (optional)
 - f display assembly
- 3 To remove the display bezel:
 - a Pry the display bezel at the base of the display [1].
 - b Lift the display bezel to release it [2].
 - c Pry the edges on the side of the display to release the display bezel [3, 4].

CAUTION: The adhesive used on the LCD bezel to seal it with the LCD itself, makes it hard to remove the bezel as the adhesive is very strong and tends to stay stuck to the LCD portion and can peel the layers up or crack the glass when trying to pry the two items apart.

GUID-5D225F7A-8B4D-4D93-91E9-98D1AF7B9919

Installing display bezel

1 Place the display bezel on the display assembly.

NOTE: Remove the protective covering on the adhesive on the LCD bezel before placing on the display assembly.

2 Starting from the top corner, press on the display bezel and work around the entire bezel until it clicks on to the display assembly.

3 Install the:

- a display assembly
- b display hinge cover
- c WWAN card(optional)
- d WLAN card
- e battery
- f base cover

4 Follow the procedure in [After working inside your computer](#).

GUID-83582729-F7E3-4745-8588-73C01746EBDD

Display hinge cover

GUID-9CFFFF9B-DA11-4D83-8080-252919881FC5

Removing display hinge cover

1 Follow the procedure in [Before working inside your computer](#).

2 Remove the:

- a base cover
- b battery

3 To remove the display hinge cover:

- a Remove the screw that secures the display hinge cover to the chassis [1].
- b Lift the display hinge cover away from the display hinge [2].
- c Repeat step a and step b to remove the other display hinge cover.

GUID-125D632B-F536-411B-B54B-0319676F1D79

Installing display hinge cover

- 1 Place the display hinge cover on the display hinge.
- 2 Tighten the screw to secure the display hinge cover to the display hinge.
- 3 Repeat step 1 and step 2 to install the other display hinge cover.
- 4 Install the:
 - a battery
 - b base cover
- 5 Follow the procedure in [After working inside your computer](#).

GUID-D0DF1B3A-887B-49C0-A3C3-0FAC4F2797F4

Display hinges

GUID-71C455F5-B437-4014-BAFF-174001F6E787

Removing display hinge

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover

- b battery
- c WWAN card (optional)
- d WLAN card
- e display hinge cover
- f display assembly
- g display bezel

- 3 To remove the display hinge:
 - a Remove the M2.5*3 screws that secure the display hinge to the display assembly [1].
 - b Lift the display hinge away from the display assembly [2].
 - c Repeat step a and step b to remove the other display hinge.

GUID-8E464428-D9B3-4CE7-A24A-B67CADBFC074

Installing display hinge

- 1 Place the display hinge on the display assembly.
- 2 Tighten the M2.5*3 screws to secure the display hinge to the display assembly.
- 3 Repeat step 1 and step 2 to install the other display hinge.
- 4 Install the:
 - a display bezel
 - b display assembly
 - c WLAN card
 - d WWAN card(optional)
 - e battery
 - f base cover

- 5 Follow the procedure in [After working inside your computer](#).

GUID-E0788C61-C654-46B3-8D36-621573FA8111

Display panel

GUID-60CBAE29-E808-43C9-AE37-85587809B992

Removing display panel

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WWAN card (optional)
 - d WLAN card
 - e display hinge cover
 - f display assembly
 - g display bezel
- 3 Remove the M2*3 screws that secure the display panel to the display assembly [1] and lift to turn over the display panel to access the eDP cable [2].

- 4 To remove the display panel:
 - a Peel the adhesive tape [1].
 - b Lift the blue tape that secures the eDP cable [2].
 - c Lift the latch and disconnect the eDP cable from the connector on the display panel [3] [4].

GUID-ADE73338-9239-443C-8916-CF6EADF44671

Installing display panel

- 1 Connect the eDP cable to the connector and affix the blue tape.
- 2 Affix the adhesive tape to secure the eDP cable.
- 3 Replace the display panel to align with the screw holders on the display assembly.
- 4 Tighten the M2*3 screws to secure the display panel to the display assembly.
- 5 Install the:
 - a display bezel
 - b display assembly
 - c WWAN card(optional)
 - d WLAN card
 - e display hinge cover
 - f battery
 - g base cover
- 6 Follow the procedure in [After working inside your computer](#).

eDP cable

Removing eDP cable

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WLAN card
 - d WWAN card (optional)
 - e display hinge cover
 - f display assembly
 - g display bezel
 - h hinge cover
 - i display panel
- 3 Disconnect the eDP cable from the camera.
- 4 Peel the eDP cable from the adhesive to remove it from the display.

GUID-D596F6F4-0206-4EF9-97B9-A748E31E9A99

Installing eDP cable

- 1 Affix the eDP cable to the display panel and connect to the camera.
- 2 Install the:
 - a display panel
 - b hinge cover
 - c display bezel
 - d display assembly
 - e display hinge cover
 - f WLAN card
 - g WWAN card(optional)
 - h battery
 - i base cover
- 3 Follow the procedure in [After working inside your computer](#).

GUID-9CEB68C0-F0D6-4234-A078-9075DAAA0CA7

Display back cover assembly

Removing the display back cover assembly

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WLAN
 - d WWAN card (optional)
 - e display hinge cover
 - f display assembly
 - g display bezel
 - h display panel
 - i eDP cable
 - j camera

The display back cover assembly is the remaining component, after removing all the components.

GUID-CDC91034-3E3F-449F-BA72-6F5F0A09F633

Installing the display back cover assembly

- 1 Place the display back cover assembly on a flat surface.
- 2 Install the:
 - a camera
 - b eDP cable
 - c display panel
 - d display bezel
 - e display assembly
 - f display hinge cover
 - g WWAN card(optional)
 - h WLAN
 - i battery
 - j base cover
- 3 Follow the procedure in [After working inside your computer](#).

Camera

GUID-BD74F948-F429-44C5-9E48-BA71BF132A15

Removing camera

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c WWAN card (optional)
 - d WLAN card
 - e display hinge cover
 - f display assembly
 - g display bezel

- h [display panel](#)
- 3 To remove the camera:
 - a Disconnect the camera cable from the connector [1].
 - b Lift the camera away from the display [2].

NOTE: The following procedure is applicable only if your computer is a non-touch computer.

GUID-27E5B5B8-7D94-445F-897F-27BC6DEE5195

Installing camera

- 1 Insert the camera into the slot on the display assembly.
- 2 Connect the camera cable to the connector.
- 3 Install the:
 - a [display panel](#)
 - b [display bezel](#)
 - c [display assembly](#)
 - d [display hinge cover](#)
 - e [WWAN card\(optional\)](#)
 - f [WLAN card](#)
 - g [battery](#)
 - h [base cover](#)
- 4 Follow the procedure in [After working inside your computer](#).

Palm rest

Removing palm rest

- 1 Follow the procedure in [Before working inside your computer](#).
- 2 Remove the:
 - a base cover
 - b battery
 - c display hinge cover
 - d WLAN card
 - e WWAN card (optional)
 - f hard drive assembly(optional)
 - g SSD card
 - h memory module
 - i coin cell battery
 - j system fan
 - k heat sink
 - l display assembly
 - m chassis frame
 - n system board
- 3 The palm rest is the remaining component after removing all the components.

Installing palmrest

- 1 Place the palm rest on a flat surface.
- 2 Install the:
 - a system board
 - b chassis frame
 - c system fan
 - d heat sink
 - e display assembly
 - f hard drive assembly(optional)
 - g coin cell battery
 - h memory module
 - i SSD card
 - j WWAN card(optional)
 - k WLAN card
 - l hard drive assembly(optional)
 - m battery
 - n base cover
- 3 Follow the procedure in [After working inside your computer](#).

Technology and components

GUID-64D336DF-93C0-40E8-92DD-BDC19B762114

Power adapter

This laptop is shipped with 7.4mm barrel plug on 65 W or 90 W power adapter.

- ⚠ WARNING:** When you disconnect the power adapter cable from the laptop, grasp the connector, not the cable itself, and then pull firmly but gently to avoid damaging the cable.
- ⚠ WARNING:** The power adapter works with electrical outlets worldwide. However, power connectors and power strips vary among countries. Using an incompatible cable or improperly connecting the cable to the power strip or electrical outlet may cause fire or equipment damage.

GUID-E0457AC6-2F91-4E6C-BDCD-631787A23A50

Processors

The Latitude 5480 laptop is shipped with the following processors:

- Intel Core i3-7100U (3M Cache, up to 2.4 GHz), Dual Core
- Intel Core i5-7200U (3M Cache, up to 3.1 GHz), Dual Core
- Intel Core i5-7300U (3M Cache, up to 3.5 GHz), vPro, Dual Core
- Intel Core i7-7600U (4M Cache, up to 3.9 GHz), vPro, Dual Core
- Intel Core i5-7300HQ (6M Cache, up to 3.5GHz), Quad Core, 35W CTPD
- Intel Core i5-7440HQ (6M Cache, up to 3.8GHz), Quad Core, 35W CTPD
- Intel Core i7-7820HQ (8M Cache up to 3.9GHz), Quad Core, 35W CTPD
- Intel Core i5-6200U (3M cache up to 2.3GHz), Dual Core
- Intel Core i5-6300U (3M cache up to 2.4GHz), vPro, Dual Core
- Intel Core i7-6600U (4M cache up to 2.6GHz), vPro, Dual Core
- Intel Core i5-6440HQ (6M cache up to 2.6GHz), vPro, Quad Core

ⓘ NOTE: The clock speed and performance varies depending on the workload and other variables.

GUID-0C65CB59-FEE1-4CF7-B418-1AF7C7136FD6

Skylake processor

Intel Skylake is the successor to the Intel® Broadwell processor. It is a microarchitecture redesign using an already existing process technology and it will be branded as Intel 6th Gen Core. Like Broadwell, Skylake is available in four variants with suffixes SKL-Y, SKL-H, and SKL-U.

The Skylake also includes Core i7, i5, i3, Pentium and Celeron processors.

Processor performance features

The following table illustrates the performance available on each Skylake suffix.

Table 2. Skylake specifications

Processor number	Cache	No. of cores/No. of threads	Power	Memory type	Graphics
Intel Core i5-6200U (Dual Core, 2.3GHz, 15W)	3 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620
Intel Core i5-6300U (Dual Core, 2.4GHz, 15W)-vPro	3 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620
Intel Core i7-6600U (Dual Core, 2.6GHz, 15W)-vPro	4 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620
Intel Core i5-6440HQ (Quad Core, 2.6GHz, cTDP 35W) - vPro	6 MB	4/4	35 W	DDR4-2133	Intel HD graphics 630

GUID-6F1AEE6A-6E9B-4D1F-BE74-CCD0AE4DC3AE

Kaby Lake — 7th Generation Intel Core processors

The 7th Gen Intel Core processor (Kaby Lake) family is the successor of 6th generation processors (Sky Lake). It's main features include:

- Intel 14nm Manufacturing Process Technology
- Intel Turbo Boost Technology
- Intel Hyper Threading Technology
- Intel Built-in Visuals
 - Intel HD graphics - exceptional videos, editing smallest details in the videos
 - Intel Quick Sync Video - excellent video conferencing capability, quick video editing and authoring
 - Intel Clear Video HD - visual quality and color fidelity enhancements for HD playback and immersing web browsing
- Integrated memory controller
- Optional Intel vPro technology (on i5/i7) with Active Management Technology 11.6
- Intel Rapid Storage Technology

Table 3. Kaby lake specifications

Processor number	Clock Speed	Cache	No. of cores/No. of threads	Power	Memory type	Graphics
Intel Core i3-7100U (3M Cache, up to 2.4 GHz), Dual Core	2.4 GHz	3 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620
Intel Core i5-7200U (3M Cache, up to 3.1 GHz), Dual Core	2.5 GHz	3 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620
Intel Core i5-7300U (3M Cache, up to 3.5 GHz),vPro, Dual Core	2.6 GHz	3 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620

Processor number	Clock Speed	Cache	No. of cores/No. of threads	Power	Memory type	Graphics
Intel Core i7-7600U (4M Cache, up to 3.9 GHz), vPro, Dual Core	2.8 GHz	4 MB	2/4	15 W	DDR4-2133	Intel HD graphics 620
Intel Core i5-7300HQ (6M Cache, up to 3.5GHz), Quad Core, 35W CTDP	2.5 GHz	6 MB	4/4	35 W	DDR4-2133; DDR4-2400	Intel HD Graphics 630
Intel Core i5-7440HQ (6M Cache, up to 3.8GHz), Quad Core, 35W CTDP	2.8 GHz	6 MB	4/4	35 W	DDR4-2133; DDR4-2400	Intel HD Graphics 630
Intel Core i7-7820HQ (8M Cache up to 3.9GHz), Quad Core, 35W CTDP	2.9 GHz	8 MB	4/4	35 W	DDR4-2133; DDR4-2400	Intel HD Graphics 630

GUID-EFCD968F-D830-401A-8F24-22202830598C

Identifying processors in Windows 10

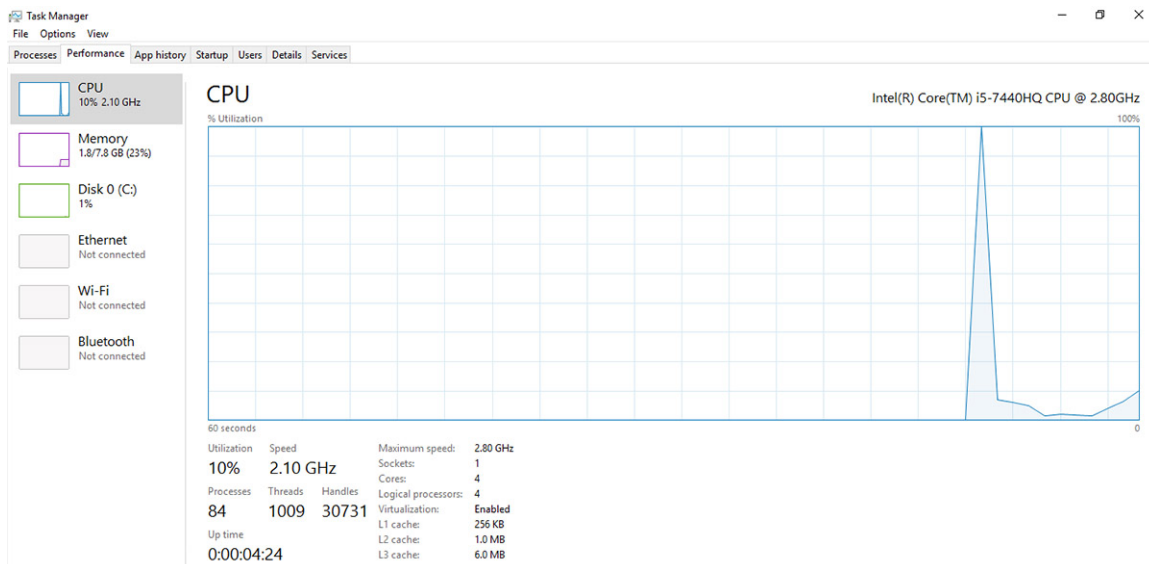

- 1 Tap **Search the Web and Windows**.
- 2 Type **Device Manager**.
- 3 Tap **Processor**.

GUID-E32431F6-39F9-4D1F-A700-FEF62874C357

Verifying the processor usage in Task Manager

- 1 Right Click on the Taskbar.
- 2 Select **Start Task Manager**.
The **Windows Task Manager** window is displayed.
- 3 Click the **Performance** tab in the **Windows Task Manager** window.
The processor performance details are displayed.

Verifying the processor usage in Resource Monitor

- 1 Right Click on the Taskbar.
- 2 Select **Start Task Manager**.
The **Windows Task Manager** window is displayed.
- 3 Click the **Performance** tab in the **Windows Task Manager** window.
The processor performance details are displayed.
- 4 Click **Open Resource Monitor**.

Chipsets

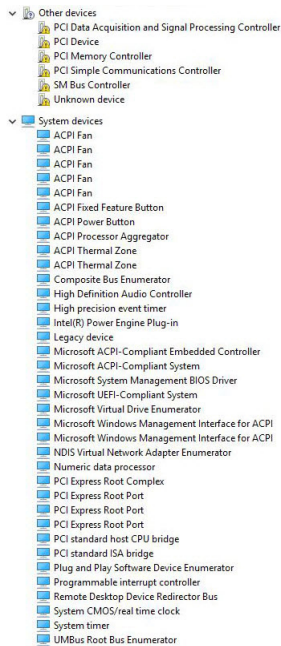

All laptops or notebook communicate with the CPU through the chipset. This laptop is shipped with the Intel Mobile CM238 .

Intel chipset drivers

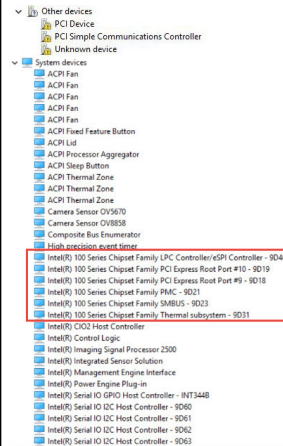

Verify if the Intel chipset drivers are already installed in the laptop.

Table 4. Intel chipset drivers

Before installation

After installation

GUID-DDD9092E-BE45-4BAE-B1B4-ED6809937DCD

Downloading the chipset driver

- 1 Turn on the laptop.
- 2 Go to **Dell.com/support**.
- 3 Click **Product Support**, enter the Service Tag of your laptop, and then click **Submit**.
NOTE: If you do not have the Service Tag, use the autodetect feature or manually browse for your laptop model.
- 4 Click **Drivers and Downloads**.
- 5 Select the operating system installed on your laptop.
- 6 Scroll down the page, expand **Chipset**, and select your chipset driver.
- 7 Click **Download File** to download the latest version of the chipset driver for your laptop.
- 8 After the download is complete, navigate to the folder where you saved the driver file.
- 9 Double-click the chipset driver file icon and follow the instructions on the screen.

GUID-06B68D39-9144-4FDE-A7CA-7C7B4A0C7915

Identifying the chipset in Device Manager on Windows 10

- 1 Right click the **Start Menu**.
- 2 Select **Device Manager**.
- 3 Expand **System Devices** and search for the chipset.

GUID-428475AE-E36D-4262-995F-3236FBB2595A

Graphic options

This laptop is shipped with the following graphics chipset options:

- Intel HD Graphics 620
- Intel HD Graphics 630
- NVIDIA GeForce 930MX 64 Bit
- NVIDIA GeForce 940MX 64 Bit

GUID-C82029B1-5DE9-46B0-A5CB-B175AD80A70E

Intel HD Graphics drivers

Verify if the Intel HD Graphics drivers are already installed in the laptop.

Table 5. Intel HD Graphics drivers

GUID-6E8E3CB8-E173-461A-875F-90DF0C9EE742

Downloading drivers

- 1 Turn on the tablet.
- 2 Go to **Dell.com/support**.

- 3 Click **Product Support**, enter the Service Tag of your tablet, and then click **Submit**.

 **NOTE: If you do not have the Service Tag, use the auto detect feature or manually browse for your tablet model.**

- 4 Click **Drivers and Downloads**.
- 5 Select the operating system installed on your tablet.
- 6 Scroll down the page and select the driver to install.
- 7 Click **Download File** to download the driver for your tablet.
- 8 After the download is complete, navigate to the folder where you saved the driver file.
- 9 Double-click the driver file icon and follow the instructions on the screen.

GUID-F4ECF473-3CFE-4353-8B03-7423E563377E

Display options

This laptop has the following display options:

- 14.0-inch HD Anti-glare (1366 x 768)
- 14.0-inch FHD Anti-glare (1920 x 1080)
- 14.0-inch FHD Touch (1920 x 1080)

GUID-6D580E34-A5F4-440D-AE6C-21A62D1735D4

Identifying the display adapter

- 1 Right Click the Start menu.
- 2 Select Device Manager.
- 3 Expand **Display adapters**.

The display adapters are displayed.

GUID-5E881A35-C183-4113-BDD8-7DADD96510FC

Changing the screen resolution

- 1 Right click on the desktop and select **Display Settings**.
- 2 Tap or click **Display settings**.
The Setting window is displayed.
- 3 Scroll down and select **Advanced Display Settings**.
The Advanced Display Setting is displayed.
- 4 Select the required resolution from the drop-down list and tap **Apply**.

GUID-5684E889-49F1-4404-AE03-62C2C7FB58F7

Rotating the display

- 1 Right click on the desktop.
A sub menu is displayed.
- 2 Select **Graphic Options** > **Rotation** and choose on of the following:
 - Rotate to Normal
 - Rotate to 90 Degrees
 - Rotate to 180 Degrees
 - Rotate to 270 Degrees

NOTE: The Display can also be rotated using the following key combinations:

- Ctrl + Alt + Up arrow key (Rotate to normal)
- Right arrow key (Rotate 90 degrees)
- Down arrow key (Rotate 180 degrees)
- Left arrow key (Rotate 270 degrees)

GUID-CC593559-34AE-4428-87C1-FE37520CEFB4

Adjusting brightness in Windows 10

To enable or disable automatic screen brightness adjustment:

- 1 Swipe-in from the right edge of the display to access the Action Center.
- 2 Tap or click **All Settings**  > **System** > **Display**.
- 3 Use the **Adjust my screen brightness automatically** slider to enable or disable automatic-brightness adjustment.

NOTE: You can also use the Brightness level slider to adjust the brightness manually.

Cleaning the display

- 1 Check for any smudges or areas that has to be cleaned.
- 2 Use a microfiber cloth to remove any obvious dust and gently brush off any dirt particles.
- 3 Proper cleaning kits should be used to clean and keep your display in a crisp clear pristine condition.

NOTE: Never spray any cleaning solutions directly on the screen; spray it to the cleaning cloth.

- 4 Gently wipe the screen in a circular motion. Do not press hard on the cloth.

NOTE: Do not press hard or touch the screen with your fingers or you may leave oily prints and smears.

NOTE: Do not leave any liquid on the screen.

- 5 Remove all excess moisture as it may damage your screen.
- 6 Let the display dry thoroughly before you turn it on.
- 7 For stains that are hard to remove, repeat this procedure till the display is clean.

Using touch screen in Windows 10

Follow these steps to enable or disable the touch screen:

- 1 Right click on the Start menu.
- 2 Select **Control Panel**.
- 3 Tap **Pen and Input Devices** in the **Control Panel**.
- 4 Tap the **Touch** tab.
- 5 Select **Use your finger as an input device** to enable the touch screen. Clear the box to disable the touch screen.

Connecting to external display devices

Follow these steps to connect your laptop to an external display device:

- 1 Ensure that the external display device is turned on and plug the external display device cable into a video port on your laptop.
- 2 Press the Windows logo+P key.
- 3 Select one of the following modes:
 - PC screen only
 - Duplicate
 - Extend
 - Second Screen only

NOTE: For more information, see the document that shipped with your display device.

GUID-4D9244D1-DA54-474D-A809-BFBA2666AE36

Realtek ALC3246 Waves MaxxAudio Pro controller

This laptop is shipped with integrated Realtek ALC3246-CG Waves MaxxAudio Pro controller. It is a High Definition audio codec designed for Windows desktop and laptops.

GUID-87361D35-D5A5-4952-AFA3-C8E9C5D00354

Downloading the audio driver

- 1 Turn on the laptop.
- 2 Go to www.Dell.com/support.
- 3 Click **Product Support**, enter the Service Tag of your laptop and click **Submit**.
i | **NOTE: If you do not have the Service Tag, use the autodetect feature or manually browse for your laptop model.**
- 4 Click **Drivers and Downloads**.
- 5 Select the operating system installed on your laptop.
- 6 Scroll down the page and expand **Audio**.
- 7 Select the audio driver.
- 8 Click **Download File** to download the latest version of the audio driver for your laptop.
- 9 After the download is complete, navigate to the folder where you saved the audio driver file.
- 10 Double-click the audio driver file icon and follow the instructions on the screen.

GUID-B1CB8E86-CF54-4B95-B2ED-138672C8F3FE

Identifying the audio controller in Windows 10

- 1 Swipe from the right edge to access the **Action center** and select **All Settings** .
- 2 Type **Device Manager** in the search box and select **Device Manager** from the left pane.
- 3 Expand **Sound, video and game controllers**.
The audio controller is displayed.

Table 6. Identifying the audio controller in Windows 10

Before installation

After installation

GUID-A9FE3EC0-9C55-4A35-B7CD-46F10BC4D3EE

Changing the audio settings

- 1 Tap or touch the **Search the web and Windows** and type **Dell Audio**.
- 2 Start the Dell Audio utility from the left pane.

WLAN cards

This laptop supports the following options:

- Qualcomm QCA61x4A
- QCA 2x2 AC with Bluetooth (non vPro)
- Intel 8265 without Bluetooth
- 2x2 AC without Bluetooth (vPro capable)-FED
- Intel 8265
- 2x2 AC with Bluetooth (vPro capable)

NOTE: Qualcomm xxxxxx (for example: QCA61x4A) is a product of Qualcomm Technologies, Inc

Secure Boot screen options

Option	Description
Secure Boot Enable	<p>This option enables or disables the Secure Boot feature.</p> <ul style="list-style-type: none"> • Disabled • Enabled <p>Default setting: Enabled.</p>

The options are:</p> <ul style="list-style-type: none"> • Save to File—Saves the key to a user-selected file • Replace from File—Replaces the current key with a key from a user-selected file • Append from File—Adds a key to the current database from a user-selected file • Delete—Deletes the selected key • Reset All Keys—Resets to default setting • Delete All Keys—Deletes all the keys <p>NOTE: If you disable the Custom Mode, all the changes made will be erased and the keys will restore to default settings.</p>

GUID-D6AEB812-9962-40E9-BCC1-7396857077F1

Hard drive options

This laptop supports HDD, M.2 SATA SSD, and M.2 PCIe NVMe.

GUID-B85F720D-DA0F-4DC7-9CDB-138ADA248A5A

Identifying the hard drive in Windows 10

- 1 Right click on Start menu
- 2 Select **Device Manager** , and expand **Disk drives**.

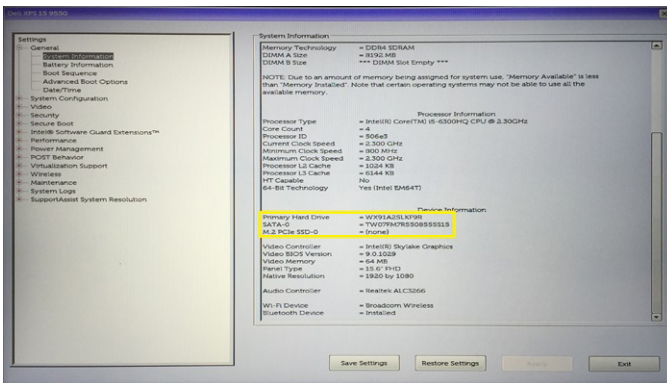

The hard drive is listed under **Disk drives**.

GUID-8EDF4132-07F1-438E-A080-D48FE8DF49ED

Identifying the hard drive in the BIOS

- 1 Turn on or restart your system.
- 2 When the Dell logo appears, perform the following action to enter the BIOS setup program:
 - With keyboard — Tap F2 until the Entering BIOS setup message appears. To enter the Boot selection menu, tap F12.

The hard drive is listed under the **System Information** under the **General** group.

GUID-DA1C05F6-9DF5-434A-B510-A13DD61EB45A

Camera features

This laptop is shipped with front-facing camera with the image resolution of 1280 x 720 (maximum).

- ① **NOTE: The camera is at the top center of the display.**
- ① **NOTE: The laptop is also shipped with no camera option.**

GUID-A6216D5F-80BB-462D-965F-F3C279A3F0E5

Identifying the camera in Device Manager on Windows 10

- 1 In the **Search** box, type `device manager`, and tap to start it.
- 2 Under **Device Manager**, expand **Imaging devices**.

GUID-82B1299E-E938-4DD5-9262-1B1E8876E1FD

Starting the camera (Windows 7, 8.1 and 10)

To start the camera, open an application that uses the camera. For instance, if you tap the Skype software that is shipped with the laptop, the camera turns on. Similarly, if you are chatting on the internet and the application requests to access the webcam, the webcam turns on.

GUID-23DAFF4B-30FA-4A9B-B980-5D9BE8F25640

Starting the camera application

- 1 Tap or click the **Windows** button and select **All apps**.

- 2 Select **Camera** from the apps list.

- 3 If the **Camera** App is not available in the apps list, search for it.

GUID-0E282B32-C647-4102-B8F7-385730F1E726

Memory features

This laptop supports a minimum memory of :

- 4 GB and a maximum of 32 GB DDR4 memory, up to 2133 MHz (dual core).
- 4 GB and a maximum of 32 GB DDR4 memory, up to 2400 MHz (quad core).

① | **NOTE:** The memory module in the Dual Core processor will have 2400 MHz printed, but it performs at 2133 MHz.

GUID-EEBA8261-DD1A-4F4E-8965-BE41B24BB59A

Verifying system memory in Windows 10

- 1 Click on the start menu and select **Settings**  > **System**.
- 2 Under **System**, tap **About**.

GUID-96E68E2C-DFCB-4164-8960-B6B2700268C1

Verifying system memory in system setup (BIOS)

- 1 Turn on or restart your system.
- 2 Perform the following actions after the Dell logo is displayed
 - With keyboard — Tap F2 until the Entering BIOS setup message appears. To enter the Boot selection menu, tap F12.
- 3 On the left pane, select **Settings > General > System Information**.
The memory information is displayed on the right pane.

GUID-3A8FC419-3D4B-46CA-BBFD-0DE4A33B89A0

Testing memory using ePSA

- 1 Turn on or restart your computer.
- 2 Press F12 or press Fn+PWR to invoke the ePSA diagnostics.
The PreBoot System Assessment (PSA) starts on your computer.

 **NOTE: If you wait too long and the operating system logo appears, continue to wait until you see the login screen/desktop screen. Turn off the computer and try again.**

If the memory test results in 25 or less errors, then the RMT basic feature automatically fixes the issues. The test will indicate a pass result since the defect(s) have been removed. If the memory test results in 26 - 50 errors, the RMT basic feature masks the defective memory blocks and results in pass with no memory replacement requirement. If the memory test results in more than 50 errors, then the test is stalled and the result indicates that memory module replacement is required.

GUID-93AA4CB1-4E74-4917-8D6D-1D832F353233

Realtek HD audio drivers

Verify if the Realtek audio drivers are already installed in the laptop.

Table 7. Realtek HD audio drivers

Thunderbolt over Type-C

Thunderbolt is a hardware interface that combines data, video, audio, and power in a single connection. Thunderbolt combines PCI Express (PCIe) and DisplayPort (DP) into one serial signal, and additionally provides DC power, all in one cable. Thunderbolt 1 and Thunderbolt 2 use the same connector as miniDP (DisplayPort) to connect to peripherals, while Thunderbolt 3 uses a USB Type-C connector.

Figure 6. Thunderbolt 1 and Thunderbolt 3

- 1 Thunderbolt 1 and Thunderbolt 2 (using a miniDP connector)
- 2 Thunderbolt 3 (using a USB Type-C connector)

Thunderbolt 3 over Type-C

Thunderbolt 3 brings Thunderbolt to USB Type-C at speeds up to 40 Gbps, creating one compact port that does it all - delivering the fastest, most versatile connection to any dock, display or data device like an external hard drive. Thunderbolt 3 uses a USB Type-C connector/port to connect to supported peripherals.

- 1 Thunderbolt 3 uses USB Type-C connector and cables - It is compact and reversible
- 2 Thunderbolt 3 supports speed up to 40 Gbps
- 3 DisplayPort 1.2 – compatible with existing DisplayPort monitors, devices and cables
- 4 USB Power Delivery - Up to 130W on supported computers

Key Features of Thunderbolt 3 over USB Type-C

- 1 Thunderbolt, USB, DisplayPort and power on USB Type-C on a single cable (features vary between different products)
- 2 USB Type-C connector and cables which are compact and reversible
- 3 Supports Thunderbolt Networking (*varies between different products)
- 4 Supports up to 4K displays
- 5 Up to 40 Gbps

NOTE: Data transfer speed may vary between different devices.

Thunderbolt Icons

Protocol	USB Type-A	USB Type-C	Notes
Thunderbolt	Not Applicable		Will use industry standard icon regardless of port style (i.e., mDP or USB Type-C)
Thunderbolt w/ Power Delivery	Not Applicable		Up to 130 Watts via USB Type-C

Figure 7. Thunderbolt Iconography Variations

System setup options

NOTE: Depending on the computer and its installed devices, the items listed in this section may or may not appear.

Topics:

GUID-39EA0288-9174-49B6-ABA2-37C542A11FC5

Boot Sequence

Boot Sequence allows you to bypass the System Setup–defined boot device order and boot directly to a specific device (for example: optical drive or hard drive). During the Power-on Self Test (POST), when the Dell logo appears, you can:

- Access System Setup by pressing F2 key
- Bring up the one-time boot menu by pressing F12 key

The one-time boot menu displays the devices that you can boot from including the diagnostic option. The boot menu options are:

- Removable Drive (if available)
- STXXXX Drive

NOTE: XXX denotes the SATA drive number.

- Optical Drive (if available)

- SATA Hard Drive (if available)
- Diagnostics

NOTE: Choosing Diagnostics, will display the ePSA diagnostics screen.

The boot sequence screen also displays the option to access the System Setup screen.

GUID-7A7EE30A-4A48-422B-AE30-B8DC236A1790

Navigation keys

NOTE: For most of the System Setup options, changes that you make are recorded but do not take effect until you restart the system.

Keys	Navigation
Up arrow	Moves to the previous field.
Down arrow	Moves to the next field.
Enter	Selects a value in the selected field (if applicable) or follow the link in the field.
Spacebar	Expands or collapses a drop-down list, if applicable.
Tab	Moves to the next focus area.

NOTE: For the standard graphics browser only.

Esc Moves to the previous page until you view the main screen. Pressing Esc in the main screen displays a message that prompts you to save any unsaved changes and restarts the system.

GUID-DB925BAE-A35B-445D-A065-7FDEFA32EA1F

System Setup overview

System Setup allows you to:

- Change the system configuration information after you add, change, or remove any hardware in your computer.
- Set or change a user-selectable option such as the user password.
- Read the current amount of memory or set the type of hard drive installed.

Before you use System Setup, it is recommended that you write down the System Setup screen information for future reference.

CAUTION: Unless you are an expert computer user, do not change the settings for this program. Certain changes can cause your computer to work incorrectly.

GUID-FC869170-7119-4ACE-9C13-5AC2D08EBACA

Accessing System Setup

- 1 Turn on (or restart) your computer.
- 2 After the white Dell logo appears, press F2 immediately.
The System Setup page is displayed.

NOTE: If you wait too long and the operating system logo appears, wait until you see the desktop. Then, shut down or restart your computer and try again.

NOTE: After the Dell logo appears, you can also press F12 and then select BIOS setup.

General screen options

This section lists the primary hardware features of your computer.

Option	Description
System Information	<p>This section lists the primary hardware features of your computer.</p> <ul style="list-style-type: none"> System Information: Displays BIOS Version, Service Tag, Asset Tag, Ownership Tag, Ownership Date, Manufacture Date, and the Express Service Code. Updating the BIOS in Windows

It is recommended to update your BIOS (System Setup), when you replace the system board or if an update is available. For laptops, ensure that your computer battery is fully charged and connected to a power outlet

NOTE: If BitLocker is enabled, it must be suspended prior to updating the system BIOS, and then re-enabled after the BIOS update is completed.

- Restart the computer.
- Go to **Dell.com/support**.
 - Enter the **Service Tag** or **Express Service Code** and click **Submit**.
 - Click **Detect Product** and follow the instructions on screen.
- If you are unable to detect or find the Service Tag, click **Choose from all products**.
- Choose the **Products** category from the list.

NOTE: Choose the appropriate category to reach the product page

- Select your computer model and the **Product Support** page of your computer appears.
- Click **Get drivers** and click **Drivers and Downloads**.
The Drivers and Downloads section opens.
- Click **Find it myself**.
- Click **BIOS** to view the BIOS versions.

- 9 Identify the latest BIOS file and click **Download**.
- 10 Select your preferred download method in the **Please select your download method below** window, click **Download File**.
The **File Download** window appears.
- 11 Click **Save** to save the file on your computer.
- 12 Click **Run** to install the updated BIOS settings on your computer.
Follow the instructions on the screen.

NOTE: It is recommended not to update the BIOS version for more than three revisions. For example: If you want to update the BIOS from 1.0 to 7.0, then install version 4.0 first and then install version 7.0.

GUID-08844976-AE7C-4757-B3AD-E54CA0CCAA20

Updating your system BIOS using a USB flash drive

If the system cannot load into Windows but there is still a need to update the BIOS, download the BIOS file using another system and save it to a bootable USB Flash Drive.

NOTE: You will need to use a bootable USB Flash drive. Please refer to the following article for further details: <http://www.dell.com/support/article/us/en/19/SLN143196/how-to-create-a-bootable-usb-flash-drive-using-dell-diagnostic-deployment-package--dddp-?lang=EN>

- 1 Download the BIOS update .EXE file to another system.
- 2 Copy the file e.g. O9010A12.EXE onto the bootable USB Flash drive.
- 3 Insert the USB Flash drive into the system that requires the BIOS update.
- 4 Restart the system and press F12 when the Dell Splash logo appears to display the One Time Boot Menu.
- 5 Using arrow keys, select **USB Storage Device** and click Return.
- 6 The system will boot to a Diag C:\> prompt.
- 7 Run the file by typing the full filename e.g. O9010A12.exe and press Return.
- 8 The BIOS Update Utility will load, follow the instructions on screen.

Figure 8. DOS BIOS Update Screen

GUID-859887F0-B1B4-4630-855E-100D4FDE930A

System and setup password

You can create a system password and a setup password to secure your computer.

Password type	Description
System password	Password that you must enter to log on to your system.
Setup password	Password that you must enter to access and make changes to the BIOS settings of your computer.

CAUTION: The password features provide a basic level of security for the data on your computer.

CAUTION: Anyone can access the data stored on your computer if it is not locked and left unattended.

NOTE: System and setup password feature is disabled.

GUID-D91DBF33-F0AB-477E-A22D-D6CD2D066BBE

Assigning a system password and setup password

You can assign a new **System Password** only when the status is in **Not Set**.

To enter the system setup, press F2 immediately after a power-on or re-boot.

- In the **System BIOS** or **System Setup** screen, select **Security** and press Enter.
The **Security** screen is displayed.
- Select **System Password** and create a password in the **Enter the new password** field.
Use the following guidelines to assign the system password:
 - A password can have up to 32 characters.
 - The password can contain the numbers 0 through 9.
 - Only lower case letters are valid, upper case letters are not allowed.
 - Only the following special characters are allowed: space, ("), (+), (,), (-), (.), (/), (:), ([), (\), (]), (`).
- Type the system password that you entered earlier in the **Confirm new password** field and click **OK**.
- Press Esc and a message prompts you to save the changes.
- Press Y to save the changes.
The computer reboots.

GUID-3D32F643-EE78-4538-9D89-348DFB68E9F1

Deleting or changing an existing system and or setup password

Ensure that the **Password Status** is Unlocked (in the System Setup) before attempting to delete or change the existing System and/or Setup password. You cannot delete or change an existing System or Setup password, if the **Password Status** is Locked.

To enter the System Setup, press F2 immediately after a power-on or reboot.

- In the **System BIOS** or **System Setup** screen, select **System Security** and press Enter.
The **System Security** screen is displayed.
 - In the **System Security** screen, verify that **Password Status** is **Unlocked**.
 - Select **System Password**, alter or delete the existing system password and press Enter or Tab.
 - Select **Setup Password**, alter or delete the existing setup password and press Enter or Tab.
- NOTE:** If you change the System and/or Setup password, re-enter the new password when promoted. If you delete the System and/or Setup password, confirm the deletion when promoted.
- Press Esc and a message prompts you to save the changes.
 - Press Y to save the changes and exit from System Setup.
The computer reboots.

Technical specifications

NOTE: Offerings may vary by region. For more information regarding the configuration of your computer in:

- Windows 10, click or tap **Start**  > **Settings** > **System** > **About**.
- Windows 8.1 and Windows 8, from the charms sidebar, click or tap **Settings** > **Change PC settings**. In the **PC Settings** window, select **PC and devices** > **PC Info**.
- Windows 7, click **Start** , right-click **My Computer**, and then select **Properties**.

Feature	Specification	
Type	65 W and 90 W	
Input voltage	100 V AC to 240 V AC	
Input current (maximum)	65 W	1.7 A
	90 W	1.6 A
Adapter size	7.4mm	
Input frequency	50 Hz to 60 Hz	
Output current	65 W	3.34 A
	90 W	4.62 A

Feature	Specification
Rated output voltage	19.5 V DC
Temperature range (Operating)	0°C to 40°C (32°F to 104°F)
Temperature range (Non-Operating)	-40°C to 70°C (-40°F to 158°F)

GUID-114D1960-85FF-440D-8CC4-40F8B91D0ACB

Physical specifications

Feature	Specification
Front height	22.45 mm (0.90 inch)
Back height	22.45 mm (0.90 inch)
Width	333.4 mm (13.1 inches)
Depth	228.9 mm (9.0 inches)
Starting weight	3.52 lb (1.60 Kg)

GUID-235A25EF-9CC0-4E3F-8DED-0EE421BFCA5D

Environmental specifications

Temperature	Specifications
Operating	0°C to 35°C (32°F to 95°F)
Storage	-40°C to 65°C (-40°F to 149°F)

Relative humidity (maximum)	Specifications
Operating	10 % to 90 % (non condensing)
Storage	5 % to 95 % (non condensing)

Altitude (maximum)	Specifications
Operating	0 m to 3048 m (0 ft to 10,000 ft)
Non-operating	0 m to 10,668 m (0 ft to 35,000 ft)

Airborne contaminant level	G1 as defined by ISA-71.04-1985

การวินิจฉัยระบบ

หากคุณประสบปัญหาเกี่ยวกับเครื่องคอมพิวเตอร์ให้เรียกใช้การวินิจฉัย ePSA ก่อนติดต่อ Dell เพื่อขอความช่วยเหลือด้านเทคนิค วัตถุประสงค์ของการดำเนินการการวินิจฉัยคือการทดสอบฮาร์ดแวร์ของคอมพิวเตอร์ของคุณ โดยไม่ต้องใช้อุปกรณ์เพิ่มเติมหรือเชื่อมต่อการที่ข้อมูลจะสูญหาย หากคุณไม่สามารถแก้ไขปัญหาได้ด้วยตัวเองบุคลากร ฝ่ายบริการและฝ่ายสนับสนุนสามารถใช้ผลการวินิจฉัยเพื่อช่วยคุณแก้ปัญหาได้

หัวข้อ :

- Enhanced Pre-Boot System Assessment (ePSA) diagnostics
- Device status lights
- Battery status lights

Enhanced Pre-Boot System Assessment (ePSA) diagnostics

The ePSA diagnostics (also known as system diagnostics) performs a complete check of your hardware. The ePSA is embedded with the BIOS and is launched by the BIOS internally. The embedded system diagnostics provides a set of options for particular devices or device groups allowing you to:

- Run tests automatically or in an interactive mode
- Repeat tests
- Display or save test results
- Run thorough tests to introduce additional test options to provide extra information about the failed device(s)
- View status messages that inform you if tests are completed successfully
- View error messages that inform you of problems encountered during testing

⚠ CAUTION: Use the system diagnostics to test only your computer. Using this program with other computers may cause invalid results or error messages.

ℹ NOTE: Some tests for specific devices require user interaction. Always ensure that you are present at the computer terminal when the diagnostic tests are performed.

You can launch the ePSA diagnostics in two ways:

- 1 Power-on the computer.
- 2 As the computer boots, press the F12 key as the Dell logo appears.
- 3 On the boot menu screen, select the **Diagnostics** option.
The **Enhanced Pre-boot System Assessment** window displays, listing all devices detected in the computer. The diagnostics starts running the tests on all the detected devices.
- 4 If you wish to run a diagnostic test on a specific device, press Esc and click **Yes** to stop the diagnostic test.
- 5 Select the device from the left pane and click **Run Tests**
- 6 If there are any issues, error codes are displayed.
Note the error code and contact Dell.

OR

- 1 Shutdown the computer.
- 2 Press and hold the fn key, while pressing the power button, and then release both.
The **Enhanced Pre-boot System Assessment** window displays, listing all devices detected in the computer. The diagnostics starts running the tests on all the detected devices.
- 3 On the boot menu screen, select the **Diagnostics** option.
The **Enhanced Pre-boot System Assessment** window displays, listing all devices detected in the computer. The diagnostics starts running the tests on all the detected devices.
- 4 If you wish to run a diagnostic test on a specific device, press Esc and click **Yes** to stop the diagnostic test.
- 5 Select the device from the left pane and click **Run Tests**
- 6 If there are any issues, error codes are displayed.
Note the error code and contact Dell.

GUID-28D538A4-D81F-492F-A464-D6D4C8643E7A

Device status lights

Table 8. Device status lights

Icon	Name	Description
	Power status light	Turns on when you turn on the computer and blinks when the computer is in a power management mode.
	Battery charge indicator	Turns on steadily or blinks to indicate battery charge status.

The device status LEDs are usually located either on the top or left side of the keyboard. They display the storage, battery and wireless devices connectivity and activity. Apart from that they can be useful as a diagnostic tool when there's a possible failure to the system.

NOTE: The position of the power status light may vary depending on the system.

The following table lists how to read the LED codes when possible errors occur.

Table 9. Battery charge LED indicator

Amber blinking pattern	Problem description	Suggested resolution
2,1	CPU	CPU failure
2,2	System board: BIOS ROM	System board, covers BIOS corruption or ROM error
2,3	Memory	No memory/RAM detected
2,4	Memory	Memory/RAM failure
2,5	Memory	Invalid memory installed
2,6	System board: Chipset	System board/Chipset error
2,7	LCD	Replace the system board
3,1	RTC Power Failure	CMOS battery failure
3,2	PCI/Video	PCI or video card/chip failure
3,3	BIOS Recovery 1	Recovery image not found
3,4	BIOS Recovery 2	Recovery image found but invalid

The blinking patterns will consist of 2 set of numbers being represented by (First Group: Amber blinks, Second Group: White blinks)

NOTE:

- 1 First Group: The LED blinks 1 to 9 times followed by a brief pause with LED off at the interval of 1.5 seconds.(This is in Amber color)
- 2 Second Group: The LED blinks 1 to 9 times, that would be then followed by a longer pause before the next cycle starts again at the interval of 1.5 seconds.(This is in White color)

For Example: No Memory detected (2,3), Battery LED blinks two times of amber color followed by a pause, and then blinks three times of white color. The Battery LED will pause for 3 seconds before the next cycle repeat itself again.

GUID-B7187258-116A-4CF7-8B00-704729AA7883

Battery status lights

If the computer is connected to an electrical outlet, the battery light operates as follows:

Alternately blinking amber light and white light	An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop.
Alternately blinking amber light with steady white light	Temporary battery failure with AC adapter present.
Constantly blinking amber light	Fatal battery failure with AC adapter present.
Light off	Battery in full charge mode with AC adapter present.
White light on	Battery in charge mode with AC adapter present.

Troubleshooting

Dell Enhanced Pre-Boot System Assessment — ePSA diagnostic 3.0

You can invoke the ePSA diagnostics by performing either of the following steps:

- Press the F12 key when the system boots and choosing **Diagnostics** option.
- Press Fn+PWR when the system boots.

For more details, see [Dell EPSA Diagnostic 3.0](#).

GUID-5FC0D943-B848-4BDC-9A28-78A5E88FDA45

Running the ePSA diagnostics

- 1 Power-on the computer.
- 2 As the computer boots, press the F12 key as the Dell logo appears.
- 3 On the boot menu screen, select the **Diagnostics** option.
- 4 Click the arrow key at the bottom left corner.
Diagnostics front page is displayed.
- 5 Press the arrow in the lower-right corner to go to the page listing.
The items detected are listed.
- 6 To run a diagnostic test on a specific device, press Esc and click **Yes** to stop the diagnostic test.
- 7 Select the device from the left pane and click **Run Tests**.
- 8 If there are any issues, error codes are displayed.
Note the error code and validation number and contact Dell.

Real Time Clock (RTC) reset

The Real Time Clock (RTC) reset function allows you or the service technician to recover the recently launched model Dell Latitude and Precision systems from select **No POST/No Boot/No Power** situations. You can initiate the RTC reset on the system from a power off state only if it is connected to AC power. Press and hold the power button for 25 seconds. The system RTC reset occurs after you release the power button.

NOTE: If AC power is disconnected from the system during the process or the power button is held longer than 40 seconds, the RTC reset process is aborted.

The RTC reset will reset the BIOS to Defaults, un-provision Intel vPro and reset the system date and time. The following items are unaffected by the RTC reset:

- Service Tag
- Asset Tag
- Ownership Tag
- Admin Password
- System Password
- HDD Password
- Key Databases
- System Logs

The following items may or may not reset based on your custom BIOS setting selections:

- The Boot List
- Enable Legacy OROMs
- Secure Boot Enable
- Allow BIOS Downgrade

Contacting Dell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

- 1 Go to **Dell.com/support**.
- 2 Select your support category.
- 3 Verify your country or region in the **Choose a Country/Region** drop-down list at the bottom of the page.
- 4 Select the appropriate service or support link based on your need.
